Studies in Archaeological Conservation Chris Caple, Vicky Garlick. 2020-12-14 Studies in Archaeological Conservation features a range of case studies that explore the techniques and approaches used in current conservation practice around the world and, taken together, provide a picture of present practice in some of the world-leading museums and heritage organisations. Archaeological excavations produce thousands of corroded and degraded fragments of metal, ceramic, and organic material that are transformed by archaeological conservators into the beautiful and informative objects that fill the cases of museums. The knowledge and expertise required to undertake this transformation is demonstrated within this book in a series of 26 fascinating case studies in archaeological conservation and artefact investigation, undertaken in laboratories around the world. These case studies are contextualised by a detailed introductory chapter, which explores the challenges presented by researching and conserving archaeological artefacts and details how the case studies illustrate the current state of the subject. Studies in Archaeological Conservation is the first book for over a quarter of a century to show the range and diversity of archaeological conservation, in this case through a series of case studies. As a result, the book will be of great interest to practising conservators, conservation students, and archaeologists around the world.

A History of Reading in the West Guglielmo Cavallo, Roger Chartier. 1999 Literature has not always been written in the same ways, nor has it been received or read in the same ways over the course of Western civilization. Cavallo (Greek palaeography, U. of Rome La Sapienza), Chartier (Ecole des Hautes Etudes en Sciences Sociales, Paris) and a number of other international contributors, address themes that highlight the transformation of reading methods and materials over the ages, such as the way texts in the Middle Ages were often written with the voice in mind, as they would have been read aloud, or even sung. Articles explore the innovations in the physical evolution of the book, as well as the growth and development of a broad-based reading public.

Foucault and Education Stephen J. Ball. 2013-05-13 First published in 1990, this book was the first to explore Foucault's work in relation to education, arguing that schools, like prisons and asylums, are institutions of moral and social regulation, complex technologies of disciplinary control where power and knowledge are crucial. Original and challenging, the essays assess the relevance of Foucault's work to educational practice, and show how the application of Foucauldian analysis to education enables us to see the politics of educational reform in a new light.

Another School is Possible Terry Wrigley. 2006 Capitalism has always had a problem with education. It needs workers who are clever enough to be profitable but not wise enough to know what's really going on. Our children are being tested to destruction. Our schools are driven by league tables, competition and subject to increasing privatisation. Wrigley mounts a call to arms for a radical, democratic education that will appeal to teachers, parents and everyone inspired by the idea that another education is possible.

The Work of Art Anthea Callen. 2015-02-15 In *The Work of Art*, Anthea Callen analyzes the self-portraits, portraits of fellow artists, photographs, prints, and studio images of prominent nineteenth-century French Impressionist painters, exploring the emergence of modern artistic identity and its relation to the idea of creative work. Landscape painting in general, she argues, and the "plein air" oil sketch in particular were the key drivers of change in artistic practice in the nineteenth century—leading to the Impressionist revolution. Putting the work of artists from Courbet and Cézanne to Pissarro under a microscope, Callen examines modes of self-representation and painting methods, paying particular attention to the painters' touch and mark-making. Using innovative methods of analysis, she provides new and intriguing ways of understanding material practice within its historical moment and the cultural meanings it generates. Richly illustrated with 180 color and black-and-white images, *The Work of Art* offers fresh insights into the development of avant-garde French painting and the concept of the modern artist.

High Voltage Karen Marie Moning. 2018-07-24 NEW YORK TIMES BESTSELLER • Immortal Faerie and ancient feuds, secrets and sacrifices—a thrilling new chapter in the bestselling Fever series begins, featuring Dani, Ryodan, and other beloved characters, as they battle to save Dublin from the rising of a terrifying evil determined to enslave the human race. There is no action without consequence. Dani O'Malley was nine years old when the delusional, sadistic Rowena transformed her into a ruthless killer. Years later, Dani is tough and hardened, yet achingly vulnerable and fiercely compassionate, living alone by her own exacting code. Despite the scars on her body, and driven by deeper ones carved into her soul, no one is more committed to protecting Dublin. By day she ensures the safety of those she rescues, by night she hunts evil, dispensing justice swiftly and without mercy, determined to give to those she cares for the peace she has never known. There is no power without price. When the Faerie Queen used the dangerously powerful Song of Making to heal the world from the damage done by the Hoar Frost King, catastrophic magic seeped deep into the earth, giving rise to horrifying, unforeseen consequences—and now deadly enemies plot in the darkness, preparing to enslave the human race and unleash an ancient reign of Hell on Earth. There is no future without sacrifice. With the lethal, immortal Ryodan at her side, armed with the epic Sword of Light, Dani once again battles to save the world, but her past comes back to haunt her with a vengeance, demanding an unspeakable price for the power she needs to save the human race. And no one—not even Ryodan, who would move the very stars for her—can save her this time. Praise for High Voltage “A romance wrapped up in a thrilling sci-fi novel—what more could you want?”—PopSugar “If you’ve never read a Karen Marie Moning book before, you’re missing out. Her heroines alone are worth the read. . . . Despite being set in a dystopian world filled with magic and fae, the obstacles that these characters go through are very much humanlike. . . . Cannot wait to see where [she] takes this series next.”—Under the Covers

