Developmental Evaluation Exemplars Michael Quinn Patton, Kate McKegg, Nan Wehipeihana. 2015-11-16 Responding to evaluator and instructor demand, this book presents a diverse set of high-quality developmental evaluation (DE) case studies. Twelve insightful exemplars illustrate how DE is used to evaluate innovative initiatives in complex, dynamic environments, including a range of fields and international settings. Written by leading practitioners, chapters offer a rare window into what it takes to do DE, what roles must be fulfilled, and what results can be expected. Each case opens with an incisive introduction by the editors. The book also addresses frequently asked questions about DE, synthesizes key themes and lessons learned from the exemplars, and identifies eight essential principles of DE. See also Michael Quinn Patton's *Developmental Evaluation*, the authoritative presentation of DE.

The Coding Manual for Qualitative Researchers Johnny Saldana. 2012-10-04 The Second Edition of Johnny Saldana's international bestseller provides an in-depth guide to the multiple approaches available for coding qualitative data. Fully up to date, it includes new chapters, more coding techniques and an additional glossary. Clear, practical and authoritative, the book: - describes how coding initiates qualitative data analysis - demonstrates the writing of analytic memos - discusses available analytic software - suggests how best to use *The Coding Manual for Qualitative Researchers* for particular studies. In total, 32 coding methods are profiled that can be applied to a range of

research genres from grounded theory to phenomenology to narrative inquiry. For each approach, Saldaña discusses the method's origins, a description of the method, practical applications, and a clearly illustrated example with analytic follow-up. A unique and invaluable reference for students, teachers, and practitioners of qualitative inquiry, this book is essential reading across the social sciences.

Blue Marble Evaluation Michael Quinn Patton.2019-09-30 As a transdisciplinary profession, evaluation has much to offer to global change interventions that work toward a sustainable future across national boundaries, sectors, and issues. This book introduces Blue Marble evaluation, which provides a framework for developing, adapting, and evaluating major systems change initiatives involving complex networks of stakeholders. Michael Quinn Patton demonstrates how the four overarching principles and 12 operating principles of this innovative approach allow evaluators, planners, and implementers to home in on sustainability and equity issues in an intervention. Compelling case examples, bulleted review lists, charts, and 80 original exhibits and graphics connect the global and local, the human and ecological. Rooted in utilization-focused, developmental, and principles-focused evaluation, Blue Marble evaluation is designed to tackle problems outside the reach of traditional evaluation practice.

Qualitative Evaluation and Research Methods Michael Quinn Patton.1990-02 Revised and updated textbook on qualitative methodology for students, researchers and practitioners, with examples to clarify concepts that include problem identification, participant observation, interviewing, document analysis, triangulation, data analysis and reporting.

Evaluation Methodology Basics E. Jane Davidson.2005 Evaluation Methodology Basics introduces evaluation by focusing on the main kinds of 'big picture' questions that evaluations usually need to answer, and how the nature of such questions are linked to

evaluation methodology choices. The author: shows how to identify the right criteria for your evaluation; discusses how to objectively figure out which criteria are more important than the others; and, delves into how to combine a mix of qualitative and quantitative data with 'relevant values' (such as needs) to draw explicitly evaluative conclusions.

