Bodies of Truth Rita Kesselring.2016-10-12 *Bodies of Truth* offers an intimate account of how apartheid victims deal with the long-term effects of violence, focusing on the intertwined themes of embodiment, injury, victimhood, and memory. In 2002, victims of apartheid-era violence filed suit against multinational corporations, accusing them of aiding and abetting the security forces of the apartheid regime. While the litigation made its way through the U.S. courts, thousands of victims of gross human rights violations have had to cope with painful memories of violence. They have also confronted an official discourse claiming that the Truth and Reconciliation Commission of the 1990s sufficiently addressed past injuries. This book shows victims' attempts to emancipate from their experiences by participating in legal actions, but also by creating new forms of sociality among themselves and in relation to broader South African society. Rita Kesselring's ethnography draws on long-term research with members of the victim support group Khulumani and critical analysis of legal proceedings related to apartheid-era injury. Using juridical intervention as an entry point into the question of subjectivity, Kesselring asks how victimhood is experienced in the everyday for the women and men living on the periphery of Cape Town and in other parts of the country. She argues that the everyday practices of the survivors must be taken up by the state and broader society to allow for inclusive social change in a post-conflict setting.

Space Supporting Africa Annette Froehlich, André Siebrits, Christoffel Kotze.2020-12-19 This book addresses the need to support decision-makers across Africa by promoting awareness of the importance of space technologies and data to African development through the presentation of existing examples where space supports education and healthcare, and by making recommendations for further roll-out of these efforts. This is necessary because of the enduring misconception that space-related research and expenditure competes with other, more pressing, needs on the continent, when in truth space can play a major role in meeting these needs. Accordingly, the book unpacks the United Nations Sustainable Development Goals (SDGs) 2030 and the critical needs they address in the African context. Secondly, it provides an analysis of the African higher education landscape and considers the network of higher education-related SDGs, their targets, and their indicators. Africa's own development plan, Agenda 2063, is also explored. The African higher education landscape is then assessed by way of three models - the Space-Education Equation (SEE), the Benefits to Education by Space Transection (BEST), and the Enhanced Education for Sustainable Development Access and Success (EESDAS) model. The critical role of educational technologies and e-learning in bridging the educational access and success gap is appraised, as is the role of the space sector, and its technologies, applications, and data in African higher education. Finally, it explores e-health and provides an analysis of pertinent technologies required by e-health, past and present, and the opportunities and challenges it presents. Space technology can play a critical role in eliminating the barriers that are currently preventing e-health from playing a more significant role in a developing region such as sub-Saharan Africa.

Contemporary Migration to South Africa Aurelia Segatti.2011-08-23 Building on global interest in migration development, the volume draws attention to one of the most important migration systems in sub-Saharan Africa. It reviews South Africa's approach to international migration in the post-

apartheid period from a regional development perspective, highlighting key policy issues, debates, and consequences. The authors find at least three areas where migration is resulting in important development impacts. First, by offering options to those affected by conflict and crises in a region that has limited formal disaster management and social protection systems. Second, by mitigating shortcomings and distortions in regional labour markets. Third, by providing support to struggling rural economies and ever expanding urban areas in terms of livelihoods and social capital transfers. Chapter One consists of a study of the country's historical experience of migration and, in particular, analyses the changes in official attitudes throughout the twentieth century, indicating the roots of contemporary ideas and policy dilemmas. Chapters Two, Three, Four and Five complement this analysis of the South African State's capacity to reform and manage the South African migration situation by looking at often neglected dimensions: the first explores the question of skilled labour, a crucial question given the unbalanced structure of the South African labour market; the second examines the impact of migration on local government in South African cities and specifically implications for urban planning, service delivery, health, security, and political accountability; the third analyses the nature of undocumented migration to South Africa and the challenges it raises to both State and non-State actors; The book concludes with an examination of health as a critical issue when examining the relationship between migration and development in South Africa, in light of recent empirical data.

Contingent Citizens Elizabeth Hull.2020-05-27 Contingent Citizens examines the ambiguous state of South Africa's public sector workers and the implications for contemporary understandings of citizenship. It takes us inside an ethnography of the professional ethic of nurses in a rural hospital in KwaZulu-Natal, shaped by a deep history of mission medicine and changing forms of new public management. Liberal democratic principles of 'transparency', 'decentralization' and 'rights', though promising freedom from control, often generate fear and insecurity instead. But despite the pressures they face, Elizabeth Hull shows that nurses draw on a range of practices from international migration to new religious movements, to assert new forms of citizenship. Focusing an anthropological lens on 'professionalism', Hull explores the major fault lines of South Africa's fragmented social landscape - class, gender, race, and religion - to make an important contribution to the study of class formation and citizenship. This prize-winning monograph will be of interest to scholars of anthropology, development studies, sociology and global public health.

