Bassoon Sight-Reading John Kember, Danielle Hartley. 2020-09-03 Sight-reading is an important aspect of making music and should in some form become a regular part of a student's routine each time they play their instrument. Regular sight-reading helps the pupil to gain greater confidence when approaching any new piece of music for the first time. Schott's Sight-Reading books aims to establish the habit early in every student's learning process and the emphasis is on providing idiomatic tunes and structures for the specific instruments rather than sterile sight-reading exercises. Starting from very easy pieces with familiar shapes and rhythms, the range of notes, keys and rhythms gradually develops. In addition to this, each section of the books concludes with duets and accompanied pieces allowing the student to gain experience of sight-reading within the context of ensemble playing. Accompaniment exercises can be found at the end of the piano books.

**Contest Pieces for Bassoon and Piano** James R. Briscoe. 2015-05-15 The Paris Conservatoire's rigorous curriculum for training both singers and instrumentalists led to a wealth of musical treasures in the form of pieces composed specifically for the end-of-year examinations, which culminated in a public prize competition, the Concours du Conservatoire. The solos composed for these examinations, both the sight-reading works and the longer contest pieces (morceaux de concours), constitute the first extended series of compositions for woodwinds, brass, and harp in music history, being composed nearly annually for each instrument beginning in the 1830s. The wealth of musical treasures resulting from this systematic accumulation of works represents the historical core of these instrumental repertoires today. The present volume contains a selection of morceaux de concours and other pieces written in a similar style, representing some of the most influential oboists and composers associated with the Conservatoire.

The Bassoon James B. Kopp.2012-01-01 This welcome volume encompasses the entire history of the bassoon, from its origins five centuries ago to its place in twenty-first-century music. James Kopp draws on new archival research and many years' experience playing the instrument to provide an up-to-date and lively portrait of today's bassoon and its intriguing predecessors. He discusses the bassoon's makers, its players, its repertory, its myths, and its audiences, all in unprecedented detail. The bassoon was invented in Italy in response to the need for a bass-register double-reed woodwind suitable for processions and marching. Composers were quick to exploit its agility and unique timbre. Later, during the reign of Louis XIV, the instrument underwent a major redesign, giving voice to its tenor register. In the early 1800s new scientific precepts propelled a wave of invention and design modifications. In the twentieth century, the multiplicity of competing bassoon designs narrowed to a German (or Heckel) type and a French type, the latter now nearly extinct. The author examines the acoustical consequences of these various redesigns. He also offers new coverage of the bassoon's social history, including its roles in the military and church and its global use during the European Colonial period. Separate historical chapters devoted to contrabassoons and smaller bassoons complete the volume [Publisher description].
