The Prehistoric Cyclades J. A. MacGillivray, R. L. N. Barber. 1984

The Cycladic and Aegean Islands in Prehistory Ina Berg. 2019-02-01 This textbook offers an up-to-date academic synthesis of the Aegean islands from the earliest Palaeolithic period through to the demise of the Mycenaean civilization in the Late Bronze III period. The book integrates new findings and theoretical approaches whilst, at the same time, allowing readers to contextualize their understanding through engagement with bigger overarching issues and themes, often drawing explicitly on key theoretical concepts and debates. Structured according to chronological periods and with two dedicated chapters on Akrotiri and the debate around the volcanic eruption of Thera, this book is an essential companion for all those interested in the prehistory of the Cyclades and other Aegean islands.

Introduction to Aegean Art Philip P. Betancourt. 2007-12-31 This textbook is a compilation of the author's more than 35 years of teaching and excavation experience in the field of Aegean Bronze Age art history and archaeology. It is geared toward an audience of undergraduate and graduate students as an introduction to the Bronze Age art objects and architecture that have been uncovered

on Crete, the Greek peninsula, and the Cycladic Islands.

Early Cycladic Sculpture Pat Getz-Preziosi.1995-01-12 First published in 1985, this groundbreaking book surveys the development of Cycladic sculpture produced by unidentified artists who worked in the Aegean islands forty-five hundred years ago. Illustrated with numerous objects from American collections—with particular emphasis on some two dozen pieces in the Getty Museum—this volume surveys the typological development of Early Cycladic sculpture and identifies, where possible, the work of individual sculptors. Newly revised and updated, this book is a concise introduction to the field.

Early Cycladic Sculpture in Context from beyond the Cyclades Marisa Marthari, Colin Renfrew, Michael J. Boyd.2019-12-31 This second volume on Early Cycladic (and Cycladicising) sculptures found in the Aegean, examines finds from mainland Greece, along with the rarer items from the north and east Aegean, with the exception of those discovered in the Cyclades (covered in the preceding volume), and of those found in Crete. The significance of these finds is that these are the principal testimonies of the influence of the Early Bronze Age Cycladic cultures in the wider Aegean. This influence is shown both by the export of sculptures produced in the Cyclades (and made of Cycladic marble), and of their imitations, produced elsewhere in the Aegean, usually of local marble. They hold the key, therefore, to the cultural interactions developing at this time, the so-called ‘international spirit’ manifest particularly during the Aegean Early Bronze II period. This was the time when the foundations of early Aegean civilisation were being laid, and the material

documented is thus of considerable significance. The volume is divided into sections wherein contributions examine finds and their archaeological, social, and economic contexts from specific regions. It concludes with an overview of the significance and role of these objects in Early Bronze Age societies of the Aegean and eastern Mediterranean region. This will be the first time that this material has been systematically gathered together. Highly illustrated, it follows and builds on the successful preceding volume, *Early Cycladic Sculpture in Context* (Oxbow 2016).

The "Keros Hoard" Panagiōta I. Sōtērakopoulou, Peggy Sotirakopoulou. 2005 Keros is a small, mountainous, and now-deserted island situated between Naxos, Amorgos, and Ios in the southeast Cyclades. Keros became widely known after a series of extensive and clandestine excavations in the 1950s and early 1960s, which concentrated on a particularly rich deposit of material at the site of Kavos, situated at its barren western extremity. These major lootings resulted in the illegal export from Greece of a large number of Early Cycladic objects - mostly fragmentary marble figurines - that flooded the international antiquities market under the general name the Keros Hoard. The cache was said to have included at least 350 Cycladic objects and is now widely dispersed. This study features a review of the archaeological investigations on Keros; a discussion of the so-called Keros Hoard; an extensive account of the various aspects of Cycladic figurines; and a catalogue of the objects identified as coming from the Hoard. Also included are an analysis of the data derived from the Hoard, the results of the study comparing the fragments in the Museum of Cycladic Art with those discovered at Kavos during official archaeological investigations; an interpretation of the Ho