Please, Do Not Make Us Suffer Anymore Human Rights Watch (Organization),Diederik Lohman.2009-01-01 With support from the Open Society Institute International Palliative Care Initiative, Human Rights Watch released a groundbreaking report on the lack of access to pain relief medicines for millions of patients worldwide. The report, Please Don't Make Us Suffer Anymore: Access to Pain Treatment as a Human Right, finds that countries can significantly improve access to pain medications by addressing the causes of their poor availability, which include the following:
*Failure to put in place functioning supply and distribution systems
*Absence of government policies to ensure medicine availability
*Insufficient instruction for health care workers
*Excessively strict drug-control regulations
*Fear of legal sanctions among healthcare workers. Please Don't Make Us Suffer Anymore notes that international law requires states to make narcotic drugs available for the treatment of pain while preventing abuse, but that the strong international focus on preventing abuse of such drugs has led many countries to neglect that obligation. The full report is available in PDF format. French, Russian, and Spanish versions are available on the HRW website.

Nursing and Informatics for the 21st Century - Embracing a Digital World, Book 1 Connie White Delaney, Charlotte A. Weaver, Joyce Sensmeier, Lisiane Pruinelli, Patrick Weber. 2022-04-28 In just the past decade, the emergence of digital health has finally become palpable. Enhanced by the pandemic, social justice events, and planetary health urgency, *Realizing Digital Health - Bold Challenges and Opportunities for Nursing* explores that evolution with a focus on capturing the current state of digital health. Anchored in an introduction to digital health, new technologies, opportunities, and challenges are described. Consideration of the opportunities and challenges of digital health calls for specific attention to ethical considerations. This book includes a current state synopsis of healthcare in the USA, with the inclusion of specific implications for nursing leaders and executives. Engagement of the people (patients, families, communities) working in partnership to enhance health is described. Information management and the necessary definition and access to data are discussed with a particular explication of the function of information management and operational decision-making. The challenges and learnings related to informatics drawn from the experiences of leaders in large health systems shed insight into the current state of informatics-enabled digital health and healthcare. The global example of the integration of technology, nursing, and health systems expands our knowledge of the current state as well as explores possibilities. This book concludes with a commitment to and description of the current state of teamwork and the integral role/functions within informatics, nursing, and healthcare. This book provides the reader with a succinct overview of digital technologies, a reality-anchored description of the current state in the USA and globally and highlights the core foundation and integration of informatics and information management. This book stimulates thought and actions to advance digital health within a full partnership among the people, organizations, systems, and global imperatives including planetary survival. This book lifts up the next era calling for full teamwork, collaboration, and partnership as we emerge into a true global community. *Nursing and Informatics for the 21st Century - Embracing a Digital World, 3rd Edition* is comprised of four books which can be purchased individually: Book 1: *Realizing Digital Health - Bold Challenges and Opportunities for Nursing* Book 2: *Nursing Education and Digital Health Strategies* Book 3: *Innovation, Technology, and Applied Informatics for Nurses* Book 4: *Nursing in an Integrated Digital World that Supports People, Systems, and the Planet*

Class, Race, and Inequality in South Africa Jeremy Seekings, Nicoli Nattrass. 2008-10-01 The distribution of incomes in South Africa in 2004, ten years after the transition to democracy, was probably more unequal than it had been under apartheid. In this book, Jeremy Seekings and Nicoli Nattrass explain why this is so, offering a detailed and comprehensive analysis of inequality in South Africa from the midtwentieth century to the early twenty-first century. They show that the basis of inequality shifted in the last decades of the twentieth century from race to class. Formal deracialization of public policy did not reduce the actual disadvantages experienced by the poor nor the advantages of the rich. The fundamental continuity in patterns of advantage and disadvantage resulted from underlying continuities in public policy, or what Seekings and Nattrass call the "distributional regime." The post-apartheid distributional regime continues to divide South Africans into insiders and outsiders. The insiders, now increasingly multiracial, enjoy good access to well-paid, skilled jobs; the outsiders lack skills and employment.

Health and Health Care in South Africa H. C. J. Van Rensburg. 2004 Health and healthcare in South Africa attempts to capture the essence of transformation and trends in the South African health sector. It offers, on the one hand, an overview of recent and current developments in the South African health care system, and on the other, of trends in the health status of the South African population. The book is a follow-up to the well-known *Health care in South Africa - structure and dynamics* (Van Rensburg, Fourie & Pretorius 1992), published just before the transition to a democratic society. The book retains a strong historical thread, but the focus is generally on the nature of the transformation process, gains made and failures encountered.

