Overcoming cultural barriers in the investment banking sector: Training and development in Germany and Switzerland Martin Giefers.2003-04-07

Inhaltsangabe:Abstract: The German banking sector, as in most Western European countries, is confronted with drastic changes which deeply affect the conditions of the financial service market and the characteristics of populations in banks. In the last few years, the isolation of the national financial markets decreased due to the increasing of foreign trade, international competition, and further developments of new financial products, like futures for example. Therefore, all banks have to think globally and have to establish branches in all financial centers to be available for their clients and stay competitive; like in New York City, London, Tokyo, Zurich, and Frankfurt am Main, cities in which the financial market plays an important role. As it is widely known, Switzerland has an outstanding international position in the investment banking sector. This condition was taken as an opportunity to examine the diamond concept of Porter related to the Swiss and German human resources. The thesis is divided into five chapters, of which the first chapter gives a general overview of the investment banking sector, which is the definition, the fields of activity, and the traded securities in the investment banking sector. The German and Swiss bank system is exemplified in the second chapter. Furthermore, this chapter gives a short overview of the banks' history in Germany and Switzerland as well as examples of training programs of the German Deutsche Morgan Grenfell and Commerzbank AG and of the Swiss SBC Warburg. In addition, the training profession Bankkaufmann/-frau which exists in Germany as well as in Switzerland is explained in this chapter. The third chapter deals with the cultural and organizational factor in the investment banking sector. The German and Swiss culture is investigated by the example of Hofstede's dimensions of cultural differences. Furthermore, the organizational changes, a new network approach in investment banking, and a brief outlook of Culbert's mind-set management of the power of advising are expounded in the third chapter. The fourth chapter deals with the main focus of this thesis which is the description of the Swiss and German advantages and disadvantages in the field of human resources within the investment banking sector. A comparison between German's and Switzerland's human factor is followed by proposals and solutions to strengthen the German human factor of investment banks, so that the German banking business [...]

Footprints in Micrometeorology and Ecology Monique Y. Leclerc,Thomas Foken.2016-08-23 How to interpret meteorological measurements made at a given level over a surface with regard to characteristic properties such as roughness, albedo, heat, moisture, carbon dioxide, and other gases is an old question which goes back to the very beginnings of modern micrometeorology. It is made even more challenging when it is unclear whether these measurements are only valid for this point/region and precisely describe the conditions there, or if they are also influenced by surrounding areas. After 50 years of field experiments, it has become both apparent and problematic that meteorological measurements are influenced from surfaces on the windward side. As such, extending these measurements for inhomogeneous experimental sites requires a quantitative understanding of these influences. When combined with atmospheric transport models similar to air pollution models, the 'footprint' concept - a fundamental approach introduced roughly 20 years ago - provides us with information on whether or not the condition of upwind site homogeneity is fulfilled. Since these

first models, the development of more scientifically based versions, validation experiments and applications has advanced rapidly. The aim of this book is to provide an overview of these developments, to analyze present deficits, to describe applications and to advance this topic at the forefront of micrometeorological research.

Handbook of Virtue Ethics in Business and Management Alejo José G. Sison.2016-11-15 This volume examines the breadth and depth of virtue ethics and aims to counter the virtue ethics amnesia that both afflicts general moral philosophy and affects business and management ethics. Divided into two parts, the handbook starts out with a historical introduction and chronology of the development of virtue ethics, providing a comprehensive assessment of its evolution and identifying the most influential authors and their works. The authors discussed include those who follow a philosophical or conceptual tradition in their treatment of virtue and those who belong to the research tradition of positive science, in particular, empirical, quantitative and applied psychology. The second part of the book discusses systematic approaches and major themes developed in virtue ethics. These contributions are conceptual, empirical/applied or case studies. They offer insight into the different topics to which virtue ethics has been applied, and show how virtue ethics has influenced the various operational areas of firms. Finally, they examine the virtue ethics responses to some of the most important issues that businesses and organizations face in the 21st century.

Remaining Relevant Rob Nixon.2015-03-27 'Remaining Relevant' is practical and practiced advice for accountants to remain relevant in a 'disrupted' industry and has been described as "the most important business book that you will read this year." As long-term industry insider and visionary, Rob has the unique capability to help accountants focus on what is important through his direct, and at times confronting, analysis of the profession. A must read." Tim Reed, MYOB CEO "Rob Nixon is to accounting what Peter Drucker was to strategy: He creates new paradigms and fresh approaches to a discipline that would be headed for the doldrums without him." Alan Weiss, PhD, Author, Million Dollar Consulting Rhode Island, USA "The accounting game is changing forever. Any partner who doesn't acknowledge this is kidding themselves. A European Public Investment Outlook Floriana Cerniglia,Francesco Saraceno.2020-06-12 This outlook provides a focused assessment of the state of public capital in the major European countries and identifies areas where public investment could contribute more to stable and sustainable growth. A European Public Investment Outlook brings together contributions from a range of international authors from diverse intellectual and professional backgrounds, providing a valuable resource for the policy-making community in Europe to feed their discussion on public investment. The volume both offers sector-specific advice and highlights larger areas which should be prioritized in the policy debate (from transport to social capital, R&D and the environment). The Outlook is structured into two parts: the chapters of Part I respectively explore public investment trends in France, Germany, Italy, Spain and Europe as a whole, and illuminate how the legacy of the 2008 Global Financial Crisis is one of insufficient public investment. Part II investigates some areas into which resources could be channelled to reverse the recent trend and provide European economies with an adequate public capital stock. The essays in this outlook collectively foster a broad approach to and definition of public investment, that is today more relevant than ever. Offering up a timely and clear case for the elimination of bias against investment in European fiscal rules, this outlook is a welcome contribution to the European debate, aimed both at policy makers and general readers.

