Assessing the Language of Young Learners Angela

Hasselgreen, Gwendydd Caudwell. 2016 This volume offers new insights into the assessment of the language of Young Learners (YLS). YLS are defined here as being from 5 to 17 years, and are treated as three distinct subgroups: younger children (5/6 to 8/9 years), older children (8/9 to 12/13 years) and teenagers (12/13 to

17 years). The first half addresses fundamental issues, beginning with the characteristics of YLs and how these are manifested in first language development. The authors consider the potential ability of each age group to perform in a second or foreign language, proposing a rough age-related correspondence with the Common European Framework of Reference for Languages (CEFR) levels. Finally, principles of assessment, specifically formative assessment and testing, are presented in the light of linguistic, cognitive and social development. The second half focuses on testing a range of 'skills'. Theoretical models of performance are introduced, followed by a practical analysis of approaches to the testing of each skill for the three age groups, illustrated with examples. The authors conclude by summing up developmental characteristics of each age group, and their implications for language testing. The book is intended for a wide readership within the field of teaching and assessing the language of young learners. Researchers are offered scope for further investigation of what emerges from the discussion, while practitioners will hopefully find support in their day-to-day work with YLs.

Trauma Informed Classrooms Katia Gonzalez, Rhoda Frumkin. 2021 The ability of educators to provide a nurturing environment to support students' cognitive, social-emotional, and physical well-being can impact not only the classroom as a learning space but may also have a long lasting effect on children and families. Educators are seeking ways to become better informed on how trauma can affect learners, individually and as a group, while also searching for evidence based practices to support pedagogical decision-making. This book provides readers with the opportunity to critically reflect upon ways research connects to practice while considering how stressors can be minimized to support students. A special section related to educators' personal and professional growth is also included--

Factfulness Hans Rosling, Anna Rosling Rönnlund, Ola Rosling. 2018-04-03 INSTANT NEW YORK TIMES BESTSELLER “One of the most important books I’ve ever read—an indispensable guide to thinking clearly about the world.” - Bill Gates “Hans Rosling tells the story of ‘the secret silent miracle of human progress’ as only he can. But Factfulness does much more than that. It also explains why progress is so often secret and silent and teaches readers how to see it clearly.” —Melinda Gates Factfulness by Hans Rosling, an outstanding international public health expert, is a hopeful book about the potential for human progress when we work off facts rather than our inherent biases. - Former U.S. President Barack Obama Factfulness: The stress-

reducing habit of only carrying opinions for which you have strong supporting facts. When asked simple questions about global trends—what percentage of the world’s population live in poverty; why the world’s population is increasing; how many girls finish school—we systematically get the answers wrong. So wrong that a chimpanzee choosing answers at random will consistently outguess teachers, journalists, Nobel laureates, and investment bankers. In *Factfulness*, Professor of International Health and global TED phenomenon Hans Rosling, together with his two long-time collaborators, Anna and Ola, offers a radical new explanation of why this happens. They reveal the ten instincts that distort our perspective—from our tendency to divide the world into two camps (usually some version of us and them) to the way we consume media (where fear rules) to how we perceive progress (believing that most things are getting worse). Our problem is that we don’t know what we don’t know, and even our guesses are informed by unconscious and predictable biases. It turns out that the world, for all its imperfections, is in a much better state than we might think. That doesn’t mean there aren’t real concerns. But when we worry about everything all the time instead of embracing a worldview based on facts, we can lose our ability to focus on the things that threaten us most. Inspiring and revelatory, filled with lively anecdotes and moving stories, *Factfulness* is an urgent and essential book that will change the way you see the world and empower you to respond to the crises and opportunities of the future. --- “This book is my last battle in my life-long mission to fight devastating ignorance...Previously I armed myself with huge data sets, eye-opening software, an energetic learning style and a Swedish bayonet for sword-swallowing. It wasn’t enough. But I hope this book will be.” Hans Rosling, February 2017.

IELTS Collected Papers 2 Lynda Taylor,Cyril J.

