The firm's work especially with kinetic architecture fuses seamless design principles with inventive concepts, namely movable structures that both catch light and create a uniquely experiential environment.

OAB Carlos Ferrater,Núria Ayala.2015 OAB draws on the collaborative nature of the Carlos Ferrater previous studio, incorporating new ways of understanding the contributions of each team member to generate richer and more varied, prepared and flexible projects. The creation of this new platform attempts to address the challenges that contemporary architecture has raised in intellectual, social, technological, and environmental spheres. The contents are organized as a collection of chapters that turn the spotlight on both projects and recently built works. These convey a willingness to work in different scenarios, expanding and enriching the range of proposals in the pursuit of new avenues of formal expression. The book covers the theoretical aspects of each project, focusing on innovation, research, and the application of new technologies. At the same time, as we explore each project's development, emphasis is placed upon context, the building's objectives, and the social roots of the architect's work.

Jesus Max Lucado.2020 In this seminal work, beloved pastor and bestselling author Max Lucado explores the life and character of Jesus, now with never-before-read content. The God of the universe knows your name. He has walked your streets. Jesus. Perhaps you've heard about him, studied him, or prayed to him. But do you know him? This is the question Max poses to the reader. Divided into six sections (Immanuel, Friend, Teacher, Miracle Worker, Lamb of God, Returning King) each containing multiple chapters, this book not only describes the person of Jesus but also eloquently dives into the heart of Jesus towards the reader. By exploring Jesus' life death and resurrection as well as specific details like how he interacted with his friends and his enemies, what he did with time alone, how he acted at a party, this compilation from Max Lucado, now with original never-before-read content from Max, gives readers the chance to become more familiar with the man at the center of the greatest story ever told. By learning more about the person Jesus was and is, the reader will understand more clearly the person they were created to be. Max writes Don't settle for a cursory glance or a superficial understanding. Look long into the heart of Christ and you'll see it. Grace and life. Forgiveness of sin. The defeat of death. This is the hope he gives. This is the hope we need.

Tortricidae (Lepidoptera) of Europe Józef Razowski.2003 The general introduction to the two volumes is including acknowledgements, and the characteristics of the family are in volume one. The list of abbreviations is repeated below and the acknowledgements are completed. The former classifications of subfamilies or tribes are already rather of historical importance; however, in almost every one there are some important facts or interesting interpretations. Within a few last years there has been a consensus in almost all classifications problems. The most actual is the proposal of arrangement of the family-level taxa by Horak (1999) which is also followed in this paper. Contents include: Introduction, Systematics, System of the European Tortricidae, Systematic list of Olethreutinae, Olethreutinae, Plates of Genitalia, Plates of Adults, List of Plants, References, Index.

The SAGE Handbook of Architectural Theory C. Greig Crysler, Stephen Cairns, Hilde Heynen.2012-01-10 Offers an intense scholarly experience in its comprehensiveness, its variety of voices and its formal organization... the editors took a risk, experimented and have delivered a much-needed resource that upends the status-quo. - Architectural Histories, journal of the European Architectural History Network Architectural theory interweaves interdisciplinary understandings with different practices, intentions and ways of knowing. This handbook provides a lucid and comprehensive introduction to this challenging and shifting terrain, and will be of great interest to students, academics and practitioners alike. - Professor Iain Borden, UCL Bartlett School of Architecture In this collection, architectural theory expands outward to interact with adjacent discourses such as sustainability, conservation, spatial practices, virtual technologies, and more. We have in The Handbook of Architectural Theory an example of the extreme generosity of architectural theory. It is a volume that designers and scholars of many stripes will welcome. - K. Michael Hays, Eliot Noyes Professor of Architectural Theory, Harvard University The SAGE Handbook of Architectural Theory documents and builds upon the most innovative developments in architectural theory over the last two decades. Bringing into dialogue a range of geographically, institutionally

and historically competing positions, it examines and explores parallel debates in related fields. The book is divided into eight sections: Power/Difference/Embodiment Aesthetics/Pleasure/Excess Nation/World/Spectacle History/Memory/Tradition Design/Production/Practice Science/Technology/Virtuality Nature/Ecology/Sustainability City/Metropolis/Territory. Creating openings for future lines of inquiry and establishing the basis for new directions for education, research and practice, the book is organized around specific case studies to provide a critical, interpretive and speculative enquiry into the relevant debates in architectural theory.

