*From Mummers to Madness* David Taylor.2021-08-30 This book considers developments in the production and consumption of popular music in England over a period of some two hundred years, which saw dramatic changes in the socio-economic, demographic and cultural life of the country. Popular music, it is argued, was not simply a response to the wider developments that were taking place but contributed to the ongoing process of adaptation and change.

*Stories of Practice: Tourism Policy and Planning* Dr Dianne Dredge, Professor John Jenkins.2012-11-28 Analyses of contemporary tourism planning and policymaking practice at local to global scales is lacking and there is an urgent need for research that informs theory and practice. Illustrated with a set of cohesive, theoretically-informed, international case studies constructed through storytelling, this volume expands readers' knowledge about how tourism planning and policymaking takes place. Challenging traditional notions of tourism planning and policy processes, this book also provides critical insights into how theoretical concepts and frameworks are applied in tourism planning and policy making practice at different spatial scales. The book engages readers in the intellectual, political, moral and ethical issues that often surround tourism policymaking and planning, highlighting the great value of reflective learning grounded in the social sciences and revealing the complexity of tourism planning and policy.

**So Far and Yet So Close** W. M Elofson.2015 So Far and Yet So Close provides a comparative study of frontier cattle ranching in two societies on opposite ends of the globe. It is also an environmental history that at the same time centres on both the natural and frontier environments. There are many points at which the western Canadian and northern Australian cattle frontiers evoke comparisons. Most obviously they came to life at about the same time: late 1870s-early 1880s. In both cases corporations were heavy investors and utilized an open range system in which tens of thousands of cattle roamed over thousands of square acres. Rancher.

**How Modern Science Came Into the World** H. F. Cohen.2010 Once upon a time 'The Scientific Revolution of the 17th century' was an innovative concept that inspired a stimulating narrative of

how modern science came into the world. Half a century later, what we now know as 'the master narrative' serves rather as a strait-jacket - so often events and contexts just fail to fit in. No attempt has been made so far to replace the master narrative. H. Floris Cohen now comes up with precisely such a replacement. Key to his path-breaking analysis-cum-narrative is a vision of the Scientific Revolution as made up of six distinct yet narrowly interconnected, revolutionary transformations, each of some twenty-five to thirty years' duration. This vision enables him to explain how modern science could come about in Europe rather than in Greece, China, or the Islamic world. It also enables him to explain how half-way into the 17th century a vast crisis of legitimacy could arise and, in the end, be overcome.

**Architecture and Modern Literature** David Anton Spurr.2017-05-09 Architecture and Modern Literature explores the representation and interpretation of architectural space in modern literature from the early nineteenth century to the present, with the aim of showing how literary production and architectural construction are related as cultural forms in the historical context of modernity. In addressing this subject, it also examines the larger questions of the relation between literature and architecture and the extent to which these two arts define one another in the social and philosophical contexts of modernity. Architecture and Modern Literature will serve as a foundational introduction to the emerging interdisciplinary study of architecture and literature. David Spurr addresses a broad range of material, including literary, critical, and philosophical works in English, French, and German, and proposes a new historical and theoretical overview of this area, in which modern forms of meaning in architecture and literature are related to the discourses of being, dwelling, and homelessness.

Northern Territory Dictionary of Biography D. Carment,Christine Edward,Barbara James,Robyn Maynard,Alan Powell,Helen J. Wilson.2008 This revised edition of the Northern Territory Dictionary of Biography brings together the entries from the original three volumes, published in 1990, 1992 and 1996. The Dictionary spans the period from the early British and French explorers of the Northern Territory coast to the mid 1990s and aims to provide a broad reflection of life in the Territory rather than focusing on eminent public figures. In some cases this has meant that some subjects are included about whom relatively little is known. Authors come from the widest possible cross-section of the community and there is a considerable range of writing styles. The principal interest of the volume is the Northern Territory. In all cases, the Territory experience of subjects, however eminent they might have been elsewhere, is thus the focal point of entries.This volume is available on CD (ISBN 9780980384697) and in this limited paperback edition.

Homicide in American Fiction, 1798-1860 David Brion Davis.2018-03-15 Homicide has many social and psychological implications that vary from culture to culture and which change as people accept

new ideas concerning guilt, responsibility, and the causes of crime. A study of attitudes toward homicide is therefore a method of examining social values in a specific setting. *Homicide in American Fiction, 1798-1860* is the first book to contrast psychological assumptions of imaginative writers with certain social and intellectual currents in an attempt to integrate social attitudes toward such diverse subjects as human evil, moral responsibility, criminal insanity, social causes of crime, dueling, lynching, the unwritten law of a husband's revenge, and capital punishment. In addition to works of literary distinction by Cooper, Hawthorne, Irving, and Poe, among others, Davis considers a large body of cheap popular fiction generally ignored in previous studies of the literature of this period. This is an engrossing study of fiction as a reflection of and a commentary on social problems and as an influence shaping general beliefs and opinions.
