Blaster's Guide Calvin J. Konya. 2015-01-05 This brief Blaster's Guide will provide methods to quickly create general blast designs by: estimating burdens, spacing, stemming and subdrilling as well as explosive loads. Charts are available to help explain blast vibration and air overpressure. The new charts provide comparisons of blast vibration and normal environmental vibration as well as air overpressure compared to wind. These charts provide both the laymen and professional with an easy, understandable method to compare blast effects with normal activities and normal environmental phenomena. The first section of the guide will provide a series of tables that, with little effort, can be used to determine average blast design dimensions. Additional forms are also given for blasting plans, seismic monitoring reports and blasting logs etc. This guide will enable the blaster to estimate dimensions in the field as well as provide the necessary forms for control of blasting operations.

Rhetoric, Fantasy, and the War on Terror Vaheed Ramazani. 2020-11-16 Drawing on psychoanalytic and semiotic perspectives, this book examines discourses mediating the global War on Terror, including governmental speeches, legal documents, print and broadcast journalism, and military memoirs. The book argues that these discourses motivate, and are motivated by, a myth of imminent harm that purportedly justifies a series of preemptive measures such as war, torture, and targeted killing, as well as an array of intrusive domestic security procedures such as profiling and mass surveillance. Dominant themes include selective compassion in the mainstream media, the language of war and the sacrificial sublime, asymmetrical warfare and the nostalgia for total war, weaponized drones and just war theory, and the role of American exceptionalism in normalizing endless war. Scholars and students alike will take interest in this original contribution to the fields of cultural studies, psychoanalysis, media studies, rhetoric, critical international relations, and international humanitarian law and ethics.

The Hawthornden Manuscripts of William Fowler and the Jacobean Court 1603-1612 Allison L. Steenson. 2020-09-07 This book explores the unedited material contained in the Hawthornden manuscripts of William Fowler, a Scottish poet attached to the court of Queen Anna of Denmark between 1590 and 1612. The material is representative of Fowler's ephemeral and occasional production, largely unknown to modern scholars. Through the lenses of the Hawthornden fragments, this book engages in the exploration of one of the cultural places of the European Renaissance, represented by the extensive use of emblems and other literary devices, and by the use of manuscript copies to circulate them. The discourse mainly focuses on the Jacobean courtly establishment in the first decade of the seventeenth century, from the point of view of a Scottish insider. By focusing on the intellectual makeup of the court in the newly united Great Britain, this work aims at bridging manuscript scholarship and literary studies with a wider perspective on contemporary society, politics and culture.

Automotive Technology James D. Halderman. 2012 Automotive Technology: Principles, Diagnosis, and Service, Fourth Edition, meets the needs for a comprehensive book that covers all eight areas of automotive service, plus the soft skills and tool knowledge that must also be taught. Because many automotive systems are intertwined, presenting all systems together in one text makes it easier for the student to see how they are all connected. Topics are divided into 133 short chapters, which makes it easier for instructors and students to learn and master the content.

Electric and Hybrid Cars Curtis D. Anderson, Judy Anderson. 2010-03-30 This illustrated history chronicles electric and hybrid cars from the late 19th century to today's fuel cell and plug-in automobiles. It describes the politics, technology, marketing strategies, and environmental issues that have impacted electric and hybrid cars' research and development. The important marketing shift from a "woman's car" to "going green" is discussed. Milestone projects and technologies such as early batteries, hydrogen and bio-mass fuel cells, the upsurge of hybrid vehicles, and the various regulations and market forces that have shaped the industry are also covered.

Boatowner's Mechanical and Electrical Manual Nigel Calder. 1996 In his latest book, Calder walks the reader through the repair, maintenance, and setting up of the boat's primary systems, including the electrical system, electronics equipment, generator sets, solar panels, wind and water generators, the engine, transmission, pumps, steering, waste disposal systems, and more. Destined to become a highly trusted companion aboard all types of boats for years to come.

Greater Cincinnati Religious Peacemakers Various Religious Leaders from Greater Cincinnati. 2021-09 Throughout human history, wars and violence have often been waged in the name of religions and in the name of diverging religious beliefs and belonging. Ironically, though, all religions in their teachings speak of nonviolence and have in common the promotion of peace and justice, namely the respect of human life and dignity, the institution of human rights, the protection of the poor and vulnerable, the freeing of the oppressed, the active elimination of injustice? It seems therefore, that violence and wars would be antithetical to religions; yet they are so frequently used as their justification. Are we then speaking of different religions? Institutional religions, the ones structured by humans and that are brandished to lead violence and wars, become in fact quite foreign to the essence of the religions as they were established by their founders and that they intend to represent; they actually contribute to their destruction. Wanting to reflect on that point, I embarked, a few years ago, on giving voice to local religious individuals, whom I called Religious Peacemakers, and who, each by living the essential teachings of their particular faith, contributed by their actions to peace and justice. I wanted to prove that their path, irrespective of their original religion, would be similar, and that their diverse faith, instead of separating them, would on the contrary end up uniting them.

David Vizard's How to Port and Flow Test Cylinder Heads David Vizard. 2012 Porting heads is an art and science. It takes a craftsman's touch to shape the surfaces of the head for the optimal flow characteristics and the best performance. Porting demands the right tools, skills, and application

of knowledge. Few other engine builders have the same level of knowledge and skill porting engine heads as David Vizard. All the aspects of porting stock as well as aftermarket heads in aluminum and cast-iron constructions are covered. Vizard goes into great depth and detail on porting aftermarket heads. Starting with the basic techniques up to more advanced techniques, you are shown how to port iron and aluminum heads as well as benefits of hand and CNC porting. You are also shown how to build a high-quality flow bench at home so you can test your work and obtain professional results. Vizard shows how to optimize flow paths through the heads, past the valves, and into the combustion chamber. The book covers blending the bowls, a basic porting procedure, and also covers pocket porting, porting the intake runners, and many advanced procedures. These advanced procedures include unshrouding valves, porting a shortside turn from the floor of the port down toward the valve seat, and developing the ideal port area and angle. All of these changes combine to produce optimal flow velocity through the engine for maximum power.