Weir.2012-02-23 This volume reports research that informs the development of reading and listening assessment in IELTS. This volume brings together a set of eight IELTS-related research studies - four on reading and four on listening - conducted between 2005 and 2010. Findings from these studies provide valuable evidence on the validity, reliability, impact and practicality of the IELTS test; they are also instrumental in highlighting aspects needing attention, and thus directly inform the continuing evolution of the IELTS reading and listening tests. The volume reviews and comments on the specific contribution of each study to the ongoing process of IELTS reading and listening test design and development.

Validity Micheline Chalhoub-Deville, Barry O'Sullivan.2020 This monograph provides a historical overview of validity, targeting developments in both the UK and the US. It explores theoretical notions of validity as well as pragmatic validation practices and expands the arguments that need to be attended to document quality. The authors examine the need to consider, in addition to the psychometric evidence, which has continued to prevail especially in the US, other critical sources of quality evidence. They call attention to principled design and the evidence accumulated from various departments/groups involved in test design and development. They also promote the concept of impact by design, which places consequences at the top of the evidence chain to guide all testing efforts and quality documentation. They envision validity scholarship to attend to consequences at the individual, aggregate/group, and larger educational/organisational/societal levels. Concomitant with this attention to consequences are considerations of stakeholders and the tailoring of communication to engage intended groups. Such an approach yields a more convincing validity argument. The monograph ends by calling on professionals in the field to publish case studies, which showcases localised validity arguments in practice. Local case studies represent critical endeavours to

illustrate how evidence and arguments are pulled together to support the quality of a testing programme and all that it entails.

Assessing English on the Global Stage Cyril J. Weir, Barry O'Sullivan. 2017 This book tells the story of the British Council's seventy-five year involvement in the field of English language testing. The first section of the book explores the role of the British Council in spreading British influence around the world through the export of British English language examinations and British expertise in language testing. Founded in 1934, the organisation formally entered the world of English language testing with the signing of an agreement with the University of Cambridge Local Examination Syndicate (UCLES) in 1941. This agreement, which was to last until 1993, saw the British Council provide substantial English as a Foreign Language (EFL) expertise and technical and financial assistance to help UCLES develop their suite of English language tests. Perhaps the high points of this phase were the British Council inspired Cambridge Diploma of English Studies introduced in the 1940s and the central role played by the British Council in the conceptualisation and development of the highly innovative English Language Testing Service (ELTS) in the 1970s, the precursor to the present day International English Language Testing System (IELTS). British Council support for the development of indigenous national English language tests around the world over the last thirty years further enhanced the promotion of English and the creation of soft power for Britain.

British expertise in language testing. Founded in 1934, the organisation formally entered the world of English language testing with the signing of an agreement with the University of Cambridge Local Examination Syndicate (UCLES) in 1941. This agreement, which was to last until 1993, saw the British Council provide substantial English as a Foreign Language (EFL) expertise and technical and financial assistance to help UCLES develop their suite of English language tests. Perhaps the high points of this phase were the British Council inspired Cambridge Diploma of English Studies introduced in the 1940s and the central role played by the British Council in the conceptualisation and development of the highly innovative English Language Testing Service (ELTS) in the 1970s, the precursor to the present day International English Language Testing System (IELTS). British Council support for the development of indigenous national English language tests around the world over the last thirty years further enhanced the promotion of English and the creation of soft power for Britain. In the early 1990s the focus of the British Council changed from test development to delivery of British examinations through its global network. However, by the early years of the 21st century, the organisation was actively considering a return to test development, a strategy that was realised with the founding of the Assessment Research Group in early 2012. This was followed later that year by the introduction of the Aptis English language testing service; the first major test developed in-house for over thirty years. As well as setting the stage for the re-emergence of professional expertise in language testing within the organisation, these initiatives have resulted in a growing strategic influence for the organisation on assessment in English language education. This influence derives from a commitment to test localisation, the development and provision of flexible, accessible and affordable tests and an efficient delivery, marking and reporting system underpinned by an innovative socio-cognitive approach to language testing. This final period

can be seen as a clear return by the British Council to using language testing as a tool for enhancing soft power for Britain: a return to the original *raison d'être* of the organisation.
