Diderot and Descartes Aram Vartanian.2015-12-08 A study of scientific naturalism in the Enlightenment. In tracing the materialism of Diderot, La Mettrie, Buffon, and D'Holbach to its sources, it offers a fresh appraisal of the total influence of Descartes on the Enlightenment. Originally published in 1953. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

The Re-enchantment of the World Joshua Landy,Michael T. Saler.2009 The Re-Enchantment of the World is an interdisciplinary volume that challenges the long-prevailing view of modernity as disenchanting. There is of course something to the widespread idea, so memorably put into words by Max Weber, that modernity is characterized by the progressive disenchantment of the world. Yet what is less often recognized is the fact that a powerful counter-tendency runs alongside this one, an overwhelming urge to fill the vacuum left by departed convictions, and to do so without invoking superseded belief systems. In fact, modernity produces an array of strategies for re-enchantment, each fully compatible with secular rationality. It has to, because God has many aspects--or to put it in more secular terms, because traditional religion offers so much in so many

domains. From one thinker to the next, the question of just what, in religious enchantment, needs to be replaced in a secular world receives an entirely different answer. Now, for the first time, many of these strategies are laid out in a single volume, with contributions by specialists in literature, history, and philosophy.

The Unfinished Enlightenment Joanna Stalnaker. 2010

In *The Unfinished Enlightenment*, Joanna Stalnaker offers a fresh look at the French Enlightenment by focusing on the era's vast, collective attempt to compile an ongoing and provisional description of the world. Through a series of readings of natural histories, encyclopedias, scientific poetry, and urban topographies, the book uncovers the deep epistemological and literary tensions that made description a central preoccupation for authors such as Buffon, Bernardin de Saint-Pierre, Diderot, Delille, and Mercier. Stalnaker argues that Enlightenment description was the site of competing truth claims that would eventually resolve themselves in the modern polarity between literature and science. By the mid-nineteenth century, the now habitual association between description and the novel was already firmly anchored in French culture, but just a century earlier, in the diverse network of articles on description in Diderot and d'Alembert's *Encyclopédie* and in the works derived from it, there was not a single mention of the novel. Instead, we find articles on description in natural history, geometry, belles-lettres, and poetry. Stalnaker builds on the premise that the tendency to view description as the inevitable (and subservient) partner of narration--rather than as a universal tool for making sense of knowledge in all fields--has obscured the central place of description in Enlightenment discourse. As a result, we have neglected some of the most original and experimental works of the eighteenth century.

The Discourse of Enlightenment in Eighteenth-Century France Daniel Brewer.1993-04-29

This study explores the problems faced by writers of the Enlightenment, who attempted to demystify all previous forms of knowledge by applying rationalist critiques that can in turn be applied to examine their own critical work. It focuses on the works of one of the best-known writers of eighteenth-century France, Denis Diderot, analysing his experimentation with presenting critical knowledge. Paying close attention to the formal-poetic nature of Diderot's writing, his 'art', it examines the interplay between critical knowledge and its representation, between epistemology and aesthetics. Professor Brewer shows how Diderot's work in the areas of philosophy, science, the fine arts and literature pushed Enlightenment critique to its limits, and points to its remarkable similarity to aspects of modern critical theory.

Cartesian Women Erica Harth.2018-08-06 The little-known writings that Erica Harth examines here reveal a remarkable chapter in the history of Western thought. Drawing upon current theoretical work in gender studies, cultural history, and literary criticism, Harth looks at how women in seventeenth- and eighteenth-century France attempted to overcome gender barriers and participated in the shaping of rational discourse.

The Field of Drama Martin Esslin.1987 A unique book of criticism that brings both theatre and film studies within a single theoretical framework Martin Esslin is the author of seminal critical studies such as *The Theatre of the Absurd* and *Brecht: A Choice of Evils*. Covering artists as diverse as Duchamp and Brecht, Busby Berkely and Congreve, Pinter and WC Fields, Esslin's approach is fresh and genuinely inquisitive, examining various prepared positions and testing the jargon. Taking each element of drama - the actor, the setting, the text, the music - and making provocative cross-references to stage and screen, Esslin offers a carefully argued system of his own, much fuller and more sensitive than anything that has gone before.