Early Cycladic Sculpture in Context Marissa Marthari, Colin Renfrew, Michael Boyd. 2017-01-04

The sculpture of the early bronze age Cyclades has been systematically studied since the time of

Christos Tsountas at the end of the 19th century. But that study has been hampered by the circumstance that so many of the subsequent finds come from unauthorised excavations, where the archaeological context was irretrievably lost. Largely for that reason there are still many problems surrounding the chronology, the function and the meaning of Early Cycladic sculpture. This lavishly illustrated and comprehensive re-assessment sets out to rectify that situation by publishing finds which have been recovered in controlled excavations in recent years, as well as earlier finds for which better documentation can now be provided. Using the material from recent excavation projects, and drawing on the papers presented at a symposium held in Athens in 2014, it is possible now to undertake a fresh overview of the entire body of sculpture from the Cycladic islands which has been found in secure archaeological contexts. Beginning with early examples from Neolithic settlement sites and extending into a consideration of material found in later contexts, the 35 chapters are divided into sections which examine sculpture from settlements, cemeteries and the sanctuary at Kavos, concluding with a discussion of material, techniques and aspects of manufacture.

Stone Vessels in the Levant RachaelThyrza Sparks.2017-07-05 Examining stone vessels in the Levant during the 2nd millennium BC, the author explores the links between material culture and society through a comprehensive study of production and distribution. Extensively illustrated with 100 drawings, maps and charts, this volume includes a full object catalogue.This study represents the first comprehensive overview of the stone vessel assemblagesof the Levant in this period, a time which, fed by an increase of wealth and interregional trade, saw a growth in the popularity and variety of such vessels.Previously, our understanding of the varied functions and forms of these diverse vessels has been relatively underdeveloped. In this volume the author attempts to address this problem by creating a typological framework though which we can analyse variability and define essential characteristics of local stone vessel workshops. Only once this has been achieved is it possible to look at stone vessel production in its wider cultural context. Subsequent chapters explore broader themes, beginning within the workshops themselves, examining the links between craftsmen, their sources of raw materials, and the authorities that controlled and distributed their output. Considerations of the geographical and chronological distribution of such goods are then used to provide a regional perspective for the operation of these workshops, connections between them, and further insights into the nature of local and international trade. Finally, the objects themselves can be used to assess the impact of trends such as the growing Egyptianization of the ruling classes of the Levant at this time.

Crete Beyond the Palaces Leslie Preston Day, Margaret S. Mook, James D. Muhly.2004-12-31 This volume presents papers from the conference Crete 2000: A Centennial Celebration of American Archaeological Work on Crete (1900-2000), held in Athens from July 10-12, 2000. The American School of Classical Studies at Athens and the Institute for Aegean Prehistory (INSTAP) Study Center

for East Crete organized the conference. Scholars participating in the American and joint Greek-American on Crete or studying material from these excavations were invited to present papers at the conference. The volume is divided into the following sections: Trade, Society and Religion, Chronology and History, Landscape and Survey, and Technology and Production.

Kos in the Neolithic and Early Bronze Age Mercurios Georgiadis.2012-12-31 This volume is based on material from an intensive and systematic field survey of Halasarna (modern Kardamaina), located on a coastal plain in the southern part of the Dodecanesian island of Kos, and a study of settlement patterns across the Aegean. It provides a new corpus of data on the Neolithic and Early Bronze Age periods, presents a material sequence based on stylistic analysis, and develops a diachronic understanding of settlement dynamics within a wider regional context.

