Wilderness Navigation Handbook Fred Touche.2005-09-28 Designed for both land and water use, this comprehensive guide helps unlock the complexity of map and chart reading as it relates to navigation. Beginning with detailed technical descriptions of the tools of navigation—a compass, an altimeter, a GPS system, and a sextant—this handbook shows how to use these tools either individually or in combination with each other to navigate any area. Factors that cause tools and techniques to fail are discussed, such as why an altimeter often shows the wrong elevation, a GPS position is sometimes off track, and the sun often points in an unexpected direction. Twenty-one real-life scenarios provide practical wisdom for even the most intrepid navigator. Specific information on using the moon for directions and the stars for position, measuring boiling water temperature for elevation, map projections, map datums, great circle routes, and the UTM/UPS grid system is included.

But that's changing. With the introduction of EPUB 3, publishers now have the means to create a single rich data source for audiences of all reading abilities. Through practical tips and examples, Accessible EPUB 3 takes you inside the EPUB 3 format and explores how you can enrich and enhance content for all readers. Author Matt Garrish demystifies the process of making content easier to access, demonstrating how accessible practices are intertwined with standard content best practices. "You Are Not Expected to Understand This" Torie Bosch.2022-11-15 Leading technologists, historians, and journalists reveal the stories behind the computer coding that touches all aspects of life—for better or worse Few of us give much thought to computer code or how it comes to be. The very word “code” makes it sound immutable or even inevitable. “You Are Not Expected to Understand This” demonstrates that, far from being preordained, computer code is the result of very human decisions, ones we all live with when we use social media, take photos, drive our cars, and engage in a host of other activities. Everything from law enforcement to space exploration relies on code written by people who, at the time, made choices and assumptions that would have long-lasting, profound implications for society. Torie Bosch brings together many of today's leading technology experts to provide new perspectives on the code that shapes our lives. Contributors discuss a host of topics, such as how university databases were programmed long ago to accept only two genders, what the person who programmed the very first pop-up ad was thinking at the time, the first computer worm, the Bitcoin white paper, and perhaps the most famous seven words in Unix history: “You are not expected to understand this.” This compelling book tells the human stories behind programming, enabling those of us who don't think much about code to recognize its importance, and those who work with it every day to better understand the long-term effects of the decisions they make. With an introduction by Ellen Ullman and contributions by Mahsa Alimardani, Elena Botella, Meredith Broussard, David Cassel, Arthur Daemmrch, Charles Duan, Quinn DuPont, Claire L. Ghost of the Navigator Tommy Muncie.2016-03-16 Three years on from the birthday party that left him crippled for life, Shadow is well on the way to wrecking what's left of himself. Just as he's finally getting his life back on track, an unexpected visitor turns up at Shadow's home, with a new idea about how to get his body restored. Everything comes at a price though, and the elusive Blake Stanford's price is a little more than Shadow bargained for. His deal with the devil leaves him on the wrong side of the world's most powerful organization: the Seeker's Council. With the Seekers' Council on his back, a nosy journalist who won't stay out of his personal life, and a crime boss who will stop at nothing to gain his allegiance for her own shady purposes, Shadow is running low on allies. Friend and doctor Kit Calloway is still on his side, but keeping Shadow alive might just cost him more than his career this time. Especially if the world's most powerful Seekers discover Shadow's true identity. Or the three tubes of Liquid Talent he once buried deep in a forest, and promised never to dig up unless lives depended on the secrets inside them...

