Home Stories Mateo Kries, Jochen Eisenbrand. 2020-04-21 A mammoth history of interior design and the way it shapes our lives, in 20 iconic interiors Our homes are an expression of how we want to live; they shape our everyday routines and fundamentally affect our well-being. Interior design for the home sustains a giant global industry and feeds an entire branch of the media. However, the question of dwelling, or how to live, is found increasingly to be lacking in serious discourse. This book sets out to review the interior design of our homes. It discusses 20 iconic residential interiors from the present back to the 1920s, by architects, artists and designers such as Assemble, Cecil Beaton, Lina Bo Bardi, Arno Brandlhuber, Elsie de Wolfe, Elio, Josef Frank, Andrew Geller, IKEA, Finn Juhl, Michael Graves, Kisho Kurokawa, Adolf Loos, Claude Parent, Bernard Rudofsky, Margarete Schütte-Lihotzky, Alison and Peter Smithson, Jacques Tati, Mies van der Rohe and Andy Warhol. Including historic and recent photographs, drawings and plans, the book explores these case studies as key moments in the history of the modern interior. Penny Sparke provides a concise history of the discipline of interior design, Alice Rawsthorn investigates the role of gender, and Mark Taylor discusses the discourse on interior design in the 21st century. Adam Stech offers insights into the use of colour in residential interiors and Matteo Pirola offers a detailed and richly illustrated chronology of significant events in the history of interior design. In a portfolio of photographs selected exclusively for this book, Jasper Morrison explores what makes a good interior. In addition to interviews with contemporary interior design practitioners, experts in the fields of the sociology of living and psychology provide further insight. This book is a valuable resource for anyone interested in interior design.

Frank Auerbach Robert Hughes. 1992 Paperback edition of a highly acclaimed 1990 monograph which was the first full study of the artist's work, with 254 illustrations, 174 in duotone and 80 in colour. Auerbach himself selected the paintings for the book as representing the most important of his career. The author is a well-known writer, critic and television presenter and art critic of 'Time' magazine. Previous books include 'The Shock of the New' and 'The Fatal Shore'.

Jean-Michel Basquiat and the Art of Storytelling Eleanor Nairne. 2018 Get up close to the bold brushwork and scribbled words of Jean-Michel Basquiat, one of the most successful artists of his time. This XXL-sized monograph gathers Basquiat's major works in pristine reproduction. Texts by editor Hans Werner Holzwarth and curator and art historian Eleanor Nairne introduce us to a legend synonymous with 1980s New York.

The Dutch Photobook Frits Gierstberg, Rik Suermondt. 2012 The Dutch photobook is internationally celebrated for its particularly close collaboration between photographer, printer and designer. The current photobook publishing boom in the Netherlands stems from a tradition of excellence that precedes World War II, but the postwar years inaugurated a period of particularly close collaboration between photographers and designers, producing such unique photography books as Ed van der Elsken's *Love on the Left Bank* (1956) and Koen Wessing's *Chili*, September 1973 (1973). Innovations such as the photo novel and the company photobook blossomed in the 1950s and 60s; later, other genres emerged to characterize the publishing landscape in Holland, including conceptual and documentary photobooks, books on youth culture, urbanism photobooks and landscape photobooks and travelogues. Examining each of these genres across six themed chapters, *The Dutch Photobook* features selections from more than 100 historical, contemporary and self-published photobook projects. It includes landmark publications such as *Hollandse taferelen* by Hans Aarsman (1989), *The Table of Power* by Jacqueline Hassink (1996), *Why Mister Why* by Geert

van Kesteren (2006) and *Empty Bottles* by Wassink Lundgren (2007). Dutch photo historians Frits Gierstberg and Rik Suermondt contribute several essays on the history of the genre, the collaborative efforts between photographers and designers and their inspiration and influences, complementing the high-quality reproductions of photobooks throughout. Award-winning designer Joost Grootens contributes unique charts and diagrams that consolidate all of these elements, in a visually unique map of the Dutch photobook.

