New Perspectives on Music and Gesture Elaine King, Anthony Gritten. 2016-04-29 Building on the insights of the first volume on Music and Gesture (Gritten and King, Ashgate 2006), the rationale for this sequel volume is twofold: first, to clarify the way in which the subject is continuing to take shape by highlighting both central and developing trends, as well as popular and less frequent areas of investigation; second, to provide alternative and complementary insights into the particular areas of the subject articulated in the first volume. The thirteen chapters are structured in a broad narrative trajectory moving from theory to practice, embracing Western and non-Western practices, real and virtual gestures, live and recorded performances, physical and acoustic gestures, visual and auditory perception, among other themes of topical interest. The main areas of enquiry include psychobiology; perception and cognition; philosophy and semiotics; conducting; ensemble work and solo piano playing. The volume is intended to promote and stimulate further research in Musical Gesture Studies.

The Wind Band and Its Repertoire: Two Decades of Research As Published in the CBDNA Journal Michael Votta, Jr.. For slightly over two decades, the College Band Directors National Association published the CBDNA Journal, a research outlet for all types of subjects of interest to the membership. Following cessation of activities in 2002, Michael Votta, Jr., the Journal's most recent editor, assembled representative articles on composers and their works, historical research and composition analysis investigations, and produced this fine collection of writings. As a source of well-constructed research by some of the country's leading musicians, it fills a much needed place in everyone's library.

The Conductor's Workshop R. Gerry Long. 1977

The Modern Conductor Elizabeth A. H. Green. 1992 Extensively refined and updated, this new edition on conducting posits that conducting is a time-space art. It builds basic book techniques and includes additional band scores excerpts, placed in proximity with the classic repertoire. The text adds new baton timing techniques, and shows the relationships of time, speed, and motion. Key words and principles are highlighted in boldface or italics. This book states a new principle regarding gesture-speed as related to dynamics and phrasing. Drills to train the mind and hands simultaneously are presented. Complete diagrams, all time-beating patterns, and logical classification of expressive gestures are included. Offers manual-technique photo illustrations and a wealth of music examples that show the application of techniques. Features an extensive appendix that includes seating charts, language tables (scores), less common terms, and an outline of musical form to aid in score study. For musicians.

What Happens While Conducting Orchestras? Francis Kwasnicki. 2021-06-11 Conducting is the art of directing a musical performance, such as an orchestral or choral concert. It has been defined as the art of directing the simultaneous performance of several players or singers by the use of gesture. The primary duties of the conductor are to interpret the score in a way which reflects the specific indications in that score, set the tempo, ensure correct entries by ensemble members, and shape the phrasing where appropriate. Conductors communicate with their musicians primarily through hand gestures, usually with the aid of a baton, and may use other gestures or signals such as eye contact. A conductor usually supplements their direction with verbal instructions to their musicians in rehearsal. In this book, we are about to know an insight into the joys, the mishaps and the very real 'Happenings' that surround symphony orchestras, performance groups and musical theatre. All told by a man with a lifetime onstage, offstage and occasionally even under the stage.

Choral Conducting and the Construction of Meaning Liz Garnett. 2017-07-05 It is a truism in teaching choral conducting that the director should look like s/he wishes the choir to sound. The conductor's physical demeanour has a direct effect on how the choir sings, at a level that is largely unconscious and involuntary. It is also a matter of simple observation that different choral traditions exhibit not only different styles of vocal production and delivery, but also different gestural vocabularies which are shared not only between conductors within that tradition, but also with the singers. It is as possible to distinguish a gospel choir from a barbershop chorus or a cathedral choir by visual cues alone as it is simply by listening. But how can these forms of physical communication be explained? Do they belong to a pre-cultural realm of primate social bonding, or do they rely on the context and conventions of a particular choral culture? Is body language an inherent part of musical performance styles, or does it come afterwards, in response to music? At a practical level, to what extent can a practitioner from one tradition mandate an approach as 'good practice', and to what extent can another refuse it on the grounds that 'we don't do it that way'? This book explores these questions at both theoretical and practical levels. It examines textual and ethnographic sources, and draws on theories from critical musicology and nonverbal communication studies to analyse them. By comparing a variety of choral traditions, it investigates the extent to which the connections between conductor demeanour and choral sound operate at a general level, and in what ways they are constructed within a specific idiom. Its findings will be of interest both to those engaged in the study of music as a cultural practice, and to practitioners involved in a choral conducting context that increasingly demands fluency in a variety of styles.