comprehensive and systematic book on qualitative research and

evaluation methods, inquiry frameworks, and analysis options

available today. Now offering more balance between applied

research and evaluation, this Fourth Edition illuminates all

aspects of qualitative inquiry through new examples, stories, and

cartoons; more than a hundred new summarizing and

synthesizing exhibits; and a wide range of new highlight

sections/sidebars that elaborate on important and emergent

issues. For the first time, full case studies are included to

illustrate extended research and evaluation examples. In addition,

Family Sexual Abuse Michael Quinn Patton. 1991-02-26 In the

battle against family sexual abuse, most studies and research

findings have examined the problem on a national level--but what

about the studies that have been done at the local level? With contributions from practitioners and researchers, *Family Sexual Abuse* deftly explores the results of eleven research projects covering such issues as sibling incest, the background of sexual offenders, effects of sexual abuse on children, effects of offender removal from the home, effects of reunification, and the prognosis for incest offenders after treatment. While large, national studies provide information on major trends in family sexual abuse, this five-year look at Minnesota studies reflects the real impact of interventions in the context of local practitioners dealing with local problems. As such, these studies clearly demonstrate the significant contributions small studies and specific program evaluations can make to both research and practice in the field of family sexual abuse. *Family Sexual Abuse* is a resource no practitioner or researcher in this field can afford to be without. This book, in contrast to most studies and research findings in the field of family sexual abuse, which examine the problem on a national level, presents the findings of 11 frontline enquiries conducted by practitioners and researchers under the auspices of the Family Sexual Abuse Project (FSAP) in Minnesota in the period 1985-1990. It is precisely this focus on the application of current knowledge (and the lack of it) interacting with changing social policy at a local level which provides this book with its distinctive contribution. --*Journal of the British Association for Counselling* In comparison to most edited volumes, these articles are consistently well-written. . . . This volume is worthwhile because these articles do not pretend to tell a simple story. In his conclusion, Michael Patton argues that the composite findings weave a 'mosaic of enormous complexity,' and in doing so, these articles raise many questions and encourage much thought. --*Journal of Marriage and the Family* This is an extremely useful book for practitioners in the field of child sexual abuse, with the bonus of practical advice for both researchers and practitioners on how to study the problems of child sexual abuse. --*Child Abuse*

Review The spirit in which this book is written is the essence of a positive approach to research dissemination. It aims to report on and share with a wide audience the findings of eleven small-scale research studies undertaken in the state of Minnesota between 1985 and 1990. The book's appeal lies in its focus on wider application of knowledge to local policy and practice in the field of child protection. A major feature of the work is the spirit of collaboration and openness to peer review in which the work was undertaken. . . .The book's rather dry title undervalues its rich and varied content. . . .Each chapter stands on its own or the book can be read as a whole. Its strength is in the variety of material, methodologies, and issues presented. . . .Of particular interest to the reader is the study which investigates the extent of abuse among American Indian families. The work was set up within an ethically sensitive framework and it provides an excellent model for the development of an anti-racist research methodology. Other chapters focus on the provocative issues of abuse indicators, intergenerational and sibling abuse. The accounts provide a clear, unambiguous account of work undertaken and they raise important, if uncomfortable, questions about each of the areas under discussion. . . .There are five main strengths of this book. First, it challenges older and newer myths about the extent and nature of sexual abuse; second, it makes a considered analysis of the effects of abuse from a range of perspectives; third, it adds to our understanding of the reasons why men and women sexually abuse their children; fourth, it evaluates a range of treatment models, and finally, it clearly states issues for policy, practice, and further research. The book also raises important issues in relation to methodology, namely the need to triangulate methods and to have specialist training for researchers involved in this area of research so that the voice of survivors can be heard and attended to. The book will be of interest to a wide audience. It merits extensive readership and debate. It should be able to achieve both, not least because of its

accessible and thought-provoking style. --British Journal of Social Work This book breaks new ground by investigating the impact of sexual abuse interventions at the local level. This five-year look at 11 independent research projects in Minnesota encompasses the spectrum of issues, including the identification and effects of sexual abuse, sibling incest, the effects of family reunification, and the treatment of sexual offenders and abuse survivors. A significant contribution to the field . . . --Child Welfare

Utilization-Focused Evaluation Michael Quinn Patton.1986 The second edition of Patton's classic text retains the practical advice, based on empirical observation and evaluation theory, of the original. It shows how to conduct an evaluation, from beginning to end, in a way that will be useful -- and actually used. Patton believes that evaluation epitomizes the challenges of producing and using information in the information age. His latest book includes new stories, new examples, new research findings, and more of Patton's evaluation humour. He adds to the original book's insights and analyses of the changes in evaluation during the past decade, including: the emergence of evaluation as a field of professional practice; articulation of standards for evaluation; a methodological synthesis of the qualitative versus quantitative debate; the tremendous growth of 'in-house' evaluations; and the cross-cultural development of evaluation as a profession. This edition also incorporates the considerable research done on utilization during the last ten years. Patton integrates diverse findings into a coherent framework which includes: articulation of utilization-focused evaluation premises; examination of the stakeholder assumption; and clarification of the meaning of utilization. --Publisher description.

Transformative Research and Evaluation Donna M.

Mertens.2008-10-29 From distinguished scholar Donna M.