Whip Spiders Peter Weygoldt.2021-10-25 Whip spiders (Amblypygi) can be large and terrifying animals with strong, raptorial pedipalps and long antenniform first legs that can produce a span of as much as 60 cm. Others are small and scarcely span 5 cm. They all lead a secretive nocturnal life and are extremely dangerous to other arthropods and small vertebrates. In contrast to spiders and scorpions, they are of no commercial, economic or medical importance and they are difficult to study in the field because of their nocturnal habits, possible reasons why they have been greatly neglected until recently, by scientists and naturalists. Whip spiders represent an old group that dates back to the Carboniferous period. Their partly primitive and partly derived morphological characters and habits make the study of these animals interesting, while observation of their behaviour greatly increases our knowledge and understanding of arachnids in general. In this book the author describes their morphology and systematics, their life history, their fascinating sensory biology, their complex mating dances and reproductive biology, and their ecology and distribution. Thus he has made a significant contribution to a better understanding of the morphology and biology of the Arachnida as a whole. Whip Spiders is an outstanding contribution to science and it will be of interest for anyone with an interest in Arachnida and for those keeping and breeding spiders.

Fossil Spiders David Penney,Paul A. Selden,Paul Selden.2011 Compared to insects, fossil spiders have received only scant attention in the literature. Previously, the only works available were numerous scientific papers, many published in foreign languages. Most of these are basic descriptive taxonomic works, with very few considering broader biological concepts. Despite a significant increase in the discovery and description of fossil spiders within the last quarter Century this void remained unfilled. Thus, this short monograph aims to achieve several objectives. Firstly, to provide general and up to date background information on the overall importance and diversity of fossils spiders, including an indication of those groups for which the taxonomy is spurious and in need of reassessment. Secondly, to discuss the techniques available for working with fossil spiders and some of the problems encountered by palaeoarachnologists, including bias and limitations of the spider fossil record. Thirdly, the overall evolutionary history of spiders is summarized in the form of an evolutionary tree, which is subsequently used to address key issues of broad interest, such as origins, diversifications and extinctions, including the effects of mass extinctions and predator-prey co-radiations. Finally, the contribution that fossil data can make to understanding the past and present biogeography of the order is considered. This book should be of interest to both amateur and professional arachnologists and palaeontologists and will also serve as a general palaeontological reference work for neontologists studying extant spiders.

The Primer of Humor Research Victor Raskin.2008-11-06 The book is intended to provide a definitive view of the field of humor research for both beginning and established scholars in a variety of fields who are developing an interest in humor and need to familiarize themselves with the available body of knowledge. Each chapter of the book is devoted to an important aspect of humor research or to a disciplinary approach to the field, and each is written by the leading expert or emerging scholar in that area. There are two primary motivations for the book. The positive one is to collect and summarize the impressive body of knowledge accumulated in humor research in and around Humor: The International Journal of Humor Research. The negative motivation is to prevent

the embarrassment to and from the first-timers, often established experts in their own field, who venture into humor research without any notion that there already exists a body of knowledge they need to acquire before publishing anything on the subject-unless they are in the business of reinventing the wheel and have serious doubts about its being round! The organization of the book reflects the main groups of scholars participating in the increasingly popular and high-powered humor research movement throughout the world, an 800 to 1,000-strong contingent, and growing. The chapters are organized along the same lines: History, Research Issues, Main Directions, Current Situation, Possible Future, Bibliography-and use the authors' definitive credentials not to promote an individual view, but rather to give the reader a good comprehensive and condensed view of the area.

Rethinking Architectural Technology William W. Braham,Jonathan A. Hale.2013-05-13 This essential reference for all students of architecture, design and the built environment provides a convenient single source for all the key texts in the recent literature on architecture and technology. The book contains over fifty carefully selected essays, manifestoes, reflections and theories by architects and architectural writers from 1900 to 2004. This mapping out of a century of architectural technology reveals the discipline's long and close attention to the experience and effects of new technologies, and provides a broad picture of the shift from the 'age of tools' to the 'age of systems'. Chronological arrangement and cross-referencing of the articles enable both a thematic and historically contextual understanding of the topic and highlight important thematic connections across time. With the ever increasing pace of technological change, this Reader presents a clear understanding of the context in which it has and does affect architecture.