The Human Right to Water Malcolm Langford, Anna F. S. Russell. 2017-10-05 In a short space of time, the right to water has emerged from relative obscurity to claim a prominent place in human rights theory and practice. This book explores this rise descriptively and prescriptively. It analyses the recognition, use and partly impact, of the right to water in international and comparative law, civil society mobilisation and public policy. It also scrutinises the normative implications of the right to water with a focus on challenges and puzzles it creates for law and policymaking. These questions are explored globally and comparatively within different dynamics of the sector - water allocation, water access and urban and rural water reform - and in conjunction with the right to sanitation. This multi-disciplinary volume reveals the diverse ways in which the right to water has been adopted, but also its limitations when faced with the realities of political economy, political ecology and partly, traditional legal thought.

The South Africa Reader Clifton Crais, Thomas V. McClendon. 2013-11-19 The *South Africa Reader* is an extraordinarily rich guide to the history, culture, and politics of South Africa. With more than eighty absorbing selections, the Reader provides many perspectives on the country's diverse peoples, its first two decades as a democracy, and the forces that have shaped its history and continue to pose challenges to its future, particularly violence, inequality, and racial discrimination. Among the selections are folktales passed down through the centuries, statements by seventeenth-century Dutch colonists, the songs of mine workers, a widow's testimony before the Truth and Reconciliation Commission, and a photo essay featuring the acclaimed work of Santu Mofokeng. Cartoons, songs, and fiction are juxtaposed with iconic documents, such as The Freedom Charter adopted in 1955 by the African National Congress and its allies and Nelson Mandela's Statement from the Dock in 1964. Cacophonous voices—those of slaves and indentured workers, African chiefs and kings, presidents and revolutionaries—invite readers into ongoing debates about South Africa's past and present and what exactly it means to be South African.

Cult and Ritual Abuse James Randall Noblitt,Pamela Perskin Noblitt.2014-07-15 This personal yet scholarly journey into the confusing and clandestine world of ritual abuse survivors sheds light on their catastrophic experiences and their efforts to heal afterward. Revised, updated, and expanded, this third edition of a classic study is one of the most authoritative and evenhanded volumes to tackle its hotly debated subject matter. Incorporating the authors' firsthand observations, the book provides historical, anthropological, and psychological context for contemporary reports of both ritual abuse and ritual crime. In addition to sharing patient vignettes and a history of cult and ritual abuse in society, the authors explore fascinating topics related to these practices, among them what triggers personality shifts for victims even many years after the abuse has stopped. Importantly, the book shows how ritual abuse affects society as a whole, influencing civil and criminal law, politics, legislation, social movements, social welfare, and psychological theory. It provides unique insights into the scientific study, forensic investigation, and implementation of social services for survivors of cult and ritual abuse, discusses new research and treatment strategies, and establishes the foundation for a psychological diagnosis to be called Cult and Ritual Trauma Disorder.

Fundamentals of Tropical Freshwater Wetlands Tatenda Dalu,Ryan J. Wasserman.2021-11-25 *Fundamentals of Tropical Freshwater Wetlands: From Ecology to Conservation Management* is a practical guide and important tool for practitioners and educators interested in the ecology, conservation and management of wetlands in tropical/subtropical regions. The book is written in such a way that, in addition to scientists and managers, it is accessible to non-specialist readers. Organized into three themed sections and twenty-three chapters, this volume covers a variety of topics, exposing the reader to a full range of scientific, conservation and management issues. Each chapter has been written by specialists in the topic being presented. The book recognizes that wetland conservation, science and management are interlinked disciplines, and so it attempts to combine several perspectives to highlight the interdependence between the various professions that deal with issues in these environments. Within each chapter extensive cross-referencing is included, so as to help the reader link related aspects of the issues being discussed. Contributed to by global experts in the field of tropical wetlands Includes case studies and worked examples, enabling the reader to recreate the work already done Focuses on tropical systems not available in any other book

An Introduction to the Ethos of Nursing J. M. Mellish,Anne-Mart Oosthuizen,Frieda Paton.2010

In the changing and often ambiguous world of modern nursing, trainee nurses need a sound ethical foundation to guide them in their practice. This revised and updated *An Introduction to the Ethos of Nursing* provides such a foundation. The authors give a clear explanation of the southern African nursing ethos, showing an appreciation of its complexity but never losing sight of the central tenet of nursing - that the nurse has a duty to care. The broad focus of the book is on the very nature of nursing, its meaning, the factors that brought nursing into being and the forces that shaped it. The book stimulates enquiry into professional values and related current issues. New and revised features include: an orientation to the nature of nursing an exploration of major issues affecting the nursing profession new chapters on Developments in advanced education for nurses and Nursing in the modern society the ethical and legal foundation of nursing interesting activities that invite reflection on issues that the nurse will have to deal with. Professor Joyce M Mellish, previously an Emeritus professor at the University of Port Elizabeth (now known as the Nelson Mandela Metropolitan University), is a widely published author of several nursing publications. Dr Anne-Mart Oosthuizen is a senior lecturer at the Department of Health Studies, University of South Africa. Ms Frieda Paton is a former senior lecturer in nursing at the University of South Africa who currently works as an occupational health nurse in Mpumalanga--Publisher's website.