Macroeconomics and New Macroeconomics Bernhard Felderer,Stefan Homburg.1992-08-21 This book gives a comprehensive account of traditional and more recent developments in macroeconomic theory. It is written primarily for students at the intermediate level. The book differs from the customary expositions in that the authors do not discuss topic by topic but orthodoxy by orthodoxy. Thus, the main approaches, like Classical theory, Keynesian theory, theory of portfolio selection, Monetarism, Rational Expectations theory, and Neoknesian disequilibrium theory are presented in historical order. Each of these approaches is substantiated and criticized in a self-contained chapter, and the authors have taken great pains to bring out the relations and differences between them. A mathematical appendix reviews those mathematical facts which are especially important for macroeconomic models and serves to make the text easy to read.

Cell Differentiation Lutz Nover,M. Luckner,B. Parthier.2011-12-16 Three years have elapsed since the publication of the first edition of this book (in German). The continued interest of our readers and the rapid progress of our knowledge in many fields necessitates a thoroughly revised and somewhat enlarged new edition. Cell differentiation is a prerequisite of life. It is defined as the process leading to the qualitatively and quantitatively selective realization of distinct parts of a given genetic material. Cell differentiation comprises five main aspects: (1) signal reception and transformation, (2) selective rearrangements of the genetic material, (3) differential gene expression, (4) organization of gene expression programs and (5) intercellular coordination of cell differentiation within the developmental programs of multicellular organisms. Despite the bewildering multiplicity of its results, i.e., the differentiated phenotypes of cells, there are apparently fundamental similarities with respect to the molecular mechanisms of the process itself. These mechanisms constitute the central subject of this book.

Media and Convergence Management Sandra Diehl,Matthias Karmasin.2013-05-24 Convergence has gained an enormous amount of attention in media studies within the last several years. It is used to describe the merging of formerly distinct functions, markets and fields of application, which has changed the way companies operate and consumers perceive and process media content. These transformations have not only led business practices to change and required companies to adapt to new conditions, they also continue to have a lasting impact on research in this area. This book's main purpose is to shed some light on crucial phenomena of media and convergence management, while also addressing more specific issues brought about by innovations related to media, technologies, industries, business models, consumer behavior and content management. This book gathers insights from renowned academic researchers and pursues a highly interdisciplinary approach. It will serve as a valuable reference guide for students, practitioners and researchers interested in media convergence processes.

Vertrieb von Finanzdienstleistungen Susanne Hannemann.2013-03-09 Die Vertriebssysteme auf den Finanzmärkten sind in der vergangenen Dekade stark in Bewegung geraten. Erstens haben sich auf Grund technologischer Fortentwicklung insbesondere verschiedene Vertriebsformen der Selbstbedienung bereits etabliert (Geldausgabeautomaten, Multifunktionsterminals); andere werden stärker an Bedeutung gewinnen (electronic cash, Btx). Zweitens haben die unterschiedlich intensiven Kooperationsformen der sogenannten Allfinanzanbieter dafür gesorgt, daß sich Banken mit ihren stationären Vertriebssystemen die mobilen von Bausparkassen und insbesondere Versicherungen nur den Absatz ihrer Leistungen verfügbar machen und vice versa.-Die Arbeit der Verfasserin ist in diesem zweiten Bereich anzusiedeln. Lange hat man die Auffassung vertreten, daß sich der Vertrieb von Finanzdienstleistungen wegen ihrer fehlenden Substanz nur direkt darstellen ließe. Inzwischen ist man jedoch zu der Erkenntnis gekommen, daß infolge der Trennungsmöglichkeit von Produktions- und Verkaufsvorgang auch middlemen eingeschaltet werden können,

aus Effizienzgründen sogar eingeschaltet werden sollten. Ob Finanzdienstleistungen in effizienter Weise über Absatzmittler verkauft werden können oder nicht, hängt aus Produzentensicht auch ab von den an sie gezahlten Vergütungen, der Erklärungsbedürftigkeit und Kontakthäufigkeit der Finanzdienstleistungen. Die Verfasserin macht in diesem Zusammenhang die unterschiedlichen Interessenlagen klar, filtert aber auch einen mittleren Bereich im Sortiment der Finanzdienstleistungen heraus, der bei Einschaltung von Absatzmittlern ein interessantes Absatzpotential erwarten lässt.
