Emergence and Innovation in Digital Learning George Veletsianos.2016-06-01 Educational systems worldwide are facing an enormous shift as a result of sociocultural, political, economic, and technological changes. The technologies and practices that have developed over the last decade have been heralded as opportunities to transform both online and traditional education systems. While proponents of these new ideas often postulate that they have the potential to address the educational problems facing both students and institutions and that they could provide an opportunity to rethink the ways that education is organized and enacted, there is little evidence of emerging technologies and practices in use in online education. Because researchers and practitioners interested in these possibilities often reside in various disciplines and academic departments the sharing and dissemination of their work across often rigid boundaries is a formidable task. Contributors to *Emergence and Innovation in Digital Learning* include individuals who are shaping the future of online learning with their innovative applications and investigations on the impact of issues such as openness, analytics, MOOCs, and social media. Building on work first published in *Emerging Technologies in Distance Education*, the contributors to this collection harness the dispersed knowledge in online education to provide a one-stop locale for work on emergent approaches in the field. Their conclusions will influence the adoption and success of these approaches to education and will enable researchers and practitioners to conceptualize, critique, and enhance their understanding of the foundations and applications of new technologies.

The Report of the Hillsborough Independent Panel Hillsborough Independent Panel.2012-09-12 96 women, men and children died as a result of the disaster in Hillsborough Stadium on 15 April 1989. They were crushed due to overcrowding in the Leppings Lane terrace, penned in by the ground's fencing. Hundreds more were injured and thousands traumatised. Lord Justice Taylor led a judicial inquiry (1990, Cm. 962, ISBN 9780101096225), concluding that the main cause of the disaster was the failure of police control. The next 11 years saw a variety of investigations and proceedings, including a scrutiny of new evidence (Lord Justice Stuart-Smith, 1998, Cm. 3878, ISBN 9780101387828). Yet many bereaved families felt that the true context, circumstances and aftermath had not been adequately made public, and were particularly aggrieved that it had become widely assumed that Liverpool fans' behaviour had contributed to the disaster. The Independent Panel was established in 2010 to oversee full public disclosure of all documents relating to the disaster and to report on its work. This report is in three parts. Firstly it shows what was already known and in the public domain by 2010. Secondly, in 12 detailed chapters, it describes what the disclosed documents add to public understanding. The third part gives a review of options for providing an archive of the documents. The disclosed documents (available at <http://panel.hillsborough.independent.gov.uk/>) add considerably to public understanding. They show that multiple factors were responsible for the tragedy and that the fans were not the cause. The report also shows that the bereaved families met a series of obstacles in their search for justice over more than 20 years.

The British School Film Stephen Glynn.2016-10-05 Through close textual and contextual analysis of British films spanning a century, this book explores how pupils, teachers and secondary education in general have been represented on the British screen. The author addresses a number of topics including the nature of

public (fee-paying) and state schooling; the values of special, single-sex and co-education; the role of male and female teachers; and the nature of childhood and adolescence itself. From the silents of Hitchcock to the sorcery of Harry Potter, British cinema's continued explorations of school life highlights its importance in the nation's everyday experience and imaginary landscape. Beyond this, the school film, varying in scope from low-budget exploitation to Hollywood-financed blockbusters, serves both as a prism through which one can trace major shifts in the British film industry and as a barometer of the social and cultural concerns of the cinema-going public. This applies especially for gender, race and, in all senses, class.

Digital Scholarly Editing Matthew James Driscoll, Elena Pierazzo. 2016-08-15 This volume presents the state of the art in digital scholarly editing. Drawing together the work of established and emerging researchers, it gives pause at a crucial moment in the history of technology in order to offer a sustained reflection on the practices involved in producing, editing and reading digital scholarly editions—and the theories that underpin them. The unrelenting progress of computer technology has changed the nature of textual scholarship at the most fundamental level: the way editors and scholars work, the tools they use to do such work and the research questions they attempt to answer have all been affected. Each of the essays in *Digital Scholarly Editing* approaches these changes with a different methodological consideration in mind. Together, they make a compelling case for re-evaluating the foundation of the discipline—one that tests its assertions against manuscripts and printed works from across literary history, and the globe. The sheer breadth of *Digital Scholarly Editing*, along with its successful integration of theory and practice, help redefine a rapidly-changing field, as its firm grounding and future-looking ambit ensure the work will be an indispensable starting point for further scholarship. This collection is essential reading for

Cultural Severance and the Environment Ian D.

