After Extinction Richard Grusin.2018-03-20 A multidisciplinary exploration of extinction and what comes next What comes after extinction? Including both prominent and unusual voices in current debates around the Anthropocene, this collection asks authors from diverse backgrounds to address this question. After Extinction looks at the future of humans and nonhumans, exploring how the scale of risk posed by extinction has changed in light of the accelerated networks of the twenty-first century. The collection considers extinction as a cultural, artistic, and media event as well as a biological one. The authors treat extinction in relation to a variety of topics, including disability, human exceptionalism, science-fiction understandings of time and posthistory, photography, the contemporary ecological crisis, the California Condor, systemic racism, Native American traditions, and capitalism. From discussions of the anticipated sixth extinction to the status of writing, theory, and philosophy after extinction, the contributions of this volume are insightful and innovative, timely and thought provoking. Manual of Standard Tibetan Nicolas Tournadre,Rdo-rje (Gsañbdag.).2003 The Manual of Standard Tibetan presents the everyday speech of Lhasa as it is currently used in Tibet and among the Tibetan diaspora. It not only places the language in its natural context but also highlights along the way key aspects of Tibetan civilization and Vajrayana Buddhism. The Manual, which consists of forty-one lessons, is illustrated with many drawings and photographs and also includes two informative political and linguistic maps of Tibet. Two CDs provide an essential oral complement to the manual. A detailed introduction presents a linguistic overview of spoken and written Tibetan.

Cities of the World Stanley D. Brunn, Maureen Hays-

Mitchell, Donald J. Zeigler.2012 Remarkably, more than half of the world's population now lives in cities, and the numbers grow daily as people abandon rural areas. This fully updated and revised fifth edition of the classic text offers readers a comprehensive set of tools for understanding the urban landscape, and, by extension, the world's politics, cultures, and economies. Providing a sweeping overview of world urban geography, a group of noted experts explores the eleven major global regions. Each author presents the region's urban history, economy, culture, and society, as well as urban spatial models and problems and prospects. Environmental, human security, globalization, and cyberspace topics are fully developed as well. Vignettes of

seventy-eight key cities give the reader a vivid understanding of daily life and the spirit of place. An introductory chapter presents an overview of key terms and concepts, and a concluding chapter projects the world's urban future. Liberally illustrated with a new selection of photographs, maps, and diagrams, the text also includes a rich array of textboxes to highlight key topics ranging from gender and the city to Islamic fashion and global warming. Bibliographic sources, websites, and an appendix of UN data provide additional resources for helping students understand more about the urban world. Clearly written and timely, *Cities of the World* will be invaluable for those teaching introductory or advanced classes on global cities, regional geography, and urban studies. Proceedings of the 21st Congress of the International Ergonomics Association (IEA 2021) Nancy L. Black, W. Patrick Neumann, Ian Noy. 2021-04-30 This book presents the proceedings of the 21st Congress of the International Ergonomics Association (IEA 2021), held online on June 13-18, 2021. By highlighting the latest theories and models, as well as cutting-edge technologies and applications, and by combining findings from a range of disciplines including engineering, design, robotics, healthcare, management, computer science, human biology and behavioral science, it provides researchers and practitioners alike with a comprehensive, timely guide on human factors and ergonomics. It also offers an excellent source of innovative ideas to stimulate future discussions and developments aimed at applying

knowledge and techniques to optimize system performance, while at the same time promoting the health, safety and wellbeing of individuals. The proceedings include papers from researchers and practitioners, scientists and physicians, institutional leaders, managers and policy makers that contribute to constructing the Human Factors and Ergonomics approach across a variety of methodologies, domains and productive sectors. This volume includes papers addressing the following topics: Activity Theories for Work Analysis and Design (ATWAD), Organisation design and management (ODAM), Ergonomic Work Analysis and Training (EWAT), Systems HF/E, HF/E Education and Professional Certification Development.

speech sounds to segmenting proto-words from fluent speech, mapping individual words to meanings in the face of natural variability and uncertainty, and developing a structured mental lexicon. Experts in the field review the development of early lexical acquisition from empirical, computational and theoretical perspectives to examine the development of skilled word learning as the outcome of a process that begins even before birth and spans the first two years of life. Drawing on cutting-edge research in infant eye-tracking, neuroimaging techniques and computational modelling, this book surveys the field covering both established results and the most recent advances in word learning research. Featuring chapters from international experts whose research approaches the topic from these diverse perspectives using different methodologies, this book provides a comprehensive yet coherent and unified representation of early word learning. It will be invaluable for both undergraduate and postgraduate courses in early language development as well as being of interest to researchers interested in lexical development.

