Inclusive Robotics for a Better Society José L. Pons.2019-07-29 The book reports on advanced topics in interactive robotics research and practice; in particular, it addresses non-technical obstacles to the broadest uptake of these technologies. It focuses on new technologies that can physically and cognitively interact with humans, including neural interfaces, soft wearable robots, and sensor and actuator technologies; further, it discusses important regulatory challenges, including but not limited to business models, standardization, education and ethical-legal-socioeconomic issues. Gathering the outcomes of the 1st INBOTS Conference (INBOTS2018), held on October 16-20, 2018 in Pisa, Italy, the book addresses the needs of a broad audience of academics and professionals working in government and industry, as well as end users. In addition to providing readers with detailed information and a source of inspiration for new projects and collaborations, it discusses representative case studies highlighting practical challenges in the implementation of interactive robots in a number of fields, as well as solutions to improve communication between different stakeholders. By merging engineering, medical, ethical and political perspectives, the book offers a multidisciplinary, timely snapshot of interactive robotics.

Arctic Geology and Petroleum Potential T.O. Vorren,E. Bergsager,Ø.A. Dahl-Stamnes,E. Holter,B. Johansen,E. Lie,T.B. Lund.2013-10-22 Since the search for hydrocarbon resources in the Arctic started in the 1930's the exploration activity has expanded into many of the Arctic regions, and several of the Arctic sedimentary basins have proven to be important sources of hydrocarbon. Nevertheless, the Arctic continental margins and adjacent onshore areas are still largely unexplored in the context of petroleum, and are therefore considered to be one of the few regions in the world where significant undiscovered sources of hydrocarbon may exist. The aim of the book is to give an updated overview of the geology of the Arctic sedimentary basins and their petroleum potential. Although the different basins vary significantly as regards sedimentary fill and tectonic evolution, many of the basins share some of the characteristics needed to become prolific oil and gas provinces. The book contains 45 extensively illustrated articles. It starts with papers on the Mesozoic source rocks, and oceanic natural gas clathrates in the Arctic, respectively. Then follow articles on the regional and petroleum geology of the main regions; Greenland, North American Arctic, Soviet Arctic and the Barents Sea. Particular emphasis is placed on the Barents Sea. The two last chapters comprise articles on salt dynamics and methods. The book closes with a paper on international law in the Arctic. This volume will be of interest to both students and professional earth scientists/petroleum explorationists working in the northern latitudes. It will allow the readers to stay abreast of the development in this climatic region of the world.

Normative Change and Security Community Disintegration Simon Koschut.2016-06-23 This book develops a theoretical and empirical argument about the disintegration of security communities, and the subsequent breakdown of stable peace among nations, through a process of norm degeneration. It draws together two key bodies of contemporary IR literature - norms and security communities - and brings their combined insights to bear on the empirical phenomenon of disintegration. The investigation of normative change in IR is becoming increasingly popular. Most studies, however, focus on its progressive connotation. The possibility of a weakening or even disappearance of an established peaceful normative order, by contrast, tends to be often either neglected or implicitly assumed. *Normative Change and Security Community Disintegration: Undoing Peace* advances the contemporary body of research on the important role of norms and ideas by analytically extending recent Constructivist arguments about international norm degeneration to the regional level and by applying them to a particular type of regional order - a security community.

The Heads of Religious Houses David Knowles,C. N. L. Brooke,Vera C. M. London.2001-08-09 This is the first of two volumes, now covering the heads of religious houses in England and Wales from the tenth-century reform to the death of Edward III, 940-1377. This first volume, by the great master of monastic history, Dom David Knowles, aided by Christopher Brooke and Vera London, was published first in 1972 and was quickly recognised as a major work of reference, noted for its mastery of accurate detail. It has now been brought up to date with substantial addenda and corrigenda by Christopher Brooke. The 1972 volume covers the period 940-1216, and comprises fully documented, critical lists of monastic superiors, with succinct biographical details. It is an essential foundation for all prosopographical study of the religious history of the period; and the precise chronology that it underpins is invaluable for dating innumerable undated documents. As such, the book is a fundamental tool of medieval research.