Rotherham.2013-05-09 This major book explores commons, lands and rights of usage in common, traditional and customary practices, and the cultural nature of 'landscapes'. Importantly, it addresses now critical matters of 'cultural severance' and largely unrecognized impacts on biodiversity and human societies, and implications for conservation, sustainability, and local economies. The book takes major case studies and perspectives from around the world, to address contemporary issues and challenges from historical and ecological perspectives. The book developed from major international conferences and collaborations over around fifteen years, culminating 'The End of Tradition?' in Sheffield, UK, 2010. The chapters are from individuals who are both academic researchers and practitioners. These ideas are now influencing bodies like the EU, UNESCO, and FAO, with recognition by major organisations and stakeholders, of the critical state of the environment consequent on cultural severance.

can be harnessed to enhance the student experience at university.

While play is often misunderstood as something 'trivial' and

associated with early years education, the editors and

contributors argue that play contributes to social and human

development and relations at a fundamental level. This volume

invalidates the commonly held assumption that play is only for

children, drawing together numerous case studies from higher

education that demonstrate how researchers, students and

collection unites play theory and practice to address the gulf in research on this fascinating topic. It will be of interest and value to educators, students and scholars of play and creativity, as well as practitioners and academic leaders looking to incorporate play into the curriculum.

Case Studies in Curriculum Change William A Reid, Decker F. Walker. 2012-05-16 One of the educationist's major concerns today is to find effective ways of translating new goals for the curriculum into classroom practices. American and British contributions analyse curriculum change as it actually occurs, with people, institutions and constraints of time and money acknowledged and accepted as a necessary and rightful part of the whole process. Detailed accounts are given of curriculum change in a wide variety of settings: American and English school systems, a college of education, an art curriculum project, Scottish classrooms. Analytic perspectives are employed that help to clarify the underlying forces at work. The contributors probe the adequacy of current theorizing about curriculum development, and suggest new ways of thinking about the problems involved in bringing about change.

Today the record companies may be hurting, but the music making business is booming, using non-traditional digital methods and distribution models. This book explains why we got where we are and where we are heading. Kusek and Leonhard foresee the disappearance of CDs and record stores as we know them in the next decade. For the iPod, downloading market, this book will explain new ways of discovering music, new ways of acquiring it and how technology trends will make music flow like water, benefiting the people who love music and make music.

Radical Information Literacy Andrew Whitworth.2014-08-27 What would a synthetic theory of Digital, Media and Information Literacy (DMIL) look like? Radical Information Literacy presents, for the first time, a theory of DMIL that synthesises the diversity of perspectives and positions on DMIL, both in the classroom and the workplace, and within the informal learning processes of society. This title is based on original analysis of how decisions are made about the relevance of information and the other resources used in learning, showing how society has privileged objective approaches (used in rule-based decision making) to the detriment of subjective and intersubjective perspectives which promote individual and community contexts. The book goes on to analyse the academic and popular DMIL literature, showing how the field may have been, consciously or unwittingly, complicit in the 'objectification' of learning and the disempowerment of individuals and communities. Alternative ways of conceiving the subject are then presented, towards a reversal of these trends. Synthesises key theorists of digital, media and information literacy and information behaviour Includes the field of 'community informatics' Conducts a bibliometric analysis of a broad spectrum of writings on digital, media and information literacy, analysing the connections between them and the frames of DMIL within which they are located

Self-Determined Learning Stewart Hase,Chris Kenyon.2013-09-26 Heutagogy, or self-determined learning, redefines how we understand learning and provides some exciting opportunities for educators. It is a novel approach to educational practice, drawing on familiar concepts such as constructivism, capability, andragogy and complexity theory. Heutagogy is also supported by a substantial and growing body of neuroscience research. Self-Determined Learning explores how heutagogy was derived, and what this approach to learning involves, drawing on recent research and practical applications. The editors draw together contributions from educators and practitioners in

Hollis Croft Mili Rajic, Dave Howarth. 2021-04-30 Sheffield, mid-19 century, the peak of the steel industry that both built and scarred the city. Dark streets and darker attitudes smother life in the grimy tenements and back streets. A young woman, Neive, leaves the poverty of her parents' home in West Ireland to seek work in the industrial cities of Northern England. She finds herself in Sheffield, having to hide her femininity to get work in steel cementation factories, she also must hide her forbidden love. An unlikely salvation occurs to her in the shape of a famous circus impresario...but will her plan lead her to a new life? This fictional story winds around the archaeological remains from an industrial site in Sheffield. Archaeologist Milica (Mili) Rajic imagines a human story entwined within the archaeological remnants and artefacts uncovered in the heavily industrialised Victorian Sheffield.

