

Nursing Care Plan For Deficient Community Health

All-in-one Care Planning Resource Pamela L. Swearingen.2004 This exciting new resource contains selected care plans for pediatric, maternal, and psychiatric nursing in addition to medical-surgical nursing care plans - 101 care plans in all. This allows students to use one book throughout the curriculum. Care plans are organized in four separate sections (medical-surgical, pediatric, maternal, and psychiatric) and within each section alphabetically by disorder/condition. The open and attractive two-color design, the latest NANDA nursing diagnoses, and desired outcomes featuring specific timeframes, make this the most student-friendly and clinically relevant nursing care plan book. The unique four books in one approach includes pediatric, maternal, and psychiatric nursing care plans in addition to medical-surgical care plans. Written by clinical experts in each subject area to ensure the most current, accurate, and clinically-relevant content available. Each care plan employs a consistent format of: Overview, Health Care Setting, Assessment, Diagnostic Tests, Nursing Diagnoses, and Patient-Family Teaching and Discharge Planning. Detailed rationales for each nursing intervention help students to apply concepts to clinical practice. An open and attractive two-color design facilitates quick and easy retrieval of information. Nursing interventions and rationales are listed in a clear two-column format to make the information more accessible. Related NIC interventions and NOC outcomes are listed for each nursing diagnosis. The Patient-Family Teaching and Discharge Planning section highlights key patient education topics, as well as resources for further information. Health Care Setting is specified for each care plan, since these conditions are treated in various settings such as hospital, primary care, long-term care facility, community, and home care. Outcome criteria with specific timelines enable nurses to set realistic goals for nursing outcomes and provide quality, cost-effective care. Includes the most recent NANDA Taxonomy II nursing diagnoses. Separate care plans on Pain and End-of-Life Care focus on palliative care for patients with terminal illnesses, as well as relief of acute and chronic pain.

Home Health Nursing Karen E. Monks.2002-10-22 This unique, spiral-bound handbook is compact, portable, and written with busy home health nurses in mind! Organized by body system, it offers instant advice on assessment and care planning for the disorders home health nurses are likely to encounter. Providing assessment guides for all body systems, the home environment, and the client's psychological status, it includes full care plans for over 50 illnesses and conditions most commonly encountered in the home. Each plan lists nursing diagnoses, short- and long-term expected outcomes, nursing interventions, and client caregiver interventions. Care plans are organized by body systems to allow for quick retrieval of information. Both short-term and long-term outcomes are included in the care plans to aid evaluation of the care provided. Detailed assessment guidelines are provided for all body systems to facilitate complete and comprehensive client examinations. Guidelines for environmental and safety assessments aid in the appraisal and improvement of clients' living conditions. Client and caregiver interventions are outlined in the care plans to promote active client participation in self-care. The convenient pocket size makes transportation and use convenient to home health nurses. Appendices on documentation guidelines, laboratory values, medication administration, home care resources, and standard precautions provide quick access to useful home care information. Related OASIS items are identified in the assessment section, and ICD-9 diagnostic codes in the care plans section assist with proper home care documentation. Visit frequency and duration schedules are suggested within each care plan to assist nurses in evaluating and planning care. NANDA nursing diagnoses are consistent with the latest 2001-2002 nomenclature. An increase in suggested therapy referrals within the care plans and in a new appendix helps nurses identify indicators for specialized services. A fully updated Resources Appendix includes websites for easy access to home health service information.

Nursing Care Plans Meg Gulanick.1994 A comprehensive compilation of care plans specific to patient problems requiring hospitalization. Timely information assists the nurse in the development, deliverance, and documentation of patient care.

Pediatric and Postpartum Home Health Nursing Kathryn A. Melson,Marie S. Jaffe.1997 This compact and portable reference assists nurses in planning and implementing nursing care for pediatric clients in the home setting. Organized by body system, it includes care plans for 36 pediatric disorders most commonly treated at home. Each care plan lists nursing diagnoses, short-term and long-term expected outcomes, nursing interventions, and client and family/caregiver interventions. Since the client and/or family is an active participant in care, client teaching is emphasized throughout.

Community Assessment Reference Guide for Community Health Nursing Mary Jo Dummer Clark.2008 This collection of 38 assessment tools and inventories helps nurses provide excellent nursing care for individuals, families, and population groups. Assessment tools guide nurses in assessing health status, while inventories are checklists of interventions or risk factors for selected community health problems. These tools provide direction for the development of nursing diagnoses, planning interventions, and evaluating the outcomes of care.

Nursing Care Plans Meg Gulanick.2003 Nursing Care Plans includes 195 care plans for commonly encountered clinical problems in medical-surgical nursing. Written for students and/or clinicians, this book reflects the most current practice and professional standards in nursing, yet its level and format are student friendly.

