Cosmography and the Idea of Hyperborea in Ancient Greece Renaud Gagné.2021-04-22 Cosmography is defined here as the rhetoric of cosmology: the art of composing worlds. The mirage of Hyperborea, which played a substantial role in Greek religion and culture throughout Antiquity, offers a remarkable window into the practice of composing and reading worlds. This book follows Hyperborea across genres and centuries, both as an exploration of the extraordinary record of Greek thought on that further North and as a case study of ancient cosmography and the anthropological philology that tracks ancient cosmography. Trajectories through the many forms of Greek thought on Hyperborea shed light on key aspects of the cosmography of cult and the cosmography of literature. The philology of worlds pursued in this book ranges from Archaic hymns to Hellenistic and Imperial reconfigurations of Hyperborea. A thousand years of cosmography is thus surveyed through the rewritings of one idea. This is a book on the art of reading worlds slowly.

Higher Education Pathways Paul Ashwin,M. Case.2018-12-13 In what ways does access to undergraduate education have a transformative impact on people and societies? What conditions are required for this impact to occur? What are the pathways from an undergraduate education to the public good, including inclusive economic development? These questions have particular resonance in the South African higher education context, which is attempting to tackle the challenges of widening access and improving completion rates in a system in which the segregations of the apartheid years are still apparent. Higher education is recognised in core legislation as having a distinctive and crucial role in building post-apartheid society. Undergraduate education is seen as central to addressing skills shortages in South Africa. It is also seen to yield significant social returns, including a consistent positive impact on societal institutions and the development of a range of capabilities that have public, as well as private, benefits. This book offers comprehensive contemporary evidence that allows for a fresh engagement with these pressing issues.

Strengths-Based Nursing Care Laurie N. Gottlieb, PhD, RN.2012-08-22 This is the first practical guide for nurses on how to incorporate the knowledge, skills, and tools of Strength-Based Nursing Care (SBC) into everyday practice. The text, based on a model developed by the McGill University Nursing Program, signifies a paradigm shift from a deficit-based model to one that focuses on individual, family, and community strengths as a cornerstone of effective nursing care. The book develops the theoretical foundations underlying SBC, promotes the acquisition of fundamental skills needed for SBC practice, and offers specific strategies, techniques, and tools for identifying strengths and harnessing them to facilitate healing and health. The testimony of 46 nurses demonstrates how SBC can be effectively used in multiple settings across the lifespan.

Safe Management of Wastes from Health-care Activities World Health Organization.2014 This is the second edition of the WHO handbook on the safe, sustainable and affordable management of health-care waste--commonly known as the Blue Book. The original Blue Book was a comprehensive publication used widely in health-care centers and government agencies to assist in the adoption of national guidance. It also provided support to committed medical directors and managers to make improvements and presented practical information on waste-management techniques for medical staff and waste workers. It has been more than ten years since the first edition of the Blue Book. During the intervening period, the requirements on generators of health-care wastes have evolved and new methods have become available. Consequently, WHO recognized that it was an appropriate time to update the original text. The purpose of the second edition is to expand and update the practical information in the original Blue Book. The new Blue Book is designed to continue to be a source of impartial health-care information and guidance on safe waste-management practices. The editors' intention has been to keep the best of the original publication and supplement it with the latest relevant information. The audience for the Blue Book has expanded. Initially, the publication was intended for those directly involved in the creation and handling of health-care wastes: medical staff, health-care facility directors, ancillary health workers, infection-control officers and waste workers. This is no longer the situation. A wider range of people and organizations now have an active interest in the safe management of health-care wastes: regulators, policy-makers, development organizations, voluntary groups, environmental bodies, environmental health practitioners, advisers, researchers and students. They should also find the new Blue Book of benefit to their activities. Chapters 2 and 3 explain the various types of waste produced from health-care facilities, their typical characteristics and the hazards these wastes pose to patients, staff and the general environment. Chapters 4 and 5 introduce the guiding regulatory principles for developing local or national approaches to tackling health-care waste management and transposing these into practical plans for regions and individual health-care facilities. Specific methods and technologies are described for waste minimization, segregation and treatment of health-care wastes in Chapters 6, 7 and 8. These chapters introduce the basic features of each technology and the operational and environmental characteristics required to be achieved, followed by information on the potential advantages and disadvantages of each system. To reflect concerns about the difficulties of handling health-care wastewaters, Chapter 9 is an expanded chapter with new guidance on the various sources of wastewater and wastewater treatment options for places not connected to central sewerage systems. Further chapters address issues on economics (Chapter 10), occupational safety (Chapter 11), hygiene and infection control (Chapter 12), and staff training and public awareness (Chapter 13). A wider range of information has been incorporated into this edition of the Blue Book, with the addition of two new chapters on health-care waste management in emergencies (Chapter 14) and an overview of the emerging issues of pandemics, drug-resistant pathogens, climate change and technology advances in medical techniques that will have to be accommodated by health-care waste systems in the future (Chapter 15).

