Rebels, Scholars, Explorers Annalisa Berta, Susan Turner.2020-10-27 Unearthing the amazing hidden stories of women who changed paleontology forever. For centuries, women have played key roles in defining and developing the field of vertebrate paleontology. Yet very little is known about these important paleontologists, and the true impacts of their contributions have remained obscure. In *Rebels, Scholars, Explorers*, Annalisa Berta and Susan Turner celebrate the history of women bone hunters, delving into their fascinating lives and work. At the same time, they explore how the discipline has shaped our understanding of the history of life on Earth. Berta and Turner begin by presenting readers with a review of the emergence of vertebrate paleontology as a science, emphasizing the contributions of women to research topics and employment. This is followed by brief biographical sketches and explanations of early discoveries by women around the world over the past 200 years, including those who held roles as researchers, educators, curators, artists, and preparators. Forging new territory, Berta and Turner highlight the barriers and challenges faced by women paleontologists, describing how some managed to overcome those obstacles in

order to build careers in the field. Finally, drawing on interviews with a diverse group of contemporary paleontologists, who share their experiences and offer recommendations to aspiring fossil hunters, they provide perspectives on what work still needs to be done in order to ensure that women's contributions to the field are encouraged and celebrated. Uncovering and relating lost stories about the pivotal contributions of women in vertebrate paleontology doesn't just make for enthralling storytelling, but also helps ensure a richer and more diverse future for this vibrant field. Illuminating the discoveries, collections, and studies of fossil vertebrates conducted by women in vertebrate paleontology, *Rebels, Scholars, Explorers* will be on every paleontologist's most-wanted list and should find a broader audience in the burgeoning sector of readers from all backgrounds eager to learn about women in the sciences.

It may also be used as an adjunct to study of the European Age of Exploration in world history courses for upper elementary and middle school grades. It can be used as a supplement to or substitute for the textbook chapter which discusses America's origins in the Old World. It provides background for the period in which Europe reached out across the globe for the first time. This treatment attempts to go beyond the heroism and adventure stories about the Age of Exploration. Most textbook treatments of the period utterly fail to place Europe in the context of its cultural and technological development relative to other civilizations. This unit shows how the Islamic lands formed a hinge between East and West. It

investigates the major motivations and development of the technological means for exploration. It goes beyond the stereotyped image of conflict between Christians and Muslims to explain the fruitful cultural exchange which occurred over the centuries. It demonstrates how the cosmopolitan character of the Islamic civilization united the Old World in interdependence, contributing to Europe's later technological, scientific, cultural and economic achievements. Finally, the unit shows how all technological and historic advances in human civilization are cumulative efforts to which many peoples have made important contributions.