The Conductor's Challenge Frank Battisti. 2016-06-01 (Meredith Music Resource). This extension and expansion of Guide to Score Study, co-authored with Robert Garofalo, examines the various stages conductors traverse in arriving at an interpretation. Battisti emphasizes the importance of the conductor's imagination, personality and ongoing study weeks/months/years in developing an interpretation that is personal, well-informed and faithful to the composer's expressive intent. He examines the score analysis process including the role and function of a work's musical elements; the need to balance intellectual understanding and intuitive feelings about a piece and the challenges faced by conductors when transforming an interpretation into a performance. As examples, he traces the procedures he used in forming interpretations of Lisbon and Horkstow Grange from Grainger's Lincolnshire Posy, Copland's Down a Country Lane and Sinfonia from Stravinsky's Octet for Wind Instruments.

A History of Orchestral Conducting Elliott W. Galkin. 1988 Although the bibliography of literature about personalities in the conducting world is extensive, a comprehensive, scholarly study of the history of conducting has been sorely lacking. Georg Schünemann's respected study, published in 1913, was brief and restricted to the procedures of time-beating. No work has attempted to examine the role of the orchestral conductor and to document the evolution of his art from historical, technical, and aesthetic perspectives. Dr. Elliott W. Galkin, musicologist, conductor, and critic—twice winner of the Deems Taylor award for distinguished writing about music—has produced such a work in *A History of Orchestral Conducting*. The central historical section of the book, which examines chronologically the theories and functions of time-beating and interpretative concepts of performance, is preceded by discussions of rhythm, development of the orchestral medium, and the evolving characteristics of orchestration. Conductors of unusual pivotal influence are examined in depth, as is the increasingly complex psychology of the podium. Critical writings since the time of Monteverdi and the birth of the orchestra are surveyed and compared. Analyses of conducting as an art and craft by musicians from Berlioz to Bernstein and commentators from Mattheson, Bernard Shaw, and Thomas Mann to Jacques Barzun, are described and discussed. A fascinating collection of engravings, wood cuts, photographs and caricatures contributes to the richness of this work.

Baton Basics Diane Wittry. 2014-10-01 Baton Basics offers a unique approach to teaching conducting based upon the concept of conveying weight, resistance, and energy in order to communicate a better concept of musical sound to the musicians. Featuring many detailed drawings and access to over 60 video examples on the companion website, Baton Basics guides conductors away from simply marking beat patterns, and towards a nuanced and phrased musicality that can be communicated to a group of musicians. Baton Basics is a key foundational text for the student and experienced conductor alike, and is a must read for anyone interested in improving and expanding their vocabulary of conducting gestures.

Name Index, Volumes 1-12, the History and Literature of the Wind Band and Wind Ensemble David Whitwell. 2012-11-03 Name Index, Volumes 1-12 is the thirteenth and final volume in Dr. David Whitwell's ground breaking History and Literature of the Wind Band and Wind Ensemble series. This volume includes nearly eight thousand entries - musicians, composers, publishers, historians, royalty, philosophers - a virtual encyclopedia of people

who have played a part, big or small, in the creation and growth of the wind band and wind ensemble. From the earliest philosophers of ancient Greece to composers from the twentieth century, this index to the History and Literature of the Wind Band and Wind Ensemble series completes one of the most amazing works of music research. Whitwell's meticulous scholarship reveals the continuous history of the wind ensemble, from its earliest roots to the nineteenth century - an unbroken tradition of wind music that music scholars have never been fully able to appreciate until now.

Musical Gestures Rolf Inge Godøy, Marc Leman.2010-02-12 We experience and understand the world, including music, through body movement—when we hear something, we are able to make sense of it by relating it to our body movements, or form an image in our minds of body movements. *Musical Gestures* is a collection of essays that explore the relationship between sound and movement. It takes an interdisciplinary approach to the fundamental issues of this subject, drawing on ideas, theories and methods from disciplines such as musicology, music perception, human movement science, cognitive psychology, and computer science.

Wind Bands and Cultural Identity in Japanese Schools David G. Hebert.2011-10-20 This well researched volume tells the story of music education in Japan and of the wind band contest organized by the All-Japan Band Association. Identified here for the first time as the world's largest musical competition, it attracts 14,000 bands and well over 500,000 competitors. The book's insightful contribution to our understanding of both music and education chronicles music learning in Japanese schools and communities. It examines the contest from a range of perspectives, including those of policy makers, adjudicators, conductors and young musicians. The book is an illuminating window on the world of Japanese wind bands, a unique hybrid tradition that combines contemporary western idioms with traditional Japanese influences. In addition to its social history of Japanese school music programs, it shows how participation in Japanese school bands contributes to students' sense of identity, and sheds new light on the process of learning to play European orchestral instruments.