Emerging Viral Diseases Institute of Medicine,Board on Global Health,Forum on Microbial Threats.2015-03-19 In the past half century, deadly disease outbreaks caused by novel viruses of animal origin - Nipah virus in Malaysia, Hendra virus in Australia, Hantavirus in the United States, Ebola virus in Africa, along with HIV (human immunodeficiency virus), several influenza subtypes, and the SARS (sudden acute respiratory syndrome) and MERS (Middle East respiratory syndrome) coronaviruses - have underscored the urgency of understanding factors influencing viral disease emergence and spread. Emerging Viral Diseases is the summary of a public workshop hosted in March 2014 to examine factors driving the appearance, establishment, and spread of emerging, re-emerging and novel viral diseases; the global health and economic impacts of recently emerging and novel viral diseases in humans; and the scientific and policy approaches to improving domestic and international capacity to detect and respond to global outbreaks of infectious disease. This report is a record of the presentations and discussion of the event.

Pro: Reclaiming Abortion Rights Katha Pollitt.2014-10-14 A poet, essayist and columnist argues that abortion is a common part of a woman's reproductive life and shouldn't be vilified, but accepted as a moral right that can be a force for social good.

Cancer in Sub-Saharan Africa D. M. Parkin, J. Ferlay, A. Jemal, M. Borok, S. S. Manraj, G. G. N'Da, F. Bray, B. Liu, F. J. Ogunbiyi. 2018 The Cancer in Sub-Saharan Africa volume brings together population-based cancer incidence data from 25 cancer registries in 20 sub-Saharan African countries that are part of the African Cancer Registry Network. The compiled data in this volume, presented and commented upon by covered population and by anatomical site, are of tremendous value to the assessment of the pattern and evolution of cancer in Africa, as a means of elucidating, confirming, and evaluating causes of the disease.

Contemporary Migration to South Africa Aurelia Segatti. 2011-08-23 Building on global interest in migration development, the volume draws attention to one of the most important migration systems in sub-Saharan Africa. It reviews South Africa's approach to international migration in the post-apartheid period from a regional development perspective, highlighting key policy issues, debates, and consequences. The authors find at least three areas where migration is resulting in important development impacts. First, by offering options to those affected by conflict and crises in a region that has limited formal disaster management and social protection systems. Second, by mitigating shortcomings and distortions in regional labour markets. Third, by providing support to struggling rural economies and ever expanding urban areas in terms of livelihoods and social capital transfers. Chapter One consists of a study of the country's historical experience of migration and, in particular, analyses the changes in official attitudes throughout the twentieth century, indicating the roots of contemporary ideas and policy dilemmas. Chapters Two, Three, Four and Five complement this analysis of the South African State's capacity to reform and manage the South African migration situation by looking at often neglected dimensions: the first explores the question of skilled labour, a crucial question given the unbalanced structure of the South African labour market; the second examines the impact of migration on local government in South African cities and specifically implications for urban planning, service delivery, health, security, and political accountability; the third analyses the nature of undocumented migration to South Africa and the challenges it raises to both State and non-State actors; The book concludes with an examination of health as a critical issue when examining the relationship between migration and development in South Africa, in light of recent empirical data.