Silent Witnesses Christos Doumas,Joan R. Mertens.2002 The exhibition *Silent Witnesses* is a succinct presentation in the third millennium AD of the picture we have of the Cycladic islanders in the third millennium BC. Cycladic works of art speak to the modern audience both through their silence, as objects of unique conception and beauty, and as testimonies of a brilliant and significant culture that flourished in the Cyclades at the dawn of Western Civilization. *Silent Witnesses* is divided into three thematic sections: Simple Beauty, In His Own Image, and Silent Witnesses. In Simple Beauty, the exhibition presents streamlined, elegant objects with quotidian uses but whose beauty places them in the realm of sculpture. These artifacts were made from readily available materials on the islands, such as wood, marble, bone and stone. The section In His Own Image examines the variety of sculptures based on the human form, revealing the anthropocentric aspects of Aegean culture of this time. The final section, *Silent Witnesses*, presents the contents of graves that were systematically excavated by archaeologists. Having been collected as objects d'art, they

are presented here as artifacts for serious historical and scientific examination. This final section emphasizes the need to educate the public about these pieces whose heritage was nearly lost. This volume explores the artistic tradition that existed in the so-called prehistoric period in the Cyclades. It includes illustrations and descriptions of the 59 objects in the exhibition such as clay and stone vases and of course numerous examples of the renowned Cycladic marble figurines.

The Hagia Photia Cemetery II Philip P. Betancourt, Costis Davaras. 2012-12-31 The publication of the Hagia Photia Cemetery is planned in three volumes. The first volume, which has already been published (Davaras and Betancourt 2004), presented the tomb groups and the architecture. The second volume about the excavation of the Hagia Photia cemetery focuses on the pottery. The third volume will present the obsidian, stone finds, metal objects, and other discoveries. The Early Minoan I tombs at Hagia Photia included the largest assemblage of vessels in Cycladic style known from Crete as well as vases from production workshops in Crete. The pottery is extremely important for several reasons, including the definition of the EM I ceramic styles that were being used as funerary offerings in this part of Crete, the establishment of the chronological synchronisms between Crete and the Cyclades, and information on the history of the Minoan pottery industry. When compared with other deposits from EM I Crete, the pottery helps to establish a better understanding of the ceramic development within the first Minoan time period.

Personal Styles in Early Cycladic Sculpture Pat Getz-Gentle. 2013-08-13 Annotation Personal Styles in Early Cycladic Sculpture represents the culmination of thirty-five years of study. Pat Getz-Gentle offers here much new material and many fresh insights into a tradition, rooted in the Neolithic period, that spanned most of the third millennium B.C. She begins with a review of this tradition, placing particular emphasis on the stages leading to the reclining figure with folded arms that is the

unique and quintessential icon of the early Bronze Age culture at the center of the Aegean. She then focuses on the styles of fifteen sculptors, several of whom are identified and discussed for the first time in this volume. By introducing little-known pieces attributable to these sculptors, she illuminates various phases of their artistic development.--BOOK JACKET. The Cambridge Companion to the Aegean Bronze Age Cynthia W. Shelmerdine.2008-08-04 This book is a comprehensive up-to-date survey of the Aegean Bronze Age, from its beginnings to the period following the collapse of the Mycenaean palace system. In essays by leading authorities commissioned especially for this volume, it covers the history and the material culture of Crete, Greece, and the Aegean Islands from c.3000-1100 BCE, as well as topics such as trade, religions, and economic administration. Intended as a reliable, readable introduction for university students, it will also be useful to scholars in related fields within and outside classics. The contents of this book are arranged chronologically and geographically, facilitating comparison between the different cultures. Within this framework, the cultures of the Aegean Bronze Age are assessed thematically and combine both material culture and social history.

