**Land Use Intensification** Saul Cunningham,Andrew Young,David Lindenmayer.2012-07-18 There can be little doubt that there are truly colossal challenges associated with providing food, fibre and energy for an expanding world population without further accelerating already rapid rates of biodiversity loss and undermining the ecosystem processes on which we all depend. These challenges are further complicated by rapid changes in climate and its additional direct impacts on agriculture, biodiversity and ecological processes. There are many different viewpoints about the best way to deal with the myriad issues associated with land use intensification and this book canvasses a number of these from different parts of the tropical and temperate world. Chapters focus on whether science can suggest new and improved approaches to reducing the conflict between productive land use and biodiversity conservation. Who should read this book? Policy makers in regional, state and federal governments, as well as scientists and the interested lay public.

*Generalized Additive Models* T.J. Hastie.2017-10-19 This book describes an array of power tools for data analysis that are based on nonparametric regression and smoothing techniques. These methods relax the linear assumption of many standard models and allow analysts to uncover structure in the data that might otherwise have been missed. While McCullagh and Nelder's Generalized Linear Models shows how to extend the usual linear methodology to cover analysis of a range of data types, Generalized Additive Models enhances this methodology even further by incorporating the flexibility of nonparametric regression. Clear prose, exercises in each chapter, and case studies enhance this popular text.

**The Evolution of Plant Architecture** Marie Helena Kurmann,Alan R. Hemsley,Royal Botanic Gardens, Kew.1999 Plant architecture is the morphological manifestation of the genetic make-up of a plant at any one stage during its development. Application of accurate architectural models provides a wealth of information about living and extinct plants, especially in regard to growth pattern and development. The Evolution of Plant Architecture brings together contributions from specialists in many different fields, including ecology, palaeobotany, systematics and evolution.

Letters of a Peruvian Woman Françoise de Graffigny.2009-01-08 'It has taken me a long time, my dearest Aza, to fathom the cause of that contempt in which women are held in this country ...' Zilia, an Inca Virgin of the Sun, is captured by the Spanish conquistadores and brutally separated from her lover, Aza. She is rescued and taken to France by Déterville, a nobleman, who is soon captivated by her. One of the most popular novels of the eighteenth century, the Letters of a Peruvian Woman recounts Zilia's feelings on her separation from both her lover and her culture, and her experience of a new and alien society. Françoise de Graffigny's bold and innovative novel clearly appealed to the contemporary taste for the exotic and the timeless appetite for love stories. But by fusing sentimental fiction and social commentary, she also created a new kind of heroine, defined by her intellect as much as her feelings. The novel's controversial ending calls into question traditional assumptions about the role of women both in fiction and society, and about what constitutes 'civilization'. ABOUT THE SERIES: For over 100 years Oxford World's Classics has made available the widest range of literature from around the globe. Each affordable volume reflects Oxford's commitment to scholarship, providing the most accurate text plus a wealth of other valuable features, including expert introductions by leading authorities, helpful notes to clarify the text, up-to-date bibliographies for further study, and much more.

**Meta-Ecosystem Dynamics** Frederic Guichard,Justin Marleau.2021-09-25 This book presents current meta-ecosystem models and their derivation from classical ecosystem and metapopulation theories. Specifically, it reviews recent modelling efforts that have emphasized the role of nonlinear dynamics on spatial and food web networks, and which have cast their implications within the context of spatial synchrony and ecological stoichiometry. It suggests that these recent advances naturally lead to a generalization of meta-ecosystem theories to spatial fluxes of matter that have both a trophic and non-trophic impact on species. Ecosystem dynamics refers to the cycling of matter and energy across ecological compartments through processes such as consumption and recycling. Spatial dynamics established its ecological roots with metapopulation theories and focuses on scaling up local ecological processes through the limited movement of individuals and matter. Over the last 15 years, theories integrating ecosystem and spatial dynamics have quickly coalesced into meta-ecosystem theories, the focus of this book. The book will be of interest to graduate students and researchers who wish to learn more about the synthesis of ecosystem and spatial dynamics, which form the foundation of the theory of meta-ecosystems.