Western Diseases Norman J. Temple, Denis P. Burkitt. 2012-12-06 Sir Richard Doll, FRS, FRCP ICRF Cancer Research Studies Unit Radcliffe Infirmary, Oxford, UK The twentieth century has seen few changes more remarkable than the improvement in health that has occurred nearly everywhere, most spectacularly in the economically developed countries. In these countries improved nutrition, better housing, the control of infection, smaller family sizes, and higher standards of education have brought about a situation in which more than 97% of all liveborn children can expect to survive the first half of the three score years and ten that formerly was regarded as the allotted span of life. From then on, however, the position is less satisfactory. Some improvement has occurred; but the proportion of survivors who die prematurely, that is under 70 years of age, varies from 25% to over 50% in men and from 13% to 28% in women, the extremes in both sexes being recorded, respectively, in Japan and Hungary. Most of these deaths under 70 years of age must now be called premature, even in Japan. For most of them are not the result of any inevitable aging process, but instead are the consequences of diseases (or types of trauma) that have lower-often much lower-age-specific incidence rates in many of the least developed countries.

Family-Centred Perinatal Care Beverley Chalmers. 2017-04-03 Since childbirth became a medicalized - and usually hospitalized - event a century ago, women's and families' psychosocial needs have been relegated to a somewhat peripheral role within the clinically focussed hierarchy of medical care. This text reinstates psychosocial issues as a primary focus of care, together with clinical excellence. Family-centred care is a familiar phrase in today's maternity services, with professional guidelines and hospital policies including the term in their care protocols; however, few definitions, and no specific standards, for family-centred care exist. While all caregivers and care services are likely to define their care as sensitive to women's needs, and family-centred, the actual implementation of a family-centred approach - despite it being a current fashion in care - is still inadequate. This book clearly defines family-centred perinatal care, and outlines how truly family-centred care can, and should, be implemented, and how, and where, this has been done.

Cardiopulmonary Physiotherapy In Trauma: An Evidence-based Approach (Second Edition) Heleen Van Aswegen, Brenda May Morrow. 2024-02-06 Trauma is a serious public health problem worldwide and is the leading cause of death among adults and children. Physiotherapists play a key role in the interdisciplinary team caring for patients with physical injury after a traumatic event. The aim of *Cardiopulmonary Physiotherapy in Trauma: An Evidence-based Approach* is to encourage quality evidence-based physiotherapy management of adult and paediatric survivors of trauma in an acute care setting on a global level. The first edition of the book was written by South African physiotherapy academics and clinical physiotherapists with expertise in trauma care. This new edition involves the South African writers from the first edition as well as a team of international experts in trauma care across health care disciplines (including surgeons, nurses, occupational therapists, dieticians, pain experts, and social workers). The information shared in the first edition has therefore been updated with more clinical expertise and the latest available evidence. The new content in this latest edition aims to make physiotherapists more aware of the importance of considering how pain influences patients' participation in therapy sessions, and of a team approach to patient care (e.g. managing pain and planning of care) to ensure the best possible outcomes for adult and paediatric patients with traumatic injury, at hospital discharge.

Practicing Biomedicine at the Albert Schweitzer Hospital 1913-1965 Tizian Zumthurm. 2020-08-10 Tizian Zumthurm uses the extraordinary hospital of an extraordinary man to produce novel insights into the ordinary practice of biomedicine in colonial Central Africa. His investigation of therapeutic routines in surgery, maternity care, psychiatry, and the treatment of dysentery and leprosy reveals the incoherent nature of biomedicine and not just in Africa. Reading rich archival sources against and along the grain, the author combines concepts that appeal to those interested in the history of medicine and colonialism. Through the microcosm of the hospital, Zumthurm brings to light the social worlds of Gabonese patients as well as European staff. By refusing to easily categorize colonial medical encounters, the book challenges our understanding of biomedicine as solely domineering or interactive.

Neurology in Africa William P. Howlett. 2015-08-20 This practical, comprehensive and highly illustrated book will be invaluable to students and doctors of neurology and internal medicine in Africa.

