Timber Trafficking in Vietnam Ngoc Anh Cao. 2018-02-09 This book is the first systematic investigation into the problem of timber trafficking in Vietnam, providing a detailed understanding of the typology of, victimization from, and key factors driving this crime. The book first reveals a multifaceted pattern of timber trafficking in Vietnam, comprising five different components: harvesting, transporting, trading, supporting, and processing. It then assesses the crime's victimization from timber trafficking. Thanks to the employment of a broad conceptual framework of human security, Cao reveals that timber trafficking has substantial harmful impacts on all seven elements of human security: economic, food, health, environmental, personal, community, and political; whilst being closely interconnected, they vary between different groups of victims. Cao concludes by offering five solutions to better control of timber trafficking in the context of Vietnam, which crucially involve refining the current policy framework of forest governance and improving the efficiency of law enforcement. A wide-ranging and timely study, this book will hold particular

appeal for scholars of green criminology and environmental harm.

Vietnam Studies Col Francis J. Kelly.2016-12-10 As long ago as 1957, U.S. Army Special Forces soldiers were in the Republic of Vietnam. going about their business of training, advising, and assisting members of the Vietnamese Army. Despite the old Army witticism about never volunteering for anything, the Special Forces soldier is. in fan, a double volunteer, having first volunteered for airborne training and then again for Special Forces training. From a very meager beginning but sustained by a strong motivation and confidence in his mission, the Special Forces soldier has marched through the Vietnam struggle in superb fashion. In 1957 some fifty-eight Vietnamese soldiers were given military training by Special Forces troops. Ten years later the Special Forces were advising and assisting over 40,000 paramilitary troops, along with another 40,000 Regional Forces and Popular Forces soldiers. This monograph traces the development and notes the progress, problems, successes, and failures of a unique program undertaken by the U.S. Army for the first lime in its history. It is hoped that all the significant lessons learned have been recorded and the many pitfalls of such a program uncovered. I am responsible for the conclusions reached, yet my thought processes could not escape the influence of the many outstanding officers and men in the Special Forces who joined in the struggle. Particularly, I must lake note of the contributions of the Special Forces noncommissioned officers, without question the most competent soldiers in the world. With the withdrawal of the Special Forces from

Vietnam in 1971, the Army could honestly lay claim to a new dimension in ground warfare—the organized employment of a paramilitary force in sustained combat against a determined enemy. I know I speak for my predecessors and successors in claiming that the 5th Special Forces Group (Airborne) was the finest collection of professional soldiers ever assembled by the U.S. Army, anywhere, anytime. Francis John Kelly Colonel, Armor 1972

From Plan To Market Adam Fforde. 2019-03-13 This clear and accessible text explores Vietnam's successful transition from neo-Stalinist central planning to a market economy—Vietnamese style. After describing the north Vietnamese system prior to 1975 and its colonial and precolonial antecedents, the authors uncover the mechanisms of that changeover. They contend that the Vietnamese transition was largely bottom-up in character and that it evolved over a long enough period for the country's political economy to adjust. This explains in part the rapid shift to a high-growth, externally oriented development path in the early 1990s, despite the loss of Soviet aid and the lack of significant Western substitutes until 1992-1993. Based upon extensive in-country experience, a wealth of primary materials, and wide comparative knowledge of development issues, the book challenges many preconceived notions, both about Vietnam and about the general nature of transition processes.

