Tenacious of Life John James Audubon,John Bachman.2021-06 Daniel Patterson and Eric Russell present a groundbreaking case for considering John James Audubon's and John Bachman's quadruped essays as worthy of literary analysis and redefine the role of Bachman, the perpetually overlooked coauthor of the essays. After completing *The Birds of America* (1826-38), Audubon began developing his work on the mammals. The *Viviparous Quadrupeds of North America* volumes show an antebellum view of nature as fundamentally dynamic and simultaneously grotesque and awe-inspiring. The quadruped essays are rich with good stories about these mammals and the humans who observe, pursue, and admire them. For help

with the science and the essays, Audubon enlisted the Reverend John Bachman of Charleston, South Carolina. While he has been acknowledged as coauthor of the essays, Bachman has received little attention as an American nature writer. While almost all works that describe the history of American nature writing include Audubon, Bachman shows up only in a subordinate clause or two. *Tenacious of Life* strives to restore Bachman's status as an important American nature writer. Patterson and Russell analyze the coauthorial dance between the voices of Audubon, an experienced naturalist telling adventurous hunting stories tinged often by sentiment, romanticism, and bombast, and of Bachman, the courteous gentleman naturalist, scientific detective, moralist, sometimes cruel experimenter, and humorist. Drawing on all the primary and secondary evidence, Patterson and Russell tell the story of the coauthors' fascinating, conflicted relationship. This collection offers windows onto the early United States and much forgotten lore, often in the form of travel writing, natural history, and unique anecdotes, all told in the compelling voices of Antebellum America's two leading naturalists.

Animals and the Law Jordan Curnutt.2001-11-02 Offers a comprehensive overview of the legislation and legal issues surrounding animals. Written by Jordan Curnutt, *Animals and the Law* covers everything from the Silver Spring monkeys, subjects in the first U.S. lab raided by police where criminal charges were filed against a scientist conducting federally funded research, to sex with animals. Consuming Japan Andrew C. McKevitt.2017-08-31 This insightful book explores the intense and ultimately fleeting moment in 1980s America when

the future looked Japanese. Would Japan's remarkable post-World War II economic success enable the East Asian nation to overtake the United States? Or could Japan's globe-trotting corporations serve as a model for battered U.S. industries, pointing the way to a future of globalized commerce and culture? While popular films and literature recycled old anti-Asian imagery and crafted new ways of imagining the yellow peril, and formal U.S.-Japan relations remained locked in a holding pattern of Cold War complacency, a remarkable shift was happening in countless local places throughout the United States: Japanese goods were remaking American consumer life and injecting contemporary globalization into U.S. commerce and culture. What impact did the flood of billions of Japanese things have on the ways Americans produced, consumed, and thought about their place in the world? From autoworkers to anime fans, *Consuming Japan* introduces new unorthodox actors into foreign-relations history, demonstrating how the flow of all things Japanese contributed to the globalizing of America in the late twentieth century.

Why Dissection? Lynette A. Hart, Mary W. Wood, Benjamin L. Hart.2008-02-28 Why do students continue to dissect animals in biology classes? Why, despite the excellence of teaching resources for veterinary and human medical education that substitute for dissection, do those provided for pre-college students fall short in convenience, flexibility, and coordination with the curriculum? Why Dissection? *Animal Use in Education* looks beyond the typical yes-or-no debate about dissection to understand how we came to our current practice of dissection in intermediate and high school biology, even as preparation of health professionals has moved away from dissection. Despite the many forces that support the continued use of dissection in pedagogy, teachers retain much autonomy in how they teach in the classroom, and legislation in many states provide specific requirements for what should and should not be taught in separated science and health curricula, offering students the option to not engage in dissection. Why Dissection? walks students, teachers, and parents through these options to help them make more informed choices regarding their science education options.

Why Animals Matter Erin E. Williams. 2010-10-04 ...an excellent look at cruelty to animals on an institutional level in various industries, taking a 'common sense perspective' and revealing many disturbing facts This is a tough but fair-minded revelation of how mass production of animals for food and other purposes results in cruelty that usually remains hidden from sight.-Publishers Weekly Erin Williams and Margo DeMello have written a compact and compelling treatise on how animals suffer in institutional settings and why people of conscience should take note and take action. They have put together an overwhelming case for a new ethic in dealing with animals, and my greatest hope is that it will have a vast readership.-Wayne Pacelle, President & CEO, The Humane Society of the United States Our treatment of animals in modern America is full of contradictions. Pets are a beloved feature of most American households, many enjoying the most luxurious food and accessories, and reveling in the love and companionship from their human families. At the same time, animals raised for food or clothing, or used for medical experiments and product testing, often live painful, lonely lives in small cages from birth to death. And wild animals suffer in other ways - losing their lives as their habitats disappear, being hunted for trophies, and finding themselves removed from their homes for the exotic pet trade. *Why Animals Matter: The Case for Animal Protection* offers a concise yet complete overview of the problems of animal suffering, linking them to larger issues of human and environmental exploitation. Authors Erin E. Williams and Margo DeMello examine industries that exploit animals - meat processing companies and agribusinesses; medical experimentation and cosmetic testing facilities; the entertainment industry (circuses, rodeos, zoos, racing, and film making); the pet industry; the fur and leather industry; and commercial and recreational activities centered on hunting. The authors also consider the adverse environmental effects of animal exploitation from pollution to deforestation and the depletion of biodiversity. In addition, they look at the connections between the poor treatment of animals and human exploitation of immigrants, slaughterhouse and farm workers, as well as the larger issues of globalization, hunger, and the negative consequences for Third World nations. Highly informative yet very reader-friendly, this book not only explores the connections between animal and human suffering, but also integrates solid information with positive case studies of rescued animals and inspiring stories of individual successes. FURTHER PRAISE FOR WHY ANIMALS MATTER: *Why Animals Matter* isn't a good book, it's a great book! It's not only easy to read but also packed with useful and up-to-date information concerning the innumerable ways in which humans selfishly use animals, why animals need to be protected now more than ever, and how we all can play a role in this social movement by making humane choices that are good for animals and our one and only planet. I will recommend it to people worldwide.-Marc Bekoff, Professor of Biology, University of Colorado-Boulder Author of *The Ten Trusts* (with Jane Goodall) and *The Emotional Lives of Animals*; Editor of the *Encyclopedia of Human-Animal Relationships: A Global Exploration Of Our Connections with Animals* Erin E. Williams (Silver Spring, MD) works for the Humane Society of the United States. Margo DeMello (Placitas, NM) is a lecturer at Central New Mexico Community College, administrative director of the House Rabbit Society, and the author of *Bodies of Adornment*, *Bodies of Inscription*, *Low-Carb Vegetarian*, and *Stories Rabbits Tell*.

Make Sure the Free eBooks Will Open In Your Device or App. Every e-reader and e-reader app has certain types of files that will work with them. When you go to download a free ebook, you'll want to make sure that the ebook file you're downloading will open. You can search for a specific title or browse by genre (books in the same genre are gathered together in bookshelves). It's a shame that fiction and non-fiction aren't separated, and you have to open a bookshelf before you can sort books by country, but those are fairly minor quibbles. If your library doesn't have a subscription to OverDrive or you're looking for some more free Kindle books, then Book Lending is a similar service where you can borrow and lend books for your Kindle without going through a library. Sacred Texts contains the web's largest collection of free books about religion, mythology, folklore and the esoteric in general. Most free books on Google Play are new titles that the author has self-published via the platform, and some classics are conspicuous by their absence; there's no free edition of Shakespeare's complete works, for example.
