How to Build a Better Business Plan Alastair Thomson.2020-12-12 Having trouble getting the backing you need for your business plan? Waiting for calls to be returned that never are? Are the people you need to talk to always in meetings? You're not alone. Too many business owners have been sold the myth that business plans are all about finance. But if you're not getting the cash you need, odds are it's nothing to do with your financial numbers. Any halfway competent accountant will have made sure those pass muster. Here's what's really happening - either investors and lenders don't believe your plan, or it isn't compelling enough to get to the top of their approval pile. Numbers alone do a poor job of fixing either of those problems. Rather, you need to convey your enthusiasm better and provide solid evidence you'll deliver on your business plan. How To Build A Better Business Plan is not about numbers or financial models. Instead, it focuses on exactly how to create a compelling and evidence-backed business plan which gives investors and lenders the confidence they need to say yes. Inside this easy-to-follow, step-by-step action guide, you'll discover: - How investors and lenders really read a business plan...page 31 (spoiler: it's not how you think) -The real value of preparing a business plan - and this has nothing to do with raising finance...page 13 - How to handle the awkward questions you'd rather gloss over...page 36 -The one question on the mind of every potential investor or lender...page 156 -If you don't have enough of this you can kiss your business plan goodbye...page 83 -This is the biggest source of competition for most businesses...yet very few business plans set out what they're going to do about it...page 111 -And

much, much more. You also get a free, downloadable fill-in-the-blanks business plan template, making sure you cover all the bases and don't miss any opportunities to secure the support you need. Get that right and you give investors and lenders the confidence they need to back you. Instead of you having to chase them, they'll be chasing you. People will come out their meetings to take your calls. You'll have them on your side right out of the starting gate. To achieve your dreams and ambitions you need a business plan which makes it easy for investors and lenders to say yes. Why not start yours today? About the author Alastair Thomson started out as an accountant, but has since worked in CEO, Chairman and Independent Non-Executive Director roles, giving him a rare perspective from all sides of the business planning process. He has compiled, reviewed, advised on, presented or approved business plans for over 25 years as a senior executive and advisor for small and medium-sized businesses and multinational organisations.

WHO Guidelines on Tularaemia World Health Organization.2007-12-15 Tularaemia is a bacterial zoonotic disease of the northern hemisphere. The bacterium (*Francisella tularensis*) is highly virulent for humans and a range of animals such as rodents hares and rabbits. Humans can infect themselves by direct contact with infected animals by arthropod bites by ingestion of contaminated water or food or by inhalation of infective aerosols. There is no human-to-human transmission. In addition to its natural occurrence *F. tularensis* evokes great concern as a potential bioterrorism agent. *F. tularensis* subspecies *tularensis* is one of the most infectious pathogens known in human

medicine. In order to avoid laboratory-associated infection safety measures are needed and consequently clinical laboratories do not generally accept specimens for culture. However since clinical management of cases depends on early recognition there is an urgent need for diagnostic services. This first edition of WHO Guidelines on tularaemia provides background information on the disease describes the current best practices for its diagnosis and treatments in humans suggests measures to be taken in case of epidemics and provides guidance on how to handle *F. tularensis* in the laboratory. The target audience includes clinicians laboratory personnel public health workers veterinarians and any other person with an interest in zoonoses.