The Biology of Camel-Spiders Fred Punzo.2012-12-06 My initial interest in the Solifugae (camel-spiders) stems from an incident that occurred in the summer of 1986. I was studying the behavioral ecology of spider wasps of the genus *Pepsis* and their interactions with their large theraphosid (tarantula) spider hosts, in the Chihuahuan Desert near Big Bend National Park, Texas. I was monitoring a particular tarantula burrow one night when I noticed the resident female crawl up into the burrow entrance. Hoping to take some photographs of prey capture, I placed a cricket near the entrance and waited for the spider to pounce. Suddenly, out of the corner of my eye appeared a large, rapidly moving yellowish form which siezed the cricket and quickly ran off with it until it disappeared beneath a nearby mesquite bush. So suddenly and quickly had the sequence of events occurred, that I found myself momentarily startled. With the aid of a headlamp I soon located the intruder, a solifuge, who was already busy at work macerating the insect with its large chelicerae (jaws). When I attempted to nudge it with the edge of my forceps, it quickly moved to another location beneath the bush. When I repeated this maneuver, the solifuge dropped the cricket and lunged at the forceps, gripping them tightly in its jaws, refusing to release them until they were forcefully pulled away.

Futuro ancestral Ailton Krenak.2024-03-01 Si hay un futuro que imaginar es ancestral, pues ya está presente en el aquí y ahora y en lo que existe a nuestro alrededor, en los ríos, las montañas y los árboles que son nuestros parientes. Krenak propone una mirada que desafía y enfrenta los supuestos que sostienen la mentalidad occidental. Frente a los estragos de siglos de colonialismo y devastación ecológica y social, Ailton Krenak llama la atención sobre el poder destructor del

capitalismo. Si hay un futuro que imaginar es ancestral, pues ya está presente en el aquí y ahora y en lo que existe a nuestro alrededor, en los ríos, las montañas y los árboles que son nuestros parientes. Una mirada que desafía y enfrenta los supuestos que sostienen la mentalidad occidental. La idea de futuro a veces nos asusta con escenarios apocalípticos. En otras ocasiones, se ofrece como una oportunidad de redención, como si fuera posible resolver, más adelante y por arte de magia, todos los problemas del presente. En todo caso, las ilusiones nos alejan de lo que está a nuestro alrededor. En esta nueva colección de textos, Ailton Krenak nos provoca con la radicalidad de su pensamiento insurgente, que desplaza al sentido común e invoca la maravilla. Dice Krenak: Los ríos, esos seres que siempre habitaron los mundos en diferentes formas, son quienes me sugieren que, si hay un futuro a pensar, ese futuro es ancestral, porque ya estaba aquí.

Minerals of Mexico William D. Panczner.2013-06-29 After many years of geographical and bibliographical journeys, William Panczner has completed a project that many of us would have loved to initiate, but did not undertake because of its magnitude and intrinsic complexity. Not since L. Salazar Salinas, who is credited with authoring *Boletín* numbers 40 and 41 (Instituto Geológico de México, 1922, 1923), has an author been able to provide readers with a comprehensive volume containing information that is both authentic and reliable on Mexican mineralogy, mineral species, and localities. This volume is the most complete synthesis about Mexican minerals and their occurrences to date. It is richly illustrated with photographs and drawings, is well documented, and is organized into four sections, making it easy to use and enjoyable to read. The introduction contains an interesting summary of the mining history and the development of mineralogy. It also describes, in a condensed but accurate and stimulating manner, the geography and the mineralogy of the country, dividing it into eleven mineral provinces. The author discusses eight of the more important mining districts in Mexico, which produce fine mineral specimens. There is also a chronology of historical, geological, and mineralogical events in Mexico. This is followed by a bibliography with over 500 references on the subject.

