The different aspects of islamic culture UNESCO.1998-12-31 This volume, the first of six to be published, studies fundamental values of Islam, along with the nature of rights and the

responsibilities in a general context. The authors analyse the development of social thought and morality in Islam, and ways in which they are enforced through the family and education. Issues of poverty and wealth, inequality and demands for political expression, and respect for diversity in a difficult world of conformity are dealt with in this series. The study is organized along thematic rather than chronological lines and thus it is not necessary to read the volumes in order. Volume II is in fact the first to have been published. Volume IV is forthcoming end 2002, volume V mid 2003 and volumes III and VI in 2004. The Prophet's Night Journey and Heavenly Ascent Sayyid Muhammad Alawi Al-Maliki.2020-02-15 Shaykh Muhammad 'Alawi al-Maliki delivers an absorbing account of the Isra' wal-Mi'raj that brings the reader almost into the story. Indeed it is a detailed narrative spiced with a simple commentary that attempts to reconcile various accounts or reports of the event that transpired. This provides a comprehensive reading that takes the reader on an experiential ride to feel the magic of Rasulullah's journey. In short, it is very inspiring; exhilarating to the spiritual core.

Praise be to Allah Who chose His praiseworthy servant Muhammad (saw) for the Message, distinguished him with the night journey on the lightening-mount Buraq, and caused him to ascend the ladders of perfection to the high heavens to show him of the greatest signs of his Lord. He raised him until he reached the Lote-tree of the Farthest Boundary where ends the science of every Messenger-Prophet and every Angel Brought Near, where lies the Garden of Retreat, to the point that he heard the sound of the pens that write what has befallen and what is to befall.

Scribal Culture and the Making of the Hebrew Bible Karel van der Toorn. 2009-04-15 We think of the Hebrew Bible as the Book--and yet it was produced by a largely nonliterate culture in which writing, editing, copying, interpretation, and public reading were the work of a professional elite. The scribes of ancient Israel are indeed the main figures behind the Hebrew Bible, and in this book Karel van der Toorn tells their story for the first time. His book considers the Bible in very specific historical terms, as the output of the scribal workshop of the Second Temple active in the period 500-200 BCE. Drawing comparisons with the scribal practices of ancient Egypt and Mesopotamia,

van der Toorn clearly details the methods, the assumptions, and the material means of production that gave rise to biblical texts; then he brings his observations to bear on two important texts, Deuteronomy and Jeremiah. Traditionally seen as the copycats of antiquity, the scribes emerge here as the literate elite who held the key to the production as well as the transmission of texts. Van der Toorn's account of scribal culture opens a new perspective on the origins of the Hebrew Bible, revealing how the individual books of the Bible and the authors associated with them were products of the social and intellectual world of the scribes. By taking us inside that world, this book yields a new and arresting appreciation of the Hebrew Scriptures.

Missional Leadership Nelus Niemandt.2019-12-12 The purpose and aim of this book is to develop an appropriate leadership model for missional churches. This implies a positioning of this book within the broader theology of mission and a consensus on the theology of the Missio Dei,

originating at the 1952 conference of the International Missionary Council in Willingen, Germany. In this approach to the theology of mission, mission is understood as the work of the Trinitarian God, and the church is privileged to participate in God's mission. It is against this background that the growing consensus on missional ecclesiology challenges leadership models developed for a different time and a different kind of church (with less or no emphasis on the missional character of the church). The aim is to reflect theologically on the role of leadership in the missional church. What kind of ideas about power, authority and leadership are appropriate for a missional church? New missional challenges demand new ideas about missional leadership. Church organisation and leadership reflects a theological position – there is a strong relation between ecclesiology and church organisation. The nature of the church provides the framework to understand the character of the church. What the church is determines what the church does. The church organises what it does and agrees on rules that regulate ministries and organisation. Issues such as the way the church organises and governs what it does, and thus church leadership, need to be answered against this background and understanding. Church polity and organisation, as well as leadership, must reflect the identity, calling, life and order of the church. This book, therefore, addresses life in the Trinity, participation in the *Missio Dei* and contours of the missional church as the point of entry to develop leadership insights. It contributes towards the development of an appropriate model of leadership for missional churches, because although recent developments in the theology of mission comprehensively addressed the area of missional ecclesiology, there is a gap in the development of a leadership model based on the concept of authority in the missional church.

Personal Narrative of a Pilgrimage to Al-Madinah & Meccah Sir Richard Francis Burton.1893
A Commentary on Daniel Homer Hailey.2023-11 In an era of runaway speculation on the subject of Bible prophecy, this volume fills an urgent need - a commentary on the Book of Revelation that is both fascinating and sensible. With its whirl of mysterious signs, symbols, and visions, the Book of Revelation inevitably gives rise to a variety of interpretations. The author combines aspects of these views-futurist, continuous historical, philosophy of history, preterist, and historical background-but favors the latter. The Book has a concrete setting in a definite period of history and deals with very real problems faced by Christians of the period. Symbols indicate powerful moral and spiritual forces involved in a violent clash in which the forces of God are ultimately triumphant. The Saints of that day found encouragement and gained the crown of victory. But the message continues to instruct and encourage God's people today. It reveals the principles of victory through righteousness and truth and the ultimate failure of all that is false. Some of the prophecies are yet to be fulfilled, such as the passing of the current order, the resurrection, the judgment, and the final reward and punishment of the righteous and the wicked. Consequently, some futurist aspects of the book are to be recognized. The first section discusses the title, author, place of writing, symbolism, date, interpretations, theme and purpose of Revelation. The second section on the Roman Empire

provides the historical background for the birth and early years of Christianity. The main section of the book offers a complete, passage-by-passage commentary. Although firmly anchored in sound scholarship, it is not heavily footnoted, giving it the broadest possible appeal to serious students of God's Word.

