Posttraumatic Stress Disorder and Related Diseases in Combat Veterans Elspeth Cameron Ritchie.2015-10-27 This book takes a case-based approach to addressing the challenges psychiatrists and other clinicians face when working with American combat veterans after their return from a war zone. Written by experts, the book concentrates on a wide variety of concerns associated with posttraumatic stress disorder (PTSD), including different treatments of PTSD. The text also looks at PTSD comorbidities, such as depression and traumatic brain injury (TBI) and other conditions masquerading as PTSD. Finally, the authors touch on other subjects concerning returning veterans, including pain, disability, facing the end of a career, sleep problems, suicidal thoughts, violence, and mefloquine "toxidrome". Each case study includes a case presentation, diagnosis and assessment, treatment and management, outcome and case resolution, and clinical pearls and pitfalls. Post-Traumatic Stress Disorder and Related Diseases in Combat Veterans is a valuable resource for civilian and military mental health practitioners, and primary care physicians on how to treat patients returning from active war zones.

Psychodynamic Formulation Deborah L. Cabaniss, Sabrina Cherry, Carolyn J. Douglas, Ruth Graver, Anna R. Schwartz.2013-03-22 How do our patients come to be the way they are? What forces shape their conscious and unconscious thoughts and feelings? How can we use this information to best help them? Constructing psychodynamic formulations is one of the best ways for mental health professionals to answer questions like these. It can help clinicians in all mental health settings understand their patients, set treatment goals, choose therapeutic strategies, construct meaningful interventions and conduct treatment. Despite the centrality of psychodynamic formulation to our work with patients, few students are taught how to construct them in a clear systematic way. This book offers students and practitioners from all fields of mental health a clear, practical, operationalized method for constructing psychodynamic formulations, with an emphasis on the following steps: DESCRIBING problems and patterns REVIEWING the developmental history LINKING problems and patterns to history using organizing ideas about development. The unique, up-to-date perspective of this book integrates psychodynamic theories with ideas about the role of genetics, trauma, and early cognitive and emotional difficulties on development to help clinicians develop effective formulations. Psychodynamic Formulation is written in the same clear, concise style of Psychodynamic Psychotherapy: A Clinical Manual (Wiley 2011). It is reader friendly, full of useful examples, eminently practical, suitable for either classroom or individual use, and applicable for all mental health professionals. It can stand alone or be used as a companion volume to the Clinical Manual.

Textbook of Hospital Psychiatry Steven S. Sharfstein.2009-02-20 With decreases in lengths of hospital stay and increases in alternatives to inpatient treatments, the field of hospital psychiatry has changed dramatically over the past 20 years. As the first comprehensive guide to be published in more than a decade, the Textbook of Hospital Psychiatry is a compilation of the latest trends, issues, and developments in the field. The textbook, written by 70 national experts and clinical specialists, covers a wide range of clinical and administrative topics that are central to today's practice of hospital psychiatry. This is the only textbook on the market today that provides information for psychiatric hospital clinicians and administrators in a single all-inclusive volume. It covers information not generally available in other textbooks and medical journals, touching on a variety of cutting-edge

issues, such as safety improvement, use of seclusion and restraint, suicide prevention, and culturally competent psychiatric care. The book's 35 chapters are divided into four parts: Part I, Inpatient Practice -- focuses on specialty psychiatric units (e.g., acute stabilization unit, eating disorders unit, forensic unit, child unit), including the many psychopharmacological and psychosocial treatments used within each. This section also touches on specialized treatment for patients with co-occurring problems, such as substance abuse, developmental disabilities, and legal difficulties. Part II, Special Clinical Issues -- covers clinical issues from the perspective of different populations (consumers, families, suicidal patients). This section also examines the recent trend toward patient-centered care. Part III, The Continuum of Care -- addresses psychiatric services within the community, such as rehabilitation programs, day hospitals, and emergency services. It discusses the importance of understanding hospital-based treatment within the broader perspective of patients' lives. Part IV, Structure and Infrastructure -- focuses on such often-overlooked topics as financing of care, risk management, electronic medical records, and the actual architecture of psychiatric hospitals, as well as the roles of psychiatric hospital administrators, psychiatric nurses, and psychiatrists and psychologists. An invaluable resource for both clinicians and administrators, as well as a comprehensive teaching tool for residents, the Textbook of Hospital Psychiatry is a must-have for all professionals who work in psychiatric settings.

