*Making Transnational Law Work in the Global Economy* Pieter H. F. Bekker,Rudolf Dolzer,Michael Waibel.2010-10-28 This tribute to Professor Detlev Vagts of the Harvard Law School brings together his colleagues at Harvard and the American Society of International Law, as well as academics, judges and practitioners, many of them his former students. Their essays span the entire spectrum of modern transnational law: international law in general; transnational economic law; and transnational lawyering and dispute resolution. The contributors evaluate established fields of transnational law, such as the protection of property and investment, and explore new areas of law which are in the process of detaching themselves from the nation-state such as global administrative law and the regulation of cross-border lawyering. The implications of decentralised norm-making, the proliferation of dispute settlement mechanisms and the rising backlash against global legal interdependence in the form of demands for preserving state legal autonomy are also examined.

**The Renaissance of Etching** Catherine Jenkins,Nadine M. Orenstein,Freyda Spira,Peter Fuhring,Donald J. La Rocca,Anne Varick Lauder,Christof Metzger,Femke Speelberg,Ad Stijnman,Pierre Terjanian,Julia Zaunbauer.2019-10-21 The Renaissance of Etching is a groundbreaking study of the origins of the etched print. Initially used as a method for decorating armor, etching was reimagined as a printmaking technique at the end of the fifteenth century in Germany and spread rapidly across Europe. Unlike engraving and woodcut, which required great skill and years of training, the comparative ease of etching allowed a wide variety of artists to exploit the expanding market for prints. The early pioneers of the medium include some of the greatest artists of the Renaissance, such as Albrecht Dürer, Parmigianino, and Pieter Bruegel the Elder, who paved the way for future printmakers like Rembrandt, Goya, and many others in their wake. Remarkably, contemporary artists still use etching in much the same way as their predecessors did five hundred years ago. Richly illustrated and including a wealth of new information, *The Renaissance of Etching* explores how artists in Germany, the Netherlands, Italy, and France developed the new medium of etching, and how it became one of the most versatile and enduring forms of printmaking. p.p1 {margin: 0.0px 0.0px 0.0px 0.0px; font: 14.0px Verdana}

**Gutenberg** Stephan Füssel.2020-03-01 Named "Man of the Millennium" in 1999, Johannes Gutenberg was the creator of one of the most influential and revolutionary inventions in Europe's history: a printing press with mechanical movable type. This development sparked the printing revolution, which is regarded as the milestone of the second millennium and represents one of the central contributions in the turn to modernity. His printing press came to play a key role in the development of the Renaissance, the Reformation, and the Age of Enlightenment, providing the material foundation for the modern knowledge-based economy and the spread of learning to the masses. His invention revolutionized the way that information is shared and broadened the boundaries of who has access to written knowledge. Paving the way for bibliophiles of today, the Gutenberg Bible of 1454 remains one of the most famous books in history. Gutenberg's technical innovations remained unrivalled for almost 350 years, until industrialization of the printing industry and the digital revolution built on the advances that he began, increasing the rate at which information is spread. Despite his significance in forming the world as we know it, there has not yet been a rigorous and accessible biography of Gutenberg published in English. Written by the leading expert on Gutenberg, Füssel's biography brings together high academic standards and thorough historical details in a highly readable text that conveys everything you need to know about the man who changed printing forever.
