Sacred Mundane Kari Patterson.2017-07-25 What if the key to changing your life--and yourself--is already in your hand? So many women struggle with what to do with their daily lives. They feel trapped in everyday drudgery and disappointment, in dull domestic duties, and in mundane jobs they despise. Where is the abundant, purposeful life they were promised? Kari Patterson shows readers the truth: in each unremarkable life lies an opportunity to see, know, love, and be utterly transformed by a God who meets everyone right where they are. Instead of stepping away from real life to find God, Patterson equips women with a six-step practice to move further in and meet Him in the humdrum moments of everyday existence. And when a woman's inner being is truly changed by the sacred, everything in her world changes too--right down to tackling the dirty dishes. Through entertaining narrative, candid real-life stories, Bible study, and practical instruction, Sacred Mundane guides individuals or small groups to discover the beautiful sacredness in the lives they already lead. Women who long to grow in God and make a real difference in the world--no matter how small--will reach eagerly for this book and the radical transformation it offers. Our daily routine, with its mundane tasks and mindless repetition, is ultimately an offering of worship to God. What a great truth from a great God! --Ann Byle, author of *The Making of a Christian Bestseller* and coauthor of *Devotions for the Soul Surfer*

Understanding by Design Grant Wiggins,Grant P. Wiggins,Jay McTighe.2005 What is understanding and how does it differ from knowledge? How can we determine the big ideas worth understanding? Why is understanding an important teaching goal, and how do we know when students have attained it? How can we create a rigorous and engaging curriculum that focuses on understanding and leads to improved student performance in today's high-stakes, standards-based environment? Authors Grant Wiggins and Jay McTighe answer these and many other questions in this second edition of *Understanding by Design*. Drawing on feedback from thousands of educators around the world who have used the UbD framework since its introduction in 1998, the authors have greatly revised and expanded their original work to guide educators across the K-16 spectrum in the design of curriculum, assessment, and instruction. With an improved UbD Template at its core, the book explains the rationale of backward design and explores in greater depth the meaning of such key ideas as essential questions and transfer tasks. Readers will learn why the familiar coverage- and activity-based approaches to curriculum design fall short, and how a focus on the six facets of understanding can enrich student learning. With an expanded array of practical strategies, tools, and examples from all subject areas, the book demonstrates how the research-based principles of *Understanding by Design* apply to district frameworks as well as to individual units of curriculum. Combining provocative ideas, thoughtful analysis, and tested approaches, this new edition of *Understanding by Design* offers teacher-designers a clear path to the creation of curriculum that ensures better learning and a more stimulating experience for students and teachers alike.

Strategies that Work Stephanie Harvey,Anne Goudvis.2017 In this new edition of their groundbreaking book *Strategies That Work*, Stephanie Harvey and Anne Goudvis share the work and thinking they've done since the second edition came out a decade ago and offer new perspectives on how to explicitly teach thinking strategies so that students become engaged, thoughtful, independent readers. Steph and Anne tackle close reading, close listening, text complexity, and critical thinking in a new chapter on building knowledge through thinking-intensive reading and learning. Other fully revised chapters focus on digital reading, strategies for integrating comprehension and technology, and comprehension across the curriculum. The new edition is organized around three sections: Part I provides readers with a solid introduction to reading comprehension instruction, including the principles that guide practice, suggestions for text selection, and a review of recent research that underlies comprehension instruction. Part II contains lessons to put these principles into practice for all areas of reading comprehension. Part III shows you how to integrate comprehension instruction across the curriculum and the school day, particularly in science and social studies. Educators Belonging, Being and Becoming .2009

Learning to Read in Our Nation's Schools Judith A. Langer.1990 To assess the reading achievement of American school children, the National Assessment of Educational Progress (NAEP) surveyed nationally representative samples of approximately 13,000 students at grades 4, 8, and 12 attending public and private schools across the nation. Students read a variety of literary and informative passages and then answered a series of multiple-choice and open-ended questions designed to measure their ability to read and comprehend these passages. In addition, students provided background information about their reading experiences both in and out of school. To supplement this information, the teachers of fourth graders participating in the assessment completed a questionnaire about the instruction their students received. Findings indicated that: (1) the average reading proficiency of students increased substantially from grades 4 to 8 and less dramatically from grades 8 to 12; (2) at all three grade levels, there were great differences in reading proficiency according to socioeconomic status; (3) more proficient readers reported home and school environments that emphasized academic achievement; (4) students reported doing very little reading in school and for homework; (5) students' interest in books seems to decrease as they progress through school; (6) emphasis on beginning reading instruction in grades 1, 2, and 3 is overwhelmingly phonics-based; (7) instruction for most fourth graders is based on a single basal reader; and (8) reasoning activities are not emphasized in class. (Extensive tables of data are included; a procedural appendix and an appendix of data are attached.) (NKA) *Developing Standards-Based Report Cards* Thomas R. Guskey,Jane M. Bailey.2010 Providing a clear framework, this volume helps school leaders align assessment and reporting practices with standards-based education and develop more detailed reports of children's learning and progress.