The Oxford Handbook of Music and Medievalism Stephen C. Meyer, Kirsten Yri. 2020-03-02 The Oxford Handbook of Music and Medievalism provides a snapshot of the diverse ways in which medievalism--the retrospective immersion in the images, sounds, narratives, and ideologies of the European Middle Ages--powerfully transforms many of the varied musical traditions of the last two centuries. Thirty-three chapters from an international group of scholars explore topics ranging from the representation of the Middle Ages in nineteenth-century opera to medievalism in contemporary video game music, thereby connecting disparate musical forms across typical musicological boundaries of chronology and geography. While some chapters focus on key medievalist works such as Orff's *Carmina Burana* or Peter Jackson's *Lord of the Rings* films, others explore medievalism in the oeuvre of a single composer (e.g. Richard Wagner or Arvo Pärt) or musical group (e.g. Led Zeppelin). The topics of the individual chapters include both well-known works such as John Boorman's film *Excalibur* and also less familiar examples such as Eduard Lalo's *Le Roi d'Ys*. The authors of the chapters approach their material from a wide array of disciplinary perspectives, including historical musicology, popular music studies, music theory, and film studies, examining the intersections of medievalism with nationalism, romanticism, ideology, nature, feminism, or spiritualism. Taken together, the contents of the Handbook develop new critical insights that venture outside traditional methodological constraints and provide a capstone and point of departure for future scholarship on music and medievalism.

Early Detection and Intervention in Audiology Katijah Khoza-Shangase, Amisha Kanji. 2021-02-01 A textbook with case studies for audiologists and

speech pathologists to make recommendations for early detection and intervention of hearing impairments in the South African context Early hearing detection and intervention (EHDI) is the gold standard for any practicing audiologist, and for families of infants and children with hearing impairment. EHDI programs aim to identify, diagnose and provide intervention to children with hearing impairment from as early as six months old (as well as those at risk for hearing impairment) to ensure they develop and achieve to their potential. Yet EHDI remains a significant challenge for Africa, and various initiatives are in place to address this gap in transferring policy into practice within the southern African context. The diversity of factors in the southern African context presents unique challenges to teaching and research in this field, which has prompted this book project. The South African government's heightened focus on increasing access to health care which includes ongoing Early Childhood Development (ECD) programs, make this an opportune time for establishing and documenting evidence-based research for current undergraduate and postgraduate students. Early Detection and Intervention in Audiology: An African Perspective aims to address this opportunity. Grounded in an African context with detailed case studies, this book provides rich content that pays careful attention to contextual relevance and contextual responsiveness to both identification and intervention in hearing impairment. With diverse contributions from experts in local and international contexts, but always with an African perspective, this is textbook will be an invaluable resource for students, researchers and practitioners.

Divided Sisterhood Shula Marks.1994 Explores the establishment of nursing in South Africa as a profession for white, English-speaking ladies in the last third of the 19th century, the class and racial tensions that developed as first Afrikaner and then black women joined its ranks, and the way processes of professionalization further divided nurses, so that today it suffers from a major crisis of identity. The book claims that the history of the nursing profession provides a powerful metaphor for South African society, and examines the connection between the development of nursing and the development of apartheid.

Robot-Assisted Radical Prostatectomy John W. Davis.2016-09-07 This book addresses knowledge gaps in RARP in 3 key sections: 1) Step-by-step approach including multiple technique options and innovations, 2) Patient selection, safety, outcomes, and 3) Preparing the patient for surgery. The order is more based upon knowledge priority rather than a chronologic sequence in which part 3 would go first. Part two allows more summary and commentary on evidence and part three allows some creative content that is otherwise hard to find in one place—medical evaluations, imaging, clinical trials, patient education, etc. This textbook emphasizes content for the advanced skills surgeon in that multiple techniques are presented as well as state of the art evidence. The learning curve is addressed and the authors clarify how this text is useful for learners. The caveat is that they should be careful in patient selection and stick with what their mentors are showing them. With experience, they can then branch out into the many techniques presented here. Robot-Assisted Radical Prostatectomy: Beyond the Learning Curve will also have cross-over appeal for surgical assistants, physician assistants, nurses, and anyone else involved in the surgical care of prostate cancer.

A Faith-based Response to HIV in Southern Africa Joint United Nations Programme on HIV/AIDS..2006 While there is a general acknowledgement within the church itself that the Church was initially slow to respond to the magnitude of the problem of HIV and AIDS, during the recent past, as the effects of HIV and AIDS within the congregations and communities of the church have become progressively more evident, the Catholic Church has emerged as an increasingly central role-player in a range of initiatives to combat the pandemic. This publication describes the work of the 'Choose to Care' initiative and the way it has been successfully scaled-up through the diocesan and parish network so that programmes are formed by local needs but work with common guidelines and can draw on central support.

