**Sweet Treats around the World** Timothy G. Roufs, Kathleen Smyth Roufs. 2014-07-29 From apple pie to baklava, cannoli to gulab jamun, sweet treats have universal appeal in countries around the world. This encyclopedia provides a comprehensive look at global dessert culture. Few things represent a culture as well as food. Because sweets are universal foods, they are the perfect basis for a comparative study of the intersection of history, geography, social class, religion, politics, and other key aspects of life. With that in mind, this encyclopedia surveys nearly 100 countries, examining their characteristic sweet treats from an anthropological perspective. It offers historical context on what sweets are popular where and why and emphasizes the cross-cultural insights those sweets present. The reference opens with an overview of general trends in desserts and sweet treats. Entries organized by country and region describe cultural attributes of local desserts, how and when sweets are enjoyed, and any ingredients that are iconic. Several popular desserts are discussed within each entry including information on their history, their importance, and regional/cultural variations on preparation. An appendix of recipes provides instructions on how to make many of the dishes, whether for school projects or general entertaining.

*Bread of Dreams* Piero Camporesi. 2023-07-17 Piero Camporesi is one of the most original and exciting cultural historians in Europe today. In this remarkable book he examines the imaginative world of poor and ordinary people in pre-industrial Europe, exploring their everyday preoccupations, fears and fantasies. Camporesi develops the startling claim that many people in early modern Europe lived in a state of almost permanent hallucination, drugged by their hunger or by bread adulterated with hallucinogenic herbs. The use of opiate products, administered even to children and infants, was widespread and was linked to a popular mythology in which herbalists and exorcists were important cultural figures. Through a careful reconstruction of the everyday imaginative life of peasants, beggars and the poor, Camporesi presents a vivid and disconcerting image of early modern Europe as a vast laboratory of dreams. *Bread of Dreams* is a rich and engaging book which provides a fresh insight into the everyday life and attitudes of people in pre-industrial Europe. Camporesi's vision is breathtaking and his work will be much discussed among social and cultural historians. This edition includes a Preface by Roy Porter, Professor of the History of Medicine at the Wellcome Institute for the History of Medicine.

**The Story of Tönle** Mario Rigoni Stern. 1998 Mario Rigoni Stern was born in 1921 in Asiago, in the mountains of northeastern Italy. Throughout his literary career, he has remained deeply attached to the region of his birth, its peasant customs, its dialect, its seasonal cycles and shifting historical fortunes. Tonle Bintarn's story takes place in the mountains of the Veneto region, which once bordered the Austro-Hungarian Empire and where smuggling was a means of subsistence for the peasant population. Having run afoul of a patrol of revenue agents, Tonle must seek refuge beyond the frontier in Central Europe, where year after year he lives by doing odd jobs and working, among other things, as an itinerant print peddler, a horse trainer in Hungary, and a gardener in a Prague castle. But every winter he returns secretly to his home and family, until finally a pardon is granted. By now his children are grown and he has little to do but tend his sheep. Meanwhile, the times are changing, social values are disintegrating under the impact of modernization, and Europe moves ever closer to disaster. During the devastation of the First World War, the occupation and ultimate destruction of his village, and his own internment in an Austrian camp, it is Tonle's loyalty to his roots and his stubborn devotion to his task as a shepherd that persist and make him a quiet symbol of heroism and human endurance.

**Cheese and Culture** Paul Kindstedt. 2012-04-01 Behind every traditional type of cheese there is a fascinating story. By examining the role of the cheesemaker throughout world history and by understanding a few basic principles of cheese science and technology, we can see how different cheeses have been shaped by and tailored to their surrounding environment, as well as defined by their social and cultural context. *Cheese and Culture* endeavors to advance our appreciation of cheese origins by viewing human history through the eyes of a cheese scientist. There is also a larger story to be told, a grand narrative that binds all cheeses together into a single history that started with the discovery of cheese making and that is still unfolding to this day. This book reconstructs that 9000-year story based on the often fragmentary information that we have available. *Cheese and Culture* embarks on a journey that begins in the Neolithic Age and winds its way through the ensuing centuries to the present. This tour through cheese history intersects with some of the pivotal periods in human prehistory and ancient, classical, medieval, renaissance, and modern history that have shaped western civilization, for these periods also shaped the lives of cheesemakers and the diverse cheeses that they developed. The book offers a useful lens through which to view our twenty-first century attitudes toward cheese that we have inherited from our past, and our attitudes about the food system more broadly. This refreshingly original book will appeal to anyone who loves history, food, and especially good cheese--Provided by publisher.

**Parameters and Functional Heads : Essays in Comparative Syntax** Perugia Adriana Belletti Associate Professor of Linguistics Università per Stranieri, Luigi Rizzi Professor of Linguistics University of Geneva. 1996-03-30 The essays collected in this volume, most previously unpublished, address a number of closely interconnected issues raised by the comparative syntax of functional heads within the Principles-and-Parameters approach. The general theory of head movement, the properties of derived structures created by incorporation, and the parameterization involved are the main theoretical foci. One major empirical area which is addressed concerns head movement in configurations involving certain kinds of operator-like elements, for example, the different manifestations of Verb Second phenomena in Wh and other constructions and the syntax of negative heads and specifiers. In addition, properties of functional heads and head movement in nominal and clausal structures and the causative construction are investigated.