The Linguistics of Punctuation Geoffrey Nunberg.1990-09
Geoffrey Nunberg challenges a widespread assumption that the linguistic structure of written languages is qualitatively identical to that of spoken language: It should no longer be necessary to defend the view that written language is truly language, but it is surprising to learn of written-language category indicators that are realized by punctuation marks and other figural devices.' He shows that traditional approaches to these devices tend to describe the features of written language exclusively by analogy to those of spoken language, with the result that punctuation has been regarded as an unsystematic and deficient means for presenting spoken-language intonation. Analysed in its own terms, however, punctuation manifests a coherent linguistic subsystem of 'text-grammar' that coexists in writing with the system of 'lexical grammar' that has been the traditional object of linguistic inquiry. A detailed analysis of the category structure of English text-sentences reveals a highly systematic set of syntactic and presentational rules that can be described in terms independent of the rules of lexical grammar and are largely

matters of the tacit knowledge that writers acquire without formal instruction. That these rules obey constraints that are structurally analogous to those of lexical grammar leads Nunberg to label the text-grammar an 'application' of the principles of natural language organization to a new domain. Geoffrey Nunberg is a researcher at Xerox Palo Alto Research Center.

Weber.2020-02-04 A new translation of two celebrated lectures on politics, academia, and the disenchantment of the world. The German sociologist Max Weber is one of the most venturesome, stimulating, and influential theorists of the modern condition. Among his most significant works are the so-called vocation lectures, published shortly after the end of World War I and delivered at the invitation of a group of student activists. The question the students asked Weber to address was simple and haunting: In a modern world characterized by the division of labor, economic expansion, and unrelenting change, was it still possible to consider an academic or political career as a genuine calling? In response Weber offered his famous diagnosis of “the disenchantment of the world,” along with a challenging account of the place of morality in the classroom and in research. In his second lecture he introduced the notion of political charisma, assigning it a central role in the modern state, even as he recognized that politics is more than anything “a slow and difficult drilling of holes into hard boards.” Damion Searls’s new translation brings out the power and nuance of these celebrated lectures. Paul Reitter and Chad Wellmon’s introduction describes their historical and biographical background, reception, and influence. Weber’s effort to rethink the idea of a public calling at the start of the tumultuous twentieth century is revealed to be as timely and stirring as ever.

Human Computation Edith Subramanya, Luis von

Talukdar.2022-06-01 Human computation is a new and evolving research area that centers around harnessing human intelligence to solve computational problems that are beyond the scope of existing Artificial Intelligence (AI) algorithms. With the growth of the Web, human computation systems can now leverage the abilities of an unprecedented number of people via the Web to perform complex computation. There are various genres of human computation applications that exist today. Games with a purpose (e.g., the ESP Game) specifically target online gamers

who generate useful data (e.g., image tags) while playing an enjoyable game. Crowdsourcing marketplaces (e.g., Amazon Mechanical Turk) are human computation systems that coordinate workers to perform tasks in exchange for monetary rewards. In identity verification tasks, users perform computation in order to gain access to some online content; an example is reCAPTCHA, which leverages millions of users who solve CAPTCHAs every day to correct words in books that optical character recognition (OCR) programs fail to recognize with certainty. This book is aimed at achieving four goals: (1) defining human computation as a research area; (2) providing a comprehensive review of existing work; (3) drawing connections to a wide variety of disciplines, including AI, Machine Learning, HCI, Mechanism/Market Design and Psychology, and capturing their unique perspectives on the core research questions in human computation; and (4) suggesting promising research directions for the future. A Spell in the Wild Alice Tarbuck.2021-10-12 'Witches occupy a clear place in contemporary imagination. We can see them, shadowy, in the corners of the past: mad, glamorous, difficult, strange. They haunt the footnotes of history - from medieval witches burning at the stake to the lurid glamour of the 1970s witchcraft revival. But they are moving out of history, too. Witches are back. They're feminist, independent, invested in self-care and care for the world. They are here, because they must be needed.' What it means to be a witch has changed radically throughout history; where 'witch' was once a dangerous - and often deadly - accusation, it is now a proud self-definition. Today, as the world becomes ever more complicated and as we face ecological, political and economic crisis - witchcraft is experiencing a resurgence. Witches are back. In A Spell in the

Wild, Alice Tarback explores what it means to be a witch today. Rooted in the real world, but filled with spells, rituals and recipes, this book is an accessible, seasonal guide to witchcraft in the twenty-first century. Following the course of a witch's calendar year while also exploring the history and politics of witchcraft, *A Spell in the Wild* is the perfect primer for the contemporary witch.

