semiconductor ecosystem, and to give credit where credit is due. We trace the history of the semiconductor industry from both a technical and business perspective. We argue that the development of the fabless business model was a key enabler of the growth in semiconductors since the mid-1980s. Because business models, as much as the technology, are what keep us thrilled with new gadgets year after year, we focus on the evolution of the electronics business. We also invited key players in the industry to contribute chapters. These In Their Own Words chapters allow the heavyweights of the industry to tell their corporate history for themselves, focusing on the industry developments (both in technology and business models) that made them successful, and how they in turn drive the further evolution of the semiconductor industry.

Idowu, Walter Leal Filho. 2008-12-21 Being socially responsible on the part of corporate entities is now no longer an option, it is part of their normal business obligations to all their stakeholders regardless of whether these are primary or secondary stakeholders. Modern societies around the world now expect corporate entities of all shapes and forms to be socially responsible in whatever they do; the "Global Practices of Corporate Social Responsibility" is a first attempt at bringing together in one book experts' accounts of how corporate entities in twenty independent nations around the world are dealing with the issue of CSR. The world today faces diverse social problems. These become apparent as one moves from one country to the next, interestingly, society now expects corporations to help in finding solutions to these problems. The problem of global warming affects us all; modern corporations can no longer continue to assume that the problem will go away, if nothing is done by them. We can all make a little difference by our actions.

Protocols for Micropropagation of Woody Trees and Fruits

S.Mohan Jain,H. Häggman.2007-09-18 Micropropagation has become a reliable and routine approach for large-scale rapid plant multiplication, which is based on plant cell, tissue and organ culture on well defined tissue culture media under aseptic conditions. A lot of research efforts are being made to develop and refine micropropagation methods and culture media for large-scale plant multiplication of several number of plant species. However, many forest and fruit tree species still remain recalcitrant to in vitro culture and require highly specific culture conditions for plant growth and development. The recent challenges on plant cell cycle regulation and the presented

potential molecular mechanisms of recalcitrance are providing excellent background for understanding on totipotency and what is more development of micropropagation protocols. For large-scale in vitro plant production the important attributes are the quality, cost effectiveness, maintenance of genetic fidelity, and long-term storage. The need for appropriate in vitro plant regeneration methods for woody plants, including both forest and fruit trees, is still overwhelming in order to overcome problems facing micropropagation such as somaclonal variation, recalcitrant rooting, hyperhydricity, polyphenols, loss of material during hardening and quality of plant material. Moreover, micropropagation may be utilized, in basic research, in production of virus-free planting material, cryopreservation of endangered and elite woody species, applications in tree breeding and reforestation.

Politics, Development and Security in Oceania David Hegarty, Darrell Tryon. 2013-04-01 French and Australian collaborative research in the humanities and the social sciences in the South Pacific has grown and intensified significantly over the past two decades, beginning with the international symposium *Changing Identities in the Pacific at the Dawn of the Twenty-First Century* held at the Australian Embassy in Paris in 1997 ... In April 2006, another French-government sponsored international symposium, AGORA (Ateliers Gouvernance et Recherche Appliquée) was held at IRD (Institut de Recherche pour le Développement), Noumea, New Caledonia, major themes being governance and economic development, again bringing together Francophone and Anglophone scholars from France and the Pacific region. This was followed in October 2009 by two conjoint Francophone/Anglophone conferences, held at the IRD Centre in Noumea, *Stability, Security and Development in Oceania*, preceded by AGORA-2, an international conference on Anglophone research in the humanities and the social sciences in the Francophone Pacific, sponsored by the French Government and the Government of New Caledonia. The first of these conferences was sponsored by the French Fonds Pacifique and the State, *Society and Governance Program at The Australian National University*. An edited selection of presentations from this symposium constitutes the present volume.--Preface.

Democratization in Morocco Lise Storm. 2007-10-29 This book explores the political games of the Moroccan democratization process in the period from independence in 1956 until 2006. By combining a great degree of political theory with empirical material on Morocco, it analyzes the strategies and actions of the various political actors and evaluates the level of democracy present in the country after the adoption of new constitutions in 1962, 1970, 1972, 1980, 1992 and 1996. Lise Storm demonstrates that in at least some instances, democratization has been more

than simply a survival strategy - every so often, key figures within the political elite have taken the democratization process further than strictly needed for them to stay in power. In the case of Morocco, it has been the monarch who on more than one occasion has moved the country further towards the democratic ideal than he necessarily had to, and that sometimes even against the wishes of one or more of the established political parties. This book illustrates how the Moroccan political parties, like so many of their counterparts in the region, have become the main obstacle to further democratization as most of them have never honoured - or appear to have abandoned - the key function of political parties: popular representation. Democratization in Morocco will be a very valuable contribution to students and researchers interested in the dynamics behind the Moroccan democratization and the role of electoral politics in North African and Middle Eastern politics.
