- Reaching Higher** Rhona S. WEINSTEIN. 2009-06-30 Drawing upon a generation of research on self-fulfilling prophecies in education, *Reaching Higher* argues that our expectations of children are often too low. Weinstein shows that children typed early as not very smart can go on to accomplish far more than is expected of them by an educational system with too narrow a definition of ability. She faults the system, pointing out that teachers themselves are harnessed by policies that do not enable them to reach higher for all children.

- Passenger Rail Franchising* Great Britain. Parliament. House of Commons. Transport Committee. 2006 It is thirteen years since the Railways Act 1993 started the process of privatising British Rail, replacing it with one company owning and managing the infrastructure, an open-access system for freight services and a series of twenty-five passenger franchises let to private companies for a specified period of time. This period has seen almost continuous change, and there is now a new 'triumvirate' framework with the Department for Transport, the Office of Rail Regulation and Network Rail in place, with the third generation of franchises in the process of being let and the number being reduced to nineteen. The Committee's report examines the current franchising system, focusing on the coherence of its objectives, the effectiveness of the process for awarding franchises and the management of franchise agreements, and whether more competition and vertical integration is needed. Findings include that the current system represents a policy muddle which lacks a coherent framework for the development of good services and delivery of value for money for passengers and taxpayers. The only way the Government can increase capacity and improve services for the long-term is to drop the dogmatic pursuit of competition in its decision-making as to what the private and public sectors can and should do in future. The Government's forthcoming long-term strategy for the railways will need to address these issues, and to set out a structure and a strategy capable of securing quality passenger rail services to meet demand over the next half a century.
- Themes in French Culture* Rhoda Métraux, Margaret Mead. 2001 Margaret Mead collaborated with her long-time colleague Rhoda Métraux in this unique study of French culture. The Hoover Institute at Stanford University originally published this volume, which grew out of the Columbia University project on Research of Contemporary Cultures in 1954. It is one of the few works by American social scientists dealing with broad themes of French life. Mead and Métraux present a vivid picture of the French starting with the organization of the house and its architecture, and drawing original conclusions for the structure of French families and overall cultural values. This work, long out of print, is a fascinating and penetrating portrait of a contemporary European society.

- The Turns of Translation Studies* Mary Snell-Hornby. 2006-06-09 What's new in Translation Studies? In offering a critical assessment of recent developments in the young discipline, this book sets out to provide an answer, as seen from a European perspective today. Many "new" ideas actually go back well into the past, and the German Romantic Age proves to be the starting-point. The main focus lies however on the last 20 years, and, beginning with the cultural turn of the 1980s, the study traces what have turned out since then to be ground-breaking contributions (new paradigms) as against what was only a change in position on already established territory (shifting viewpoints). Topics of the 1990s include nonverbal communication, gender-based Translation Studies, stage translation, new fields of interpreting studies and the effects of new technologies and globalization (including the increasingly dominant role of English). The author's aim is to stimulate discussion and provoke further debate on the current profile and future perspectives of Translation Studies.
- Regional Development in the Romanian-Hungarian Cross-border Space* István Süli-Zakar, Ioan Horga. 2006
- Weak Courts, Strong Rights* Mark Tushnet. 2009-07-20 Unlike many other countries, the United States has few constitutional guarantees of social welfare rights such as income, housing, or healthcare. In part this is because many Americans believe that the courts cannot possibly enforce such guarantees. However, recent innovations in constitutional design in other countries suggest that such rights can be judicially enforced--not by increasing the power of the courts but by decreasing it. In *Weak Courts, Strong Rights*, Mark Tushnet uses a comparative legal perspective to show how creating weaker forms of judicial review may actually allow for stronger social welfare rights under American constitutional law. Under strong-form judicial review, as in the United States, judicial interpretations of the constitution are binding on other branches of government. In contrast, weak-form review allows the legislature and executive to reject constitutional rulings by the judiciary--as long as they do so publicly. Tushnet describes how weak-form review works in Great Britain and Canada and discusses the extent to which legislatures can be expected to enforce constitutional norms on their own. With that background, he turns to social welfare rights, explaining the connection between the state action or horizontal effect doctrine and the enforcement of social welfare rights. Tushnet then draws together the analysis of weak-form review and that of social welfare rights, explaining how weak-form review could be used to enforce those rights. He demonstrates that there is a clear judicial path--not an insurmountable judicial hurdle--to better enforcement of constitutional social welfare rights.
- The Rise of Professional Women in France* Linda L. Clark. 2000-12-21 This history of professional women in positions of administrative responsibility illuminates women's changing relationship to the public sphere in France since the Revolution of 1789. Linda L. Clark traces several generations of French women in public administration, examining public policy and politics, attitudes towards gender, and women's work and education. Women's own perceptions and assessments of their positions illustrate changes in gender roles and women's relationship to the state. With seniority-based promotion, maternity leaves and the absence of the marriage bar, the situation of French women administrators invites comparison with their counterparts in other countries. Why has the profile of women's employment in France differed from that in the USA and the UK? This study gives unique insights into French social, political and cultural history, and the history of women during the nineteenth and twentieth centuries. It will interest scholars of European history and also specialists in women's studies.
- The Archaeology of Disease** Charlotte A. Roberts, Keith Manchester. 1997 This text shows how scientific and archaeological techniques can be used to identify the common illnesses and injuries from which humans suffered in antiquity. Charlotte Roberts and Keith Manchester study evidence gleaned from written records and works of art as well as from ancient human remains, and they combine a clinical interpretation of prevalent diseases with a graphic description of their social, economic, and cultural consequences. This edition includes case studies from around the world and gives an account of the rapid technical advances that have dramatically increased our knowledge of illness in the distant past.
- Education and Jobs* Ivar E. Berg. 2003 In this famous study, selected by the New York Times Book Review as one of the most important social science books of 1971, the author argues that the familiar correlation between educational training and job performance is a myth and that the upgrading of the supply of labor is meaningless unless we reconsider the nature of the demand. A lengthy new introduction by the author extends his critique into the 1990s. Originally published by Praeger in 1970.

