Glosario Del Banco Mundial World Bank.1996 This edition of the World Bank has been revised and expanded by the Terminology Unit in the Languages Services Division of the World Bank in collaboration with the English, Spanish, and French Translation Sections. The Glossary is intended to assist the Bank's translators and interpreters, other Bank staff using French and Spanish in their work, and free-lance translator's and interpreters employed by the Bank. For this reason, the Glossary contains not only financial and economic terminology and terms relating to the Bank's procedures and practices, but also terms that frequently occur in Bank documents, and others for which the Bank has a preferred equivalent. Although many of these terms, relating to such fields as agriculture, education, energy, housing, law, technology, and transportation, could be found in other sources, they have been assembled here for ease of reference. A list of acronyms occurring frequently in Bank texts (the terms to which they refer being found in the Glossary) and a list of international, regional, and national organizations will be found at the end of

the Glossary.

Translation and Identity Michael Cronin.2006-09-27 Michael Cronin looks at how translation has played a crucial role in shaping debates about identity, language and cultural survival in the past and in the present. He explores how everything from the impact of migration on the curricula for national literature courses, to the way in which nations wage war in the modern era is bound up with urgent questions of translation and identity. Examining translation practices and experiences across continents to show how translation is an integral part of how cultures are evolving, the volume presents new perspectives on how translation can be a powerful tool in enhancing difference and promoting intercultural dialogue. Drawing on a wide range of materials from official government reports to Shakespearean drama and Hollywood films, Cronin demonstrates how translation is central to any proper understanding of how cultural identity has emerged in human history, and suggests an innovative and positive vision of how translation can be used to deal with one of the most salient issues in an increasingly borderless world.

Driving Europe Frank Schipper.2008 Today we can hardly imagine life in Europe without roads and the automobiles that move people and goods around. In fact, the vast majority of movement in Europe takes place on the road. Travelers use the car to explore parts of the continent on their holidays, and goods travel large distances to reach consumers. Indeed, the twentieth century has deservedly been characterized as the century of the car. The situation looked very different around 1900. People crossing national borders by car encountered multiple hurdles on their way. Technically, they imported their vehicle into a neighboring country and had to pay astronomical import duties. Often they needed to pass a driving test in each country they visited. Early on, automobile and touring clubs sought to make life easier for traveling motorists. International negotiations tackled the problems arising from differing regulations. The resulting volume describes everything from the standardized traffic signs that saved human lives on the road to the Europabus taking tourists from Stockholm to Rome in the 1950s. Driving Europe offers a highly original portrait of a Europe built on roads in the course of the twentieth century.

The Cost of Environmental Degradation Lelia Croitoru, Maria Sarraf.2010-07-16 How much is a cleaner environment worth? For policy makers, that question used to go largely unanswered. Many economic activities cause environmental degradation, entailing real costs to the economy and to people's welfare. Knowing the extent of these costs is crucial for identifying a country's main environmental priorities and allocating appropriate funds for environmental protection. Over the past decade, the World Bank has initiated a systematic effort to measure the costs of environmental degradation in the Middle East and North Africa, shedding new light on their magnitude and on the need for policy changes. In many cases, these costs were found to be surprisingly large. 'The Cost of Environmental Degradation: Case Studies from the Middle East and North Africa' brings together the best case studies of this program and summarizes their policy impacts at the national and regional levels. The case studies quantify monetarily the annual damage due to environmental degradation and express these estimates as percentages of the countries' gross domestic product. The studies use the most recent environmental valuation methods to estimate the economic costs resulting from air pollution, water degradation, deforestation, and land degradation. Uniquely, the book dedicates a case study to value the costs of environmental degradation resulting from an oil spill and demolition waste in times of conflict. The studies then illuminate the concrete

World Employment and Social Outlook INTERNATIONAL LABOUR OFFICE..2021-06-02 This year's World Employment and Social Outlook: Trends examines global and regional trends in employment, unemployment, labour force participation and productivity, as well as dimensions of job quality such as employment status, informal employment and working poverty. It also provides extensive analysis of the crisis's varied impact on enterprises and workers.The report forecasts that employment recovery, though strong, will be insufficient to close the gaps. Workers whose labour market position was disadvantageous prior to the crisis - women, young people, migrants, informal workers and workers in lower-skilled occupations - suffered disproportionately. The report proposes a human-centred recovery strategy to avoid scarring of global labour markets for the years to come.

British and French Colonialism in Africa, Asia and the Middle East James R. Fichter.2019-08-14 This book examines the connections between the British Empire and French colonialism in war, peace and the various stages of competitive cooperation between, in which the two empires were often frères ennemis. It argues that in crucial ways the British and French colonial empires influenced each other. Chapters in the volume consider the two empires' connections in North, West and Central Africa, as well as their entanglement at sea in the Mediterranean Sea, Persian Gulf and South China Sea. Also analysed are their mutual engagement with Islam in both the Hajj and various religiously inflected colonial revolts, their mutually-informed systems of administration in the New Hebrides and generally, and the interconnected ways the two empires fought World War II and decolonization. By uniting historians of France and her colonies with historians of Britain and her colonies, this volume speaks to a broad international and imperial history audience.
