Gerontology Nursing Case Studies, Second Edition Dr. Donna J.

Bowles, MSN, EdD, RN, CNE.2015-04-08 Praise for the first edition: "This is an excellent teaching guide and resource manual for instructors, gerontological nursing students, and practicing nurses and social workers who wish to learn more about geriatric concerns and care. It will be kept by nursing students long after

they graduate as a guide to resources that will be valuable throughout their nursing careers. As a home care nurse working mainly with the geriatric community, I found the resources helpful in my practice. As an instructor, I found the book to be a very useful guide for teaching geriatrics.” Score: 90, 4 Stars —Doody’s Medical Reviews “[This] is a unique volume that effectively addresses the lack of gerontology case studies for use with undergraduate nursing students. Case studies are a pedagogically powerful approach to active learning that offer opportunities to apply content to clinical practice.” —The Gerontologist “The case narrative approach of this book promotes active learning that is more meaningful to students (and practicing nurses) and more likely to increase the transfer of evidence into practice. An excellent resource for faculty (staff educators) to facilitate critical learning skills.” —Liz Capezuti, PhD, RN, FAAN Dr. John W. Rowe Professor in Successful Aging Co-Director, Hartford Institute for Geriatric Nursing New York University College of Nursing Vivid case examples help guide nurses in developing appropriate interventions that include complementary and alternative health therapies and provide a basis for evaluating outcomes. Exercises interspersed throughout each case study include numerous open-ended and multiple-choice questions to facilitate learning and critical thinking. The text is unique in that some of the presented cases focus on psychosocial issues such as gambling addiction, hoarding behavior, emergency preparedness, and long-distance caregiving. Cases also depict geriatric clients who are living healthy, productive lives to counter myths and negative attitudes about older adults. Scenarios demonstrating ethical dilemmas prepare students to appropriately respond to “gray area” situations. The text is geared for AACN and NLN accreditation and is organized according to the needs of actual clinical settings. With cases that take place in the home and community or within primary, acute, and long-term care facilities, this book will be useful for courses

Case Studies in Geriatric Medicine Judith C.

Ahronheim.2005-07-07 This case-based approach to geriatric medicine is suitable for all health professionals and trainees who provide care for the elderly, including interns, residents, geriatric fellows, physicians in practice, and nurse practitioners. Illustrated with more than 40 cases based on the authors' experience in clinical practice, the examples range from the healthy elderly to those with advanced cognitive or physical impairments.

Discussions are evidence-based with extensive references, emphasizing differential diagnosis, atypical presentations in late life, age-appropriate medical management, interdisciplinary methods and care in the context of different health care settings. The authors have distilled a wealth of practical and clinical experience in this area to produce a user-friendly guide to geriatric medicine. This is the ideal study guide for certifying examinations and highly suitable as a textbook for courses in geriatric medicine and gerontology.

Geriatric Emergencies Lee A. Lindquist,Scott M.

Dresden.2019-05-15 Care for older adults in Emergency Departments (EDs) has historically been focused on acute medical conditions with little emphasis on geriatric-specific issues. In 2010, emergency departments (EDs) throughout the nation saw almost 130 million patients, 15% of whom were 65 or older. The number of older adults who visit an ED has doubled in the last decade and continues to grow rapidly. Older adults receiving care in an ED are highly likely to be admitted to the hospital, much more so than their younger counterparts. Preventing a hospital admission saves older adults from frequently encountered adverse events, including hospital-acquired delirium, functional status impairment, cognitive loss, and nursing home admission. It is unknown how many older adults are hospitalized for reasons other than acute medical illness, such as functional decline, polypharmacy, progressive dementia, caregiver stress, or unstable living situation. These non-emergent conditions are rarely addressed during a typical ED visit due to lack of resources, significant patient volumes, and the need for rapid turnover of care spaces. The predominant management strategy of emergency physicians to handle these important but not imminently life-threatening geriatric issues is to recommend

