Humanism and Resilience in Residency Training Ana Hategan, Karen Saperson, Sheila Harms, Heather Waters. 2020-06-24 This book aims to help identify pre-existing adaptive traits and positive perspectives in resident trainees, while challenging those that are less adaptive by building a formal curriculum for medical education that focuses on the humanistic aspects of medicine. Humanism in medicine is threatened by the false narrative that good physicians are superhumans who do not have their own needs. Written by experts in the field, this book is designed to be a concise, integrated guide to resilience during residency training. Through this guide, trainees learn (i) the usefulness of psychotherapeutic strategies for their own stress management and well-being; (ii) techniques and strategies that are useful in the practice of medicine; and (iii) to consider lifestyle modifications to improve physical and psychological health and well-being, through identification of positive and negative lifestyle factors influencing physicians' response to stress. Since it is designed for busy trainees and physicians, this volume meticulously provides easy-to-use, evidence-based learning tools and therapeutic techniques, including case studies, skill-building exercises, self-test questionnaires, illustrations, useful practice-reminder tips, and other features. *Humanism and Resilience in Residency Training* is an excellent resource for all medical trainees and professionals who need to incorporate humanism and resilience in their practice, both for accreditation requirements and for personal well-being. This includes medical students and residents, psychiatrists, addiction medicine specialists, family physicians, medical education professionals, hospitalists, nurses, and all healthcare providers

Testosterone Inc Christopher M. Byron. 2005-04-08 In *Testosterone Inc.: Tales of CEOs Gone Wild*, bestselling author and New York Post columnist Chris Byron chronicles the Gatsby-like saga of the rise and fall of the celebrity CEO. During the height of the 1990s bull market, they were America's new heroes: the heroes of business. They were our bold new leaders, cutting the fat, pushing for productivity, implementing visionary plans, and making strategic deals. When the bull market turned to bust and the applause turned to cat-calls, the world was shocked at the truth. Drenched in money and public acclaim, our CEO-heroes—mostly white, mostly male, mostly middle-aged—turned out to be not much different than a group of twenty-something rock stars—drunk on power and driven by sex, greed, and glamour. *Testosterone Inc.* goes behind the boardroom doors to show the serial affairs and marriages of these acquisitive corporate titans. At the center of this story is Jack Welch, the biggest of America's rock star CEOs and the former head of General Electric Co., surrounded by "mini-me" CEOs Ron Perelman of Revlon, Al Dunlap of Sunbeam, and Dennis Kozlowski of Tyco—all gone wild in public displays of consumption and predatory appetites writ large. Byron gets inside the bars where Welch liked to hang out and pick up women with his early "business soul mate" buddies. Byron hovers unseen at the elbow of Ron Perelman and his mistress aboard the Concorde for a week in Paris in his mistaken belief that his wife knows nothing about his secret affair. Byron peeks behind the curtains of a U.S. Army officers' quarters to behold Al Dunlap horrifying his first wife, who claimed in her divorce action that Dunlap would point his knife at her and say, "I often wondered what human flesh tasted like." Byron becomes a fly on the wall to chronicle the longing for respect and serial womanizing of Dennis Kozlowski. Frequently hilarious, sometimes heartbreaking, *Testosterone Inc.* follows the intertwined lives of these four corporate heroes, from childhood to their ultimate moments of glory and the crash-and-burn calamities that followed, as man's age-old hunger for power, greed, and temptation undid them all. From suicide to murder, from dysfunctional childhoods to dysfunctional marriages in adulthood, from business chutzpah to financial suicide, here is the ultimate untold business story of our time: what went on at century's end, when testosterone got the best of businessmen everywhere, and CEOs went wild.

How Pop Culture Shapes the Stages of a Woman's Life Melissa Ames, Sarah Burcon. 2016-03-15 Contemporary popular culture has created a slew of stereotypical roles for girls and women to (willingly or not) play throughout their lives: The Princess, the Nymphette, the Diva, the Single Girl, the Bridezilla, the Tiger Mother, the M.I.L.F, the Cougar, and more. In this book Ames and Burcon investigate the role of cultural texts in gender socialization at specific pre-scripted stages of a woman's life (from girls to the golden girls) and how that instruction compounds over time. By studying various texts (toys, magazines, blogs, tweets, television shows, Hollywood films, novels, and self-help books) they argue that popular culture exists as a type of funhouse mirror constantly distorting the real world conditions that exist for women, magnifying the gendered expectations they face. Despite the many problematic, conflicting messages women receive throughout their lives, this book also showcases the ways such messages are resisted, allowing women to move past the blurry reality they broadcast and toward, hopefully, gender equality.