From Old English to Standard English Dennis Freeborn.1998 This practical and informative course book is a fascinating, visual volume which leads the student through the development of the language from Old English, through Middle and Early Modern English to the establishment of Standard English in the eighteenth century. At the core of this substantially expanded second edition lies a series of nearly 200 historical texts, of which more than half are reproduced in facsimile, and which illustrate the progressive changes in the language. The book is firmly based upon linguistic description, with commentaries which form a series of case studies demonstrating the evidence for language change at every level - handwriting, spelling, punctuation, vocabulary, grammar and meaning. Such a wealth of texts, as well as the structured activities and the various case studies, allow the volume to be used not only as a stimulating course text, guiding students through the analysis of data, but also as a comprehensive resource book and invaluable reference tool for teachers and students at all levels.--BOOK JACKET.Title Summary field provided by

Sary and the Maharajah's Emeralds Sharon Shipley.2018-12-03 Imprisoned by a fanatical, corrupt maharajah in the torrid climes of 1910 India, Sarabande Swinford battles the maharajah's lust and another man's passions, all while desperately trying to regain her memory. She has forgotten her perilous adventures in both love and fortunes, but her intrepid spirit remains as she encounters jealousy in the harem, man- and woman-eating crocodiles, and venomous snakes, all in her attempts at escape. Her defender in every potentially fatal situation is, surprisingly, the rajah, brother to the maharajah. Rami is all the maharajah is not: handsome and muscular, graceful, intelligent, and compassionate, a fitting challenge to Sary's spirited nature, a man well educated and well travelled in the world. But the real question is whether he can overcome his brother's hold on power and survive while rescuing Sary.

Among Herders of Inner Mongolia Christel Braae.2017-10-20 This is a study of a unique collection of Inner Mongolian artifacts at the National Museum of Denmark. They are described, analyzed and presented in a catalogue of more than 800 items, documenting the daily life of pastoral society in and around the tent, in the herding of the animals, in caravan trade and in hunting, crafts, sports and games, and in ritual life. Information about the objects was obtained during two expeditions to Inner Mongolia in the 1930s led by the Danish author Henning Haslund-Christensen, who had many years' experience of travel and expedition life in Mongolia. This is also a detailed account of the expeditions; of the routes, means and measures, as well as the worries and hopes of the participants; of their struggles with scientific aspirations; and of the conditions for collecting against the backdrop of the Chinese civil war and the Japanese occupation. The First and Second Danish Expeditions to Central Asia took place in 1936-1937 and 1938-1939 respectively. These expeditions were the sole foreign parties with access to the area at the time, and therefore their members were among the few observers of Inner Mongolian pastoral society at a time and place for which information was, and still is, scant and fragmented. Hence, the material objects and data obtained are of great scientific importance in the documentation of the life and material culture of Inner Mongolian herders in the 1930s - the main subject of the present book.

How Picturebooks Work Maria Nikolajeva, Carole Scott. 2013-02-01 *How Picturebooks Work* is an innovative and engaging look at the interplay between text and image in picturebooks. The authors explore picturebooks as a specific medium or genre in literature and culture, one that prepares children for other media of communication, and they argue that picturebooks may be the most influential media of all in the socialization and representation of children. Spanning an international range of children's books, this book examines such favorites as *Curious George* and *Frog and Toad Are Friends*, along with the works of authors and illustrators including Maurice Sendak and Tove Jansson, among others. With 116 illustrations, *How Picturebooks Work* offers the student of children's literature a new methodology, new theories, and a new set of critical tools for examining the picturebook form.

The Light at the End of the World Siddhartha Deb.2023-05-30 Connecting India's tumultuous 19th and 20th centuries to its distant past and its potentially apocalyptic future, this sweeping tale of rebellion, courage, and brutality reinvents fiction for our time. Delhi, the near future: Bibi, a low-ranking employee of a global consulting firm, is tasked with finding a man long thought to be dead but who now appears to be the source of a vast collection of documents. The trove purports to reveal the secrets of the Indian government, including detention centers, mutated creatures, engineered viruses, experimental weapons, and alien wrecks discovered in remote mountain areas. Bhopal, 1984: an assassin tracks his prey through an Indian city that will shortly be the site of the worst industrial disaster in the history of the world. Calcutta, 1947: a veterinary student's life and work connect him to an ancient Vedic aircraft that might stave off genocide. And in 1859, a British soldier rides with his detachment to the Himalayas in search of the last surviving leader of an anti-colonial rebellion. These timelines interweave to form a kaleidoscopic, epic novel in which each protagonist must come to terms with the buried truths of their times as well as with the parallel universe that connects them all, through automatons, spirits, spacecraft, and aliens. *The Light at the End of the World*, Siddhartha Deb's first novel in fifteen years, is a magisterial work of shifting forms, expanding the possibilities of fiction while bringing to life the India of our times.