hospital admission. Northwestern has pioneered the Geriatric Emergency Department through the creation of the Geriatric Emergency Department Innovation model (GEDI), with goals to prevent admissions for older adults by assessing and meeting their geriatric-specific, non-acute care needs in the ED. The GEDI model at Northwestern centers on a multi-disciplinary curriculum composed of clinical, didactic, and practical arms developed by emergency medicine and geriatrics educational experts. In this title, we will present case studies of older adults seen in the Emergency Department through the GEDI model and discuss means of identifying/screening for, diagnosing, and treating geriatric syndromes seen in the emergent care of the older adult patient. In addition, there will be a set of concise “take-home points” for each case study that will be easy to commit to memory and implement in clinical care of older adults. As the number of seniors seeking emergent care will continue to increase, the ED setting must become responsive to geriatric-specific needs. This book will provide a variety of models detailing how to offer comprehensive, state-of-the-art, optimal care for managing the full range of geriatric syndromes that regularly present in the emergent care setting.

Comprehensive Geriatric Assessment Alberto Pilotto, Finbarr C.

Martin. 2017-12-29 This book offers an up-to-date review on the principles and practice of multidimensional assessment and management of the older individual, which represents the cornerstone of modern clinical practice in the elderly. The early chapters cover the main elements and scope of the comprehensive geriatric approach and explain the pathways of care from screening and case finding through to in-depth assessment and treatment planning. Subsequent chapters review the evidence of how best to apply the multidimensional assessment and management approach in defined healthcare settings and within specific clinical areas, such as cancer and surgery. Finally, the education and training challenges are reviewed and the prospects for future clinical service and research in this important field are examined. The book is very timely given the recent advances in application of this approach, which reflect the growing international realization that older people are "core business" in many clinical areas where the role of specialist geriatric medicine has hitherto been limited. Accordingly, the book will be relevant to a wide range of clinicians. The authorship comprises many of the best known and widely published experts in their respective fields.

Thompson,John Grimley Evans.2016 Based around the core curriculum for specialist trainees and consultants, Oxford Case Histories in Geriatric Medicine is a valuable reference and teaching tool which provides an opportunity for case-based learning across a rapidly growing field. This book uses well-structured and concise cases from the Oxford hospitals to comprehensively cover the presentation, management, and treatment of illness in older people alongside relevant social and ethical issues. Each case comprises a brief clinical history with relevant examination findings and investigation results.

Associated questions on the differential diagnosis and aspects of management provide interactive learning material designed to enhance the reader's diagnostic ability and clinical understanding, along with detailed discussion and suggestions for further reading. Part of the Oxford Case Histories series, this book will be valuable reading for postgraduate trainees and consultants, and will be an essential resource for those preparing for exit examinations and revalidation. Challenges in Long-term Geriatric and Palliative Care

Jochanan E. Naschitz.2020 Practice guidelines for management of conditions prevalent in long-term geriatric care are based, by and large, on expert consensus and rarely on controlled studies.

Though enforced by tradition, some of the rules often applied in clinical practice fall short of scientific foundation. In lacking high-grade scientific evidence, geriatric practice might benefit from an 'evidence-balanced' approach. A step forward in this direction is by corroboration of observational data. In this book, we brought our share of observational data, input from our experience in geriatric care, to be merged with the profession's collective

Case-based Geriatrics: A Global Approach Victor A. Hirth, Darryl Wieland, Maureen Dever-Bumba. 2010-12-31 A full-color case-based guide to the principles and clinical aspects of geriatric care Case-Based Geriatrics utilizes a case-and-evidence-based approach to help you understand the key principles and clinical points of geriatric medicine and healthcare. Written to reflect the field's growing trend toward interdisciplinary collaboration, the book is of value not only to physicians, but to the entire health team involved in the care of the elderly. This unique text is constructed around case presentations, which are used as the primary teaching tool. These cases reflect issues and principles of geriatrics that are encountered and practiced worldwide. You will learn how cultural characteristics of both patients and providers have added new layers of complications to this already challenging field - and how they can be recognized and overcome. Each case is directly linked to the learning objectives found in each chapter. Review questions appear at the beginning and end of each chapter to test your understanding. Case-Based Geriatrics is divided into three sections: Issues in Aging -- features foundational chapters covering essential topics such as biology of aging, worldwide demographics, the geriatric physical exam, sensory changes in aging, and approaches to laboratory testing and imaging in aging Inter-professional Geriatrics -- provides an overview of multi-professional team care and covers important topics such as pre -and-post operative care, discharge planning and transitional care, end-of-life care, home care, and long-term care Geriatric Syndromes and Important Issues -- covers common disorders such as delirium, dementia, depression, stroke, hypertension, osteoporosis, and more

