Lectures on Kant's Political Philosophy Hannah Arendt.2014-12-10 Hannah Arendt's last philosophical work was an intended three-part project entitled The Life of the Mind. Unfortunately, Arendt lived to complete only the first two parts, Thinking and Willing. Of the third, Judging, only the title page, with epigraphs from Cato and Goethe, was found after her death. As the titles suggest, Arendt conceived of her work as roughly parallel to the three Critiques of Immanuel Kant. In fact, while she began work on The Life of the Mind, Arendt lectured on Kant's Political Philosophy, using the Critique of Judgment as her main text. The present volume brings Arendt's notes for these lectures together with other of her texts on the topic of judging and provides important clues to the likely direction of Arendt's thinking in this area.

Law and Practice of the United Nations Simon Chesterman,Ian Johnstone,David M. Malone.2016-03-01 Law and Practice of the United Nations: Documents and Commentary combines primary materials with expert commentary demonstrating the interaction between law and practice in the UN organization, as well as the possibilities and limitations of multilateral institutions in general. Each chapter begins with a short introductory essay describing how the documents that ensue illustrate a set of legal, institutional, and political issues relevant to the practice of diplomacy and the development of public international law through the United Nations. Each chapter also includes questions to guide discussion of the primary materials, and a brief bibliography to facilitate further research on the subject. This second edition addresses the most challenging issues confronting the United Nations and the global community today, from terrorism to climate change, from poverty to nuclear proliferation. New features include hypothetical fact scenarios to test the understanding of concepts in each chapter. This edition contains expanded author commentary, while maintaining the focus on primary materials. Such materials enable a realistic presentation of the work of international diplomacy: the negotiation, interpretation and application of such texts are an important part of what actually takes place at the United Nations and other international organizations. This work is ideal for courses on the United Nations or International Organizations, taught in both law and international relations programs.

Forests for People Anne M Larson,Deborah Barry,Ganga Ram Dahal.2012-09-10 Who has rights to forests and forest resources? In recent years governments in the South have transferred at least 200 million hectares of forests to communities living in and around them . This book assesses the experience of what appears to be a new international trend that has substantially increased the share of the world's forests under community administration. Based on research in over 30 communities in selected countries in Asia (India, Nepal, Philippines, Laos, Indonesia), Africa (Burkina Faso, Cameroon, Ghana) and Latin America (Bolivia, Brazil, Guatemala, Nicaragua), it examines the process and outcomes of granting new rights, assessing a variety of governance issues in implementation, access to forest products and markets and outcomes for people and forests . Forest tenure reforms have been highly varied, ranging from the titling of indigenous territories to the granting of small land areas for forest regeneration or the right to a share in timber revenues. While in many cases these rights have been significant, new statutory rights do not automatically result in rights in practice, and a variety of institutional weaknesses and policy distortions have limited the impacts of change. Through the comparison of selected cases, the chapters explore the nature of forest reform, the extent and meaning of rights transferred or recognized, and the role of authority and citizens' networks in forest governance. They also assess opportunities and obstacles associated with government regulations and markets for forest products and the effects across the cases on livelihoods, forest condition and equity. Culture, Architecture, and Design Amos Rapoport.2005 The three basic questions of EBS are (1) What bio-social, psychological, and cultural characteristics of human beings influence which characteristics of the built environment?; (2) What effects do which aspects of which environments have on which groups of people, under what circumstances, and when, why, and how?; and (3) Given this two-way interaction between people and environments, there must be mechanisms that link them. What are these mechanisms?Focusing on answers to these and other questions, Culture, Architecture, and Design discusses the relationship between culture, the built environment, and design by showing that the purpose of design is to create environments that suit users and is, therefore, user-oriented. Design must also be based on knowledge of how people and environments interact. Thus, design needs to respond to culture. In discussing (1) the nature and role of Environment-Behavior Studies (EBS); (2) the types of environments; (3) the importance of culture; (4) preference, choice, and design; (5) the nature of culture; (6) the scale of culture; and (7) how to make culture usable, Amos Rapoport states that there needs to be a "change from designing for one's own culture to understanding and designing for users" cultures and basing design on research in EBS, anthropology, and other relevant fields. Such changes should transform architecture and design so that it, in fact, does what it claims to do and is supposed to do "create better (i.e., more supportive) environments."

A History of Reading in the West Guglielmo Cavallo,Roger Chartier.1999 Literature has not always been written in the same ways, nor has it been received or read in the same ways over the course of Western civilization. Cavallo (Greek palaeography, U. of Rome La Sapienza), Chartier (Ecole des Hautes Etudes en Sciences Sociales, Paris) and a number of other international contributors, address themes that highlight the transformation of reading methods and materials over the ages, such as the way texts in the Middle Ages were often written with the voice in mind, as they would have been read aloud, or even sung. Articles explore the innovations in the physical evolution of the book, as well as the growth and development of a broad-based reading public.

Undoing Gender Judith Butler.2004-10-22 Undoing Gender constitutes Judith Butler's recent reflections on gender and sexuality, focusing on new kinship, psychoanalysis and the incest taboo, transgender, intersex, diagnostic categories, social violence, and the tasks of social transformation. In terms that draw from feminist and queer theory, Butler considers the norms that govern--and fail to govern--gender and sexuality as they relate to the constraints on recognizable personhood. The book constitutes a reconsideration of her earlier view on gender performativity from Gender Trouble. In this work, the critique of gender norms is clearly situated within the framework of human persistence and survival. And to do one's gender in certain ways sometimes implies undoing dominant notions of personhood. She writes about the New Gender Politics that has emerged in recent years, a combination of movements concerned with transgender, transsexuality, intersex, and their complex relations to feminist and queer theory.

