Relating to Rock Art in the Contemporary World Liam M. Brady,Paul S.C. Taçon.2016-12-01 Rock art has long been considered an archaeological artifact reflecting activities from the past, yet it is also a phenomenon with present-day meaning and relevance to both indigenous and non-indigenous communities. Relating to Rock Art in the Contemporary World challenges traditional ways of thinking about this highly recognizable form of visual heritage and provides insight into its contemporary significance. One of the most visually striking forms of material culture embedded in landscapes, rock art is ascribed different meanings by diverse groups of people including indigenous peoples, governments, tourism offices, and the general public, all of whom relate to images and sites in unique ways. In this volume, leading scholars from around the globe shift the discourse from a primarily archaeological basis to one that examines the myriad ways that symbolism, meaning, and significance in rock art are being renegotiated in various geographical and cultural settings, from Australia to the British Isles. They also consider how people manage the complex meanings, emotions, and cultural and political practices tied to rock art sites and how these factors impact processes relating to identity construction and reaffirmation today. Richly illustrated and geographically diverse, Relating to Rock Art in the Contemporary World connects archaeology, anthropology, and heritage studies. The book will appeal to students and scholars of archaeology, anthropology, heritage, heritage management, identity studies, art history, indigenous studies, and visual theory, as well as professionals and amateurs who have vested or avocational interests in rock art. The Grizzly Bear Who Lost His GRRRRR! Rob Biddulph.2016-11-01 From the award-winning author and illustrator of Blown Away, Rob Biddulph, comes a delightfully hilarious story about a grizzly bear named Fred who loses his GRRRRR. Each year, for as long as the forest has stood, a contest is held for the bears of the wood... Fred is the champion. He's the best. But being the best takes time and training, especially when it comes to having the loudest growl. Then, one morning, disaster strikes—Fred's GRRRRR is gone! Oh, no! Will Fred find his GRRRRR and realize that there's more to life than being a winner?

The Rise of the Network Society Manuel Castells.2011-08-24 This first book in Castells' groundbreaking trilogy, with a substantial new preface, highlights the economic and social dynamics of the information age and shows how the network society has now fully risen on a global scale. Groundbreaking volume on the impact of the age of information on all aspects of society Includes coverage of the influence of the internet and the net-economy Describes the accelerating pace of innovation and social transformation Based on research in the USA, Asia, Latin America, and Europe *A Sea of Stories: Taizé* Hardi Szabo, Orsi. This new title deals about the Taizé Community and the everyday life in this French monastery. Written by Orsi Hardi, and illustrated by Roser Argemí, the book has been published in Spanish, Catalan, English, French and German. George, a boy who visits Taizé with his parents, learns who the Brother Roger was, why he decided to found the community, and why people from all over the world, specially young people and families, travel to this place to share their experiences for some days.

The New New Journalism Robert Boynton.2007-12-18 Forty years after Tom Wolfe, Hunter S. Thompson, and Gay Talese launched the New Journalism movement, Robert S. Boynton sits down with nineteen practitioners of what he calls the New New Journalism to discuss their methods, writings and careers. The New New Journalists are first and foremost brilliant reporters who immerse themselves completely in their subjects. Jon Krakauer accompanies a mountaineering expedition to Everest. Ted Conover works for nearly a year as a prison guard. Susan Orlean follows orchid fanciers to reveal an obsessive subculture few knew existed. Adrian Nicole LeBlanc spends nearly a decade reporting on a family in the South Bronx. And like their muckraking early twentieth-century precursors, they are drawn to the most pressing issues of the day: Alex Kotlowitz, Leon Dash, and William Finnegan to race and class; Ron Rosenbaum to the problem of evil; Michael Lewis to boom-and-bust economies; Richard Ben Cramer to the nitty gritty of politics. How do they do it? In these interviews, they reveal the techniques and inspirations behind their acclaimed works, from their felt-tip pens, tape recorders, long car rides, and assumed identities; to their intimate understanding of the way a truly great story unfolds. Interviews with: Gay Talese Jane Kramer Calvin Trillin Richard Ben Cramer Ted Conover Alex Kotlowitz Richard Preston William Langewiesche Eric Schlosser Leon Dash William Finnegan Jonathan Harr Jon Krakauer Adrian Nicole LeBlanc Michael Lewis Susan Orlean Ron Rosenbaum Lawrence Weschler Lawrence Wright