Stitched Up Tansy E. Hoskins. 2014-01-21 *Stitched Up* delves into the exclusive and alluring world of fashion, to expose class division, gender stereotyping and wasteful consumption. Tansy Hoskins illuminates the political and sociological dimensions of an industry which promotes and supports the dominant values of our age: image, glamour, money and sex. Hoskins also provides a fascinating historical narrative, showing that the clothes we wear are as indicative of who we are as they were during the reign of Louis XIV. She tackles key contemporary issues, such as the controversy over 'size zero' and the impact of fashion in depleting the world's natural resources. In a provocative move, *Stitched Up* argues that fashion controls our aspirations and self worth through a set of impossible beauty standards. At a time when high spending on clothes persists despite economic recession, *Stitched Up* provides a unique critical examination of fashion in relation to contemporary culture and the distorting priorities of capitalism.

Talk to Me Paola Antonelli. 2011 Published in conjunction with an exhibition at The Museum of Modern Art, *Talk to Me* thrives on an important late 20th-century cultural development in design: a shift from the centrality of function to that of meaning. From this new perspective, objects contain information that goes well beyond their immediate use or appearance, providing access to complex systems and networks and acting as gateways and interpreters. Whether openly and actively, or in subtle, subliminal ways, things talk to us, and designers write the initial script that lets us develop and improvise the dialogue. *Talk to Me* focuses on objects that involve direct interaction, such as interfaces, information systems, communication devices, and projects that establish a practical, emotional or even sensual connection between their users and entities such as cities, companies, governmental institutions, as well as other people. The featured objects range in date from the early 1980s - beginning with the first Graphic User Interface, developed by Xerox Parc in 1981 - with particular attention given to projects from the last five years and to several ones currently in development. Included are a diverse array of examples, from computer and machine interfaces to websites, video games, devices and tools, and installations. Organized thematically, *Talk to Me* features essays by Paola Antonelli, Jamer Hunt, Alexandra Midel, Kevin Slavin, and Koi Vinh. By introducing design practices that are becoming increasingly crucial to our world, the book presents a highly distilled sample of today's best design production that uses technology in creative and unexpected ways, showing how rich and deep design's influence will be on our future.

The Travels of Bad Zander Blom. 2009 Comprises a mini-novella with 17 photographic works, a 17-track album soundtrack, and an exhibition catalogue.

Paula Hayes Paula Hayes, Richard D. Marshall. 2012-05-22 Artist Paula Hayes is most famous for her exquisite, high-end art terrariums of organically shaped, handblown glass, but her affinity for all things green extends to full gardens as well. She has created over twenty full gardens for private clients around the country. This volume, the first monograph on her work, is structured in a two-part format that devotes equal attention to both. A fixture of the New York art scene for over twenty years, Paula Hayes's popularity among art collectors and the public has swelled dramatically over the past few. Her installation in the lobby of MoMA, *Nocturne of the Limax Maximus*, garnered much critical acclaim and landed her a feature on CBS Sunday Morning. She installed an oversized terrarium in the lobby of Lever House in New York City, and a solo exhibition on her work was held at the Wexler Art Center in Columbus, Ohio, where she also installed a permanent garden adjacent to the museum's main entrance.

Help Your Self Mieke Gerritzen. 2021-02-09 Our identities used to be shaped by our communities, families, and friends, but in the online era we inhabit today, we are expected to write our own success stories on social media platforms. We design our own identity, create our own image, and

present ourselves in the way we want to be seen. The various imaginative methods and ideas for upgrading oneself are seen as new forms of creativity, or 'Self-Design'. Authored by designer, producer, and Image Society founder Mieke Gerritzen, 'Help Your Self' is an inspirational book for getting started with designing your perfect self. In addition, it offers reflections on the self-help industry as a relatively new phenomenon.