Finding Identity Through Directing Soseh Yekanians.2020-05-29 Finding Identity through Directing is a practice-led autoethnographical monograph that provides an in-depth exploration into the field of theatre directing and an individual's endless creative pursuit for belonging. The book specifically examines how a culturally displaced individual may find a sense of identity through their directing and addresses the internal struggles of belonging, acceptance and Self that are often experienced by those who have confronted cultural unhoming. The first half of the story scrutinises Dr Yekanians' own identity as an Iranian born Armenian-Australian and how she struggled with belonging growing up in a world that for the most part, was unaccepting of her differences. The second half, looks at how theatre directing, aided her (re)discovery of Self. While evidence shows that within the past decade there has been a growing interest in the vocation of theatre directing, embarking on a career within this field, while exciting, can often be a daunting and experimental vocation. Finding Identity through Directing questions this conundrum and specifically asks, in a competitive artistic profession that is rapidly developing, what attracts an individual to the authoritative role of the director and what are the underlying motivations of this attraction? By uncovering that there is more to the role of the director than the mere finality of a production, we can observe that the theatre is a promising setting for cultural exchanges in dialogue and for personal development. Theatre directing as the vehicle for these expansions and progressions of self can potentially address the internal struggles of identity often experienced by those who, in some form, have encountered cultural displacement.

The Stages of Psychosocial Development According to Erik H. Erikson Stephanie Scheck.2014-11-13 Scientific Essay from the year 2005 in the subject Psychology - Developmental Psychology, grade: 1.0, University of Kassel, language: English, abstract: Erik H. Erikson (1902 - 1994) is without a doubt one of the most outstanding psychoanalysts of the last century. The native Dane and later US-American further developed the psychosocial aspects and the developmental phases of adulthood in Sigmund Freud's stage theory. It is Erikson's basic assumption that in the course of a lifetime, the human being goes through eight developmental phases, which are laid out in an internal development plan. On each level, it is required to solve the relevant crisis, embodied by the integration of opposite poles presenting the development tasks, the successful handling of which is in turn of importance for the following phases. The term crisis does not have a negative connotation for Erikson, but rather is seen as a state, which through constructive resolution leads to further development, which is being integrated and internalized into the own self-image. Each (component) comes to its ascendance, meets its crisis, and finds its lasting solution (...) toward the end of the stages mentioned. All of them exist in the beginning in some form. Hence, the human development is a process alternating between levels, crises, and the new balance in order to reach

increasingly mature stages. In detail, Erikson studied the possibilities of an individual's advancement and the affective powers that allow it to act. This becomes particularly obvious in the eight psychosocial phases, which now should be the focus of this paper. This demonstrates that Erikson did see development as above all: a lifelong process.

Dimensions of a New Identity Erik H. Erikson. 1979-05-17 The two lectures presented in this important volume were delivered by Erik H. Erikson at the second annual Jefferson Lectures in the Humanities, sponsored by The National Endowment for the Humanities. In the first lecture, entitled *The Founders: Jeffersonian Action and Faith*, Erikson uses selected themes from Jefferson's life to illustrate some principles of psychohistory. In the second lecture, *The Inheritors: Modern Insight and Foresight*, Erikson applied his main concepts to the problems of ongoing history. The title of the lectures contains one such concept. New identity is the result of radical historical change and is here meant to characterize the emerging American identity as first embodied in such men as Jefferson. Erikson first explores certain themes in his examination of the emerging American identity during Jefferson's time. He then attempts to relate the Jeffersonian themes to contemporary problems of repression and suppression, of moralistic vindication, and true liberation by insight. Finally, Erikson maintains that now that children will be born by the privileged choice of parental persons, an adult environment fitting the living and the to-be-living becomes an ethical necessity. There is no question that this work ranks among Erikson's most challenging and seminal books.