Marx's Economics Michio Morishima.1973 Professor Morishima concentrates on the three volumes of Das Kapital and their contributions to the major topics of traditional Marxian economics. He provides a rigorous mathematisation of the labour theory of value, the theory of exploitation, the transformation problem, the reproduction scheme, the law of relative surplus population, the falling rate of capital and the turnover of capital. After proving Marxian propositions in a rigorous way, he argues that in order to combine Marx's model with von Neumann's in a new growth theory it is necessary to abandon the labour theory of value. Professor Morishima feels that this sacrifice is well worth making, because it enables Marxian economics to be integrated with orthodox theory into a new Marx-von Neumann theory of growth, and this to make an important contribution to the development of the subject.

Critical Discourse Studies in Context and Cognition Christopher Hart.2011-08-17 Critical Discourse Studies (CDS) is an exciting research enterprise in which scholars are concerned with the discursive reproduction of power and inequality. However, researchers in CDS are increasingly recognising the need to investigate the cognitive dimensions of discourse and context if they want to fully account for any connection between language, legitimisation and social action. This book presents a collection of papers in CDS concerned with various ideological discourses. Analyses are firmly rooted in linguistics and cognition constitutes a major focus of attention. The chapters, which are written by prominent researchers in CDS, come from a broad range of theoretical perspectives spanning pragmatics, cognitive psychology and cognitive linguistics. The book is essential reading for anyone working at the cutting edge of CDS and especially for those wishing to explore the central place that cognition must surely hold in the relationship between discourse and society.

Ad Hominem Arguments Douglas Walton.1998 A vital contribution to legal theory and media and civic discourse In the 1860s, northern newspapers attacked Abraham Lincoln's policies by attacking his character, using the terms drunk, baboon, too slow, foolish, and dishonest. Steadily on the increase in political argumentation since then, the argumentum ad hominem, or personal attack argument, has now been carefully refined as an instrument of oppo tactics and going negative by the public relations experts who craft political campaigns at the national level. In this definitive treatment of one of the most important concepts in argumentation theory and informal logic, Douglas Walton presents a normative framework for identifying and evaluating ad hominem or personal attack arguments. Personal attack arguments have often proved to be so effective, in election campaigns, for example, that even while condemning them, politicians have not stopped using them. In the media, in the courtroom, and in everyday confrontation, ad hominem arguments are easy to put forward as accusations, are difficult to refute, and often have an extremely powerful effect on persuading an audience. Walton gives a clear method for analyzing and evaluating cases of ad hominem arguments found in everyday argumentation. His analysis classifies the ad hominem argument into five clearly defined subtypes—abusive (direct), circumstantial, bias, poisoning the well, and tu quoque (you're just as bad) arguments—and gives methods for evaluating each type. Each subtype is given a well-defined form as a recognizable type of argument. The numerous case studies show in concrete terms many practical aspects of how to use textual evidence to identify and analyze fallacies and to evaluate argumentation as fallacious or not in particular cases.

