The Political Economy of Social Welfare Policy in Africa Rinie Schenk,Mimie Sesoko,Leila Patel,Johannes John-Langba,Tanusha Raniga,Ronald Addinall.2019-04-18 The Political Economy of Social Welfare Policy in Africa: Transforming Policy through Practice is a groundbreaking text that uses a political economy and human rights lens to analyse and critique social welfare policy in selected countries in Africa. Tracing the political transformation of South Africa and other sub-Saharan countries, it provides the reader with critical insight into how social welfare policy evolved during periods of colonial and post-colonial governance regimes and the contemporary period characterised by neoliberal globalisation. The text focuses on the interdependence of economic and social development policies and processes to advance human development and protect the basic human rights of all, especially the poorest and most marginalised.

Getting Started with Neurofeedback John N. Demos.2005-01-17 What is neurofeedback? Neurofeedback is founded upon computer technology joined with auxiliary equipment that can measure the metabolic activity of the cerebral cortex. Neurofeedback training combines the principles of complementary medicine with the power of electronics. It is a comprehensive system that promotes growth change at the cellular level of the brain and empowers the client to use his or her mind as a tool for personal healing.Until now, there has not been a single comprehensive yet easy-to-understand guide for clinicians interested in adding neurotherapy to their practice. Getting Started with Neurofeedback is a step-by-step guide for professional health care providers who wish to begin with neurotherapy, as well as experienced clinicians who are looking for a concise treatment guide.This book answers essential questions such as: How does neurotherapy work?, What is the rationale for treatment? When is neurotherapy the treatment of choice? Why should I add it to my already existing healthcare practice? The author also answers questions important to establishing a successful practice such as: What kind of training should clinicians get? What kind of equipment should clinicians buy? How can clinicians add neurofeedback to their existing practice?The first part of the book introduces the reader to the world of neurofeedback, its history and scientific basis. Case studies help clinicians apply what they are learning to their existing practice. Demos takes the mystery out of the assessment process and charts and examples of topographical brain maps (in full color) serve as teaching aids. Later in the book, advanced techniques are explained and

demonstrated by additional case studies. The reader is shown how to use biofeedback for the body to augment neurofeedback training as well as being taught to work with the body and acquire a basic knowledge of complementary medicine. The book concludes by offering clinicians practical suggestions on marketing their expanded practice, purchasing equipment, finding appropriate training and supervision, and keeping up with the ever-growing profession of neurofeedback. Research and theory unite to demonstrate the clinical underpinnings for this exciting new modality. Some images in the ebook are not displayed owing to permissions issues.

Social Development James Midgley. 1995-08-03 The social development approach seeks to integrate economic and social policies within a dynamic development process in order to achieve social welfare objectives. This first comprehensive textbook on the subject demonstrates that social development offers critically significant insights for the developed as well as the developing world. James Midgley describes the social development approach, traces its origins in developing countries, reviews theoretical issues in the field and analyzes different strategies in social development. By adding the developmental dimension, social development is shown to transcend the dichotomy between the residualist approach, which concentrates on targeting resources to the most needy, and the institutional approach which urges extensive state involvement in welfare.

Skills Shortages in South Africa Johan Erasmus, Mignon Breier. 2009 Skills shortages in South Africa are widely seen as a major obstacle to the achievement of targeted economic growth rates. Yet there is some dispute as to the nature and extent of these shortages, given the large number of unemployed graduates. The case studies presented here explore the question of shortage in nine key professions and artisanal trades, and find evidence of skills scarcity in most fields. The case studies provide insight into the reasons for shortages and surpluses in relation to South Africa's own context and history. They also consider the international market for knowledge and skills, in which South African qualifications are highly

prized. The monograph emanates from a study on sector specific research and related skills requirements commissioned by the South African Department of Labour in 2006. It formed part of a wider research project on scarce and critical skills related to the National Skills Development Strategy and the National Industrial Policy Framework of 2007, for which the Human Sciences Research Council led a research consortium comprising the Development Policy Research Unit at the University of Cape Town and the Sociology of Work Unit at the University of the Witwatersrand.

Person-Centred Facilitation Hanka Dorothee Grobler,C. J. Schenck,R Schenck,Rembuluwani Paul Mbedzi.2013-10-31 How can social workers, psychologists and counsellors improve communication with their clients? What can these facilitators do to enhance their listening and empathic skills? How can they create an environment of trust in which clients - be they individuals, groups, families, or communities - can develop and grow effectively? *Person-Centred Facilitation* presents the theory and practice of the person-centred approach to facilitating counselling, as developed by Carl Rogers. The text provides an introduction to the person-centred approach in relation to individuals, groups, families and communities. It offers a solid theoretical grounding which supports both academic learning and applied practice, and guides readers' understanding and self-development. Revised and updated, the fourth edition integrates values from an African cultural perspective, and reflects the importance of social justice as an element of the developmental counselling process. It offers a wealth of South African case studies, an entirely new section on family counselling, and an expanded focus on group work counselling. Other expanded areas include aspects of constructivism; cross-cultural communication; people in conflict, and the self of the facilitator, the latter two aspects having been integrated into the text of the various chapters.