The Oxford Handbook of Clinical Geropsychology Nancy A. Pachana, Ken Laidlaw. 2014 The Oxford Handbook of Geropsychology provides students and experienced clinicians and clinical researchers alike with a comprehensive and contemporary overview of developments in the field of geropsychology. Informed by an international perspective, the introductory section covers demographics, meta-analyses in geropsychology, social capital and gender, cognitive development, and ageing. Sections on assessment and formulation include chapters on interviewing older people, psychological assessment strategies, capacity and suicidal ideation, and understanding long term care environments. Psychological distress and their causes are reviewed with chapters focusing upon late-life depression and anxiety, psychosis, and personality disorders. In this section, neuropsychiatric approaches to working with older people and risk factors relating to cognitive health are reviewed. Intervention strategies covered include cognitive-behavioural therapy (CBT), interpersonal psychotherapy (IPT), acceptance and commitment therapy (ACT), and family therapy. Interprofessional teamwork and aspects of work with persons with dementia (PwD), caregivers, and care staff, are also covered. Chapters on interventions address specific populations such as lesbian, gay, bisexual and transgender older persons, people with physical and psychological comorbidities, and those experiencing grief and bereavement. Finally, this Handbook explores new horizons, including positive ageing, exercise and health promotion, and the use of new media such as online and virtual reality interactive technologies in clinical research and practice with older adults. -- From the Amazon

Middle Range Theory for Nursing, Fourth Edition Mary Jane Smith, PhD, RN, FAAN, Patricia R. Liehr, PhD, RN. 2018-03-10 Three-time recipient of the AJN Book of the Year Award! Praise for the third edition: "This is an outstanding edition of this book. It has great relevance for learning about, developing, and using middle range theories. It is very user friendly, yet scholarly. Score: 90, 4 Stars -Doody's Medical Reviews The fourth edition of this invaluable publication on middle range theory in nursing reflects the most current theoretical advances in the field. With two additional chapters, new content incorporates exemplars that bridge middle range theory to advanced nursing practice and research. Additional content for DNP and PhD programs includes two new theories: Bureaucratic Caring and Self-Care of Chronic Illness. This user-friendly text stresses how theory informs practice and research in the everyday world of nursing. Divided into four sections, content sets the stage for understanding middle range theory by elaborating on disciplinary perspectives, an organizing framework, and evaluation of the theory. *Middle Range Theory for Nursing, Fourth Edition*

presents a broad spectrum of 13 middle range theories. Each theory is broken down into its purpose, development, and conceptual underpinnings, and includes a model demonstrating the relationships among the concepts, and the use of the theory in research and practice. In addition, concept building for research through the lens of middle range theory is presented as a rigorous 10-phase process that moves from a practice story to a conceptual foundation. Exemplars are presented clarifying both the concept building process and the use of conceptual structures in research design. This new edition remains an essential text for advanced practice, theory, and research courses. New to the Fourth Edition: Reflects new theoretical advances Two completely new chapters New content for DNP and PhD programs Two new theories: Bureaucratic Caring and Self-Care of Chronic Illness Two articles from Advances in Nursing Science documenting a historical meta-perspective on middle range theory development Key Features: Provides a strong contextual foundation for understanding middle range theory Introduces the Ladder of Abstraction to clarify the range of nursing's theoretical foundation Presents 13 middle range theories with philosophical, conceptual, and empirical dimensions of each theory Includes Appendix summarizing middle range theories from 1988 to 2016