The Metamorphoses of Kinship Maurice Godelier.2012-03-03 With marriage in decline, divorce on the rise, the demise of the nuclear family, and the increase in marriages and adoptions among same-sex partners, it is clear that the structures of kinship in the modern West are in a state of flux. In *The Metamorphoses of Kinship*, the world-renowned anthropologist Maurice Godelier contextualizes these developments, surveying the accumulated experience of humanity with regard to such phenomena as the organization of lines of descent, sexuality and sexual prohibitions. In parallel, Godelier studies the evolution of Western conjugal and familial traditions from their roots in the nineteenth century to the present. The conclusion he draws is that it is never the case that a man and a woman are sufficient on their own to raise a child, and nowhere are relations of kinship or the family the keystone of society. Godelier argues that the changes of the last thirty years do not herald the disappearance or death agony of kinship, but rather its remarkable metamorphosis—one that, ironically, is bringing us closer to the “traditional” societies studied by ethnologists.

Women's Human Rights Niamh Reilly.2013-04-23 *Women's Human Rights: Seeking Gender Justice in a Globalising Age* explores the emergence of transnational, UN-oriented, feminist advocacy for women's human rights, especially over the past three decades. It identifies the main feminist influences that have shaped the movement liberal, radical, third world and cosmopolitan and exposes how the Western, legalist, state-centric, and liberal biases of mainstream human rights discourse impede the realisation of human rights in women's lives everywhere. The book traces the evolution of the women's human rights movement through an examination of its key issues, debates, and practical interventions in international law and policy arenas. This includes efforts to: Develop global gender equality norms via the UN Women's Convention Frame violence against women as a human rights issue Address gender-based crimes in conflict situations, include women in conflict resolution and post-conflict reconstruction, and challenge new forms of militarism Highlight the gendered human rights dimensions of widening inequalities in a context of neo-liberal globalisation Develop human rights responses to anti-feminist fundamentalist movements with a focus on reproductive and sexual rights Ultimately, Women's

Human Rights reaffirms a commitment to critically reinterpreted universal human rights principles and demonstrates the vital role that bottom-up, transnational movements play in making them a reality in women's lives.

Under Development: Gender C. Verschuur, I. Guérin, H. Guétat-Bernard. 2016-04-30 Despite various decades of research and claim-making by feminist scholars and movements, gender remains an overlooked area in development studies. Looking at key issues in development studies through the prisms of gender and feminism, the authors demonstrate that gender is an indispensable tool for social change.

The Medical Mandarins George Weisz. 1995 This wide-ranging and imaginative book examines the social and scientific role of the French Academy of Medicine from its creation in 1820 to the outbreak of the Second World War. The first chapters focus on the institution and its activities, including the evaluation of medical innovations and the cultivation of professional memory through eulogies and institutional art. Weisz argues that the Academy was gradually transformed from a low-status public institution that was central to French medical science in the nineteenth century to an establishment institution largely irrelevant to medical science but playing a key role in public health policy. The second half of the book uses the activities and literary productions of the Academy to explore broader issues of medical history. The Academy's role in the regulation and scientific study of mineral waters illuminates processes of discipline formation in medical science and explores the therapeutic specificity of French medicine. Academic debates are used to investigate the appropriation of new research techniques like animal experimentation and quantification in therapeutic reasoning. Academic eulogies provide a starting point for the evolving medical and scientific reputation of Laennec, the inventor of auscultation. Using techniques of prosopography applied to the membership of the Academy, Weisz goes on to analyze the role of the Parisian medical elite in French medicine and its social place within the French bourgeoisie. His concluding chapter examines the emerging self-images of this Parisian elite in academic eulogies.

Gender in the Legal Profession Joan Brockman. 2001 An analysis of the causes and implications of the gendered structure of the legal profession in Canada and elsewhere. The author concludes that until there is significant change in how women are perceived in relation to domestic duties, it is unlikely that they will attain equality within the legal profession.