Handbook of International Social Work Lynne M. Healy, Rosemary J. Link. 2012 Global knowledge is increasingly essential for all aspects of social work. Today's professionals respond to concerns including permeable borders, the upheavals of war, displaced workers, natural disasters, international adoption, and human trafficking. Everywhere, social workers work with service users and colleagues from diverse cultures and countries. Globally relevant concepts such as human rights, development, and inclusion offer new perspectives to enhance policy and practice and facilitate the international exchange of ideas. This handbook is the first major reference text to provide a solid foundation of knowledge for students and researchers alike. The extensive collection of 73 chapters confirms the integral and necessary nature of international social work knowledge to all areas of practice, policy, and research. Chapters systematically map the key issues, organizations, competencies, training and research needs, and ethical guidelines central to international social work practice today, emphasizing the linkages among social work, development, and human rights practice. In-depth country case studies and policy examples encourage readers to understand how their practice in social work touches on international issues, regardless of whether the work is done at home or abroad. Representing all regions of the world, a wide range of contributors that are leaders in their fields have put together an exhaustive collection that represents the state-of-play of international social work today.

Decolonizing Social Work Mel Gray, John Coates, Michael Yellow Bird, Tiani Hetherington. 2016-05-13 Riding on the success of Indigenous Social Work Around the World, this book provides case studies to further scholarship on decolonization, a major analytical and activist paradigm among many of the world's Indigenous Peoples, including educators, tribal leaders, activists, scholars, politicians, and citizens at the grassroots level. Decolonization seeks to weaken the effects of colonialism and create opportunities to promote traditional practices in contemporary settings. Establishing language and cultural programs; honouring land claims, teaching Indigenous history, science, and ways of knowing; self-esteem programs, celebrating ceremonies, restoring traditional parenting approaches, tribal rites of passage, traditional foods, and helping and healing using tribal approaches are central to decolonization. These insights are brought to the arena of international social work still dominated by western-based approaches. Decolonization draws attention to the effects of globalization and the universalization of education, methods of practice, and international 'development' that fail to embrace and recognize local knowledges and methods. In this volume, Indigenous and non-Indigenous social work scholars examine local cultures, beliefs, values, and practices as central to decolonization. Supported by a growing interest in spirituality and ecological awareness in international social work, they interrogate trends, issues, and debates in Indigenous social work theory, practice methods, and education models including a section on Indigenous research approaches. The diversity of perspectives, decolonizing methodologies, and the shared struggle to provide effective professional social work interventions is reflected in the international nature of the subject matter and in the mix of contributors who write from their contexts in different countries and cultures, including Australia, Canada, Cuba, Japan, Jordan, Mexico, New Zealand, South Africa, and the USA.

Social Work in Social Change Nicci Earle. 2008 This study forms part of a series of studies on professions and professional education being conducted by the HSRC's research programme on Education, Science & Skills Development. It follows a pilot study on medical doctors, published in 2006 entitled *Doctors in a Divided Society: The profession and education of medical practitioners in South Africa*. Like the other studies in the series, this study involved developing an understanding of the professional milieu and professional labour market of social workers. As the implementers of government social policy, social work professionals have been at the forefront of grappling with the practicalities of the changes in focus, approach and methods of social security and social service delivery since 1994. It examines developments in the education and training of social workers within the democratic dispensation, the most significant of which is the development of a national, standardised Bachelor of Social Work degree. The study

also reveals that the dominant profile in student enrolment and graduation statistics has changed from white female to African female, and that enrolment has increased significantly. However, the study also shows that graduation trends have been negative and losses due to emigration are an additional concern. Given the scarcity of these professionals against the demand for their services, understanding the factors that contribute to this picture are critical to effective intervention.

Social Work and Social Development James Midgley, Amy Conley. 2010-05-19 Social workers have been involved in social development for many years, but it is only recently that these ideas have been explicitly applied to social work practice. The result is that a new and distinctive approach to social work practice known as developmental social work has emerged. Developmental social work emphasizes the role of social investment in professional practice. These investments meet the material needs of social work's clients and facilitate their full integration into the social and economic life of the community. Developmental social workers believe that client strengths and capabilities need to be augmented with public resources and services if those served by the profession are to live productive and fulfilling lives. Although developmental social work is inspired by international innovations, particularly in the developing countries, it is highly relevant to practice in the United States and other Western nations. In the first book to lay out a clear framework for developmental social work practice, chapters will focus on the traditional fields of social work practice, showing how social investment strategies can be adopted by social workers in their daily practice with populations including families and children, people with mental illness, homeless youth, people with disabilities, the elderly, and those in the correctional system. By facilitating clients' full social and economic participation through a variety of strategies, such as microenterprise or asset-building programs, practitioners can help bring about meaningful changes in clients' lives and throughout their communities. The editors and contributors offer a highly original exposition of developmental social work theory and practice, providing a definitive guide to an emerging and exciting new approach to practice.
