Zen Without a Master Frenk Meeuwssen.2023-03-28 For Frenk Meeuwssen, a drawing is like a Zen garden: wavy lines on snow-white paper. In those lines, he searches for the essence of Japan, for truth, and for himself. His book *Zen Without a Master* is visual philosophy. How does the sound of one clapping hand sound? This famous riddle from Zen philosophy is simply solved by Meeuwssen: it 'sounds' like applause in sign language for the deaf. Of course he makes a drawing of it, but this solution is also characteristic of his approach to spirituality, because it makes you laugh. With Dutch common sense, he tackles Japanese Buddhism, and thus comes to surprising discoveries.-Joost Polmann

Social Capital and Information Technology Marleen Huysman,Volker Wulf.2004 A multidisciplinary examination of the interplay between social capital--the value derived from social ties--and information technology. The concept of social capital, or the value that can be derived from social ties created by goodwill, mutual support, shared language, common beliefs, and a sense of mutual obligation, has been applied to a number of fields, from sociology to management. It is only lately, however, that researchers in information technology and knowledge management have begun to explore the idea of social capital in relation to their fields. This collection of thirteen essays by computer scientists, sociologists, communication specialists, economists, and others presents a multidisciplinary look at this particular intersection of information technology and social science and the need to adopt a sociotechnical perspective.For the most part the contributors take a positive view of the interplay of social capital, knowledge sharing, and community building. Some essays look at specific instances, including the on-line and face-to-face relationships of a community of athletes, the building of social capital among Iranian NGOs, and the Internet-based communities created by the open-source movement, while others discuss more general ideas of civic and personal communities. The last four essays examine computer applications that augment social capital, including topic- and member-centered communications spaces such as the Expert Finder and the Loops system and virtual repositories of knowledge such as the Answer Garden and Pearls of Wisdom.

The Palgrave Handbook of Masculinity and Political Culture in Europe Christopher Fletcher, Sean Brady, Rachel E. Moss, Lucy Riall.2018-02-02 This handbook aims to challenge 'gender blindness' in the historical study of high politics, power, authority and government, by bringing together a group of scholars at the forefront of current historical research into the relationship between masculinity and political power. Until very recently in historical terms, formal political authority in Europe was normally and ideally held by adult males, with female power being perceived as a recurrent aberration. Yet paradoxically the study of the interactions between masculinity and political culture is still very much in its infancy. This volume seeks to remedy this lacuna by considering the different consequences of the masculinity of power over two millennia of European history. It examines how masculinity and political culture have interacted from ancient Rome and the early medieval Byzantine empire, to twentieth-century Germany and Italy. It considers a broad variety of case studies from early medieval Iceland and late medieval France, to Naples at the time of the French Revolution and Strasbourg after the Franco-Prussian War, with a particular focus on the development of political masculinities in Great Britain between the sixteenth century and the present day.
