The Health Of Women Jill Gay.2018-05-04 This book provides a state-of-the-art, comprehensive review of the many factors that affect women's health, ranging from low socioeconomic status and the impact of the debt crisis to more direct medical determinants, such as poor nutrition, hemorrhage, eclampsia, and infection. At stake are the unnecessary and preventable deaths of women and girls around the globe. The contributors assess the reduced quality of life for women and the often unacknowledged contributions of women and girls as the backbone of production in both developing and developed countries. Synthesizing perspectives of policymakers and practitioners, researchers and scholars, The Health of Women urges major new initiatives to understand and improve women's health, taking into account biological elements such as the life cycle of women as well as cultural constraints and socioeconomic realities.

Marburg Virus Disease G. A. Martini,R. Siegert.2013-11-11 In the late summer of 1967, several patients suffering from a severe disease were admitted to the Department of Medicine of the Marburg University. It soon became obvious that the illness was a hitherto unknown infectious disease. The number of afflicted patients increased to 23. Several cases were observed in Frankfurt/Main at the same time and, some weeks later also in Belgrade, Yugo slavia. Common to all the patients was previous contact with the blood or tissues of *Cercopithecus aethiops*, the vervet monkey. Altogether 31 people became ill and 7 died. It was soon apparent that the infectious agent was neither bacterial nor rickettsial in origin but that a viral etiology was probable. Most of the known viral diseases were excluded and the infectious agent was shown to be a hitherto unknown virus with many peculiar characteristics: it infects guinea pigs but not adult mice and is larger than known viruses and of different shape. This agent was called the Marburg virus since most of the cases had occurred in Marburg and the greater part of the laboratory work leading to the detection of the virus was performed in Marburg.

Genres of the Credit Economy Mary Poovey.2008-04 Banking, borrowing, investing, and even losing money - in other words, participating in the modern financial system - seem like routine activities of everyday life. This book looks at how this came to be the case by examining the history of financial instruments and representations of finance in 18th and 19th century Britain.

The Darlings Cristina Alger.2012-12-24 A Bonfire of the Vanities for our times, by an author who "knows her way around 21st-century wealth and power" (The Wall Street Journal). Since he married Merrill Darling, daughter of billionaire financier Carter Darling, attorney Paul Ross has grown accustomed to all the luxuries of Park Avenue. But a tragic event is about to catapult the Darling family into the middle of a massive financial investigation and a red-hot scandal. Suddenly, Paul must decide where his loyalties really lie. Debut novelist Cristina Alger is a former analyst at Goldman Sachs, an attorney, and the daughter of a Wall Street financier. Drawing on her unique insider's perspective, Alger gives us an irresistible glimpse into the highest echelons of New York society—and a fast-paced thriller of epic proportions that powerfully echoes Claire Messud's *The Emperor's Children* and reads like a fictional *Too Big to Fail*.

Financial Speculation in Victorian Fiction Tamara S. Wagner.2010 In *Financial Speculation in Victorian Fiction: Plotting Money and the Novel Genre, 1815-1901*, Tamara S. Wagner explores the ways in which financial speculation was imagined and turned into narratives in Victorian Britain. Since there clearly was much more to literature's use of the stock market than a mere reflection of contemporary economic crises alone, a much-needed reappraisal of the Victorians' fascination with extended fiscal plots and metaphors also asks for a close reading of the ways in which this fascination remodeled the novel genre. It was not merely that interchanges between literary productions and the credit economy's new instruments became self-consciously worked into fiction. Financial uncertainties functioned as an expression of indeterminacy and inscrutability, of an encompassing sense of instability. Bringing together canonical and still rarely discussed texts, this study analyzes the making and adaptation of specific motifs, of variously adapted tropes, extended metaphors, and recurring figures, including their transformation of a series of crises into narratives. Since these crises were often personal and emotional as well as financial, the new plots of speculation described maps of some of the major themes of nineteenth-century literature. These maps led across overlapping categories of literary culture, generating zones of intersection between otherwise markedly different subgenres that ranged from silver-fork fiction to the surprisingly protean versions of the sensation novel's domestic Gothic. Financial plots fascinatingly operated as the intersecting points in these overlapping developments, compelling a reconsideration of literary form.