Managing Conflict in Organizations M. Afzalur Rahim.2017-07-12 After much debate by business professionals, organizational conflict is now considered normal and legitimate; it may even be a positive indicator of effective organizational management. Within certain limits, conflict can be essential to productivity. This book contributes to the investigation of organizational conflict by

analyzing its origins, forms, benefits, and consequences. Conflict has benefits: it may lead to solutions to problems, creativity, and innovation. In contrast, little or no conflict in organizations may lead to stagnation, poor decisions, and ineffectiveness. *Managing Conflict in Organizations* is a vigorous analysis of the rational application of conflict theory in organizations. Conflict is inevitable among humans. It is a natural outcome of human interaction that begins when two or more social entities engage one another while striving to attain their own objectives. Relationships among people or organizations become incompatible or inconsistent when two or more of them desire a similar resource that is in short supply; when they do not share behavioral preferences regarding their joint action; or when they have different attitudes, values, beliefs, and skills. This book examines these root causes of organizational conflict and offers constructive perspectives on its consequences.

Celebrating the Birthday of the Prophet Is a Bid'ah Abu Ammaar Saeed Ahmed.2014-01-04 Abu

Ammaar saeed Ahmed Celebrating the Birthday of the Prophet is a Bid'ah, proved by history and authentic sources. Whatever form it takes and whatever the intentions of those who do this are, there is no doubt whatsoever that it is an invented, Haram innovation which was introduced by the Shia Fatimids after the three best centuries of Islam, in order to corrupt the religion of the Muslims. The next person to do this after them and re-introduce it was King Al-Mudhaffar Abu Saeed Kawkaboori, the king of Irbil, at the end of the sixth century or the beginning of the seventh century AH, as was mentioned by the historians such as Ibn Khalkaan, may Allaah have mercy upon him, and others. Introductory Grammar of Amharic Wolf Leslau. 2000 This book closes the gap for beginners who want to study the Amharic language and had difficulties in finding the right grammar for this purpose: The first grammar of Amharic, the national language of Ethiopia, was published by Hiob Ludolf in 1698. The Amharic grammar published by Praetorius in 1879 is based on Amharic religious texts and on scattered material, usually composed by missionaries. A milestone in the study of Amharic is Marcel Cohen's *Traite de langue amharique* (1936), but this grammar, too is not completely suited for beginners since the author's generalizations are at times aimed at linguists. The grammar that comes closest to the concept of a beginner's grammar is that of C.H. Dawkin (1960), yet this grammar is extremely short, does not give examples and does not introduce the student to the intricacies of the language. The new book gives all the grammatical forms and the sentences of the present grammar in Amharic script and in phonetic transcription. The illustrative examples have a free and a literal translation. This procedure should likewise prove to be useful for the Semitist as well as for the general linguist.

Calvin's Commentaries Jean Calvin. 1996

Commentaries on the Four Last Books of Moses, Arranged in the Form of a Harmony Jean Calvin.1852

The Digital Humanist Domenico Fiormonte, Teresa Numerico, Francesca Tomasi.2015 This book offers a critical introduction to the core technologies underlying the Internet from a humanistic perspective. It provides a cultural critique of computing technologies, by exploring the history of computing and examining issues related to writing, representing, archiving and searching. The book raises awareness of, and calls for, the digital humanities to address the challenges posed by the linguistic and cultural divides in computing, the clash between communication and control, and the biases inherent in networked technologies. A common problem with publications in the Digital Humanities is the dominance of the Anglo-American perspective. While seeking to take a broader view, the book attempts to show how cultural bias can become an obstacle to innovation both in the methodology and practice of the Digital Humanities. Its central point is that no technological instrument is culturally unbiased, and that all too often the geography that underlies technology coincides with the social and economic interests of its producers. The alternative proposed in the book is one of a world in which variation, contamination and decentralization are essential instruments for the production and transmission of digital knowledge. It is thus necessary not only to have spaces where DH scholars can interact (such as international conferences, THATCamps, forums and mailing lists), but also a genuine sharing of technological know-how and experience. This is a truly exceptional work on the subject of the digital....Students and scholars new to the field of digital humanities will find in this book a gentle introduction to the field, which I cannot but think would be good and perhaps even inspirational for them....Its history of the development of machines and programs and communities bent on using computers to advance science and research merely

sets the stage for an insightful analysis of the role of the digital in the way both scholars and everyday people communicate and conceive of themselves and others in written forms - from treatises to credit card transactions. Peter Shillingsburg *The Digital Humanist* is not simply a translation of the Italian book *L'umanista digitale* (il Mulino 2010), but a new version tailored to an international audience through the improvement and expansion of the sections on social, cultural and ethical problems of the most widely used methodologies, resources and applications. Adaptation in the Age of Media Convergence Johannes Fehrle,Werner Schäfke-Zell.2019-09-06 This collection considers new phenomena emerging in a convergence environment from the perspective of adaptation studies. Giving an overview of the various fields and practices most prominent in convergence culture and viewing them as adaptations in a broad intertextual and intermedial sense, the contributions offer reconsiderations of theoretical concepts and practices in participatory and

convergence culture. These range from fan fiction born from mash-ups of novels and YouTube songs to negotiations of authorial control and interpretative authority between media producers and fan communities to perspectives on the fictional and legal framework of brands and franchises. In this fashion, the collection expands the horizons of both adaptation and transmedia studies and provides reassessments of frequently discussed (BBC's Sherlock or the LEGO franchise) and previously largely ignored phenomena (self-censorship in transnational franchises, mash-up novels, or YouTube cover videos).