Markiani, Amorgos Lila Marankou.2006 Markiani in Amorgos is the first rural settlement of the Early Cycladic period to be excavated systematically and published comprehensively. Most of our knowledge of the Cycladic islands of Greece in the third millennium BC comes from the well-known Cycladic cemeteries, with their fine decorated pottery, marble vessels and striking marble figurines. Early Cycladic remains also underlie the proto-urban trading centres of the Aegean Bronze Age, such as Phylakopi on Melos or Ayia Irini on Kea. Now, for the first time, we glimpse the life of a country farming community with its rural crafts, including spinning and probably weaving and

metallurgy. The stratified culture sequence, with its radiocarbon chronology, documents clearly a thousand years of peasant life in this rather isolated island community. The site, overlooking the sea on the south coast of Amorgos, was already fortified towards the beginning of the Bronze Age. The abundant finds contrast strikingly with the elite products recovered from the Cycladic cemeteries. The abundant pottery is local and undecorated. There is a full repertoire of tools and artefacts of stone and bone, and the metal finds include a lead seal, an indication (with the clay sealings) of some organisation in production and exchange already in this modest community. Written by an internationally recognised team of Greek and British scholars, and with its clear documentation and abundant drawings and photographs, this volume establishes a new direction in the study of Cycladic prehistory. It should become an indispensable work of reference for every archaeological library.

Stone Vessels and Values in the Bronze Age Mediterranean Andrew Bevan.2007-08-13 The societies that developed in the eastern Mediterranean during the Bronze Age produced the most prolific and diverse range of stone vessel traditions known at any time or anywhere in the world. Stone vessels are therefore a key class of artefact in the early history of this region. As a form of archaeological evidence, they offer important analytical advantages over other artefact types - virtual indestructibility, a wide range of functions and values, huge variety in manufacturing traditions, as well as the subtractive character of stone and its rich potential for geological provenancing. In this 2007 book, Andrew Bevan considers individual stone vessel industries in great detail. He also offers a highly comparative and value-led perspective on production, consumption and exchange logics throughout the eastern Mediterranean over a period of two millennia during the Bronze Age

(ca.3000–1200 BC).

Personal Styles in Early Cycladic Sculpture Pat Getz-Gentle.2001-11-26 Getz-Gentle (an independent scholar) has seen many of the examples that exist in the course of her career studying Cycladic sculpture. She presents in this volume a catalog of Cycladic sculpture which she has organized into stylistic categories based on formal analysis. The methods she used to arrive at her conclusions, as well as her theory of how the sculptures were produced are discussed at length.

Negotiating Island Identities Ina Berg.2007 *Negotiating Island Identities* explores the history of interaction between Crete and the Cycladic islands from the late Middle to Late Bronze II periods when Minoan influence was at its peak. Based on a thorough investigation of pottery assemblages from key sites, the book advocates a rethink of established acculturation scenarios (such as Minoanisation) in relation to the Cycladic islands. Openness or closure towards outside influences was not predetermined by cultural, geographical or ecological variables but was socially constructed. Island communities could consciously fashion their worlds and make choices about the nature and degree of interaction with their neighbours.

Tholos Tomb Gamma Yiannis Papadatos.2005-12-31 This publication includes a detailed discussion of the pottery, the finds and their parallels, and a reconstruction of both the excavation and

stratigraphy of Tholos Gamma in the Bronze Age cemetery of Phourni at Archanes. This evidence is used to give the historical outline of the tomb from its foundation in Early Minoan IIA until its excavation in 1972. Several problems concerning Prepalatial mortuary practices are discussed, with particular reference to Tholos Gamma and the new evidence resulting from the study of this funerary assemblage. The artifacts from the tomb include pottery, metal objects, marble figurines, other small finds, and skeletal remains.

Cycladic Art J. Lesley Fitton. 1999 At the dawn of European history, in the third millennium BC, the small Greek islands in the southern Aegean known as the Cyclades were home to a remarkable and distinctive culture. Among its most characteristic products were vessels and sculpted figures fashioned from the local marble, and today these Cycladic figurines are admired around the world. This concise introduction to Cycladic art puts the figurines and other objects into the context provided by current knowledge of early life in the islands.--Jacket.