Empowering Adolescent Girls in Developing Countries Caroline Harper, Nicola Jones, Anita Ghimire, Rachel Marcus, Grace Kyomuhendo Bantebya. 2018-02-13 The Open Access version of this book, available at <http://www.tandfebooks.com/doi/view/10.4324/9781315180250>, has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license Adolescence is a pivotal time in a girl's life. The development of educational, physical, psychosocial, familial, political and economic capabilities enable girls to reach their full potential and contribute to the wellbeing of their families and society. However, progress is still significantly constrained by discriminatory gender norms and the related attitudes and practices which restrict girls' horizons, restrain their ambition and, if unfettered, allow exploitation and abuse. Empowering Adolescent Girls in Developing Countries explores the detrimental impact of discriminatory gender norms on adolescent girls' lives across very different contexts. Grounded in four years of in-depth research in Ethiopia, Nepal, Uganda and Viet Nam, the book adopts a holistic approach, recognising the inter-related nature of capabilities and the importance of local context. By exploring the theory of gendered norm change, contextualising and examining socialisation processes, the book identifies the patriarchal vested interests in power, authority and moral privilege, which combine in attempts to restrict and control girls' lives. Throughout the book, Empowering Adolescent Girls in Developing Countries demonstrates how efforts to develop more egalitarian gender norms can enable disadvantaged adolescent girls to change the course of their lives and contribute to societal change. Accessible and informative, the book is perfect for policy makers, think tanks, NGOs, activists, academics and students of gender and development studies.

Scientific Babel Michael D. Gordin. 2015-04-13 English is the language of science today. No matter which languages you know, if you want your work seen, studied, and cited, you need to publish in English. But that hasn't always been the case. Though there was a time when Latin dominated the field, for centuries science has been a polyglot enterprise, conducted in a number of languages whose importance waxed and waned over time—until the rise of English in the twentieth century. So how did we get from there to here? How did French, German, Latin, Russian, and even Esperanto give way to English? And what can we reconstruct of the experience of doing science in the polyglot past? With *Scientific Babel*, Michael D. Gordin resurrects that lost world, in part through an ingenious mechanism: the pages of his highly readable narrative account teem with footnotes—not offering background information, but presenting quoted material in its original language. The result is stunning: as we read about the rise and fall of languages, driven by politics, war, economics, and institutions, we actually see it happen in the ever-changing web of multilingual examples. The history of science, and of English as its dominant language, comes to life, and brings with it a new understanding not only of the frictions generated by a scientific community that spoke in many often mutually unintelligible voices, but also of the possibilities of the polyglot, and the losses that the dominance of English entails. Few historians of science write as well as Gordin, and *Scientific Babel* reveals his incredible command of the literature, language, and intellectual essence of science past and present. No reader who takes this linguistic journey with him will be disappointed.

Chinese Stories for Language Learners Vivian Ling, Peng Wang. 2021-03-23 The highly anticipated next book in Tuttle's *Stories for Language Learners* series is here! This book presents 22 classic Chinese proverbs and the traditional tales behind them. The stories are bilingual, with the Chinese and English versions presented on facing pages. Each includes an explanation of how the proverb is used today, cultural notes, vocabulary and discussion questions. Online audio recordings of the tales by native speakers give students a chance to improve their pronunciation and comprehension. Some of the proverbs featured in this collection include: *Painting the Eyes on the Dragon* Based on the story of a famous court painter in 6th century China who painted dragons, this proverb refers to the finishing touches needed to bring a work of art or literature to life. In a discussion, it refers to the final statements used to clinch the argument. *Waiting for Rabbits by a Tree Stump* Based on an ancient folktale about a foolish farmer who sees a rabbit kill itself in front of him by running into a tree stump, then gives up tilling his field to wait for more rabbits by the stump. This saying is applied to people who wait passively for luck to strike again. It also refers to impractical people who stick to one way of doing things only because it has worked for them once in the past. *Pure Water Has No Fish; Perfect People Have No Friends* Many versions of this historical tale exist. The one told here is about a 2nd century AD official sent to govern a far-flung outpost on the Silk Road who is fastidious in

applying strict rules and thereby causes the local people to rebel against him. In the professional world, it is used to refer to people who do not like to work with an overly strict supervisor or colleague. Whether being used in a classroom or for self-study, Chinese Stories for Language Learners provides an educational and entertaining way for intermediate Mandarin learners to expand their vocabulary and understanding of the language.