This Is Enlightenment Clifford Siskin,William Warner.2010-06-15 Debates about the nature of the Enlightenment date to the eighteenth century, when Immanuel Kant himself addressed the question, "What is Enlightenment?" The contributors to this ambitious book offer a paradigm-shifting answer to that now-famous query: Enlightenment is an event in the history of mediation. Enlightenment, they argue, needs to be engaged within the newly broad sense of mediation introduced here—not only oral, visual, written, and printed media, but everything that intervenes, enables, supplements, or is simply in between. With essays addressing infrastructure and genres, associational practices and protocols, this volume establishes mediation as the condition of possibility for enlightenment. In so doing, it not only answers Kant's query; it also poses its own broader question: how would foregrounding mediation change the kinds and areas of inquiry in our own epoch? *This Is Enlightenment* is a landmark volume with the polemical force and archival depth to start a conversation that extends across the disciplines that the Enlightenment itself first configured.

Humorous Texts Salvatore Attardo.2010-12-14 This book presents a theory of long humorous texts

based on a revision and an upgrade of the General Theory of Verbal Humour (GTVH), a decade after its first proposal. The theory is informed by current research in psycholinguistics and cognitive science. It is predicated on the fact that there are humorous mechanisms in long texts that have no counterpart in jokes. The book includes a number of case studies, among them Oscar Wilde's Lord Arthur Savile's Crime and Allais' story Han Rybeck. A ground-breaking discussion of the quantitative distribution of humor in select texts is presented.

Costa Rican Ecosystems Maarten Kappelle.2016-04-15 In 1502, Christopher Columbus named Costa Rica, and while gold and silver never materialized to justify the moniker of rich coast in purely economic terms, scientists and ecotourists alike have long appreciated its incredible wealth. Wealth in Costa Rica is best measured by its biodiversity home to a dizzying number of plants and animals, many endemic, it is a country that has long encouraged and welcomed researchers from the world over, and is exemplary in the creation and commitment to indigenous conservation and management programs. Costa Rica is considered to have the best preserved natural resources in Latin America. Approximately nine percent (about 1,000,000 acres) of Costa Rica has been protected in 15 national parks, and a comparable amount of land is protected as wildlife refuges, forest reserves or Indian reservations. This long-awaited synthesis of Costa Rican ecosystems is an authoritative presentation of the paleoecology, biogeography, structure, conservation, and sustainable use of Costa Rica's ecosystems. It systematically covers the entire range of Costa Rica's natural and managed, terrestrial, freshwater and marine ecosystems, including its island systems (Cocos Islands), the Atlantic and Pacific oceans and shores (coasts, coral reefs, mangrove forests), its lowlands (dry, season and wet forests), its highlands (the northern volcanoes and southern Talamanca's), and its estuaries, rivers, lakes, swamps and bogs. The volume's integrated, comprehensive format will be welcomed by tropical and temperate biologists alike, by biogeographers, plant and animal ecologists, marine biologists, conservation biologists, foresters, policy-makers and all scientists, natural history specialists and all with an interest in Costa Rica's ecosystems.

An essential reference in this fundamental area.

Dizziness Ruth Anderwald, Karoline Feyertag, Leonhard Grond.2020-03-24 Dizziness is more than feeling dizzy. In this multidisciplinary reader, artists, philosophers, and researchers from a range of experimental sciences and cultural studies trace dizziness not only as a phenomenon of sensory input impacting our vestibular system, but also as a twofold phenomenon of "sense"—creating meaning and triggering emotions. It is an interdependence of sense and sensing, of cultural constructs and sensuality, of somatic and cognitive knowledge, that can only be conceived of as a complex relation of both formation and dissolution, habituations and transformations, pertaining to

our shared reality and our individual experiences. This is further reflected in the programmatic claim that states of dizziness can be seen as a resource. co-published with Academy of Fine Arts Vienna Contributors Ruth Anderwald, Mathias Benedek, Oliver A. I. Botar, Katrin Bucher Trantow, Davide Deriu, Karoline Feyertag, Leonhard Grond, François Jullien, Sarah Kolb, Rebekka Ladewig, Jarosław Lubiak, Alice Pechriggl, Oliver Ressler, Maya M.