The Arabic Plotinus Peter Adamson.2017-12-27 The so-called Theology of Aristotle is a translation of the Enneads of Plotinus, the most important representative of late ancient Platonism. It was produced in the 9th

century CE within the circle of al-Kindī, one of the most important groups for the early reception of Greek thought in Arabic. In part because the Theology was erroneously transmitted under Aristotle's authorship, it became the single most important conduit by which Neoplatonism reached the Islamic world. It is referred to by such thinkers as al-Fārābī, in an attempt to demonstrate the agreement between Platonism and Aristotelianism, Avicenna, who wrote a set of comments on the text, and later on thinkers of Safavid Persia including Mullā Ṣadrā. Yet the Theology is not just a translation. It may in fact more accurately be described as a creative paraphrase, which takes frequent liberties with the source text and even includes whole paragraphs' worth of new material. Adamson's book offers a philosophical interpretation of the changes introduced in the Arabic version. It is argued that these changes were in part intended to show the relevance of Plotinus' thought for contemporary Islamic culture, for instance by connecting the Neoplatonist theory of the First Principle to theological disputes within Islam over the status of God's attributes. At the same time the paraphrase reflects a tendency to harmonize the various strands of Greek thought, so that a critique by Plotinus of Aristotle's theory of the soul is subtly changed into a defense of Aristotle's theory against a possible misinterpretation. The upshot, or so Adamson argues, is that the Theology needs to be read as an original philosophical work in its own right, and understood within the context of the 'Abbāsīd era.

**Body and Spirit in the Middle Ages** Gaia Gubbini.2020-08-10 A crucial question throughout the Middle Ages, the relationship between body and spirit cannot be understood without an interdisciplinary approach - combining literature, philosophy and medicine. Gathering contributions by leading international scholars from these disciplines, the collected volume explores themes such as lovesickness, the five senses, the role of memory and passions, in order to shed new light on the complex nature of the medieval Self.

*Santa Teresa* Dr. Martina Bengert,Iris Roebing-Grau.2019-07-15 Even prior to her widely observed 500th anniversary, Teresa of Ávila (1515-1582) was already considered one of the most important authors of occidental mysticism. This volume gathers together contributions from a multitude of disciplines to explore the writings and reception of the Spanish author and saint. Previously disregarded lines of tradition are explored for a new understanding of her oeuvre, which is examined here with special regard to the potential to affect its readers. Teresa proves to not only be an accomplished, but also a very literary writer. Santa Teresa proves to be a figure of cultural memory, and the diffusion of her thinking is traced up to the present, whereby a recurrent focus is put on the phenomenon of ecstasy. Part of the widespread resonance of her work is the image of the iconic saint whose emergence as an international phenomenon is presented here for the first time. The volume is closed by an interview with Marina Abramovi answering four questions about Teresa.

Zoology in Early Modern Culture: Intersections of Science, Theology, Philology, and Political and Religious Education .2014-10-09 This volume tries to map out the intriguing amalgam of different, partly conflicting approaches that shaped early modern zoology. It demonstrates that theology and philology played a pivotal role in the complex formation of this new science.

Against the Modern World Mark Sedgwick.2009 Against the Modern World is the first history of Traditionalism, an important yet surprisingly little-known twentieth-century anti-modern movement. Comprising a number of often secret but sometimes very influential religious groups in the West and in the Islamic world, it affected mainstream and radical politics in Europe and the development of the field of religious studies in the United States, touching the lives of many individuals. French writer Rene Guenon rejected modernity as a dark age and sought to reconstruct the Perennial Philosophy - the central truths behind all the major world religions. Guenon stressed the urgent need for the West's remaining spiritual and intellectual elite to find personal and collective salvation in the surviving vestiges of ancient religious traditions. A number of disenchanted intellectuals responded to his call. In Europe, America, and the Islamic world, Traditionalists founded institutes, Sufi brotherhoods, Masonic lodges, and secret societies. Some attempted unsuccessfully to guide Fascism and Nazism along Traditionalist lines; others later participated in political terror in Italy. Traditionalist ideas were the ideological cement for the alliance of anti-democratic forces in post-Soviet Russia, and in the Islamic world entered the debate about the relationship between Islam and modernity. Although its appeal in the West was ultimately limited, Traditionalism has wielded enormous influence in religious studies, through the work of such Traditionalists as Ananda Coomaraswamy, Huston Smith, Mircea Eliade, and Seyyed Hossein Nasr.