Cognitive Radio Architecture Joseph Mitola, III. 2006-09-14 An exciting new technology, described by the one who invented it This is the first book dedicated to cognitive radio, a promising new technology that is poised to revolutionize the telecommunications industry with increased wireless flexibility. Cognitive radio technology integrates computational intelligence into software-defined radio for embedded intelligent agents that adapt to RF environments and user needs. Using this technology, users can more fully exploit the radio spectrum and services available from wireless connectivity. For example, an attempt to send a 10MB e-mail in a zone where carrier charges are high might cause a cognitive radio to alert its user and suggest waiting until getting to the office to use the LAN instead. *Cognitive Radio Architecture* examines an ideal cognitive radio that features autonomous machine learning, computer vision, and spoken or written language perception. The author of this exciting new book is the inventor of the technology and a leader in the field. Following his step-by-step introduction, readers can start building aware/adaptive radios and then make steps towards cognitive radio. After an introduction to adaptive, aware, and cognitive radio, the author develops three major

themes in three sections: Foundations Radio Competence User Domain Competence The book makes the design principles of cognitive radio more accessible to students of teleinformatics, as well as to wireless communications systems developers. It therefore embraces the practice of cognitive radio as well as the theory. In particular, the publication develops a cognitive architecture that integrates disparate disciplines, including autonomous machine learning, computer vision, and language perception technologies. An accompanying CD-ROM contains the Java source code and compiled class files for applications developed in the book. In addition, for the convenience of the reader, Web resources introducing key concepts such as speech applications programmer interfaces (APIs) are included. Although still five to ten years away from full deployment, telecommunications giants and research labs around the world are already dedicating R&D to this new technology. Telecommunications engineers as well as advanced undergraduate and graduate students can learn the promising possibilities of this innovative technology from the one who invented it. Note: CD-ROM/DVD and other supplementary materials are not included as part of eBook file.

The Power of Human Imagination Jerome L. Singer,Kenneth S. Pope.2012-12-06 For at least half of the twentieth century, psychology and the other mental health professions all but ignored the significant adaptive possibilities of the human gift of imagery. Our capacity seemingly to duplicate sights, sounds, and other sensory experiences through some form of central brain process continues to remain a mysterious, almost miraculous skill. Because imagery is so much a private experience, experimental psychologists found it hard to measure and turned their attention to observable behaviors that could easily be studied in animals as well as in humans. Psychoanalysts and others working with the emotionally disturbed continued to take imagery information seriously in the form of dream reports, transference fantasies, and as indications of hallucinations or delusions. On the whole, however, they emphasized the maladaptive aspects of the phenomena, the distortions and defensiveness or the regressive qualities of daydreams and sequences of images. The present volume grows out of a long series of investigations by the senior author that have suggested that daydreaming and the stream of consciousness are not simply manifestations in adult life of persisting phenomena of childhood. Rather, the data suggest that imagery sequences represent a major system of encoding and transforming information, a basic human capacity that is inevitably part of the brain's storage process and one that has enormous potential for adaptive utility. A companion volume, *The Stream of Consciousness*, edited by Kenneth S. Pope and Jerome L.

Now, in this dazzling collection of nine entirely original essays, written with a rare combination of give and sharpness, wit and fearlessness, she delves into the forces that warp our vision, demonstrating an unparalleled stylistic potency and critical dexterity. Trick Mirror is an enlightening, unforgettable trip through the river of self-delusion that surges just beneath the surface of our lives. This is a book about the incentives that shape us, and about how hard it is to see ourselves clearly through a culture that revolves around the self. In each essay, Tolentino writes about a cultural prism: the rise of the nightmare social internet; the advent of scamming as the definitive millennial ethos; the literary heroine’s journey from brave to blank to bitter; the punitive dream of optimization, which insists that everything, including our bodies, should become more efficient and beautiful until we die. Gleaming with Tolentino’s sense of humor and capacity to elucidate the impossibly complex in an instant, and marked by her desire to treat the reader with profound honesty, Trick Mirror is an instant classic of the worst decade yet. JOY, AND LOVE of Living “Hands Free” If technology is the new addiction, then multi-tasking is the new marching order. We check our email while cooking dinner, send a text while bathing the kids, and spend more time looking into electronic screens than into the eyes of our loved ones. With our never-ending to-do lists and jam-packed schedules, it’s no wonder we’re distracted. But this isn’t the way it has to be. In July 2010, special education teacher and mother Rachel Macy Stafford decided enough was enough. Tired of losing track of what matters most in life, Rachel began practicing simple strategies that enabled her to momentarily let go of largely meaningless distractions and engage in meaningful soul-to-soul connections. She started a blog to chronicle her endeavors and soon saw how both external and internal distractions had been sabotaging her happiness and preventing her from bonding with the people she loves most. Hands Free Mama is the digital society’s answer to finding balance in a media-saturated, perfection-obsessed world. It doesn’t mean giving up all technology forever. It doesn’t mean forgoing our jobs and responsibilities. What it does mean is seizing the little moments that life offers us to engage in real and meaningful interaction. It means looking our loved ones in the eye and giving them the gift of our undivided attention, leaving the laundry till later to dance with our kids in the rain, and living a present, authentic, and intentional life despite a world full of distractions. So join Rachel and go hands-free. Discover what happens when you choose to open your heart—and your hands—to the possibilities of each God-given moment.