Mertens, this core book provides a framework for making methodological decisions and conducting research and evaluations that promote social justice. The transformative paradigm has emerged from - and guides - a broad range of social and behavioral science research projects with communities that have been pushed to the margins, such as ethnic, racial, and

sexual minority group members and children and adults with disabilities. Mertens shows how to formulate research questions based on community needs, develop researcher-community partnerships grounded in trust and respect, and skillfully apply quantitative, qualitative, and mixed-methods data collection strategies. Practical aspects of analyzing and reporting results are addressed, and numerous sample studies are presented. An ideal core book for graduate courses, or practitioner resource, the book includes: Commentary on the sample studies that explains what makes them transformative. Explanations of key concepts related to oppression, social justice, and the role of research and evaluation. Questions for Thought to stimulate critical self-reflection and discussion. Advance chapter organizers and chapter summaries. The book is intended for graduate students in psychology, education, social work, sociology, and nursing, as well as practicing researchers and program evaluators. It will serve as a core book or supplement in Research Methods, Program Evaluation, and Community Psychology courses. *Essentials of Utilization-Focused Evaluation* Michael Quinn Patton.2011-08-22 Provides both an overall framework and concrete advice for how to conduct useful evaluations that actually get used. - preface.

Outcome Harvesting Ricardo Wilson-Grau.2018-11-01 Are you a grant maker, manager or evaluator who must assess your work to improve as well as be accountable for the use of resources and results? Does the project, program or organization you fund, manage or evaluate contend with substantial uncertainty about what to do and what will be the results? Do you thus experience constant change and unexpected and unforeseeable actors and factors in your intervention? Do you need to know what you are achieving and how in real time? And therefore, do you seek an alternative to conventional monitoring and evaluation of social change results? If yes, then you are the audience for this book. Beginning in 2002, working closely with co-evaluators and commissioners of evaluations, the author developed Outcome Harvesting to enable evaluators, grant makers, and managers to identify, formulate, verify, and make sense of changes that interventions have influenced in a broad range of cutting-edge innovation and development projects and programs around the world. Over these years, he led Outcome Harvesting evaluative exercises involving almost 500 non-governmental organizations, networks, government agencies, funding agencies, community-based organizations, research institutes and university programs. In over fifty evaluations, with forty co-evaluators he has harvested thousands of outcomes on six continents. Outcome Harvesting has proven useful in evaluations of a great diversity of initiatives: human rights advocacy, political, economic and environmental advocacy, arts and culture, health systems, information and communication technology, conflict and peace, water and sanitation, taxonomy for development, violence against women, rural development, organic agriculture, participatory democracy, waste management, public sector reform, good governance, eLearning, social accountability, and business competition, amongst others. In this book, the author explains the steps of

Outcome Harvesting and how to customize them according to the nine underlying principles. He shares his experience and gives practical advice on how to work with Outcome Harvesting and remain true to its essential features.

Qualitative Research Practice Jane Ritchie, Jane

Lewis. 2003-02-19 'An excellent introduction to the theoretical, methodological and practical issues of qualitative research... they deal with issues at all stages in a very direct, clear, systematic and practical manner and thus make the processes involved in qualitative research more transparent' - Nyhedsbrev 'This is a how to book on qualitative methods written by people who do qualitative research for a living.... It is likely to become the standard manual on all graduate and undergraduate courses on qualitative methods' - Professor Robert Walker, School of Sociology and Social Policy, University of Nottingham What exactly is qualitative research? What are the processes involved and what can it deliver as a mode of inquiry? Qualitative research is an exciting blend of scientific investigation and creative discovery. When properly executed, it can bring a unique understanding of people's lives which in turn can be used to deepen our understanding of society. It as a skilled craft used by practitioners and researchers in the 'real world'; this textbook illuminates the possibilities of qualitative research and presents a sequential overview of the process written by those active in the field. Qualitative Research Practice: - Leads the student or researcher through the entire process of qualitative research from beginning to end - moving through design, sampling, data collection, analysis and reporting. - Is written by practising researchers with extensive experience of conducting qualitative research in the arena of social and public policy - contains numerous case studies. - Contains plenty of pedagogical material including chapter summaries, explanation of key concepts, reflective points for seminar discussion and further reading in each chapter - Is structured and applicable for all courses in

qualitative research, irrespective of field. Drawn heavily on courses run by the Qualitative Unit at the National Centre for Social Research, this textbook should be recommended reading for students new to qualitative research across the social sciences.

