While modern books are born digital, books old enough to be in the public domain may never have seen a computer. Google has been scanning books from public libraries and other sources for several years. That means you've got access to an entire library of classic literature that you can read on the computer or on a variety of mobile devices and eBook readers. Authorama.com features a nice selection of free books written in HTML and XHTML, which basically means that they are in easily readable format. Most books here are featured in English, but there are quite a few German language texts as well. Books are organized alphabetically by the author's last name. Authorama offers a good selection of free books from a variety of authors, both current and classic. Most ebook files open on your computer using a program you already have installed, but with your smartphone, you have to have a specific e-reader app installed,

which your phone probably doesn't come with by default. You can use an e-reader app on your computer, too, to make reading and organizing your eBooks easy. You can literally eat, drink and sleep with eBooks if you visit the Project Gutenberg website.