How to Speak Money John Lanchester.2015-10-27 Refreshingly clear, sharp, and funny, *How to Speak Money* will help you understand not only what the language of finance means but also why it matters. —James Surowiecki, author of *The Wisdom of Crowds* To those who don't speak it, the language of money can seem impenetrable. Fortunately, John Lanchester—the best-selling novelist and reporter hailed by *The Economist* for explain[ing] complex stuff in a down-to-earth and witty style—is here to bridge the gap between the money people and the rest of us. With wit and candor, Lanchester explains more than 300 common words and phrases from AAA rating and amortization to yield curve and zombie bank.

The Empathy Problem Gavin Extence.2016-08-11 'You can't put it down . . . precise and propulsive . . . a real page-turner' Janice Forsyth Show, BBC Radio Scotland 'It's so good it'll leave you wanting to change your own life' Independent ***** So far in his life, Gabriel - selfish, arrogant and happy to be so - has only ever thought about two things: money and himself. When he's diagnosed with a terminal brain tumour, he doesn't see why anything should change. But as the tumour grows, something strange starts happening. Whether Gabriel likes it or not, he's becoming . . . nicer. Kinder. A better person. And then he meets Caitlin. Before, he wouldn't even have glanced at her; now he's entranced. But real change takes time - and time is something Gabriel just doesn't have. As each day brings him closer to his last, has the one opportunity for a second

What Makes Women Sick Lesley Doyal. 1995 What makes women sick? To an Ecuadorean woman, it's nervios from constant worry about her children's illnesses. To a woman working in a New Mexico electronics factory, it's the solvents that leave her with a form of dementia. To a Ugandan woman, it's HIV from her husband's sleeping with the widow of an AIDS patient. To a Bangladeshi woman, it's a fatal infection following an IUD insertion. What they all share is a recognition that their sickness is somehow caused by situations they face every day at home and at work. In this clearly written and compelling book, Lesley Doyal investigates the effects of social, economic, and cultural conditions on women's health. The fault line of gender that continues to divide all societies has, Doyal demonstrates, profound and pervasive consequences for the health of women throughout the world. Her broad synthesis highlights variations between men and women in patterns of health and illness, and it identifies inequalities in medical care that separate groups of women from each other. Doyal's wide-ranging arguments, her wealth of data, her use of women's voices from many cultures--and her examples of women mobilizing to find their own solutions--make this book required reading for everyone concerned with women's health.

Human Reproductive Genetics Juan A. Garcia-Velasco, Emre Seli. 2020-04-19 Human Reproductive Genetics: Emerging Technologies and Clinical Applications presents a great reference for clinicians and researchers in reproductive medicine. Part I includes a brief background of genetics and epigenetics, probability of disease, and the different techniques that are being used today for analysis and genetic counseling. Part II focuses on the analysis of the embryo, current controversies and future concepts. Part III comprises different clinical scenarios that clinicians frequently face in practice. The increasing amount of genetic tests available and the growing information that patients handle makes this section a relevant part of the fertility treatment discussion. Finally, Part IV concludes with the psychological aspects of genetic counseling and the role of counselor and bioethics in human reproduction. Provides an essential reference for clinicians involved in reproductive medicine Builds foundational knowledge on new genetic tests coming into the clinical scenario for physicians involved with patients Assembles critically evaluated chapters that cover basic concepts of genetics and epigenetics and the techniques involved, including preimplantation genetic testing, controversies, and more

Structure and Properties of Silicate Melts Bjorn O. Mysen. 1988 Characterization of the relationships between structure and properties of materials is based on the fundamental principle that the structure of the material be determined first, followed by assessments of which structural properties may govern their properties as a function of composition, pressure, temperature and other variables. Whereas this methodology has been successfully applied to further our understanding of crystalline materials, studies of silicate melt structure are often conducted on a somewhat different basis. Rather than from direct structural determination, structure models have been developed from assumed relationships between a specific melt property and its structure. As a result, a multitude of models has evolved - many of which are mutually exclusive. The overall scope of this book is to address properties and processes of magmatic systems from the vantage point of melt structure. To this end available data in chemically increasingly complex systems are reviewed and discussed with the ultimate goal being integration of the simple system data into a model that describes complex systems such as natural magmatic liquids. Thus the book evolves from the simplest possible system, SiO₂, to complex systems such as natural magmatic liquids. From a petrologic point of view, sufficient data have been obtained so that a general framework of the structure of magmatic liquids is in place. This framework is based on the same principles as those of crystal chemistry, modulated by the absence of long range order in amorphous material, and systematic relationships between structure and properties can be discerned at least at atmospheric pressure.