The Madness Narcís Oller.2020-09-15 Written in nine chapters separated into three blocks, Narcís Oller's The Madness is one of the first literary pieces of work to aim to truly analyze the social and genetic causes and results of mental illness. Told through the eyes of an anonymous narrator character, The Madness tells the story of a young revolutionary called Daniel Serrallonga and his gradual deterioration into madness and delusion. Set against the backdrop of the political crisis that ripped Spain apart in the mid to late 19th century and laid the foundations of the Spanish Civil War, The Madness is a fascinating study of mental health within both rural and urban Catalan society. As relevant and entertaining now as it was when it was first published, this lively translation brings this fantastic piece of literature to new, modern audiences while drawing parallels with some of the 19th century's greatest English language writers such as Charles Dickens and Thomas Hardy.

Hypertext and Cognition Jean-Francois Rouet,Jarmo J. Levonen,Andrew Dillon,Rand J. Spiro.2012-11-12 The recent evolution of western societies has been characterized by an increasing emphasis on information and communication. As the amount of available information increases, however, the

user -- worker, student, citizen -- faces a new problem: selecting and accessing relevant information. More than ever it is crucial to find efficient ways for users to interact with information systems in a way that prevents them from being overwhelmed or simply missing their targets. As a result, hypertext systems have been developed as a means of facilitating the interactions between readers and text. In hypertext, information is organized as a network in which nodes are text chunks (e.g., lists of items, paragraphs, pages) and links are relationships between the nodes (e.g., semantic associations, expansions, definitions, examples -- virtually any kind of relation that can be imagined between two text passages). Unfortunately, the many ways in which these hypertext interfaces can be designed has caused a complexity that extends far beyond the processing abilities of regular users. Therefore, it has become widely recognized that a more rational approach based on a thorough analysis of information users' needs, capacities, capabilities, and skills is needed. This volume seeks to meet that need. From a user-centered perspective -- between systems and users -- this volume presents theoretical and empirical research on the cognitive processes involved in using hypertext. In so doing, it illustrates three main approaches to the design of hypertext systems: *cognitive, which examines how users process multilayered hypertext structures; *ergonomical, which explores how users interact with the design characteristics of hardware and software; and *educational, which studies the learning objectives, frequency and duration of hypertext sessions, type of reading activity, and the user's learning characteristics. This volume also tries to provide answers for the questions that have plagued hypertext research: *What is hypertext good for? *Who is hypertext good for? *If it is useful for learning and instruction, then what type? *What particular cognitive skills are needed to interact successfully with a hypertext system? Anyone interested in the fields of computer science, linguistics, psychology, education, and graphic design will find this volume intriguing, informative, and a definitive starting point for future research in the field of hypertext.

The end of days is near, but life always goes on. A young Latin tutor—penniless and bullied by a violent father—falls in love with an extraordinary, eccentric young woman. Agnes is a wild creature who walks her family's land with a falcon on her glove and is known throughout the countryside for her unusual gifts as a healer, understanding plants and potions better than she does people. Once she settles with her husband on Henley Street in Stratford-upon-Avon, she becomes a fiercely protective mother and a steadfast, centrifugal force in the life of her young husband, whose career on the London stage is just taking off when his beloved young son succumbs to sudden fever.