Firefighter Emotional Wellness Jada Hudson.2022-03-15 Firefighter Emotional Wellness: Reconnecting with Yourself and Others is a training exercise for your heart and mind. It's an excellent, evidence-based self-help book with boots on the ground sharing interviews with firefighters and how they adapt. "You are looking at a critical part of your success as a first responder and human being, and it doesn't mean that you will have perfect understanding right away - or ever, but what it means is you will begin to find tools that help you grapple with what you have seen." - Jada Hudson What others are saying "By sharing personal stories of her clients' emotional wellness struggles, Jada Hudson takes away the stigma of talking about things like depression, anxiety, addiction, suicidal ideation," said Dr. Thomas E. Joiner, an academic psychologist, author and professor of psychology, Florida State University. "Firefighter Emotional Wellness: Reconnecting with Yourself and Others is a must-read for every academy recruit, newlywed, leader, retiree, spouse, and individual who wants to become or remain emotionally well." "Jada Hudson's years of critically important work with counseling first responders has come full circle in this book. Her insight, guidance and examination of the issues facing the men and women on the front lines is both remarkable and humbling. This book should be a must read for any first responder or medical professional." - Dr. Robert Langman, Northwestern Medicine, Chicago "I highly recommend this book for first responders, peer support programs, chaplains and clinicians," said Dr. Joel Fay, who teaches intervention, case law, PTSD, Suicide by Cop and Self Care for Sacramento PD CIT. "Jada Hudson brings a considerable wealth of information regarding the mental health and treatment of first responders. She covers a broad range of topics including PTSD, suicide, stress and trauma, resiliency, and treatment. She shares her professional knowledge and writes from her personal experience and the book is richer for it." "Jada Hudson draws upon her personal and professional experience as well as research and theory in writing Firefighter Emotional Wellness, a book that is timely and important," says Dr. Stanley McCracken, author, and lecturer (ret.), The University of Chicago. "Just as first responders drill to prepare them for the physical demands of their jobs, reading this book should be considered a preparation for the emotional demands they will face."

Adolescents at School, Third Edition Michael Sadowski.2021-02-01 Adolescents at School brings together the perspectives of scholars, educators, and researchers to address the many issues that affect adolescents' emerging identities, especially in relation to students' experience of and engagement with school. The book offers current and preservice teachers a practical understanding of the concept of identity development, particularly as impacted by such factors as race, ethnicity, gender, sexual orientation, ability/disability, immigration, and social class. This third edition includes new chapters on boys' emotional lives, risk and resilience in girls, the experiences of undocumented immigrant students, Muslim-American youth, and

income inequality; features on “teaching while white”; and an extensively updated chapter on LGBTQ+ students. The book expands on the strengths and insights of the previous editions while also touching on issues highly relevant to contemporary youth such as social media, youth activism, and immigration. A practical and insightful volume, *Adolescents at School* points to ways to foster the success of every student in our schools and classrooms.

Looks Good on Paper? Leslie S. Pratch. 2014-07-01 Leslie S. Pratch is a practicing psychologist who focuses on assessing and coaching executives who occupy or are candidates for top positions in business organizations. In this book, she shares insights from more than twenty years of executive evaluations and offers an empirically based approach to identify executives who will be effective within organizations—and to flag those who will ultimately fail—by evaluating aspects of personality and character that are hidden beneath the surface. Pratch compares candidates with impressive careers and tries to determine which ones are likely to act with consistently high integrity and exhibit sound, timely judgment when faced with unanticipated business problems. Central to effective leadership is a psychological quality called “active coping,” which Pratch defines and explores by referencing case studies, historical figures, and her own scholarly work. This book speaks not only to those in hiring positions and their advisors but more widely to leaders and anyone who wishes to learn more about their own character and the abilities of those around them. She offers knowledge, asks questions, and challenges common perceptions, providing a practical tool for those in business and for general readers.