The Golden Cord Charles Taliaferro.2012-12-15 The title of Charles Taliaferro’s book is derived from poems and stories in which a person in peril or on a quest must follow a cord or string in order to find the way to happiness, safety, or home. In one of the most famous of such tales, the ancient Greek hero Theseus follows the string given him by Ariadne to mark his way in and out of the Minotaur’s labyrinth. William Blake’s poem “Jerusalem” uses the metaphor of a golden string, which, if followed, will lead one to heaven itself. Taliaferro extends Blake’s metaphor to illustrate the ways we can link what we see, feel, and do with deep spiritual realities. Taliaferro offers a foundational case for the recognition of the experience of the eternal God of Christianity, in which God is understood as the fount of all goodness and the subject and object of our best love, revealed through scripture, tradition, philosophical reflection, and encountered in everyday events. He addresses philosophical obstacles to the recognition of such experiences, especially objections from the “new atheists,” and explores the values involved in thinking and experiencing God as eternal. These include the belief that the eternal goodness of God subordinates temporal goods, such as the pursuit of fame and earthly glory; that God is the essence of life; and that the eternal God hallows domestic goods, blessing the everyday goods of ordinary life. An exploration of the moral and spiritual riches of the Christian tradition as an alternative to materialism and naturalism, The Golden Cord brings an originality and depth to the debate in accessible and engaging prose.

The Juggling Mother Amanda D. Watson.2020-09-15 Who is the juggling mother, the woman who quietly flicks dried cereal off her blazer while running a corporate empire? The Juggling Mother explores the figure of contemporary mothering in media representations: a typically white, middle-class woman on the verge of coming undone because of her unwieldy slate of labours. More troublingly, she also serves as a model neoliberal worker who upholds white privilege and notions of mastery, capacity, and productivity. Amanda Watson makes the controversial case that mothers with the most power are complicit in the exclusion of less privileged ones - and in their own undoing.

Mothering through Precarity Julie A. Wilson,Emily Chivers Yochim.2017-03-09 In Mothering through Precarity Julie A. Wilson and Emily Chivers Yochim explore how working- and middle-class mothers negotiate the difficulties of twenty-first-century mothering through their everyday engagement with digital media. From Facebook and Pinterest to couponing, health, and parenting websites, the women Wilson and Yochim study rely upon online resources and communities for material and emotional support. Feeling responsible for their family's economic security, these women often become mamapreneurs, running side businesses out of their homes. They also feel the need to provide for their family's happiness, making successful mothering dependent upon economic and emotional labor. Questioning these standards of motherhood, Wilson and Yochim demonstrate that mothers' work is inseparable from digital media as it provides them the means for sustaining their families through such difficulties as health scares, underfunded schools, a weakening social safety net, and job losses.

Mothering in the Third Wave Amber E. Kinser.2008 Mothering in the Third Wave is a welcome addition to scholarship on both third-wave feminism and feminist mothering. The volume continues in the tradition of earlier third-wave anthologies in its inclusive and diverse vision of feminisms and feminists, while forging new ground in its focus on third-wave mothers and third-wave practices of mothering. In exploring how the institution of motherhood is shaped by today's political and social realities, Mothering in the Third Wave examines contemporary experiences of feminist mothering while connecting to earlier writing on the subject since the 1970s. Recommended for readers of any generation interested in the complexities of feminist mothering in the twenty-first century. - Astrid Henry, author of Not My Mother's Sister: Generational Conflict and Third-Wave Feminism

Performance Autoethnography Norman K. Denzin.2018-04-20 This book is a manifesto. It is about rethinking performance autoethnography, about the formation of a critical performative cultural politics, about what happens when everything is already performative, when the dividing line between performativity and performance disappears. This is a book about the writing called autoethnography. It is also about what this form of writing means for writers who want to perform work that leads to social justice. Denzin's goal is to take the reader through the history, major terms, forms, criticisms and issues confronting performance autoethnography and critical interpretive. To that end many of the chapters are written as performance texts, as ethnodramas. A single thesis organizes this book: the performance turn has been taken in the human disciplines and it must be taken seriously. Multiple informative performance models are discussed: Goffman's dramaturgy; Turner's performance anthropology; performance ethnographies by A. D. Smith, Conquergood, and Madison; Saldana's ethnodramas; Schechter's social theatre; Norris's playacting; Boal's theatre of the oppressed; and Freire's pedagogies of the oppressed. They represent different ways of staging and hence performing ethnography, resistance and critical pedagogy. They represent different ways of imagining, and inventing and hence performing alternative imaginaries, alternative counter-performances to war, violence, and the globalized corporate empire (Schechner 2015). This book provides a systematic treatment of the origins, goals, concepts, genres, methods, aesthetics, ethics and truth conditions of critical performance autoethnography. Denzin uses the performance text as a vehicle for taking up the hard questions about reading, writing, performing and doing critical work that makes a difference.