Liberalising Trade in the EU and the WTO Sanford E. Gaines, Birgitte Egelund Olsen, Karsten Engsig Sørensen. 2012-08-02 This comparison of EU and WTO approaches to common trade-liberalisation challenges brings together eighteen authors from Europe and America. Together they explore fundamental legal issues, such as the role of general principles of law, the role of the judiciary in the development of law, the effect of the principle of non-discrimination and the elimination of non-discriminatory barriers to trade. The contributions also examine the most recent developments in trade law across a full range of trade issues, including TBT and SPS, services, intellectual property, customs rules, safeguards, anti-dumping and government procurement. Adopting a comparative perspective throughout, this volume sheds light on today's trade law and suggests paths forward for each system through the perennial tensions between open, non-discriminatory trade and strongly held national values and objectives.

Images of Plague and Pestilence Christine M. Boeckl. 2000-11-24 Since the late fourteenth century, European artists created an extensive body of images, in paintings, prints, drawings, sculptures, and other media, about the horrors of disease and death, as well as hope and salvation. This interdisciplinary study on disease in metaphysical context is the first general overview of plague art written from an art-historical standpoint. The book selects masterpieces created by Raphael, Titian, Tintoretto, Rubens, Van Dyck, and Poussin, and includes minor works dating from the fourteenth to twentieth centuries. It highlights the most important innovative artistic works that originated during the Renaissance and the Catholic Reformation. This study of the changing iconographic patterns and their iconological interpretations opens a window to the past.

Marburg and Ebola Viruses Hans-Dieter Klenk. 2011-10-22 Marburg and Ebola virus, the two species within the family Filoviridae, are among the most pathogenic agents causing fulminant hemorrhagic fever in humans and nonhuman primates. The chronology of filovirus epidemics and epizootics proves that these viruses are prototypes of emerging/re-emerging pathogens. Since the discovery of Marburg virus in 1967 until the recent Ebola virus outbreaks in Central and West Africa filoviruses have not only raised the interest of scientists, but have also been a matter of high public concern. With the advent of recombinant DNA technology our knowledge on the genome structure and the replication strategies of these agents has significantly increased. This volume gives an overview on many aspects of filovirus research and summarizes recent advances in the field. The topics addressed include the molecular biology of filoviruses, pathogenesis, epidemiology, immune response, as well as clinical aspects and diagnostic measures.

Scandals and Abstraction Leigh Claire La Berge.2015 The greed, excess, and decadence of the long 1980s has been famously chronicled, critiqued, and satirized in epochal works like *White Noise* by Don DeLillo, *American Psycho* by Bret Easton Ellis, and Tom Wolfe's *The Bonfire of the Vanities*. Leigh Claire La Berge offers an in-depth study of these fictions alongside the key moments of financial history that inform them, contending that throughout the 1980s, novelists, journalists, and filmmakers began to reimagine the capitalist economy as one that was newly personal, masculine, and anxiety producing. The study's first half links the linguistic to the technological by exploring the arrival of ATMs and their ubiquity in postmodern American literature. In transformative readings of novels such as *White Noise* and *American Psycho*, La Berge traces how the ATM serves as a symbol of anxious isolation and the erosion of interpersonal communication. A subsequent chapter on Ellis' novel and Jane Smiley's *Good Faith* explores how male protagonists in each develop unique associations between money and masculinity. The second half of the monograph features chapters that attend to works-most notably Oliver Stone's *Wall Street* and Wolfe's *The Bonfire of the Vanities*-that capture aspects of the arrogance and recklessness that led to the savings-and-loan crisis and the 1987 stock market crash. Concluding with a coda on the recent Occupy Wall Street Movement and four short stories written in its wake, *Scandals and Abstraction* demonstrates how economic forces continue to remain a powerful presence in today's fiction--

The Subnormal Mind Cyril Burt.1935

Amalgamemnon Christine Brooke-Rose.1994 History and literature seem to be losing ground in the contemporary world of electronic media, and battle lines have been drawn between the humanities and technology, the first world and the third, women and men. Narrator Mira Enketei erases these boundaries in a punning monologue that blends the contemporary with the historical, and in which she sees herself as Cassandra, condemned by Apollo to prophesy but never to be believed, enslaved by Agamemnon after the fall of Troy. Here, Brooke-Rose amalgamates ancient literature and modern anxieties to produce a powerful novel about our future.