The Oxford Handbook of the Bronze Age Aegean Eric H. Cline. 2012-01-01 The Greek Bronze Age, roughly 3000 to 1000 BCE, witnessed the flourishing of the Minoan and Mycenaean civilizations, the earliest expansion of trade in the Aegean and wider Mediterranean Sea, the development of artistic techniques in a variety of media, and the evolution of early Greek religious practices and mythology. The period also witnessed a violent conflict in Asia Minor between warring peoples in the region, a conflict commonly believed to be the historical basis for Homer's Trojan War. The Oxford Handbook of the Bronze Age Aegean provides a detailed survey of these fascinating aspects of the

period, and many others, in sixty-six newly commissioned articles. Divided into four sections, the handbook begins with Background and Definitions, which contains articles establishing the discipline in its historical, geographical, and chronological settings and in its relation to other disciplines. The second section, Chronology and Geography, contains articles examining the Bronze Age Aegean by chronological period (Early Bronze Age, Middle Bronze Age, Late Bronze Age). Each of the periods are further subdivided geographically, so that individual articles are concerned with Mainland Greece during the Early Bronze Age, Crete during the Early Bronze Age, the Cycladic Islands during the Early Bronze Age, and the same for the Middle Bronze Age, followed by the Late Bronze Age. The third section, Thematic and Specific Topics, includes articles examining thematic topics that cannot be done justice in a strictly chronological/geographical treatment, including religion, state and society, trade, warfare, pottery, writing, and burial customs, as well as specific events, such as the eruption of Santorini and the Trojan War. The fourth section, Specific Sites and Areas, contains articles examining the most important regions and sites in the Bronze Age Aegean, including Mycenae, Tiryns, Pylos, Knossos, Kommos, Rhodes, the northern Aegean, and the Uluburun shipwreck, as well as adjacent areas such as the Levant, Egypt, and the western Mediterranean. Containing new work by an international team of experts, The Oxford Handbook of the Bronze Age Aegean represents the most comprehensive, authoritative, and up-to-date single-volume survey of the field. It will be indispensable for scholars and advanced students alike.

The Early Bronze Age Village on Tsoungiza Hill Daniel J. Pullen. 2011-12-31 While corridor houses such as the House of the Tiles at Lerna have provoked widespread discussion about the origins of social stratification in Greece, few settlements of the Early Bronze Age (ca. 3100 to 2000 B.C.) have been thoroughly excavated. This important study integrates the presentation and analysis of the

archaeological evidence from a single settlement that flourished on Tsoungiza Hill in the Nemea Valley from the Final Neolithic until the end of the Early Helladic period. The first section details the stratigraphy, architecture, deposits, and ceramics of each of the five major periods represented. The second section contains specialist reports on all aspects of material culture including figurines and ornaments, textiles and crafts, metal analyses, chipped and ground stone, and faunal and palaeobotanical remains.

Stone Vessels of the Cyclades in the Early Bronze Age Pat Getz-Gentle.1996 With the exception of early Egypt and Minoan Crete, no early culture had such a vigorous stone vase-making industry as the Cyclades. Figures and vessels of stone, overwhelmingly of marble, are the most distinctive and appealing products of the Early Cycladic culture. The vessels, like the better-known figures, formed a special class of object that conformed to a strict traditional typology. Ranging from charming miniatures to works of impressive size, they often show a striking purity of form, beauty of material, and excellence in their workmanship. Stone Vessels of the Cyclades in the Early Bronze Age is the first comprehensive study of these vessels. For each vessel type, Pat Getz-Gentle considers the material used, the size range, and the formal characteristics and the extent of their variation. She also discusses manufacturing methods, the incidence of repairs occasioned by accidental damage, and the possible function or functions, as well as the development, frequency, dating, and distribution of each vessel type within the Cyclades and beyond. She stresses the human element--how the vessels were used, held, and carried; how much they weigh; and how much they hold. She examines the sculptors who made them--how they might have designed and executed their works, how on occasion they seem to have modified their original plans, and how they stand out as individual artists working within a traditional craft. The 114 plates, with more than 500 separate

photographs, illustrate works that show both the homogeneity and the diversity within each type.