Nursing Care Plans Marilyn E. Doenges,Mary Frances Moorhouse.2000 Doenges, a clinical specialist, Moorhouse, a nurse consultant, and Geissler, a contract practitioner nurse consultant, all working out of Colorado Springs, Colorado, designed this text for both the practicing nurse and nursing student as a reference tool to use in acute care, community and homecare settings. Following introductory chapters on current issues in healthcare and care plan construction, the book is organized by body systems, presenting plans of care including information to assist the nurse in providing holistic care. The enclosed CD-ROM includes sample care plans for 172 disorders which can be customized to fit specific patient needs. Annotation copyrighted by Book News, Inc., Portland, OR

Introduction to Community-based Nursing Roberta Hunt.2009 This text presents foundational concepts pivotal to delivering nursing care in the community setting, with specific attention to the NLN competencies for community-based nursing care. The author examines the variety of settings and situations in which the community-based nurse provides care, highlighting cultural diversities in the patient populations, and emphasizing interactions between the individual and the family. This edition includes more information on disaster management and communicable diseases and expanded, updated Medicare/Medicaid guidelines. A companion Website on thePoint will include student activities, assessment guidelines, and forms. Instructors will have access to an Instructor's Manual, PowerPoint slides, and an expanded testbank.

Nursing Diagnoses 2012-14 NANDA International.2014-02-05 A nursing diagnosis is defined as a clinical judgment about individual, family or community responses to actual or potential health problems or life processes which provide the basis for selection of nursing interventions to achieve outcomes for which the nurse has accountability (NANDA-I, 2009). Accurate and valid nursing diagnoses guide the selection of interventions that are likely to produce the desired treatment effects and determine nurse-sensitive outcomes. Nursing diagnoses are seen as key to the future of evidence-based, professionally-led nursing care - and to more effectively meeting the need of patients. In an era of increasing electronic patient health records, standardized nursing terminologies such as NANDA-I, NIC and NOC provide a means of collecting nursing data that are systematically analysed within and across healthcare organizations and provide essential data for cost/benefit analysis and clinical audit. Nursing Diagnoses: Definitions and Classification is the definitive guide to nursing diagnoses, as reviewed and approved by NANDA-I. Each nursing diagnosis undergoes a rigorous assessment process by NANDA-I's Diagnosis Development Committee, with stringent criteria used to indicate the strength of the underlying level of evidence. Each diagnosis comprises a label or name for the diagnosis, a definition, defining characteristics, risk factors and/or related factors. Many diagnoses are further qualified by terms such as risk for, effective, ineffective, impaired, imbalanced, self-care deficit, readiness for, disturbed, decreased, etc. The 2012-2014 edition is arranged by concept according to Taxonomy II domains, i.e. Health promotion, Nutrition, Elimination and exchange, Activity/Rest, Perception/Cognition, Self-perception, Role relationships, Sexuality, Coping/ Stress tolerance, Life principles, Safety/protection, Comfort, and Growth/development. The 2012-2014 edition contains revised chapters on NANDA-I taxonomy, and slotting of diagnoses into NANDA & NNN taxonomies, diagnostic reasoning & conceptual clarity, and submission of new/revised diagnoses. New chapters are provided on the use of nursing diagnoses in education, clinical practice, electronic health records, nursing & health care administration, and research . A companion website hosts related resources. Key features 2012-2014 edition arranged by diagnostic concepts Core references and level of evidence for each diagnosis New chapters on appropriate use of nursing diagnoses in clinical practice, education, administration and electronic health record 16 new diagnoses 11 revised diagnoses Aimed at students, educators, clinicians, nurse administrators and informaticians Companion website available, including a video on assessment, clinical reasoning and diagnosis

Swearingen's All-In-One Nursing Care Planning Resource, 5th Edition, features over 100 care plans including medical-surgical, maternity/OB, pediatrics, and psychiatric-mental health to help you care for patients in any setting. This new edition is the first in the market to include a unique, interprofessional, patient problem focus that teaches students how to speak to patients in conversational terms rather than in nursing-specific language. New non-medical-surgical care plans and updated content throughout reflect the latest evidence-based treatment guidelines for national and international clinical practice. Plus, with its clear approach, easy-to-use format, and straightforward rationales, you can use this one book throughout their entire nursing curriculum! Bolded and highlighted Safety Icons corresponds to the safety competency of the Quality and Safety Education for Nurses (QSEN) initiative for easier recognition. Care plans for all four major clinical areas include medical-surgical, OB/maternity, pediatric, and psychiatric-mental health nursing care plans. A consistent format for each care plan enables you to perform faster searches, with headings for Overview/Pathophysiology, Health Care Setting, Assessment, Diagnostic Tests, Patient Problems, Desired Outcomes, Interventions with Rationales, and Patient-Family Teaching and Discharge Planning. Prioritized patient problems are listed in order of importance and physiologic patient needs. Detailed rationales for each nursing intervention help you apply concepts to specific patient situations in clinical practice. Full-color design makes the book more user friendly and includes color-coded tabs and improved cross-referencing and navigation aids for faster information retrieval. NEW! UNIQUE! Interprofessional patient problems focus familiarizes you with how to speak to patients and other medical colleagues in the consistent interprofessional language of patient problems, rather than the nursing-specific language of nursing diagnosis. NEW! Care plans helps you to support the lesbian, gay, bisexual, transgender, queer/questioning, or intersex patient. NEW! Updated content throughout reflects the latest evidence-based treatment guidelines and national and international clinical practice guidelines.