Grading for Equity Joe Feldman.2018-09-25 Joe Feldman shows us how we can use grading to help students become the leaders of their own learning and lift the veil on how to succeed. . . . This must-have book will help teachers learn to implement improved, equity-focused grading for impact. —Zaretta Hammond, Author of *Culturally Responsive Teaching & The Brain Crack* open the grading conversation Here at last—and none too soon—is a resource that delivers the research base, tools, and courage to tackle one of the most challenging and emotionally charged conversations in today's schools: our inconsistent grading practices and the ways they can inadvertently perpetuate the achievement and opportunity gaps among our students. With *Grading for Equity*, Joe Feldman cuts to the core of the conversation, revealing how grading practices that are accurate, bias-resistant, and motivational will improve learning, minimize grade inflation, reduce failure rates, and become a lever for creating stronger teacher-student relationships and more caring classrooms. Essential reading for schoolwide and individual book study or for student advocates, *Grading for Equity* provides A critical historical backdrop, describing how our inherited system of grading was originally set up as a sorting mechanism to provide or deny opportunity, control students, and endorse a fixed mindset about students' academic potential—practices that are still in place a century later A summary of the research on motivation and equitable teaching and learning, establishing a rock-solid foundation and a true north orientation toward equitable grading practices Specific grading practices that are more equitable, along with teacher examples, strategies to solve common hiccups and concerns, and evidence of effectiveness Reflection tools for facilitating individual or group engagement and understanding As Joe writes, Grading practices are a mirror not just for students, but for us as their teachers. Each one of us should start by asking, What do my grading practices say about who I am and what I believe? Then, let's make the choice to do things differently . . . with *Grading for Equity* as a dog-eared reference.

Classroom Assessment and the National Science Education Standards National Research Council,Division of Behavioral and Social Sciences and Education,Center for Education,Committee on Classroom Assessment and the National Science Education Standards.2001-08-12 The National Science Education Standards address not only what students should learn about science but also how their learning should be assessed. How do we know what they know? This accompanying volume to the Standards focuses on a key kind of assessment: the evaluation that occurs regularly in the classroom, by the teacher and his or her students as interacting participants. As students conduct experiments, for example, the teacher circulates around the room and asks individuals about their findings, using the feedback to adjust lessons plans and take

other actions to boost learning. Focusing on the teacher as the primary player in assessment, the book offers assessment guidelines and explores how they can be adapted to the individual classroom. It features examples, definitions, illustrative vignettes, and practical suggestions to help teachers obtain the greatest benefit from this daily evaluation and tailoring process. The volume discusses how classroom assessment differs from conventional testing and grading—and how it fits into the larger, comprehensive assessment system.

The Sky Is Not the Limit Neil deGrasse Tyson. 2010-03-19 From the author of *Astrophysics for People in a Hurry* and the host of *Cosmos: A Spacetime Odyssey*, a memoir about growing up and a young man's budding scientific curiosity. This is the absorbing story of Neil deGrasse Tyson's lifelong fascination with the night sky, a restless wonder that began some thirty years ago on the roof of his Bronx apartment building and eventually led him to become the director of the Hayden Planetarium. A unique chronicle of a young man who at one time was both nerd and jock, Tyson's memoir could well inspire other similarly curious youngsters to pursue their dreams. Like many athletic kids he played baseball, won medals in track and swimming, and was captain of his high school wrestling team. But at the same time he was setting up a telescope on winter nights, taking an advanced astronomy course at the Hayden Planetarium, and spending a summer vacation at an astronomy camp in the Mojave Desert. Eventually, his scientific curiosity prevailed, and he went on to graduate in physics from Harvard and to earn a Ph.D. in astrophysics from Columbia. There followed postdoctoral research at Princeton. In 1996, he became the director of the Hayden Planetarium, where some twenty-five years earlier he had been awed by the spectacular vista in the sky theater. Tyson pays tribute to the key teachers and mentors who recognized his precocious interests and abilities, and helped him succeed. He intersperses personal reminiscences with thoughts on scientific literacy, careful science vs. media hype, the possibility that a meteor could someday hit the Earth, dealing with society's racial stereotypes, what science can and cannot say about the existence of God, and many other interesting insights about science, society, and the nature of the universe. Now available in paperback with a new preface and other additions, this engaging memoir will enlighten and inspire an appreciation of astronomy and the wonders of our universe.

Rethinking Grading Cathy Vatterott. 2015-07-13 Grading systems often reward on-time task completion and penalize disorganization and bad behavior. Despite our best intentions, grades seem to reflect student compliance more than student learning and engagement. In the process, we inadvertently subvert the learning process. After careful research and years of experiences with grading as a teacher and a parent, Cathy Vatterott examines and debunks traditional practices and policies of grading in K-12 schools. She offers a new paradigm for standards-based grading that focuses on student mastery of content and gives concrete examples from elementary, middle, and high schools. *Rethinking Grading* will show all educators how standards-based grading can authentically reflect student progress and learning—and significantly improve both teaching and learning. Cathy Vatterott is an education professor and researcher at the University of Missouri-St. Louis, a former middle school teacher and principal, and a parent of a college graduate. She has learned from her workshops that grading continues to be the most contentious part . . . conjuring up the most intense emotions and heated disagreements.