Pedagogy of Evaluation Michael Quinn Patton.2017-10-16 Pedagogy is the study of teaching. Pedagogy of evaluation entails examining how and what evaluation teaches. This volume is inspired by and builds on the works of Paulo Freire, especially his classic, *Pedagogy of the Oppressed*. Freire understood and taught that all interactions between and among people are pedagogical; something is always being taught, conveyed, and proselytized. It follows that all evaluation approaches constitute a pedagogy of some kind. All evaluation teaches something--Page [4] of cover.

This monograph aims to help the diabetologist understand this troublesome condition.

Creative Evaluation Michael Quinn Patton.1987-12 Creative Evaluation is both entertaining and stimulating reading for the practising evaluator looking for fruitful new ways of approaching evaluation research, training and consultation. The author's basic themes include the necessity for evaluators to recognize the limitations of routine response patterns, the value of situational responsiveness and the need to test new approaches and

perspectives. Patton lets readers discover their own creative potential by guiding them towards expanding their options through a new awareness of the standard operating procedures evaluators fall back on and their usual way of doing things. This revised second edition is geared more closely to the professional evaluator than the first edition.

Facilitating Evaluation Michael Quinn Patton.2017-10-23 Michael Quinn Patton's *Facilitating Evaluation: Principles in Practice* is the first book of its kind to explain in depth and detail how to facilitate evaluation processes with stakeholders. Using the author's own stories of his experiences as an evaluation facilitator, the book illustrates the five evaluation facilitation principles that are the organizing framework for addressing how to work with stakeholders to generate evaluation questions, make decisions among methods, interpret findings, and participate in all aspects of evaluation. Ultimately, this book will help readers perform facilitation to enhance the relevance, credibility,

meaningfulness, and utility of evaluations. A must-read for anyone considering a high-impact evaluation! -Margaret Lombe, Boston College

Utilization-Focused Evaluation Michael Quinn Patton.1997 The latest edition of this bestselling book has been completely revised and updated to provide the most comprehensive review and integration ever done of the vast literature on evaluation use and practice.

Practical Evaluation Michael Quinn Patton.1982-12-01 Patton demonstrates that the main failing of most evaluations is a lack of practicality. They fail to be cheap, accurate, attuned to the differences between different programmes or to provide useful, realistic policy alternatives for decision-makers. Patton discusses the major stages of the evaluation process, describing evaluation design, measurement, analysis and reporting. Using his own field and workshop experiences, he provides a new vision of evaluation that emphasizes the elements of feasibility, efficiency, and utility.

Applied Qualitative Research Design Margaret R. Roller,Paul J. Lavrakas.2015-02-23 This unique text provides a comprehensive framework for creating, managing, and interpreting qualitative research studies that yield valid and useful information. Examples of studies from a wide range of disciplines illustrate the strengths, limitations, and applications of the primary qualitative methods: in-depth interviews, focus group discussions, ethnography, content analysis, and case study and narrative research. Following a consistent format, chapters show students and researchers how to implement each method within a paradigm-neutral and flexible Total Quality Framework (TQF) comprising four interrelated components: Credibility, Analyzability, Transparency, and Usefulness. Unlike other texts that relegate quality issues to one or two chapters, detailed discussions of such crucial topics as construct validity, interresearcher reliability, researcher bias, and verification strategies are featured throughout. The book also addresses

applications of the TQF to the writing, review, and evaluation of qualitative research proposals and manuscripts. Pedagogical Features *Summary tables that highlight important content, such as the application of a method to vulnerable or hard-to-reach populations. *Case studies that illustrate TQF standards in practice for each method. *Guidelines for effective documentation (via thick descriptions) of each type of study. *End-of-chapter discussion topics, exercises, and suggested further reading and Web resources. *Chapters open with a preview and close with a bulleted summary of key ideas. *Extensive glossary. 2021 Winner-American Association for Public Opinion Research (AAPOR) Book Award

Practical Evaluation Michael Quinn Patton.1982-12 This book takes seriously the notion that evaluation practice should be guided by attention to criteria of excellence. This book builds on the work of evaluation standards committee (1981), The evaluation network, the evaluation research society, and the various disciplinary associations in their efforts to improve the quality of applied social science. In so doing, this book explores the practical implications of conducting evaluations that exhibit four fundamental criteria of excellence: Utility, feasibility, propriety and accuracy