Psychological Analyses and the Historical Jesus Bas Van Os. 2010-12-23 Since Albert Schweitzer's monumental work, nearly a century ago, psychology has been banned from Historical Jesus research. But both disciplines have advanced and it is time to review the contribution that psychology can make. Bas Van Os examines the problems which surround both the historical and the psychological study of Jesus, such as the fact that we can only work with the surviving traditions that some of his early followers left us. Following this, Van Os proposes a theoretical framework that combines sound psychological theories and critical biblical scholarship to explain how Jesus' life and religious experience impacted the beliefs of his friends and family after his death.

The Life Cycle Completed Erik Homburger Erikson. 1994 This text is based on an long introduction which the National Institute of Mental Health asked the author to contribute for *The Course of Life: Psychoanalytical Contributions Toward Understanding Personality Development*. It places Erikson's famous theories - the identity crisis, the interdependence of history and life history, the life cycle, and the concept that maturity is not the end of psychological growth - in their historical and autobiographical contexts.

Toward a Theory of Peace Randall Caroline Watson Forsberg. 2019-12-15 Military analyst, peace activist, teacher, and social theorist Randall Caroline Watson Forsberg (1943–2007) founded the Nuclear Freeze campaign and the Institute for Defense and Disarmament Studies. In *Toward a Theory of Peace*, completed in 1997 and published for the first time here, she delves into a vast literature in psychology, anthropology, archeology, sociology,

and history to examine the ways in which changing moral beliefs came to stigmatize forms of socially sanctioned violence such as human sacrifice, cannibalism, and slavery, eventually rendering them unacceptable. Could the same process work for war? Edited and with an introduction by political scientists Matthew Evangelista (Cornell University) and Neta C. Crawford (Boston University), both of whom worked with Forsberg.

The Little Book of Child and Adolescent Development Karen J. Gilmore,Pamela Meersand.2014-10-15 The Little Book of Child and Adolescent Development presents a modern, psychoanalytically-informed summary of how the mind develops from infancy through young adulthood. It is a comprehensive work that integrates analytic theories with a contemporary systems model of development, and also draws on scholarly research from neighboring fields. Key models discussed include attachment theory, intersubjective theory, cognitive development theory, and infancy research. This book's contemporary approach to development makes it relevant to such timely topics as bullying, the experience of LGBT youth, preadolescent and adolescent use of the internet, and the struggles of young (emerging) adults in modern society. Written to optimize ease of use for the busy clinician, key clinical points are summarized at the end of each chapter, and a glossary of important concepts and terminology is also included. The text will be valuable for psychiatric residents, psychoanalytic candidates and faculty, and graduate students who would benefit from a quick and concise review of the developmental trajectory.

Psychological Hermeneutics for Biblical Themes and Text J. Harold Ellens.2012-05-03 For centuries scholars have been developing ways of studying the bible, through exegesis, historical critique, literary critique, form criticism, and narrative analysis. During the last half century new theoretical approaches have come to the fore. Psychological Hermeneutics takes as its starting point the text itself, and its context - the dynamics of the human document created, the person(s) who authored the text, the original audience for which it was intended, the subsequent audiences to which it spoke, and the factors that were at play behind, in, and in front of the text. The contributions to this volume examine the growth of Psychological Hermeneutics as a discipline within biblical studies. The book is structured in two parts. The first assesses the approach taken by Wayne G. Rollins, one of the pioneers of this field. The second provides applications of Rollins' approach. The result is a book which presents a state-of-the-art survey of the discipline and development of Psychological Hermeneutics over the last thirty years.

Ancient Knowledge Networks Eleanor Robson.2019-11-14 Ancient Knowledge Networks is a book about how knowledge travels, in minds and bodies as well as in writings. It explores the forms knowledge takes and the meanings it accrues, and how these meanings are shaped by the peoples who use it.Addressing the relationships between political power, family ties, religious commitments and literate scholarship in the ancient Middle East of the first millennium BC, Eleanor Robson focuses on two regions where cuneiform script was the predominant writing medium: Assyria in the north of modern-day Syria and Iraq, and Babylonia to the south of modern-day Baghdad. She investigates how networks of knowledge enabled cuneiform intellectual culture to endure and adapt over the course of five world empires until its eventual demise in the mid-first century BC. In doing so, she also studies Assyriological and historical method, both now and over the past two centuries, asking how the field has shaped and been shaped by the academic concerns and fashions of the day. Above all, Ancient Knowledge Networks is an experiment in writing about 'Mesopotamian science', as it has often been known, using geographical and social approaches to bring new insights into the intellectual history of the world's first empires.