A History of Afro-Hispanic Language John M. Lipski.2005-03-10 The African slave trade, beginning in the fifteenth century, brought African languages into contact with Spanish and Portuguese, resulting in the Africans' gradual acquisition of these languages. In this 2004 book, John Lipski describes the major forms of Afro-Hispanic language found in the Iberian Peninsula and Latin America over the last 500 years. As well as discussing pronunciation, morphology and syntax, he separates legitimate forms of Afro-Hispanic expression from those that result from racist stereotyping, to assess how contact with the African diaspora has had a permanent impact on contemporary Spanish. A principal issue is the possibility that Spanish, in contact with speakers of African languages, may have creolized and restructured - in the Caribbean and perhaps elsewhere - permanently affecting regional and social varieties of Spanish today. The book is accompanied by the largest known anthology of primary Afro-Hispanic texts from Iberia, Latin America, and former Afro-Hispanic contacts in Africa and Asia.

From Silver Screen to Spanish Stage Stuart Nishan Green.2011-05-31 This is the first book-length English-language study of a group of five artists closely linked with the Spanish avant-garde in the 1920s and 1930s, now known as the 'Other' Generation of 27. In the same way that their contemporaries of the celebrated Generation of 27 (which included Federico Garcia Lorca) attempted a revolution of the arts through poetry inspired by European modernism, the 'Other' Generation of 27 attempted to renovate Spanish humour, first in prose, and then in the theatre and cinema. This book demonstrates how these humorists drew on the humour of Chaplin, Keaton, Lubitsch and the Marx Brothers for their stage comedy, and how they stretched the limits of the stage at the time by incorporating cinematic techniques, such as flashback, voice-overs and montage, in their search for new dramatic forms.

Building A Character Constantin Stanislavski.2013-12-04 Building a Character is one of the three volumes that make up Stanislavski's The Acting Trilogy. An Actor Prepares explores the inner preparation an actor must undergo in order to explore a role to the full. In this volume, Sir John Gielgud said, this great director "found time to explain a thousand things that have always troubled actors and fascinated students." Building a Character discusses the external techniques of acting: the use of the body, movement, diction, singing, expression, and control. Creating a Role

describes the preparation that precedes actual performance, with extensive discussions of Gogol's *The Inspector General* and Shakespeare's *Othello*. Sir Paul Scofield called *Creating a Role* "immeasurably important" for the actor. These three volumes belong on any actor's short shelf of essential books.

The Invisible Actor Yoshi Oida, Lorna Marshall. 2020-10-01 *The Invisible Actor* presents the captivating and unique methods of the distinguished Japanese actor and director, Yoshi Oida. While a member of Peter Brook's theatre company in Paris, Yoshi Oida developed a masterful approach to acting that combined the oriental tradition of supreme and studied control with the Western performer's need to characterise and expose depths of emotion. Written with Lorna Marshall, Yoshi Oida explains that once the audience becomes openly aware of the actor's method and becomes too conscious of the actor's artistry, the wonder of performance dies. The audience must never see the actor but only his or her performance. Throughout Lorna Marshall provides contextual commentary on Yoshi Oida's work and methods. In a new foreword to accompany the Bloomsbury Revelations edition, Yoshi Oida revisits the questions that have informed his career as an actor and explores how his skilful approach to acting has shaped the wider contours of his life.

Legislative Theatre Augusto Boal. 2005-07-28 Augusto Boal's reputation is now moving beyond the realms of theatre and drama therapy, bringing him to the attention of a wider public. Legislative Theatre is the latest and most remarkable stage in his work. 'Legislative Theatre' is an attempt to use Boal's method of 'Forum Theatre' within a political system to create a truer form of democracy. It is an extraordinary experiment in the potential of theatre to affect social change. At the heart of his method of Forum Theatre is the dual meaning of the verb 'to act': to perform and to take action. Forum Theatre invites members of the audience to take the stage and decide the outcome, becoming an integral part of the performance. As a politician in his native Rio de Janeiro, Boal used Forum Theatre to motivate the local populace in generating relevant legislation. In Legislative Theatre Boal creates new, theatrical, and truly revolutionary ways of involving everyone in the democratic process. This book includes: * a full explanation of the genesis and principles of Legislative Theatre * a description of the process in operation in Rio * Boal's essays, speeches and lectures on popular theatre, Paulo Freire, cultural activism, the point of playwrighting, and much else besides.

Hollywood Censored Gregory D. Black. 1994 After a series of sex scandals rocked the film industry in 1922, movie moguls hired Will Hays to clear the image of movies. Hays tried a variety of ways to regulate movies before adopting what became known as the production code. Written in 1930 by a St Louis priest, the code stipulated that movies stress proper behaviour, respect for government, and 'Christian values'. The Catholic Church reinforced these efforts by launching its Legion of Decency in 1934. Intended to force Hays and Hollywood to censor films, the Legion of Decency engineered the appointment of Joseph Breen as head of the Production Code Administration. For the next three decades, Breen, Hays, and the Catholic Legion of Decency virtually controlled the content of all Hollywood films.