Design for Democracy Marcia Lausen.2008-11-15 In November 2000, when the now-infamous butterfly ballot confused crucial Florida voters during a hotly contested presidential race, the importance of well-designed ballots to a functioning democracy caught the nation's attention. Recognizing that our entire voting process—from registering to vote to following instructions at the polling place—can be almost as confusing as the Florida ballot, Design for Democracy builds on the lessons of 2000 by presenting innovative steps for redesigning elections in the service of citizens. Handsomely designed itself, this volume showcases adaptable design models that can improve almost every part of the election process by maximizing the clarity and usability of ballots, registration forms, posters and signs, informational brochures and guides, and even administrative materials for poll workers. Design for Democracy also lays out specific guidelines—covering issues of color palette, typography, and image use—that anchor the comprehensive election design system devised by the group of design specialists from whose name the book takes its title. Part of a major AIGA strategic program, this group's prototypes and recommendations have already been used successfully in major Illinois and Oregon elections and, collected here, are likely to spread across the country as more people become aware of the myriad benefits and broad applicability of improved election design. An essential tool for designers and election officials, lawmakers and citizens, Design for Democracy harnesses the power of design to increase voter confidence, promote government transparency, and, perhaps most important, create an informed electorate.

Christien Meindertsma - Bottom Ash Observatory.2015 Following a tour through the largest and most energy-efficient waste-to-energy plant in the world, Dutch artist and designer Christien Meindertsma became intrigued with the dark residue leftover by the process of incinerating municipal solid waste. Using a 25-kilo sample of raw bottom ash, as it is called, she demonstrates the rich properties and versatility of this resource by successfully gleaning numerous materials from it by hand - among them valuable reusable ones such as zinc, aluminium, copper, and silver. Meindertsma commissioned photographer Mathijs Labadie to document every step of this exhaustively precise process in a surprisingly scientific inquiry.

Landscape as Infrastructure Pierre Belanger.2016-11-10 As ecology becomes the new engineering, the projection of landscape as infrastructure—the contemporary alignment of the disciplines of landscape architecture, civil engineering, and urban planning— has become pressing. Predominant challenges facing urban regions and territories today—including shifting climates, material flows, and population mobilities, are addressed and strategized here. Responding to the under-performance of master planning and over-exertion of technological systems at the end of twentieth century, this book argues for the strategic design of infrastructural ecologies, describing a synthetic landscape of living, biophysical systems that operate as urban infrastructures to shape and direct the future of urban economies and cultures into the 21st century. Pierre Bélanger is Associate Professor of Landscape Architecture and Co-Director of the Master in Design Studies Program at Harvard University's Graduate School of Design. As part of the Department of Landscape Architecture and the Advanced Studies Program, Bélanger teaches and coordinates graduate courses on the convergence of ecology, infrastructure and urbanism in the interrelated fields of design, planning and engineering. Dr. Bélanger is author of the 35th edition of the Pamphlet Architecture Series from Princeton Architectural Press, GOING LIVE: from States to Systems (pa35.net), co-editor with Jennifer Sigler of the 39th issue of Harvard Design Magazine, Wet Matter, and co-author of the forthcoming volume ECOLOGIES OF POWER: Mapping Military Geographies & Logistical Landscapes of the U.S. Department of Defense. As a landscape architect and urbanist, he is the recipient of the 2008 Canada Prix de Rome in Architecture and the Curator for the Canada Pavilion and Canadian Exhibition, EXTRACTION, at the 2016 Venice Architecture Biennale