Identity and the Life Cycle Erik H. Erikson.1994-04-17 Erik H. Erikson's remarkable insights into the relationship of life history and history began with observations on a central stage of life: identity development in adolescence. This book collects three early papers that—along with *Childhood and Society*—many consider the best introduction to Erikson's theories. *Ego Development and Historical Change* is a selection of extensive notes in which Erikson first undertook to relate to each other observations on groups studied on field trips and on children studied longitudinally and clinically. These notes are representative of the source material used for *Childhood and Society*. *Growth and Crises of the Health Personality* takes Erikson beyond adolescence, into the critical stages of the whole life cycle. In the third and last essay, Erikson deals with *The Problem of Ego Identity* successively from biographical, clinical, and social points of view—all dimensions later pursued separately in his work.

Insight and Responsibility Erik H. Erikson.1994-08-17 In the six essays contained in this text the author reflects on the ethical implications of psychoanalytical insight. Among the topics covered are: Freud's discovery that the human mind can only be studied through a partnership between observer and observed; how clinical evidence is made up of a unique mixture of subjective and objective; an observation on the way issues of identity affect not only individuals but classes of people; and an examination of the links between ego formation and institutions and traditions. Erikson also discusses the origins of ethics and looks at psychiatry as the pragmatic Western version of the universal journey to self-awareness.

Community Psychology John Moritsugu,Elizabeth Vera, Frank Y Wong, Karen Grover Duffy.2015-07-22 *Community Psychology, 5/e* focuses on the prevention of problems, the promotion of well-being, empowerment of members within a community, the appreciation of diversity, and an ecological model for the understanding of human behavior. Attention is paid to both "classic" early writings and the most recent journal articles and reviews by today's practitioners and researchers. Historical and alternative methods of effecting social change are explored in this book, with the overall theme that the environment is as important as the individual in it. This text is available in a variety of formats - digital and print. Learning Goals Upon

completing this book, readers will be able to: Understand the historical and contemporary principles of community psychology. Apply theory and research to social services, mental health, health, legal, and public health systems

Scattered Finds Alice Stevenson.2019-01-22 Between the 1880s and 1980s, British excavations at locations across Egypt resulted in the discovery of hundreds of thousands of ancient objects that were subsequently sent to some 350 institutions worldwide. These finds included unique discoveries at iconic sites such as the tombs of ancient Egypt's first rulers at Abydos, Akhenaten and Nefertiti's city of Tell el-Amarna and rich Roman Era burials in the Fayum. Scattered Finds explores the politics, personalities and social histories that linked fieldwork in Egypt with the varied organizations around the world that received finds. Case studies range from Victorian municipal museums and women's suffrage campaigns in the UK, to the development of some of the USA's largest institutions, and from university museums in Japan to new institutions in post-independence Ghana. By juxtaposing a diversity of sites for the reception of Egyptian cultural heritage over the period of a century, Alice Stevenson presents new ideas about the development of archaeology, museums and the construction of Egyptian heritage. She also addresses the legacy of these practices, raises questions about the nature of the authority over such heritage today, and argues for a stronger ethical commitment to its stewardship. Praise for Scattered Finds 'Scattered Finds is a remarkable achievement. In charting how British excavations in Egypt dispersed artefacts around the globe, at an unprecedented scale, Alice Stevenson shows us how ancient objects created knowledge about the past while firmly anchored in the present. No one who reads this timely book will be able to look at an Egyptian antiquity in the same way again.' Professor Christina Riggs, UEA