Communication Power Manuel Castells.2013-08-29 Drawing on a wide range of social and psychological theories, Castells presents original research on political processes and social movements. He applies this analysis to numerous recent events - the misinformation of the American public on the Iraq War, the global environmental movement to prevent climate change, the control of information in China and Russia, Barak Obama's internet-based presidential campaigns, and (in this new edition) responses to recent political and economic crises such as the Arab Spring and the Occupy movement. On the basis of these case studies he proposes a new theory of power in the information age based on the management of communication networks.

Basic Research Methods Gerard Guthrie.2010-07-14 This book offers a comprehensive and rounded view of research as a tool for logical problem-solving. It is built on the philosophical-pragmatic foundation that the value of knowledge and research methodologies lies in their usefulness in engaging with the real world. Synthesizing both positivist and non-positivist methodologies, this book is for students who are undertaking their first social science research course or their first research project. The techniques are basic ones, but many masters and doctoral research studies use them. From an experiential base, students would be able to build a more advanced conceptual and theoretical understanding of research through further reading and practice.

Celiac Disease and Non-Celiac Gluten Sensitivity Luis Rodrigo, Amado Salvador Peña.2014-11-07 Celiac disease is a systemic autoimmune process and appears in genetically predisposed individuals, with a well-known cause, consisting in a permanent intolerance to gluten, a protein contained in the flour of wheat, rye, barley and oats. Worldwide celiac disease affects to 1% of the Caucasian and there is recent evidence that the disease is increasing in USA and Finland among other regions in the world. It is considered to be the most prevalent disease with a genetic predisposition. The clinical forms of presentation are varied. The classical form consisting of diarrhea, anemia and failure to thrive is still common in children, but in the adult patients the symptoms resemble the irritable bowel syndrome. Mono-symptomatic forms with extra-intestinal manifestations are frequent. Hematological, cutaneous, articular, hepatic, bone and neurological manifestations are often described. This protean presentation and the lack of awareness explain the delay in diagnosis and suggest that screening in high-risk groups is indicated. The publication of this book written mainly by Spanish and Latin-American clinicians, researchers, and teachers, demonstrates the wide interest and the involvement of different disciplines that are necessary to understand celiac disease and gluten-related pathologies, such as non-celiac gluten-sensitivity. This has a great impact in the general public and in the industry. However, the knowledge of non-celiac gluten-related pathologies remains scarce but presently in the process of being properly defined. This book also highlights the importance of recognizing non-celiac gluten-sensitivity and briefly discusses a new definition. It also provides some perspectives to take into account when studying celiac disease in China and Central America. It describes new observations in Mexico, El Salvador and Costa Rica. The psychosocial impact as studied and reported by Argentinean investigators also adds to the value of this book. Written with a multidisciplinary team, we think that this book could be of interest to a great variety of medical specialists. Due to the systemic nature and variable presentation of celiac disease it certainly is of interest to pediatricians, gastroenterologists, hepatologists, specialists in internal medicine, general practitioners as well as hematologists, immunologists, geneticists, pathologists, rheumatologists, dermatologists, neurologists, gynecologists, neurologists, psychiatrists, psychologists, orthopedic surgeons, specialists in rehabilitation medicine, endocrinologists. Being gluten the cause of these disorders, the food industry, dietitians and nutritionists will benefit from the valuable information presented in this book.

Racism in the 21st Century Ronald E. Hall.2008-08-06 In the post-Civil Rights era, there is a temptation to assume that racism is no longer the pressing social concern in the United States that it once was. The contributors show that racism has not fallen from the forefront of American society, but is manifest in a different way. According to the authors in this volume, in 21st century, skin color has come to replace race as an important cause of discrimination. This is evidenced in the increasing usage of the term "people of color" to encompass people of a variety of racial and ethnic

backgrounds. The editor has compiled a diverse group of contributors to examine racism from an interdisciplinary perspective. Contributions range from the science of racism, from its perceived biological basis at the end of the 19th century, to sociological studies its new forms in the 21st century. The result is a work that will be invaluable to understanding the challenges of confronting Racism in the 21st Century.