The Amsterdam School Maristella Casciato.1996 The first years of this century witnessed the birth in Amsterdam of a movement which with its sculptural opulence of form would alter dramatically the appearance of that city. Under the leadership of architects like Wijdeveld, Kramer and De Klerk there evolved an expressionist visual language which under the name of Amsterdam School would create a stir on an international scale. Here, aided by almost 500 illustrations, is a comprehensive survey of many designs produced by the Amsterdam School, including such masterpieces as Van der Mey's Scheepvaarthuis, Berlage's plan for Amsterdam South, Kramer's bridges and De Klerk's De Dageraad and Eigen Haard housing estates. The work also deals with the carvings of Hildo Krop, street furniture, furniture designs and domestic interiors. The extensive bibliography and biographies of the most important architects make this an indispensable work of reference.--

Popular Music Fandom Mark Duffett.2013-11-07 This book explores popular music fandom from a cultural studies perspective that incorporates popular music studies, audience research, and media fandom. The essays draw together recent work on fandom in popular music studies and begin a dialogue with the wider field of media fan research, raising questions about how popular music fandom can be understood as a cultural phenomenon and how much it has changed in light of recent developments. Exploring the topic in this way broaches questions on how to define, theorize, and empirically research popular music fan culture, and how music fandom relates to other roles, practices, and forms of social identity. Fandom itself has been brought center stage by the rise of the internet and an industrial structure aiming to incorporate, systematize, and legitimate dimensions of it as an emotionally-engaged form of consumerism. Once perceived as the pariah practice of an overly attached audience, media fandom has become a standardized industrial subject-position called upon to sell box sets, concert tickets, new television series, and special editions. Meanwhile, recent scholarship has escaped the legacy of interpretations that framed fans as passive, pathological, or defiantly empowered, taking its object seriously as a complex formation of identities, roles, and practices. While popular music studies has examined some forms of identity and audience practice, such as the way that people use music in daily life and listener participation in subcultures, scenes and, tribes, this volume is the first to examine music fans as a specific object of study.

Las multitudes argentinas José María Ramos Mejía.2019-04-01 Las multitudes argentinas (1899), de José María Ramos Mejía, es un estudio de psicología colectiva influido por *Psychologie des foules*, de Le Bon. A partir de un sociologismo evolucionista, Ramos analiza la dimensión social y política de la inmigración masiva y la gobernabilidad de las masas, y aplica los preceptos positivistas a la historia social. Las obras de Ramos Mejía (Argentina, 1842-1914), Juan Agustín García (Argentina, 1862-1923) y Jorge Basadre (Perú, 1903-1980) abrieron el camino hacia una nueva historia

de Hispanoamérica, hacia una historia social. Tienen las virtudes y los defectos de toda obra fundacional: imprecisión terminológica, manejo de conceptos determinados por las corrientes de la época. Los historiadores que no las tuvieron en cuenta pasaron por alto una riqueza que a ellos mismos les hubiera correspondido rectificar, acrecentar y perfilar. Esa omisión es aún recuperable. Pero la recuperación solo es posible cuando se tenga una visión transparente de nuestro pasado cultural y de nuestra historia, es decir, una visión que no solo censure y que cuando lo haga no confunda la censura con la condena; una visión que no crea que la generosidad en la apreciación de una obra del pasado es necesariamente apología o ignorancia de la última moda. Las creaciones literarias y científicas son inevitablemente efímeras, pero el reconocimiento de la fugacidad no puede inducir a creer que lo que es pasado para una o dos generaciones carece de suscitaciones para las generaciones posteriores, de las que se supone que tienen una perspectiva más amplia. Can We Live Together? Alain Touraine, David Macey. 2000 In this book, a leading French social thinker grapples with the gap between the tendency toward globalization of economic relations and mass culture and the increasingly sectarian nature of our social identities as members of ethnic, religious, or national groups. Though at first glance, it might seem as if the answer to the question "Can we live together?" is that we already do live together—watching the same television programs, buying the same clothes, and even using the same language to communicate from one country to another—the author argues that in important ways, we are farther than ever from belonging to the same society or the same culture. Our small societies are not gradually merging into one vast global society; instead, the simultaneously political, territorial, and cultural entities that we once called societies or countries are breaking up before our eyes in the wake of ethnic, political, and religious conflict. The result is that we live together only to the extent that we make the same gestures and use the same objects—we do not communicate with one another in a meaningful way or govern ourselves together. What power can now reconcile a transnational economy with the disturbing reality of introverted communities? The author argues against the idea that all we can do is agree on some social rules of mutual tolerance and respect for personal freedom, and forgo the attempt to forge deeper bonds. He argues instead that we can use a focus on the personal life-project—the construction of an active self or "subject"—ultimately to form meaningful social and political institutions. The book concludes by exploring how social institutions might be retooled to safeguard the development of the personal subject and communication between subjects, and by sketching out what these new social institutions might look like in terms of social relations, politics, and education.