Charles Baudelaire Théophile Gautier.2012-12 This volume contains Gautier's biographical essay The Life and Intimate Memoirs of Baudelaire. Metaphysics Adrian Pabst.2012-05-04 This book does nothing less than to set new standards in combining philosophical with political theology. Pabst's argument about rationality has the potential to change debates in philosophy, politics, and religion. (from the foreword) This comprehensive and detailed study of individuation reveals the theological nature of metaphysics. Adrian Pabst argues that ancient and modern conceptions of being or individual substance fail to account for the ontological relations that bind beings to each other and to God, their source. On the basis of a genealogical account of rival theories of creation and individuation from Plato to postmodernism, Pabst proposes that the Christian Neo-Platonic fusion of biblical revelation with Greco-Roman philosophy fulfills and surpasses all other ontologies and conceptions of individuality.

Humanitarian Ethics Hugo Slim.2015-01-09 Humanitarians are required to be impartial, independent, professionally competent and focused only on preventing and alleviating human suffering. It can be hard living up to these principles when others do not share them, while persuading political and military authorities and non-state actors to let an agency assist on the ground requires savvy ethical skills. Getting first to a conflict or natural catastrophe is only the beginning, as aid workers are usually and immediately presented with practical and moral questions about what to do next. For example, when does working closely with a warring party or an immoral regime move from practical cooperation to complicity in human rights violations? Should one operate in camps for displaced people and refugees if they are effectively places of internment? Do humanitarian agencies inadvertently encourage ethnic cleansing by always being ready to 'mop-up' the consequences of scorched earth warfare? This book has been written to help humanitarians assess and respond to these and other ethical dilemmas.

**A Civil Society** James Smith Allen.2022-05 A Civil Society explores the struggle to initiate women as full participants in the masonic brotherhood that shared in the rise of France's civil society and its civic morality on behalf of women's rights. As a vital component of the third sector during France's modernization, freemasonry empowered women in complex social networks, contributing to a more liberal republic, a more open society, and a more engaged public culture. James Smith Allen shows that although women initially met with stiff resistance, their induction into the brotherhood was a significant step in the development of French civil society and its civic morality, including the promotion of women's rights in the late nineteenth century. Pulling together the many gendered facets of masonry, Allen draws from periodicals, memoirs, and archival material to account for the rise of women within the masonic brotherhood in the context of rapid historical change. Thanks to women's social networks and their attendant social capital, masonry came to play a leading role in French civil society and the rethinking of gender relations in the public sphere.

*Queer Theory in Education* William F. Pinar.2012-10-02 Theoretical studies in curriculum have begun to move into cultural studies--one vibrant and increasingly visible sector of which is queer theory. Queer Theory in Education brings together the most prominent and promising scholars in the field of education--primarily but not exclusively in curriculum--in the first volume on queer theory in education. In his perceptive introduction, the editor outlines queer theory as it is emerging in the field of education, its significance for all scholars and teachers, and its relation to queer theory in literacy theory and more generally, in the humanities.

**Why We Play** Roberte Hamayon.2016 Play is one of humanity's straightforward yet deceitful ideas: though the notion is unanimously agreed upon to be universal, used for man and animal alike, nothing defines what all its manifestations share, from childish playtime to on stage drama, from sporting events to market speculation. Within the author's anthropological field of work (Mongolia and Siberia), playing holds a core position: national holidays are called Games, echoing in that way the circus games in Ancient Rome and today's Olympics. These games convey ethical values and local identity. Roberte Hamayon bases her analysis of the playing spectrum on their scrutiny. Starting from fighting and dancing, encompassing learning, interaction, emotion and strategy, this study heads towards luck and belief as well as the ambiguity of the relation to fiction and reality. It closes by indicating two features of play: its margin and its metaphorical structure. Ultimately revealing its consistency and coherence, the author displays play as a modality of action of its own. Playing is no 'doing' in the ordinary sense once wrote Johan Huizinga. Isn't playing doing something else, elsewhere and otherwise ?