One Billion Hungry Gordon Conway.2012-10-15 Hunger is a daily reality for a billion people. More than six decades after the technological discoveries that led to the Green Revolution aimed at ending world hunger, regular food shortages, malnutrition, and poverty still plague vast swaths of the world. And with increasing food prices, climate change, resource inequality, and an ever-increasing global population, the future holds further challenges. In *One Billion Hungry*, Sir Gordon Conway, one of the world's foremost experts on global food needs, explains the many interrelated issues critical to our global food supply from the science of agricultural advances to the politics of food security. He expands the discussion begun in his influential *The Doubly Green Revolution: Food for All in the Twenty-First Century*, emphasizing the essential combination of increased food production, environmental stability, and poverty reduction necessary to end endemic hunger on our planet. Conway addresses a series of urgent questions about global hunger: • How we will feed a growing global population in the face of a wide range of adverse factors, including climate change? • What contributions can the social and natural sciences make in finding solutions? • And how can we engage both government and the private sector to apply these solutions and achieve significant impact in the lives of the poor? Conway succeeds in sharing his informed optimism about our collective ability to address these fundamental challenges if we use technology paired with sustainable practices and strategic planning. Beginning with a definition of hunger and how it is calculated, and moving through issues topically both detailed and comprehensive, each chapter focuses on specific challenges and solutions, ranging in scope from the farmer's daily life to the global movement of food, money, and ideas. Drawing on the latest scientific research and the results of projects around the world, Conway addresses the concepts and realities of our global food needs: the legacy of the Green Revolution; the impact of market forces on food availability; the promise and perils of genetically modified foods; agricultural innovation in regard to crops, livestock, pest control, soil, and water; and the need to both adapt to and slow the rate of climate change. *One Billion Hungry* will be welcomed by all readers seeking a multifaceted understanding of our global food supply, food security, international agricultural development, and sustainability.

Making & Being Susan Jahoda,Caroline Woolard.2020-01-23 Making and Being draws on the lived experience of Susan Jahoda and Caroline Woolard, visual arts educators who have developed a framework for teaching art with the collective BFAMFAPhD that emphasizes contemplation, collaboration, and political economy. The authors share ideas and pedagogical strategies that they have adapted to spaces of learning which range widely, from self-organized workshops for professional artists to Foundations BFA and MFA thesis classes. This hands-on guide includes activities, worksheets, and assignments and is a critical resource for artists and art educators today-- Page 4 of cover.

Wildflowering L.A. Shamim Momin.2015 Wildflowering L.A. is a native wildflower seed sowing initiative throughout Los Angeles County by artist Fritz Haeg. Fifty highly visible sites were sown by participants in fall 2013 to bloom in spring 2014. The project included various events throughout the course of the season, and culminated with a participatory public exhibition.

Christien Meindertsma Christien Meindertsma,Katherine Rosmalen,Joel Gethin Lewis.2007 Christien Meindertsma has spent three years researching all the products made from a single pig. Amongst some of the more unexpected results were: Ammunition, medicine, photo paper, heart valves, brakes, chewing gum, porcelain, cosmetics, cigarettes, conditioner and even bio diesel. Meindertsma makes the subject more approachable by reducing everything to the scale of one animal. After it's death, Pig number 05049 was shipped in parts throughout the world. Some products remain close to their original form and function while others diverge dramatically. In an almost surgical way a pig is dissected in the pages of the book - resulting in a startling photo book where all the products are shown at their true scale (1:1).

Looks Good, Feels Good, is Good Anne van der Zwaag.2014 Social design omvat alle designstromingen die een duurzame leefstijl ondersteunen en alternatieven aandragen voor de

huidige sociale en economische systemen. Dit boek verheldert het concept van social design op toegankelijke, interdisciplinaire en visueel aantrekkelijke wijze. Het functioneert daardoor als referentieboek voor professionals en studenten, maar tevens als katalysator voor een creatieve beweging en een mentaliteit met een enorm potentieel en een ongekende impact.