Dark and Magical Places: The Neuroscience of Navigation Christopher Kemp.2022-01-25 How the brain helps us to understand and navigate space—and why, sometimes, it doesn't work the way it should. Inside our

heads we carry around an infinite and endlessly unfolding map of the world. Navigation is one of the most ancient neural abilities we have—older than language. In *Dark and Magical Places*, Christopher Kemp embarks on a journey to discover the remarkable extent of what our minds can do. Fueled by his own spatial shortcomings, Kemp describes the brain regions that orient us in space and the specialized neurons that do it. Place cells. Grid cells. He examines how the brain plans routes, recognizes landmarks, and makes sure we leave a room through a door instead of trying to leave through a painting. From the secrets of supernavigators like the indigenous hunters of the Bolivian rainforest to the confusing environments inhabited by people with place blindness, Kemp charts the myriad ways in which we find our way and explains the cutting-edge neuroscience behind them. How did Neanderthals navigate? Why do even seasoned hikers stray from the trail? What spatial skills do we inherit from our parents? How can smartphones and our reliance on GPS devices impact our brains? In engaging, engrossing language, Kemp unravels the mysteries of navigating and links the brain's complex functions to the effects that diseases like Alzheimer's, types of amnesia, and traumatic brain injuries have on our perception of the world around us. A book for anyone who has ever felt compelled to venture off the beaten path, *Dark and Magical Places* is a stirring reminder of the beauty in losing yourself to your surroundings. And the beauty in understanding how our brains can guide us home.

In *The Anchored Life: Nautical Principles that Help Believers Grow*, Marv Nelson and Tim Hibsman use nautical terms and analogies to show that the Bible is full of promises for the sea of life on which we are all sailing. Whether you're an experienced sailor or a landlubber, the lessons learned in this book will enliven you and give you hope for those times that you need to batten down the hatches and hold on to the One Who calms the storms.

Celestial Navigation Anne Tyler.2011-01-26 A poignant, uplifting, heartbreaking love story from the beloved bestselling, Pulitzer Prize-winning author: To read a novel by Anne Tyler is to fall in love (PEOPLE). Thirty-eight-year-old Jeremy Pauling has never left home. He lives on the top floor of a Baltimore row house where he creates collages of little people snipped from wrapping paper. His elderly mother putters in the rooms below, until her death. And it is then that Jeremy is forced to take in Mary Tell and her child as boarders. Mary is unaware of how much courage it takes Jeremy to look her in the eye. For Jeremy, like one of his paper creations, is fragile and easily torn—especially when he's falling in love....

[The Papers of Thomas Jefferson: Retirement Series, Volume 15](#) Thomas Jefferson.2019-02-19 The 618 documents in this volume span 1 September 1819 to 31 May 1820. Jefferson suffers from a “colic,” recovery from which requires extensive rest and medication. He spends much time dealing with the immediate effects of the \$20,000 addition to his debts resulting from his endorsement of notes for the bankrupt Wilson Cary Nicholas. Jefferson begins to correspond with his carpenter, the enslaved John Hemmings, as Hemmings undertakes maintenance and construction work at Poplar Forest. Jefferson and his allies in the state legislature obtain authorization for a \$60,000 loan for the fledgling University of Virginia, the need for which becomes painfully clear when university workmen complain that they have not been paid during seven months of construction work. In the spring of 1820, following congressional discussion leading to the Missouri Compromise, Jefferson writes that the debate, “like a fire bell in the night, awakened and filled me with terror,” and that with regard to slavery, Americans have “the wolf by the ear, and we can neither hold him, nor safely let him go.”

Establishing Effective Patient Navigation Programs in Oncology National Academies of Sciences, Engineering, and Medicine,Health and Medicine Division,Board on Health Care Services,National Cancer Policy Forum.2018-08-13 Delivering high-quality cancer care to all patients presents numerous challenges, including difficulties with care coordination and access. Patient navigation is a community-based service delivery intervention designed to promote access to timely diagnosis and treatment of cancer and other chronic diseases by eliminating barriers to care, and has often been proposed and implemented to address these

challenges. However, unresolved questions include where patient navigation programs should be deployed, and which patients should be prioritized to receive navigation services when resources are limited. To address these issues and facilitate discussion on how to improve navigation services for patients with cancer, the National Cancer Policy Forum of the National Academies of Sciences, Engineering, and Medicine held a workshop on November 13 and 14, 2017. At this workshop, a broad range of experts and stakeholders, including clinicians, navigators, researchers, and patients, explored which patients need navigation and who should serve as navigators, and the benefits of navigation and current gaps in the evidence base.