Mobile Learning Design Daniel Churchill, Jie Lu, Thomas K.F. Chiu, Bob Fox. 2015-12-21 This book focuses on mobile learning design from both theoretical and practical perspectives. It introduces and discusses how mobile learning can be effectively integrated into curricula, highlighting the design of four key components of learning-centric pedagogy: Resource, Activity, Support and Evaluation in the context of mobile learning. It also investigates the learning theories underpinning mobile learning design, and includes case studies in different contexts. It provides practical insights that allow teachers to change and transform teaching practices using mobile technology. Anyone involved in mobile-technology enhanced learning and teaching will find this book both informative and useful.

represents the lifetime work of Margaret Stansfield who sadly passed away in 2012. Margaret spent 30 years compiling the 3,439 biographical entries giving a poignant insight into the background, working lives and families of those who selflessly left Huddersfield to fight for their country never to return. Along with the biographical accounts there are many moving letters to the families of soldiers who lost their lives reflecting an attempt to bring comfort amid the darkness that their loss brought to both families and comrades alike.

Web Squared: Web 2.0 Five Years On Tim O'Reilly,John Battelle.2009-09-23 Ever since we first introduced the term Web 2.0, people have been asking, What [™]'s next? Assuming that Web 2.0 was meant to be a kind of software version number (rather than a statement about the second coming of the Web after the dotcom bust), we [™]re constantly asked about Web 3.0. Is it the semantic web? The sentient web? Is it the social web? The mobile web? Is it some form of virtual reality? It is all of those, and more. The Web is no longer a collection of static pages of HTML that describe something in the world. Increasingly, the Web is the world everything and everyone in the world casts an information shadow,an aura of data which, when captured and processed intelligently, offers extraordinary opportunity and mindbending implications. Web Squared is our way of exploring this phenomenon and giving it a name.

issues are central to the volume: the role of ritual speech acts; the way in which authorship can be seen as created within medieval texts rather than as a given category; finally, phenomena of voice, created and situated between citation and repetition, especially in forms which appropriate and transform literary tradition. The volume encompasses articles by historians and musicologists as well as literary scholars. It spans European literature from the West (French, German, Italian) to the East (Church Slavonic), vernacular and Latin; it contrasts modes of liturgical meditation in the Western and Eastern Church with secular plays and songs, and it brings together studies on the character of 'voice' in major medieval authors such as Dante with examples of Dante-reception in the early twentieth century.

The Bells of England J. J. Raven. 2015-12-04 J. J. Raven's learned and comprehensive work on the Bells of England arouses much interest, as it is the last work of a distinguished antiquary, who has accomplished much for the study of English archaeology. For a period of half a century J. J. Raven has been engaged on the fascinating study of campanology. He was one of the pioneers of the science, and therefore wrote this monograph with authority and accurate knowledge. We have many volumes on the bell-lore of different counties. The late H. T. Ellacombe recorded the bells of East Anglia. Thomas North those of five of the midland shires, Mr. Stahlschmidt did Kent and Surrey, Mr. Cox, Buckinghamshire, and the Rev. T. M. N. Owen, Huntingdonshire; other workers are engaged upon other counties; and J. J. Raven has now told the story of the bells of England as far as it was possible to do so with all available information, and a very graphic

story it is. The remains of the British period, the notices of bells by Saxon chroniclers, lamentations over the destruction of Norman bells, owing to the falling of many central towers, the gradual development of shape, inscriptions, foundry marks, and Longobardic lettering, the story of early foundries, such as those of London, York, King's Lynn, Wokingham and Reading, the history of change-ringing; legends and bell law, are some of the subjects of this volume. Enthusiastic bell-lovers are rare: we doubt not that J. J. Raven's book will greatly increase their number, and lead others to complete these chronicles of the bells of England by climbing the belfries and reading the inscriptions on the bells of some counties which have not been thoroughly explored. -Magazine of Christian Art [1907]

This site features a massive library hosting over 50,000 free eBooks in ePu, HTML, Kindle and other simple text formats. What's interesting is that this site is built to facilitate creation and sharing of e-books online for free, so there is no registration required and no fees. If your library doesn't have a subscription to OverDrive or you're looking for some more free Kindle books, then Book Lending is a similar service where you can borrow and lend books for your Kindle without going through a library. International Digital Children's Library: Browse through a wide selection of high quality free books for children here. Check out Simple Search to get a big picture of how this library is organized: by age, reading level, length of book, genres, and more. Now that you have a bunch of ebooks waiting to be read, you'll want to build your own ebook library in the cloud.

Or if you're ready to purchase a dedicated ebook reader, check out our comparison of Nook versus Kindle before you decide. While modern books are born digital, books old enough to be in the public domain may never have seen a computer. Google has been scanning books from public libraries and other sources for several years. That means you've got access to an entire library of classic literature that you can read on the computer or on a variety of mobile devices and eBook readers.
