The Rejection of Consequentialism Samuel Scheffler.1994-08-11 In contemporary philosophy, substantive moral theories are typically classified as either consequentialist or deontological. Standard consequentialist theories insist, roughly, that agents must always act so as to produce the best available outcomes overall. Standard deontological theories, by contrast, maintain that there are some circumstances where one is permitted but not required to produce the best overall results, and still other circumstances in which one is positively forbidden to do so. Classical utilitarianism is the

most familiar consequentialist view, but it is widely regarded as an inadequate account of morality. Although Professor Scheffler agrees with this assessment, he also believes that consequentialism seems initially plausible, and that there is a persistent air of paradox surrounding typical deontological views. In this book, therefore, he undertakes to reconsider the rejection of consequentialism. He argues that it is possible to provide a rationale for the view that agents need not always produce the best possible overall outcomes, and this motivates one departure from consequentialism; but he shows that it is surprisingly difficult to provide a satisfactory rationale for the view that there are times when agents must not produce the best possible overall outcomes. He goes on to argue for a hitherto neglected type of moral conception, according to which agents are always permitted, but not always required, to produce the best outcomes.

Affective Health and Masculinities in South Africa Hans Reihling.2020-04-03 Affective Health and Masculinities in South Africa explores how different masculinities modulate substance use, interpersonal violence, suicidality, and AIDS as well as recovery cross-culturally. With a focus on three male protagonists living in very distinct urban areas of Cape Town, this comparative ethnography shows that men's struggles to become invulnerable increase vulnerability. Through an analysis of masculinities as social assemblages, the study shows how affective health problems are tied to modern individualism rather than African 'tradition' that has become a cliché in Eurocentric gender studies. Affective health is conceptualized as a balancing act between autonomy and connectivity that after colonialism and apartheid has become compromised through the imperative of self-reliance. This book provides a rare perspective on young men's vulnerability in everyday life that may affect the reader and spark discussion about how masculinities in relationships shape physical and psychological health. Moreover, it shows how men change in the face of distress in ways that may look different than global health and gender-transformative approaches envision. Thick descriptions of actual events over the life course make the study accessible to both graduate and undergraduate students in the social sciences. Contributing to current debates on mental health and masculinity, this volume will be of interest to scholars from various disciplines including anthropology, gender studies, African studies, psychology, and global health.

Leiji Matsumoto Helen McCarthy,Darren-Jon Ashmore.2021-01-21 Leiji Matsumoto is one of Japan's most influential myth creators. Yet the huge scope of his work, spanning past, present and future in a constantly connecting multiverse, is largely unknown outside Japan. Matsumoto was the major creative force on Star Blazers, America's gateway drug for TV anime, and created Captain Harlock, a TV phenomenon in Europe. As well as space operas, he made manga on musicians from Bowie to Tchaikovsky, wrote the manga version of American cowboy show Laramie, and created dozens of girls' comics. He is a respected manga scholar, an expert on Japanese swords, a frustrated engineer and pilot who still wants to be a spaceman in his eighties. This collection of new essays--the first book on Matsumoto in English--covers his seven decades of comic creation, drawing on contemporary scholarship, artistic practice and fan studies to map Matsumoto's vast universe. The contributors--artists, creators, translators and scholars--mirror the range of his work and experience. From the bildungsroman to the importance of textual analysis for costume and performance, from early days in poverty to honors around the world, this volume offers previously unexplored biographical and bibliographic detail from a life story as thrilling as anything he created.
