Multilingual Learners and Academic Literacies Daniella Molle,Edynn Sato,Timothy Boals,Carol A. Hedgspeth.2015-03-05 Shifting the discourse from a focus on academic language to the more dynamic but less researched construct of academic literacies, this volume addresses three key questions: • What constitutes academic literacy? • What does academic literacy development in adolescent multilingual students look like and how can this development be assessed? • What classroom contexts foster the development of academic literacies in multilingual adolescents? The contributing authors provide divergent definitions of academic literacies and use dissimilar theoretical and methodological approaches to study literacy development. Nevertheless, all chapters reflect a shared conceptual framework for examining academic literacies as situated, overlapping, meaning-making practices. This framework foregrounds students' participation in valued disciplinary literacy practices. Emphasized in the new college and career readiness standards, the notion of disciplinary practices allows the contributing authors to bridge the language/content dichotomy, and take a more holistic as well as nuanced view of the demands that multilingual students face in general education classrooms. The volume also explores the implications of the emphasis on academic literacy practices for classroom instruction, research, and policy.

Guidelines for developing listening items, and procedures that can be used in peer review and task revision are also provided. Who Says Women Can't Be Computer Programmers? Tanya Lee Stone.2018-02-20 A picture book biography of Ada Lovelace, the woman recognized today as history's first computer programmer—she imagined them 100 years before they existed! In the early nineteenth century lived Ada Byron: a young girl with a wild and wonderful imagination. The daughter of internationally acclaimed poet Lord Byron, Ada was tutored in science and mathematics from a very early age. But Ada's imagination was never meant to be tamed and, armed with the fundamentals of math and engineering, she came into her own as a woman of ideas—equal parts mathematician and philosopher. From her whimsical beginnings as a gifted child to her most sophisticated notes on Charles Babbage's Analytical Engine, this book celebrates the woman recognized today as the first computer programmer. Examining Listening Ardeshir Geranpayeh,Lynda Taylor.2013-03-27 This volume examines the nature of second language listening proficiency and how it can be assessed. The book highlights the need for test developers to provide a clear explication of the ability constructs which underpin the tests they offer in the public domain. This is increasingly necessary if claims about the validity of test score interpretation and use are to be supported both logically and with empirical evidence. It operationalises a comprehensive test validation framework which adopts a socio-cognitive perspective. The framework embraces six core components, examining and then analysing Cambridge ESOL listening tasks from the following perspectives: Test Taker; Cognitive Validity; Context Validity; Scoring Validity; Criterion-related Validity; and Consequential Validity.

Sexual Identities in English Language Education Cynthia D. Nelson.2008-11-01 What pedagogic challenges and opportunities arise as gay, lesbian, and queer themes and perspectives become an increasingly visible part of English language classes within a variety of language learning contexts and levels? What sorts of teaching practices are needed in order to productively explore the sociosexual aspects of language, identity, culture, and communication? How can English language teachers promote language learning through the development of teaching approaches that do not presume an exclusively heterosexual world? Drawing on the experiences of over 100 language teachers and learners, and using a wide range of research and theory, especially queer education research, this innovative, cutting-edge book skillfully interweaves classroom voices and theoretical analysis to provide informed guidance and a practical framework of macrostrategies English language teachers (of any sexual identification) can use to engage with lesbian/gay themes in the classroom. In so doing, it illuminates broader questions about how to address social diversity, social inequity, and social inquiry in a classroom context.

But Sifford kept playing, becoming the first Black golfer to win a PGA tournament and eventually ranking among the greats in golf.
