Handbook of Literacy in Akshara Orthography R. Malatesha Joshi,Catherine McBride.2019-06-11 This volume examines the unique characteristics of akshara orthography and how they may affect literacy development and problems along with the implications for assessment and instruction. Even though akshara orthography is used by more than a billion people, there is an urgent need for a

systematic attempt to bring the features, research findings, and future directions of akshara together in a coherent volume. We hope that this volume will bridge that gap. Akshara is used in several Indic languages, each calling it by a slightly different name, for example 'aksharamu', in Telugu, 'akshara' in Kannada, and 'akshar' in Hindi. It is the Bhrami-derived orthography used across much of the Indian subcontinent. There is a growing body of research on the psycholinguistic underpinnings of learning to read akshara, and the emerging perspective is that akshara, even though classified as alphasyllabaries, abugida, and semi-syllabic writing systems, is neither alphabetic nor syllabic. Rather, akshara orthography is unique and deserves to be a separate classification and needs further investigation relating to literacy acquisition in akshara. The chapters in this volume, written by leading authors in the field, will inform the reader of the current research on akshara in a coherent and systematic way.

Dreaming In Hindi Katherine Russell Rich. 2010-06-10 An eye-opening and courageous memoir that explores what learning a new language can teach us about distant worlds and, ultimately, ourselves. After miraculously surviving a serious illness, Katherine Rich found herself at an impasse in her career as a magazine editor. She spontaneously accepted a freelance writing assignment to go to India, where she found herself thunderstruck by the place and the language, and before she knew it she was on her way to Udaipur, a city in the northwestern state of Rajasthan, in order to learn Hindi. Rich documents her experiences—ranging from the bizarre to the frightening to the unexpectedly exhilarating—using Hindi as the lens through which she is given a new perspective not only on India, but on the radical way the country and the language itself were changing her. Fascinated by the process, she went on to interview linguistics experts around the world, reporting back from the frontlines of the science wars on what happens in the brain when we learn a new language. She brings both of these experiences together seamlessly in *Dreaming in Hindi*, a remarkably unique and thoughtful account of self-discovery.

Development, Education and Learning Disability in India Maya Kalyanpur.2021-12-13 This book uses qualitative research methods to examine why students in an Indian context are being identified as having learning disabilities on criteria that are largely drawn from the context of the Global North. It explores the push towards English language instruction as a possible factor that affects poor academic outcomes for students from low-income backgrounds who may be first-generation learners or English language learners. The book contrasts the different outcomes and supports for academically struggling students across low-income and middle-income backgrounds, with evidence to suggest that, despite the inclusionary principles of Education For All, this label is creating a marginalized group of students.

Nodes of Translation Martin Christof-Füchsle,Razak Khan.2024-01-29 The volume examines translation of key German texts into the modern Indian languages as well as translation from the vernacular languages of South Asia into German. Our key concerns are shifting historical contexts, concepts, and translation practices. Bringing an intellectual history dimension to translation studies, we explore the history of translation, translators, and sites of translation. The organization of the

volume follows some key questions. Which texts were being translated? At what point or period in time did this happen? What were the motivations behind these translations? Topics covered range from thematic nodes or clusters, e.g., translations of Economics texts and ideas into Urdu, or the translation of Marx and Engels into Marathi, to personal endeavours, such as the first Hindi translation of Goethe's Faust done by Bholanath Sharma in 1939. Missionary as well as Marxist activist translation work from Malayalam, Tamil and Telugu is included too. On the other hand, German translations of Tagore and Gandhi setting in shortly after 1912 are also examined. Also discussed are political strategies of publication of translations from modern Indian languages guiding the output of publishing houses in the GDR after 1949. Further included are the translator's perspective and the contemporary translation and literary culture. What happens through the process of linguistic translation in the realm of cultural translation? What can a historical study of translation tell us about the history of Indo-German intellectual entanglements in the long twentieth century? The volume brings together multifaceted interdisciplinary research work from South Asian and German studies to answer some of these questions.

Chewing Over the West .2009-01-01 The orientation of academic institutions has in recent years been moving away from highly specialized area studies in the classical sense towards broader regional and comparative studies. Cultural studies points to the limitation of Western approaches to non-Western cultures – a development not yet reflected in actual research and data collections. Bringing together scholars from all over the world with specialized knowledge in both Western and non-Western languages, literatures, and cultures, this collection of essays provides new insights into the agency of non-Western literatures in relation to the West – a term used with critical caution and, like other common binary dualisms, challenged here. Inter-cultural expertise, seldom applied in the

combination of Asian, African, and 'oriental' perspectives, makes this compilation of essays an important contribution to the study of colonialism and postcoloniality. Topics covered include postcolonial Arabic writing; T.S. Eliot in contemporary Arabic poetry; Algerian (and Berber) literature; the English language and narratives in Kenyan art; characterization, dialogism, gender and Western influence in modern Hindi fiction; Naya drama in India; modern Burmese theatre and literature under Western influence; Remarque's All Quiet on the Western Front and the Vietnamese Novel Without a Name; Western Marxism and vernacular literature in colonial Indonesia; hybridity in Komedi Stambul; and Sherlock Holmes in/and the crime fiction of Siam and Indonesia

Each chapter on the individual language covers the phonology and grammar (morphology and syntax) of the language and its writing system, and gives the historical background and information concerning the geography of the language and the number of its speakers.
