Rural Gerontology Mark Skinner, Rachel Winterton, Kieran Walsh. 2020-12-28 This book provides the first foundation of knowledge about the intellectual traditions, contemporary scope and future prospects for the interdisciplinary field of rural gerontology. With a focus on rural regions, small towns and villages, which have the highest rates of population ageing worldwide, Rural Gerontology is aimed at understanding what it means for rural people, communities and institutions to be at the forefront of twenty-first-century demographic change. The book offers important insights from rural ageing studies into today's most pressing gerontological problems. With chapters from more than 65 established and emerging rural ageing researchers, it is the first synthesis of knowledge about rural gerontology, harnessing a burgeoning interdisciplinary scholarship on the rural dimensions of ageing, old age and older populations. With a view to advancing a critical understanding of rural ageing populations, this book will have an overreaching impact across the social sciences by drawing on advancements in understandings of rural ageing from social, environmental, geographical and critical gerontology to facilitate a comprehensive exploration of the diversity, complexity and implications of the ageing process in rural settings. Bringing together valuable international perspectives, this book makes a timely contribution to gerontology, rural studies and the social sciences, and will appeal to scholars and researchers across USA and Canada, UK and Ireland, Australia and New Zealand, Europe, China and countries in Africa, South America and South-East Asia.

The Cultural Experience David W. McCurdy, James P. Spradley, Dianna J. Shandy. 2004-11-03 The Cultural Experience has helped generations of undergraduates discover the excitement of ethnographic research through participation in relatively familiar cultures in North American society. Grounded in the interviewing-based ethnographic technique known as ethnosemantics, the latest edition continues to treat ethnography as a discovery process. Students are taught how to set up an ethnographic field study, choose a microculture, and find and approach an informant, as well as how to ask ethnographic questions, record data, and organize and analyze what they have learned. Detailed instruction on how to write an ethnography is also provided. The guidelines are followed by ten short but substantive, well-written student ethnographies on such microcultures as exotic dancing, firefighting, pest extermination, and the work of midwives and police detectives. The Second Edition of this popular classroom volume includes boxed inserts that offer suggestions to aid in the research process, material on how to use observation and narratives with the ethnosemantic approach, an emphasis on how to find cultural themes and adaptive challenges by analyzing ethnographic field data, and extensive strategies for writing the final ethnographic paper. It also presents a comprehensive treatment of ethical responsibilities as well as a discussion of the significance of ethnographic research and its applications in the workplace.
