Business Planning David Butler.2000 A readable and structured guide for the increasing numbers of people each year who consider setting up a small business or becoming self-employed. 'Business Planning' outlines the options and risks involved in setting up a business. The importance of thorough planning is often overlooked and only becomes evident if the business fails. This is highlighted in a recent study by the SFEDI of 486 bankers and accountants where lack of planning was the most common reason cited as to why businesses fail. 'Business Planning' shows how to avoid this failure by focusing on the planning stage and building on this framework as the business develops. This is the only book based around the Small Firms Enterprise Development Initiative (SFEDI) for first time owner-managers. It contains all the underpinning factual information required to prepare and present a successful Business Plan for presentation to a bank manager, or an alternative potential source of finance, or for use in an NVQ portfolio. It is in line with the major syllabuses for Business Start-Up, and can be used as a course book for anyone completing a formal NVQ level 3 qualification in this area, with tips on NVQ structure and assessment. Covers all the essential information for preparing a business plan for funding applications, or as part of an NVQ Endorsed by Tony Robinson at SFEDI and designed around approved good practice in this area. Written in clear English with practical examples and tips for assessment

International Practices to Promote Budget Literacy Harika Masud, Helene Pfeil, Sanjay Agarwal, Alfredo Gonzalez Briseno. 2017-06-28 Budget literacy is defined as 'the ability to read, decipher, and understand public budgets to enable and enhance meaningful citizen participation in the budget process'. It is comprised of two main parts - (i) a technical understanding of public budgets, including familiarity with government spending, tax rates and public debt and; (ii) the ability to engage in the budget process, comprising of practical knowledge on day-to-day issues, as well as an elementary understanding of the economic, social and political implications of budget policies, the stakeholders involved and when and how to provide inputs during the annual budget cycle. Given that no international standards or guidelines have been established for budget literacy education to date, this book seeks to address this gap by taking stock of illustrative initiatives promoting budget literacy for youth in selected countries. The underlying presumption is that when supply-side actors in the budget process -- governments -- simplify and disseminate budget information for demand-side actors -- citizens -- this information will then be used by citizens to

provide feedback on the budget. However, since citizens are often insufficiently informed about public budgets to constructively participate in budget processes one way to empower them and to remedy the problem of budget illiteracy is to provide budget-literacy education in schools to youth, helping them evolve into civic-minded adults with the essential knowledge needed for analyzing their government's fiscal policy objectives and measures, and the confidence and sense of social responsibility to participate in the oversight of public resources. This book elaborates on approaches, learning outcomes, pedagogical strategies and assessment approaches for budget literacy education, and presents lessons that are relevant for the development, improvement, or scaling up of budget literacy initiatives.