Swarm Jennifer D. Lyle.2023-11-07 On a sunny September morning, the creatures first appear. Shur sees one of them hovering outside the window in history class: it looks like a giant butterfly, at first too beautiful and strange to seem like a threat. But when emergency alerts light up everyone's phones around her, she realizes something very, very wrong is happening outside. These... things are everywhere. By the time Shur makes it back to her house with her brother, Keene, and their two best friends, it's clear they must face whatever comes next on their own. A terrifying species the world's never seen before has suddenly emerged, and few living things are safe. As the creatures swarm and attack outside, life for Shur and her friends becomes a survival game. They board the windows, stockpile supplies, and try to make sense of the news reports for as long as the power stays on. Yet nothing can prepare them for what follows. The butterflies are only the beginning. The next onslaught will be deadlier, and even closer to home.

Dutch Designers Yearbook Freek Kroesbergen.2021-08-10 Dutch designers are noted worldwide for their originality and daring innovations, and their work penetrates the capillaries of our society. Design is everywhere and the world seems makeable. This is an image to which the unorthodox methods and creative power of designers contribute. Although the Covid-19 crisis is fundamentally affecting the creative sector, the accompanying major social and economic challenges facing the world also offer many opportunities. How resilient is the design sector and how can it contribute to the necessary transitions?00The Dutch designers Yearbook describes the design year 2020 and looks to the future. The book offers a candid take on what designers are thinking and making now: through essays and interviews, remarkable graduation projects from Dutch design schools, award-winning work and portraits of iconic design heroes such as Simon Dogger, Christien Meindertsma, Taco Carlier, Harald Dunnink and Bas Timmer.

CoReFab Ammar Eloueini.2005 CoReFab combines three words/fields: Concepts + Representation + Fabrication. The book documents five completed projects by AEDS Ammar Eloueini designed and implemented between 2003-2005. The projects are here grouped for evident similarities as well as

differences. They are similar in scale, budget, materials and fabrication. They are all designed for a short life-span and have a distinct familial look. Most importantly, they share a consistent research agenda in the use of certain materials, structural techniques and geometries. They differ in their wide-ranging purpose and institutional framework: they are commissioned by a variety of clients ranging from choreographers, fashion designers and art institutions to perform very different tasks. AUTHOR: Ammar Eloueini (born 1968), received a Master of Science in Advanced Architectural Design from Columbia University Graduate School of Architecture in 1995. Teaching at the Ecole d'Architecture Paris-Villemin since 1996, co-founder of the digit-all studio. Participated to the International Exhibition Transarchitectures 02 launched in Paris in June 1997. Over the past three years, Ammar Eloueini produced projects that challenge traditional design processes. Integrating digital media to investigate new approaches, based on animation software and the use of computers as a design tool. Extending his activities in the theoretical field, he participated in various international ideas competitions, where a conceptual and projectual approach, based on dynamic, non linear systems, answering new architectural and urban complexities was tested. Winner of the Villa Medicis Hors les Murs (AFAA, French Ministry of Culture) in 1998, he is working on a research project (Living in Strenereality). Other publications include a forthcoming book digital trilogy, from mass production to mass customization. ILLUSTRATIONS: 55 colour & 5 b/w photographs & 24 illustrations

Cutlery Marco Ferreri.1997 Each of these three books presents a fascinating history of the art and design of a particular object, detailing, with hundreds of painstakingly-collected examples and informative texts, the multitude of varieties of pencils, cutlery, and bookmarks. These books will appeal to those who value both the beauty and functionality of everyday objects, simple tools that are made with astonishing precision and care. Above all these are superbly designed books, with inviting page layouts, many reproductions in actual-size, and colorful examples ranging from the preserved and untarnished to those that proudly bear their battle scars from years of use. Short texts by master compiler Marco Ferreri describing the background of each type and style are included, as well as an introductory essay that examines the evolution and historical significance of these marvels of design.