Organic Chemistry of Sulfur S. Oae. 2012-12-06 In recent years organic sulfur chemistry has been growing at an even faster pace than the very rapid development in other fields of chemistry. This phenomenal growth is undoubtedly a reflection of industrial and public demands: not only was sulfur recently in overall surplus for the first time in the history of the chemical industry but it has now become a principal environmental hazard in the form of sulfur dioxide, sulfuric acid and hydrogen sulfide. Another reason, discernible in the last fifteen years, has been the desire, on the part of individual chemists and all types of research managers, to move away from the established chemistry of carbon into the less well understood and sometimes virgin chemistries of the other elements which form covalent bonds. As a result of this movement the last decade has seen the development of sulfur chemistry into a well-organized and now much better understood branch of organic chemistry. Enough of the detail has become clear to see

mechanistic interrelationships between previously unconnected reactions and with this clarification the whole subject has in turn become systematized and subdivided. The divalent sulfur chemistry of thiols, monosulfides, disulfides and polysulfides is a large area in itself, much of it devoted to oxidation-reduction and the breakage and formation of sulfur-sulfur bonds, although interesting discoveries are now being made about the reactivity of certain sulfur-carbon bonds. Of course, this area has its own massive biochemical branch involving enzymes and proteins.

Sociobiology: Beyond Nature/nurture? George W

Barlow, James Silverberg, Frank B Livingstone. 2019-06-26 To most biologists, sociobiology represents the concept of strict Darwinian individual selection married to an analytical application of ecological principles and brought to bear on social behavior in an unusually exciting and productive way. Joining the biologists are a small number of social scientists. But there are radically divergent views as to how the field should be delimited, and sociobiology is one of the most widely discussed fields in biology and anthropology today. The symposium on which this book is based was arranged by a biologist and an anthropologist. The participants, leaders in their fields, ably present contrasting and responsible views on current issues. This is the first collection of essays on sociobiology in which opposing views are aired. It is an exciting, timely book and an important historical document.

Richardson.2008-10-31 The approach that has helped thousands of learners memorize Japanese kanji has been adapted to help students with Chinese characters. Remembering Simplified Hanzi covers the writing and meaning of the 1,000 most commonly used characters in the traditional Chinese writing system, plus another 500 that are best learned at an early stage. Of critical importance to the approach found in these pages is the systematic arranging of characters in an order best suited to memory. In the Chinese writing system, strokes and simple components are nested within relatively simple characters, which can, in turn, serve as parts of more complicated characters and so on. Taking advantage of this allows a logical ordering, making it possible for students to approach most new characters with prior knowledge that can greatly facilitate the learning process.--BOOK JACKET.

Implicit Memory Stephan Lewandowsky,John C. Dunn, Kim Kirsner.2014-01-14 The first to focus exclusively on implicit memory research, this book documents the proceedings of a meeting held in Perth, Australia where leading researchers in the field exchanged ideas, data, and predictions about theoretical issues. In addition to reporting new information on a variety of topics, integrating previous findings, and proposing new theoretical approaches to implicit memory, the book also contains critical commentaries by highly regarded area specialists.

