Recherches en didactique de l'évolution Corinne Fortin,Julie

Gobert.2023-11-15 Cet ouvrage rend compte de l'actualité et de

la dynamique des nouvelles recherches en didactique de

l'évolution, principalement en contexte francophone (Québec,

Belgique, France). Les différentes contributions à ce travail

collectif constituent autant d'analyses pour engager ou

poursuivre une réflexion sur les enjeux épistémologiques,

cognitifs et sociétaux de l'enseignement et de l'apprentissage de

l'évolution. À partir de travaux issus de la didactique des sciences

de la vie et de la Terre, et plus largement des sciences de

l'éducation, du primaire à l'université, les thématiques traitées

témoignent de la vitalité, de la diversité, mais aussi de la vivacité des problématiques de recherche. Structuré autour de différents champs théoriques, Recherches en didactique de l'évolution explore aussi bien des questions d'ordre didactique, historique, épistémologique que socio-éducatif en lien avec les contenus enseignés, les démarches d'enseignement et les pratiques enseignantes, à la fois dans une visée d'intelligibilité et de faisabilité.

Invasive Plant Species of the World, 2nd Edition Ewald Weber.2017-04-13 Since the publication of the first edition of this book in 2003, the status of many important invasive plants around the world has changed dramatically. Species have extended their ranges, new literature has been accumulated, and control methods have been improved. Research on some plant invaders has also focused on the species' ecology and impacts, confirming that invasive plants continue to pose serious threats to species and ecosystems. Given their range expansions and introduction via international trade, these problems will only become more serious in the future. Including colour images of each species, this up-to-date reference guide on the most important plant invaders is an invaluable tool for both researchers and policy makers.

Towards a Political Education Through Environmental Issues

Melki Slimani.2021-04-27 The growing field of political education through environmental issues is organized around processes, which reach beyond the formal ones found in academic disciplines and national curricula into informal processes (such as social mobilization) and nonformal processes (such as those found in various international educational recommendations). Using

theoretical approaches from the fields of political philosophy and the social sciences, this book develops a simultaneously conceptual and analytical framework for the political in educational content involving environmental issues. This framework is then used to empirically analyze educational content on sustainable development formulated by UNESCO, as well as the Tunisian curriculum. The theoretical and empirical studies carried out in this book lead to proposed curriculum tags for political education through environmental issues, with the intent of opening this field to inclusion in the didactics of curriculum research.