Tracing Hospital Boundaries .2020-04-06 Tracing Hospital Boundaries explores how the forces of integration and segregation shaped hospital communities and structures in theory and practice between the eleventh and twentieth centuries. The eleven chapters consider hospitals in Europe (particularly Southeast), North America and Africa.

Fees Must Fall Susan Booyesen.2016-10-01 This book explores the student discontent a year after the start of the 2015 South African #FeesMustFall revolt #FeesMustFall, the student revolt that began in October 2015, was an uprising against lack of access to, and financial exclusion from, higher education in South Africa. More broadly, it radically questioned the socio-political dispensation resulting from the 1994 social pact between big business, the ruling elite and the liberation movement. The 2015 revolt links to national and international youth struggles of the recent past and is informed by black consciousness politics and social movements of the international left. Yet, its objectives are more complex than those of earlier struggles. The student movement has challenged the hierarchical, top-down leadership system of university management and its 'double speak' of professing to act in workers' and students' interests yet entrenching a regressive system for control and governance. University managements, while on one level amenable to change, have also co-opted students into their ranks to create co-responsibility for the highly bureaucratized university financial aid that stands in the way of their social revolution. This book maps the contours of student discontent a year after the start of the #FeesMustFall revolt. Student voices dissect colonialism, improper compromises by the founders of democratic South Africa, feminism, worker rights and meaningful education. In-depth assessments by prominent scholars reflect on the complexities of student activism, its impact on national and university governance, and offer provocative analyses of the power of the revolt.

Herodotus - narrator, scientist, historian Ewen Bowie.2018-03-19 Recently the importance for Herodotus' work of contemporary medical and sophisticated thought and techniques of argument has been widely recognised, as long had been his dependence on and difference from earlier geographical and ethnographic writing. This volume focuses on the place of these interests in his investigatory techniques and sets them alongside his many narrative skills, from superficially traditional battle narrative and reworking of Greek or non-Greek traditions that border on myth to the structuring of narrative by highlighting the life of objects, and addresses such fundamental issues as how he chooses between competing explanations and how far he valued truth. The book tackles many of the basic issues that confront any attempt to understand Herodotus' work.

Both the nutritional support and decision making in oral route are described and the impact of dysphagia on carers and family when managing dysphagia.

Several chapters are dedicated to outlining the manifestation and consequences of dysphagia in specific populations, including persons with Parkinsons disease, dystonia, chronic obstructive pulmonary disease and mixed connective tissue disease.

Indigenous Social Security Systems in Southern and West Africa Ndangwa Noyoo, Emmanuel Boon. 2018-08-14 The desire exists within Governments to provide for those who are on the fringes of society. Therefore, indigenous approaches seem relevant in the redistribution of resources among citizens. This book is therefore not only essential, but also timely. Indigenous Social Security Systems in Southern and West Africa (ISSS) contributes to human service literature for Africa, Southern Africa and West Africa in particular. The richness of the book lies within the variety of contributions that encourage its origin. The book's value is extensive and captures many essential and current topics that have an appeal to academicians, policy-makers, analysts and practitioners in the field of social welfare and social security. Ultimately, the book serves as a pragmatic and expedient tool for human service practitioners and any enthusiast of social security systems.

Writing the Self Kerstin W. Shands, Giulia Grillo Mikrut, Dipti R. Pattanaik. 2015-09-24 Recent discussions of autobiographical writing have led to a new terminology (autographies, autre-biographies, nouvelle autobiographie, autofiction, faction, egolitterature, circonfession), and current approaches to autobiography and autofiction suggest that this literary field offers a renewal and even a revolution of life-writing. Exploring autobiographical expression from different perspectives, the thirty essays in this book were presented at an international conference held at Sodertorn University in 2014. As the essays in this anthology suggest, literary critics and authors alike are rethinking autobiographical writing and its definitions. Through the variety of papers, this anthology offers a thought-provoking overview of different approaches to autobiography and autofiction.