Hunger and the Sword Paul Erdkamp.2023-01-16 Roman wars, like those of later times, took place in a landscape - a landscape not only consisting of mountains, plains and rivers, but also of men tilling the soil, travelling across sea or land, or employing other means in their struggle for survival (and even happiness). This book undertakes to examine Roman wars in this context of the natural and human environment. Roman warfare is generally examined from the vierpoint of the ancient authors on whose narratives our understanding depends. As a consequence, however, Roman wars seem to have become events that took place on the pages of a book rather than in the environment of the Mediterranean world. The way Roman wars were fought was determined by the geography and climate of the Mediterranean peninsulas, by the ecological restraints on agriculture and

transport, and by the economic and social structures of the society of which the armies were a significant part. This book relates warfare to one of the main conditions of survival: it examines on the one hand the food supply of the many thousands that manned the Roman armies, and on the other the impact of war on the food supply of those people not waging war.

Small-Animal SPECT Imaging Matthew A. Kupinski,Harrison H. Barrett.2007-05-27 *Small-Animal SPECT Imaging* is an edited work derived from the first workshop on Small-Animal SPECT Imaging held January 14-16, 2004 at the University of Arizona, Tucson, AZ, USA. The overall goal of the meeting and therefore this volume is to promote information exchange and collaboration between the research groups developing systems for small-animal applications. Topics include the biomedical significance of small-animal imaging, an overview of detector technologies including scintillation cameras and semi-conductor arrays, imager design and data acquisition systems, animal handling and anesthesia issues, objective assessment of image quality, and system modeling and reconstruction algorithms.

The Language of Baklava Diana Abu-Jaber.2007-12-18 Diana Abu-Jaber's vibrant, humorous memoir weaves together delicious food memories that illuminate the two cultures of her childhood—American and Jordanian. Here are stories of being raised by a food-obsessed Jordanian father and tales of Lake Ontario shish kabob cookouts and goat stew feasts under Bedouin tents in the desert. These sensuously evoked repasts, complete with recipes, paint a loving and complex portrait of Diana's impractical, displaced immigrant father who, like many an immigrant before him, cooked to remember the place he came from and to pass that connection on to his children. The Language of Baklava irresistibly invites us to sit down at the table with Diana's family, sharing unforgettable meals that turn out to

Remote Sensing of Clouds and Precipitation Constantin Andronache.2018-02-21 This book presents current applications of remote sensing techniques for clouds and precipitation for the benefit of students, educators, and scientists. It covers ground-based systems such as weather radars and spaceborne instruments on satellites. Measurements and modeling of precipitation are at the core of weather forecasting, and long-term observations of the cloud system are vital to improving atmospheric models and climate projections. The first section of the book focuses on the use of ground-based weather radars to observe and measure precipitation and to detect and forecast storms, thunderstorms, and tornadoes. It also discusses the observation of clouds using ground-based millimeter radar. The second part of the book concentrates on spaceborne remote sensing of clouds and precipitation. It includes cases from the Tropical Rainfall Measuring Mission (TRMM) and the Global Precipitation Measurement (GPM) mission, using satellite radars to observe precipitation systems. Then, the focus is on global cloud observations from the CloudSat, Cloud-Aerosol Lidar and Infrared Pathfinder Satellite Observation (CALIPSO), including a perspective on the Earth Clouds, Aerosols, and Radiation Explorer (EarthCARE) satellite. It also addresses global atmospheric water vapor profiling for clear and cloudy conditions using microwave observations. The final part of this volume provides a perspective into advances in cloud modeling using remote sensing

Rome at War Nathan Rosenstein.2005-12-15 Historians have long asserted that during and after the Hannibalic War, the Roman Republic's need to conscript men for long-term military service helped bring about the demise of Italy's small farms and that the misery of impoverished citizens then became fuel for the social and political conflagrations of the late republic. Nathan Rosenstein challenges this claim, showing how Rome reconciled the needs of war and agriculture throughout the middle republic. The key, Rosenstein argues, lies in recognizing the critical role of family formation. By analyzing models of families' needs for agricultural labor over their life cycles, he shows that families often had a surplus of manpower to meet the demands of military conscription. Did, then, Roman imperialism play any role in the social crisis of the later second century B.C.? Rosenstein argues that Roman warfare had critical demographic consequences that have gone unrecognized by previous historians: heavy military mortality paradoxically helped sustain a dramatic increase in the birthrate, ultimately leading to overpopulation and landlessness.