Mozart in the Jungle Blair Tindall.2007-12-01 The memoir that inspired the two-time Golden Globe Award-winning comedy series: "Funny . . . heartbreaking . . . [and] utterly absorbing" (Lee Smith, New York Times—bestselling author of *Guests on Earth*). Oboist Blair Tindall recounts her decades-long professional career as a classical musician—from the recitals and Broadway orchestra performances to the secret life of musicians who survive hand to mouth in the backbiting New York classical music scene, where musicians trade sexual favors for plum jobs and assignments in orchestras across the city. Tindall and her fellow journeymen musicians often play drunk, high, or hopelessly hungover, live in decrepit apartments, and perform in hazardous conditions—working-class musicians who schlep across the city between low-paying gigs, without health-care benefits or retirement plans, a stark contrast to the rarefied experiences of overpaid classical musician superstars. An incisive, no-holds-barred account, *Mozart in the Jungle* is the first true, behind-the-scenes look at what goes on backstage and in the orchestra pit. The book that inspired the Amazon Original series starring Gael García Bernal and Lola Kirke, this is "a fresh, highly readable and caustic perspective on an overglamorized world" (Publishers Weekly).

Lead and Inspire Robert Joseph Garofalo, Frank L. Battisti.2005

The Elements of Expressive Conducting Michael Haithcock.2020-08-15 *The Elements of Expressive Conducting* begins with a synthesis of various movement theories which allow beginning conducting students to understand how best to use their body as an expressive instrument. Strategies for developing musical expression beyond pedagogical execution are discussed in each chapter. The text further explores merging musical preparation with a healthy, tension-free approach to an individual's movement. Readers will also find strategies for developing the coordination between the ear and body; ways to transfer every day movements to the art of conducting; and suggestions for building to a professional level of success.

The Complete Idiot's Guide to Conducting Music Michael Miller.2012-06-05 The complex art of conducting may look effortless to the casual onlooker, however, it requires a great deal of knowledge and skill. The success of a performance hinges on the director's ability to keep the group playing together and interpreting the music as the composer intended. *The Complete Idiot's Guide® to Conducting Music* shows student and novice conductors how to lead bands, orchestras, choirs, and other ensembles effectively through sight-reading, rehearsals, and performances.

The Effects of Staccato and Legato Conducting Gestures on Perceptions of Note Duration Nickolas Michael Doshier.2023 The purpose of this study was to examine the effects of staccato and legato conducting gestures on perceptions of note duration. I also investigated how the effects of conductor gesture might differ for participants with and without conductor training. In addition, I explored whether participants believed that watching the conductor influenced their ratings of note duration. The participants (N = 173) for this study were collegiate musicians who observed four brief video recordings of a conductor demonstrating short and long gestures synchronized with audio recordings of a wind ensemble performing short and long notes. All possible pairings were used for audiovisual stimuli, including two congruent (id est, short conducting gestures with short performance audio and long conducting gestures with long performance audio) and two incongruent stimuli (id est, short conducting gestures with long performance audio and long conducting gestures with short performance audio). Participants were randomly assigned to one of four unique presentation orders. After observing each recording, participants rated the overall note duration of the excerpt by manipulating a slider anchored by

1 (extremely short) and 101 (extremely long). The numeric values were not visible to participants, and the slider was positioned in the center prior to the participants' rating. After viewing and responding to the four recordings, participants were asked if they believed that watching the conductor influenced their ratings of note duration. They also answered a free-response question where they explained their answer. Results indicated a significant main effect for performance audio ($h_2p = .823$) and conducting gestures ($h_2p = .264$) for participants' ratings of note duration. There was also a significant three-way interaction between conducting gesture, performance audio, and presentation order, $F(3, 169) = 16.505, p$

The Conductor's Legacy Paula A. Crider. 2010 What would you ask the leading band directors of our time in a one-on-one conversation? Paula A. Crider, a seasoned and distinguished band director in her own right, shares the wealth of knowledge gleaned from her interviews of the extraordinary personalities who have changed the landscape of the wind band world in this remarkable book. With insight and clarity of thought, she asks the probing questions that prompt stories of talent, work, sacrifice, ingenuity, bravery, and determination. These pioneering and innovative conductors share their concept of band sound, views on score marking, advice to music majors and young band directors, thoughts on how to advance the wind band genre, the elements of their musical success, and much more about the art and craft of conducting a band. In calling forth these thoughts, the author inspires these leaders of the wind band profession to remind us all not only of where we have come from, but also provide a stirring handoff to us and to future generations.

Winds of Change II - The New Millennium Frank L. Battisti. 2012-04-01 (Meredith Music Resource). This new publication is an extension of *The Winds of Change*, that traced the development of the American wind band/ensemble in the twentieth century. This book covers all the important conferences, concerts, events, initiatives, and compositions created for wind bands/ensembles during the first decade of the twenty-first century. In gathering information for this book, the author examined hundreds of scores, listened to dozens of recordings, attended conferences, interviewed wind band/ensemble director-conductors, and surveyed numerous professional journals and magazines. The result is a book that provides a panorama view of the American wind band/ensemble scene from 2000-2010.