The Influence of Global Environmental Change on Infectious Disease Dynamics Institute of Medicine, Board on Global Health, Forum on Microbial Threats. 2014-09-03 The twentieth century witnessed an era of unprecedented, large-scale, anthropogenic changes to the natural environment. Understanding how environmental factors directly and indirectly affect the emergence and spread of infectious disease has assumed global importance for life on this planet. While the causal links between environmental change and disease emergence are complex, progress in understanding these links, as well as how their impacts may vary across space and time, will require transdisciplinary, transnational, collaborative research. This research may draw upon the expertise, tools, and approaches from a variety of disciplines. Such research may inform improvements in global readiness and capacity for surveillance, detection, and response to emerging microbial threats to plant, animal, and human health. The Influence of Global Environmental Change on Infectious Disease Dynamics is the summary of a workshop hosted by the Institute of Medicine Forum on Microbial Threats in September 2013 to explore the scientific and policy implications of the impacts of global environmental change on infectious disease emergence, establishment, and spread. This report examines the observed and potential influence of environmental factors, acting both individually and in synergy, on infectious disease dynamics. The report considers a range of approaches to improve global readiness and capacity for surveillance, detection, and response to emerging microbial threats to plant, animal, and human health in the face of ongoing global environmental change.

Immunopathology and Immunomodulation Krassimir Metodiev. 2015-11-18 This book is a continuation of the efforts of InTech to expand the scientific know-how in the field of immunopathology and bring valuable updated information to medical professionals and researchers. It consists of chapters related to various approaches to investigate the unique role of the immune system in response to different clinical disorders. The international team of authors is the bonus of the book, reflecting the rapid development of immunology and new achievements in medical science. We firmly hope that the book will be an excellent manual and guideline for people dealing with biology, microbiology, immunology, virology, pharmacology, general and dental medicine, and health care, from students and postdocs to high-level specialists and university professors.

Neurogenic Dysphagia Tobias Warnecke, Rainer Dziewas, Susan Langmore. 2021-03-05 This book is a clinical manual that covers the whole spectrum of swallowing and its disorders. It starts with physiology of swallowing, pathophysiology of disordered deglutition, diagnostic methods (clinical and instrumental) and ends with an in-depth's and up-to-date presentation of current treatment options. The clinically most relevant topics of dysphagia management on the stroke unit and the intensive care unit are dealt with in separate chapters. Also the closely intertwined issue of nutritional management is specifically addressed. Most importantly, the book covers all obligatory topics of the Flexible Endoscopic Evaluation of Swallowing (FEES)-curriculum, an educational initiative that started in Germany in 2014 and is currently being extended to other European and non-European countries. The book is richly illustrated and an online video section provides a number of typical patient cases. FEES is probably the most commonly chosen method for the objective assessment of swallowing and its disorders. It is used in stroke units, intensive care facilities, geriatric wards but also in rehabilitation clinics and within dedicated outpatient services. This book on neurogenic dysphagia therefore addresses a wide range of different medical disciplines, such as neurologists, geriatricians, intensive care physicians, rehabilitation physicians, gastroenterologists, otolaryngologists, phoniatrists and also speech-language pathologists.

The Ebola Epidemic in West Africa National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Global Health, Forum on Microbial Threats. 2016-12-30 The most recent Ebola epidemic that began in late 2013 alerted the entire world to the gaps in infectious disease emergency preparedness and response. The regional outbreak that progressed to a significant public health emergency of international concern (PHEIC) in a matter of months killed 11,310 and infected more than 28,616. While this outbreak bears some unique distinctions to past outbreaks, many characteristics remain the same and contributed to tragic loss of human life and unnecessary expenditure of capital: insufficient knowledge of the disease, its reservoirs, and its transmission; delayed prevention efforts and treatment; poor control of the disease in hospital settings; and inadequate community and international responses. Recognizing the opportunity to learn from the countless lessons of this epidemic, the National Academies of Sciences, Engineering, and Medicine convened a workshop in March 2015 to discuss the challenges to successful outbreak responses at the scientific, clinical, and global health levels. Workshop participants explored the epidemic from multiple perspectives, identified important questions about Ebola that remained unanswered, and sought to apply this understanding to the broad challenges posed by Ebola and other emerging pathogens, to prevent the international community from being taken by surprise once again in the face of these threats. This publication summarizes the presentations and discussions from the workshop.