**Dialogues on architecture** Emilio Faroldi, Maria Pilar Vettori. 2022-01-20 The dialogue, as "the talking of the soul with itself" that constitutes the act of thinking (Plato), has been selected as the ideal form through which to vividly and accurately convey the thinking of a number of protagonists of Italian modern architecture. Knowledge remains a latent legacy of the soul until a given stimulus reawakens its memory: architecture, more than sophia (wisdom), becomes philo-sophia, i.e. love of knowledge. A reading of the architectural phenomenon aimed at faithfully bringing out its complexity cannot help but involve the stories directly told by the protagonists, and the micro-stories of individual episodes, in order to explore the relationship that exists between the poetic and the technical-scientific spheres, underlining their complementary and conflictual nature. The disciplinary tools of exegesis of design and its materialization stimulate a form of critique of criticism driven by the rejection of an angle of interpretation of architecture oriented exclusively towards its results. Method and result constitute the inseparable terms: the direct testimony of certain protagonists of Italian architecture makes it possible to reconnect the interrupted threads of a narrative that has often been rendered syncopated and unilateral by excessively superficial explanation. The Dialogues on Architecture explore the interaction between idea, design and construction, revealing different operative and conceptual modes through which to achieve the finished work. Franco Albini, Lodovico B. Belgiojoso, Guido Canella, Aurelio Cortesi, Roberto Gabetti & Aimaro Isola, Ignazio Gardella, Vittorio Gregotti, Vico Magistretti, Enrico Mantero, Paolo Portoghesi, Aldo Rossi, Giuseppe Terragni, Vittoriano Viganò are the authors of this narrative.

**Planning on the Edge** Nick Gallent, Johan Andersson, Marco Bianconi. 2006-09-27 More than a tenth of the land mass of the UK comprises 'urban fringe': the countryside around towns that has been called 'planning's last frontier'. One of the key challenges facing spatial planners is the land-use management of this area, regarded by many as fit only for locating sewage works, essential service functions and other un-neighbourly uses. However, to others it is a dynamic area where a range of urban and rural uses collide. Planning on the Edge fills an important gap in the literature, examining in detail the challenges that planning faces in this no-man's land. It presents both problems and solutions, and builds a vision for the urban fringe that is concerned with maximising its potential and with bridging the physical and cultural rift between town and country. Its findings are presented in three sections: the urban fringe and the principles underpinning its management sectoral challenges faced at the urban fringe (including commerce, energy, recreation, farming, and housing) managing the urban fringe more effectively in the future. Students, professionals and researchers alike will benefit from the book's structured approach, while the global and transferable nature of the principles and ideas underpinning the study will appeal to an international audience.

*Industry Recipes* J.-C. Spender. 1989-01-01

**Food is Culture** Massimo Montanari. 2006 Elegantly written by a distinguished culinary historian, Food Is Culture explores the innovative premise that everything having to do with food--its capture, cultivation, preparation, and consumption--represents a cultural act. Even the choices made by primitive hunters and gatherers were determined by a culture of economics (availability) and medicine (digestibility and nutrition) that led to the development of specific social structures and traditions. Massimo Montanari begins with the invention of cooking which allowed humans to transform natural, edible objects into cuisine. Cooking led to the creation of the kitchen, the adaptation of raw materials into utensils, and the birth of written and oral guidelines to formalize cooking techniques like roasting, broiling, and frying. The transmission of recipes allowed food to acquire its own language and grow into a complex cultural product shaped by climate, geography, the pursuit of pleasure, and later, the desire for health. In his history, Montanari touches on the spice trade, the first agrarian societies, Renaissance dishes that synthesized different tastes, and the analytical attitude of the Enlightenment, which insisted on the separation of flavors. Brilliantly researched and analyzed, he shows how food, once a practical necessity, evolved into an indicator of social standing and religious and political identity. Whether he is musing on the origins of the fork, the symbolic power of meat, cultural attitudes toward hot and cold foods, the connection between cuisine and class, the symbolic significance of certain foods, or the economical consequences of religious holidays, Montanari's concise yet intellectually rich reflections add another dimension to the history of human civilization. Entertaining and surprising, Food Is Culture is a fascinating look at how food is the ultimate embodiment of our continuing attempts to tame, transform, and reinterpret nature.

**Market-Driven Management** Jean-Jacques Lambin, Isabelle Schuiling. 2012-07-19 Market-Driven Management adopts a broad approach to marketing, integrating the strategic and operational elements of the discipline. Lambin's unique approach reflects how marketing operates empirically, as both a business philosophy and an action-oriented process. Motivated by the increased complexity of markets, globalisation, deregulation, and the development of e-commerce, the author challenges the traditional concept of the 4Ps and the functional roles of marketing departments, focusing instead on the concept of market orientation. The book considers all of the key market stakeholders, arguing that developing market relations and enhancing customer value is the responsibility of every member of the organization, and that the development of this customer value is the only way for a firm to achieve profit and growth. New to this edition: - Greater coverage of ethical issues and corporate social responsibility; cultural diversity; value and branding and the economic downturn - Broad international perspective - Thoroughly revised to reflect the latest academic thinking and research With its unique approach, international cases and complementary online resources, this book is ideal for postgraduate and upper level undergraduate students of marketing, and for MBAs and Executive MBAs.
