Seismic Resistant Structures S. Ivorra,C. A. Brebbia.2018-03-28 Research studies on the preparation for and mitigation of future earthquakes, an area of increasing importance to many countries around the world, comprise this volume. The selected papers included in this book have been prepared by experts from around the world in the fields of earthquake engineering relevant to the design of structures. As the world's population has concentrated in urban areas resulting in buildings in regions of high seismic vulnerability, we have seen the consequences of natural disasters take an ever higher toll on human existence. Protecting the built environment in earthquake-prone regions involves not only the optimal design and construction of new facilities, but also the upgrading and rehabilitation of existing structures including heritage buildings, which is an important area of research. Major earthquakes and associated effects, such as tsunamis, continue to stress the need to carry out more research and a better understanding of these phenomena is required to design earthquake resistant buildings and to carry out risk assessment and vulnerability studies.

Safety Planning with Battered Women Jill M. Davies,Eleanor Lyon,Diane Monti-Catania.1998 Safety Planning with Battered Women introduces a new model of "woman-defined" advocacy that is designed to bridge the gap that sometimes occurs between a battered woman's perspective and a victim advocate's perception. Created to improve service delivery to women who are victims of domestic violence, this new model emphasizes placing attention on the victim's assessment of the risk in a violent relationship and in her decision making. Authors Jill Davies, Eleanor Lyon, and Diane Monti-Catania strive to help advocates better understand battered women's decisions, including the decision to remain in an abusive relationship; to improve advocacy for victims with varying cultural backgrounds and experiences; and to provide advocates with assistance in redesigning their services, so they may better meet the needs of battered women. Since there are no quick fixes to the problems encountered in cases of domestic violence, it is vital that victims be provided with a real understanding of their options and the opportunity to implement those safety plans they deem most feasible. Safety Planning with Battered Women helps advocates tailor

alternatives that will enhance the safety of battered women based on the individual realities of battered women. This book is both enlightening and highly practical and is a must read for anyone working with domestic violence victims. By introducing a woman-defined model and offering a new approach to advocacy, *Safety Planning with Battered Women* will compel readers to reexamine current approaches and examine the future provision of services to domestic violence victims, making it a valuable resource for students, researchers, academics, professionals, and practitioners. *Science Abstracts* .1995

Freedom and Tenure in the Academy William W. Van Alstyne.1993 Van Alstyne presents an unhurried historical review of the extent to which academic freedom has been accepted into domestic constitutional law. Two essays deal with the issue of tenure and academic freedom. Ralph S. Brown and Jordan E. Kurland agree that tenure reinforces academic freedom but wonder if there is not a large price to be paid for such a system. In a highly instructive review Matthew Finkin looks at academic tenure and freedom in the light of labor law. Focusing on freedom of artistic expression, Robert O'Neil raises difficult questions about what kinds of art displays taxpayers can be expected to tolerate in the colleges and universities they support. Rodney A. Smolla looks at the ways in which hate speech and offensive expression on campuses engage wide First Amendment jurisprudence. Judith Jarvis Thomson examines the vexed issue of selecting - and valuing - individual faculty members or disciplines with regard to ideology. Michael W.

The 71F Advantage National Defense University Press.2010-09-01 Includes a foreword by Major General David A. Rubenstein. From the editor: 71F, or 71 Foxtrot, is the AOC (area of concentration) code assigned by the U.S. Army to the specialty of Research Psychology. Qualifying as an Army research psychologist requires, first of all, a Ph.D. from a research (not clinical) intensive graduate psychology program. Due to their advanced education, research psychologists receive a direct commission as Army officers in the Medical Service Corps at the rank of captain. In terms of numbers, the 71F AOC is a small one, with only 25 to 30 officers serving in any given year. However, the 71F impact is much bigger than this small cadre suggests. Army research psychologists apply their extensive training and expertise in the science of psychology and social behavior toward understanding, preserving, and enhancing the health, well being, morale, and performance of Soldiers and military families. As is clear throughout the pages of this book, they do this in many ways and in many areas, but always with a scientific approach. This is the 71F advantage: applying the science of psychology to understand the human dimension, and developing programs, policies, and products to benefit the person in military operations. This book grew out of the April 2008 biennial conference of U.S. Army Research Psychologists, held in Bethesda, Maryland. This meeting was to be my last as Consultant to the Surgeon General for Research Psychology, and I thought it would be a good idea to publish proceedings, which had not been done before. As Consultant, I'd often wished for such a document to help explain to people what it is that Army Research Psychologists do for a living. In addition to our core group of 71Fs, at the Bethesda 2008 meeting we had several brand-new members, and a number of distinguished retirees, the grey-beards of the 71F clan. Together with longtime 71F colleagues Ross Pastel and Mark Vaitkus, I also saw an unusual opportunity to capture some of the history of the Army Research Psychology specialty while providing a representative sample of current 71F research and activities. It seemed to us especially important to do this at a time when the operational demands on the Army and the total force were reaching unprecedented levels, with no sign of easing, and with the Army in turn relying more heavily on research psychology to inform its programs for protecting the health, well being, and performance of Soldiers and their families.