Geriatric Psychiatry Review and Exam Preparation Guide Mark Rapoport, Andrew Wiens, Dallas Seitz, Evan Lilly. 2017-01-06

Geriatric psychiatry is a relatively young discipline within the field of North American psychiatry. The development of a workforce to meet the needs of an aging population has been identified as an urgent priority, but there is still much we don't know about fulfilling the mental health needs of older adults. For Mark J. Rapoport, geriatric psychiatrists must assess and treat patients today in face of the limitations of what we know, but also be armed with enthusiasm to create novel ways of impacting on the quality of life of older patients with mental illness. The chapters in this book include case scenarios, concise point-form summaries of diagnostic and treatment approaches, up-to-date

Home-Based Medical Care for Older Adults Jessica L.

Colburn, Bruce Leff, Jennifer Hayashi, Mattan

Schuchman. 2019-08-29 As the population of older adults in the U.S. continues to grow, medical house calls are increasingly part of a system of comprehensive home-based care for patients who have difficulty accessing office-based care. Clinicians who have been trained mostly in office and hospital settings must adapt their usual approaches to accommodate a wide range of environmental, social, and physical circumstances that impact home-limited patients. Ideally, a comprehensive team of clinicians proficient in multiple domains of functional, social, and medical care can work together to address potential gaps in any one clinician's expertise. Unfortunately, such teams are still rare. This book aims to equip individual clinicians with the interdisciplinary knowledge, skills, and perspective they need to provide the best care possible with limited formal interdisciplinary support. This book offers 20 patient cases drawn from the collective experience of experts in home-based medical care from highly respected academic and clinical programs across the United States. Each case demonstrates a scenario that is frequently encountered and/or very important in home-based medical care practice. Each

scenario frequently proves to be challenging for many professionals because it requires an approach or leverages aspects of care delivery that most are not trained in. Additionally, each scenario reflects an approach to care that is enhanced by interdisciplinary input. Finally, each case lends itself to a practical problem-solving approach that could be accomplished by most home-based medical care providers, even in the absence of an interdisciplinary team. Written by interdisciplinary experts in geriatric home-based care, this book serves as both an educational tool for learners in all related disciplines as well as a quick reference for experienced clinicians looking to augment their existing house call “toolbox.”

Gerontology Nursing Case Studies Donna J. Bowles, MSN, EdD, RN, CNE. 2011-02-24 Designated a Doody's Core Title! This is an excellent teaching guide and resource manual for instructors, gerontological nursing students, and practicing nurses and social workers who wish to learn more about geriatric concerns and care. It will be kept by nursing students long after they graduate as a guide to resources that will be valuable throughout their nursing careers. As a home care nurse working mainly with the geriatric community, I found the resources helpful in my practice. As an instructor, I found the book to be a very useful guide for teaching geriatrics. Score: 90, 4 Stars. - Doody's Medical Reviews Donna Bowles's Gerontology Nursing Case Studies is a unique volume that effectively addresses the lack of gerontology case studies for use with undergraduate nursing students. Case studies are a pedagogically powerful approach to active learning that offer opportunities to apply content to clinical practice.--The Gerontologist The case narrative approach of this book promotes active learning that is more meaningful to students (and practicing nurses) and more likely to increase the transfer of evidence into practice. An excellent resource for faculty (staff educators) to facilitate critical learning skills. Liz Capezuti, PhD, RN, FAAN Dr. John W. Rowe Professor