The French Book Trade in Enlightenment Europe Simon Burrows. 2018 This is a rich and path-breaking comparative study of reading tastes in the final years of old regime Europe. Based on extensive research in the account books of the Swiss publishers, the Société Typographique de Neuchâtel (STN), and related archives, it charts the dissemination of literature and reading tastes across Europe in the years leading up to the French revolution. In the process, it recasts our understanding of late 18th-century print culture and the contours of the enlightenment. The fruit of a widely acclaimed five year database project, the STN database, it is also a story of pioneering efforts to apply the latest digital technology and GIS mapping techniques to traditional historical and bibliographic problems. Although written to serve as a standalone study, this book is ideally complemented by its companion volume, Mark Curran's *The French Book Trade in Enlightenment Europe I: Selling Enlightenment*, which offers a radical reinterpretation of the structure and practices of the European book trade. The STN database is now recognised as a cutting-edge digital project of global significance. Robert Darnton has called it a prodigious accomplishment and a joy to use while Jeremy Popkin adds, No one working in the field of French Enlightenment studies ... can afford to ignore the rich mine of data that Simon Burrows and his collaborators have made accessible, in an eminently usable form, and the new possibilities it opens up for scholars. *The French Book Trade in Enlightenment Europe I and II* offer a roadmap of that data and what it can show us.--Bloomsbury Publishing

Travels in Nubia Johann Ludwig Burckhardt.1819

Before Fiction Nicholas D. Paige.2011-08-16 Fiction has become nearly synonymous with literature itself, as if Homer and Dante and Pynchon were all engaged in the same basic activity. But one difficulty with this view is simply that a literature trafficking in openly invented characters is a quite recent development.

Novelists before the nineteenth century ceaselessly asserted that their novels were true stories, and before that, poets routinely took their basic plots and heroes from the past. We have grown accustomed to thinking of the history of literature and the novel as a progression from the ideal to the real. Yet paradoxically, the modern triumph of realism is also the triumph of a literature that has shed all pretense to literalness. Before Fiction: The Ancien Régime of the Novel offers a new understanding of the early history of the genre in England and France, one in which writers were not slowly discovering a type of fictionality we now take for

granted but rather following a distinct set of practices and rationales. Nicholas D. Paige reinterprets Lafayette's *La Princesse de Clèves*, Rousseau's *Julie, ou la Nouvelle Héloïse*, Diderot's *La Religieuse*, and other French texts of the seventeenth and eighteenth centuries in light of the period's preoccupation with literal truth. Paige argues that novels like these occupied a place before fiction, a pseudofactual realm that in no way leads to modern realism. The book provides an alternate way of looking at a familiar history, and in its very idiom and methodology charts a new course for how we should study the novel and think about the evolution of cultural forms.

Science in the Age of Sensibility Jessica Riskin. 2010-11-15

Empiricism today implies the dispassionate scrutiny of facts. But Jessica Riskin finds that in the French Enlightenment, empiricism was intimately bound up with sensibility. In what she calls a sentimental empiricism, natural knowledge was taken to rest on a blend of experience and emotion. Riskin argues that sentimental empiricism brought together ideas and institutions, practices and politics. She shows, for instance, how the study of blindness, led by ideas about the mental and moral role of vision and by cataract surgeries, shaped the first school for the blind; how Benjamin Franklin's electrical physics, ascribing desires to nature, engaged French economic reformers; and how the question of the role of language in science and social life linked disputes over Antoine Lavoisier's new chemical names to the founding of France's modern system of civic education. Recasting the Age of Reason by stressing its conjunction with the Age of Sensibility, Riskin offers an entirely new perspective on the development of modern science and the history of the Enlightenment.