Icebergs, Zombies, and the Ultra-Thin Matthew Soules.2021-05-04 Soules's excellent book makes sense of the capitalist forces we all feel but cannot always name... Icebergs, Zombies, and the Ultra Thin arms architects and the general public with an essential understanding of how capitalism makes property. Required reading for those who think tomorrow can be different from today.— Jack Self, coeditor of *Real Estates: Life Without Debt* In *Icebergs, Zombies, and the Ultra Thin*, Matthew Soules issues an indictment of how finance capitalism dramatically alters not only architectural forms but also the very nature of our cities and societies. We rarely consider architecture to be an important factor in contemporary economic and political debates, yet sparsely occupied ultra-thin pencil towers develop in our cities, functioning as speculative wealth storage for the superrich, and cavernous iceberg homes extend architectural assets many stories below street level. Meanwhile, communities around the globe are blighted by zombie and ghost urbanism, marked by unoccupied neighborhoods and abandoned housing developments. Learn how the use of architecture as an investment tool has accelerated in recent years, heightening inequality and contributing to worldwide financial instability: • See how investment imperatives shape what and how we build, changing the very structure of our communities • Delve into high-profile projects, like the luxury

apartments of architect Rafael Viñoly's 432 Park Avenue • Understand the convergence of technology, finance, and spirituality, which together are configuring the financialized walls within which we eat, sleep, and work Includes dozens of photos and drawings of architectural phenomena that have changed the way we live. Essential reading for anyone interested in architecture, design, economics, and understanding the way our world is formed.

W. E. B. Du Bois's Data Portraits The W.E.B. Du Bois Center at the University of Massachusetts Amherst. 2018-11-06 The colorful charts, graphs, and maps presented at the 1900 Paris Exposition by famed sociologist and black rights activist W. E. B. Du Bois offered a view into the lives of black Americans, conveying a literal and figurative representation of the color line. From advances in education to the lingering effects of slavery, these prophetic infographics —beautiful in design and powerful in content—make visible a wide spectrum of black experience. W. E. B. Du Bois's Data Portraits collects the complete set of graphics in full color for the first time, making their insights and innovations available to a contemporary imagination. As Maria Popova wrote, these data portraits shaped how Du Bois himself thought about sociology, informing the ideas with which he set the world ablaze three years later in *The Souls of Black Folk*.

Massive Change Bruce Mau, Jennifer Leonard, Institute Without Boundaries. 2004-10 Massive Change is a modern illustrated primer on the new inventions, technologies, and events that are affecting the human race worldwide. The book is a part of a broader research project by Bruce Mau Design intended to provoke debate and discussion about the familiar objects and techniques that are transforming our lives. In essays, interviews, and provocative imagery aimed at a broad audience, Massive Change explores the changing force of design in the contemporary world, and in doing so expands the definition of design to include the built environment, transportation technologies, revolutionary materials, energy and information systems, and living organisms. The book is divided into 11 heavily illustrated sections covering major areas of change in contemporary society - such as urbanism and architecture, the military, health and living, and wealth and politics. introductory essay, extended captions, and interviews with leading thinkers, including engineers, designers, philosophers, scientists, architects, artists, and writers. Concluding the book is a graphic timeline of significant inventions and world events from 10,000 B.C. to the present. Massive Change is the umbrella name for wide-ranging research project initiated by Bruce Mau Design and the Institute Without Boundaries, a new post-graduate design program headquartered at his studio. The project will include not only this book but also a travelling exhibition, public events, an on-line forum, a documentary television project, posters, and a product line. The overall aim of the project is to explore the changing force of design in the contemporary world. The book focuses on the powerful, newly designed technologies and systems (and the failure of outmoded ones) that increasingly influence our daily lives. the debate about genetically modified foods, the race to decode human the human genome, the development and worldwide trafficking of sophisticated military weapons - even the increasingly intrusive security systems at airports: all are examples of massive changes that involve the field of design. The book presents images and text that explore the impact of these subjects, both the seemingly mundane as well as the mind-boggling and microscopic. As the text in Massive Change explains: No longer associated simply with objects and appearances, design is increasingly understood in a much wider sense as the human capacity to plan and produce desired outcomes. The book is divided into 11 sections, each focusing on a specific economy at work in the world today, both the traditional (such as manufacturing), and the often-invisible (globalization and politics). The pages combine images, extended captions, general essays, and interviews in a clean, simple design. The imagery in Massive Change is irresistible, and stands alone as a compelling reason to own this book. beautiful. For example, a photo of a smoky blue blob, as the caption explains, is really Aerogel, a material developed by NASA to collect fast-moving space dust. And a

featherless, naked chicken staring at us from the page is just that: a new, genetically engineered broiler that requires no plucking and yields more meat, a boon to poultry producers yet a frightening harbinger of our future food supply. Massive Change is a well designed, intelligent, visually provocative exploration of the myriad subjects percolating through popular culture: those we read about in magazines and on Web sites but rarely understand in any meaningful way. It poses the question: Now that the human race can do almost anything, what will we do next?

Provoke Matthew S. Witkovsky, Diane Dufour, Duncan Forbes, Walter Moser. 2016 The short-lived Japanese magazine Provoke is recognized as a major achievement in world photography of the postwar era, uniting the country's most contentious examples of protest photography, vanguard fine art, and critical theory of the late 1960s and early 70s in only three issues overall. Provoke is accordingly treated here as a model synthesis of the complexities and overlapping uses of photography in postwar Japan. The writing and images by Provoke's members - critic Koji Taki, poet Takahiko Okada, photographers Takuma Nakahira, Yutaka Takanashi, Daido Moriyama - were suffused with the tactics developed in some Japanese protest books which made use of innovative graphic design and provocatively poor materials. Recording live actions, photography in these years was also an expressive form suited to emphasize and critique the mythologies of modern life with a wide spectrum of performing artists such as Nobuyoshi Araki, Koji Enokura and Jiro Takamatsu. This catalogue accompanies the first exhibition ever to be held about the magazine and its creators and focuses on its historical context. It covers the preliminary period leading to its first and the aftermath following its last issue. Provoke takes shape as a strongly interpretative explanation of currents in Japanese art and society at a moment of historical collapse and renewal.

DailyCheapReads.com has daily posts on the latest Kindle book deals available for download at Amazon, and will sometimes post free books. Another site that isn't strictly for free books, Slideshare does offer a large amount of free content for you to read. It is an online forum where anyone can upload a digital presentation on any subject. Millions of people utilize SlideShare for research, sharing ideas, and learning about new technologies. SlideShare supports documents and PDF files, and all these are available for free download (after free registration). Once you've found a book you're interested in, click Read Online and the book will open within your web browser. You also have the option to Launch Reading Mode if you're not fond of the website interface. Reading Mode looks like an open book, however, all the free books on the Read Print site are divided by chapter so you'll have to go back and open it every time you start a new chapter. Since it's a search engine, browsing for books is almost impossible. The closest thing you can do is use the Authors dropdown in the navigation bar to browse by authors—and even then, you'll have to get used to the terrible user interface of the site overall. Free ebook download sites: - They say that books are one's best friend, and with one in their hand they become oblivious to the world. While With advancement in technology we are slowly doing away with the need of a paperback and entering the world of eBooks. Yes, many

may argue on the tradition of reading books made of paper, the real feel of it or the unusual smell of the books that make us nostalgic, but the fact is that with the evolution of eBooks we are also saving some trees. 4eBooks has a huge collection of computer programming ebooks. Each downloadable ebook has a short review with a description. You can find over thousand of free ebooks in every computer programming field like .Net, Actionscript, Ajax, Apache and etc. Although this program is free, you'll need to be an Amazon Prime member to take advantage of it. If you're not a member you can sign up for a free trial of Amazon Prime or wait until they offer free subscriptions, which they do from time to time for special groups of people like moms or students. It's disappointing that there's no convenient menu that lets you just browse freebies. Instead, you have to search for your preferred genre, plus the word 'free' (free science fiction, or free history, for example). It works well enough once you know about it, but it's not immediately obvious.
