Tattooed Memory Abdelkébir Khatibi.2016-07-02 *Tattooed Memory (La Mémoire tatouée)* is the first novel of the great Moroccan critic and novelist Abdelkébir Khatibi (1938-2009). Only one other novel has been translated into English (*Love In Two Languages*, 1991). Khatibi belongs to the generation following the foundational generation of writers such as Driss Chraïbi. For Khatibi's generation, French colonialism is a vibrant memory - but a memory from childhood. *Tattooed Memory* is part bildungsroman, part anticolonial treatise, and part language experiment, and it takes us from earliest childhood memory to young adulthood.

Promise at Dawn Romain Gary.2017-10-31 A classic of modern French literature, the thrilling real-life story of the military hero, ambassador, ladies man, writer, and loving son I grew up longing for the day when I could tear down the veil of darkness and absurdity concealing the true face of the universe and discover at last a smile of kindness and wisdom; I grew up in the certitude that one day I should help my fellow men to wrest the world from our enemies and give back the earth to those who ennoble it with their courage and warm it with their love. *Promise at Dawn* begins as the story of a mother's sacrifice: alone and poor, she fights fiercely to give her son the very best. Romain Gary chronicles his childhood in Russia, Poland, and on the French Riviera; he recounts his adventurous life as a young man fighting for France in World War II. But above all he tells the story of the love for his mother that was his very life—their secret and private planet, their wonderland “born out of a mother's murmur into a child's ear, a promise whispered at dawn of future triumphs and greatness, of justice and love.”

Phytochemicals in Nutrition and Health Mark S. Meskin, Wayne R. Bidlack, Audra J. Davies, Stanley T. Omaye.2002-03-19 Are soy isoflavones neuroprotective? Just how different is one species of Echinacea from another? Which phytochemicals will be effective as therapeutic agents in vivo? Supported by solid scientific research, *Phytochemicals in Nutrition and Health* helps provide answers to these and other probing questions concerning the mechanisms of action associated with beneficial phytochemical groups. It examines new areas such as the efficacy and safety of medicinal herbs, the use of biotechnology to manipulate and enhance the phytochemical profiles of various plants, and the pharmacokinetics of phytochemicals in humans. The editors also expand discussion presented in their previous books on phytochemicals. They explore new research on phytochemicals in the Vaccinium family (cranberries, blueberries and bilberries), wine, and oilseeds, and the biological activity of Echinacea in humans. Additional chapters present new information about isothiocyanates, lycopene, carotenoids other than beta-carotene, tocotrienols, and phytoestrogens. Highlighting phytochemicals that have significant potential for promoting health or preventing disease, *Phytochemicals in Nutrition and Health* expands discussions of appropriate research methodologies and new technologies in this exciting field.

The Plague Albert Camus.1991-05-07 “Its relevance lashes you across the face.” —Stephen Metcalf, *The Los Angeles Times* • “A redemptive book, one that wills the reader to believe, even in a time of despair.” —Roger Lowenstein, *The Washington Post* A haunting tale of human resilience and hope in the face of unrelieved horror, Albert Camus' iconic novel about an epidemic ravaging the people of a North African coastal town is a classic of twentieth-century literature. The townspeople of Oran are in the grip of a deadly plague, which condemns its victims to a swift and horrifying death. Fear, isolation and claustrophobia follow as they are forced into quarantine. Each person responds in their own way to the lethal disease: some resign themselves to fate, some seek blame, and a few, like Dr. Rieux, resist the terror. An immediate triumph when it was published in 1947, *The Plague* is in part an allegory of France's suffering under the Nazi occupation, and a timeless story of bravery and determination against the precariousness of human existence.

The Violence of Modernity Debarati Sanyal.2020-03-03 *The Violence of Modernity* turns to Charles Baudelaire, one of the most canonical figures of literary modernism, in order to reclaim an aesthetic legacy for ethical inquiry and historical critique. Works of modern literature are commonly theorized as symptomatic responses to the trauma of history. In a climate that tends to privilege crisis over critique, Debarati Sanyal argues that it is urgent to rethink literary experience in terms that recall its contestatory potential. Examining Baudelaire's poems afresh, she shifts the focus of critical attention toward an account of modernism as an active engagement with violence, specifically the violence of history in nineteenth-century France. Sanyal analyzes a literary current that uses the traditional hallmarks of modernism—irony, intertextuality, self-reflexivity, and formalism—to challenge the historical violence of modernity. Baudelaire and the committed ironists writing in his wake teach us how to read and resist the violence of history, and thereby to challenge the melancholy tenor of our contemporary wound culture. In a series of provocative readings, Sanyal presents Baudelaire's poetry as an aesthetic form that contests historical violence through rhetorical strategies of complicity, counterviolence, and critique. The book develops a new account of Baudelaire's significance as a modernist by dislodging him both from his traditional status as a practitioner of art for art's sake and from his more recent incarnation as the poet of trauma. Following her extended analysis of Baudelaire's poetry, Sanyal in later chapters considers a number of authors influenced by his strategies—including Rachilde, Virginie Despentes, Albert Camus, and Jean-Paul Sartre—to examine the relevance of their interventions for our current climate of trauma and terror. The result is a study that underscores how Baudelaire's legacy continues to energize literary engagements with the violence of modernity.

Anti-ageing Medicine Astrid Stuckelberger.2008 The 21st century technological development is revolutionizing medicine and health care, bringing new hopes to human suffering by offering cures and treatments which were unthinkable a few decades ago. This is where anti-ageing medicine finds its niche. Anti-ageing medicine aims at slowing, arresting, and reversing phenomena associated with ageing by merging biotechnological innovation and engineered solutions. Ideally, by means of the newest medical technology, the body machinery should be kept fit and at peak performance all life long. Early detection of age-related dysfunction should thus be fixed at any age with interventions such as metabolic fine tuning, enhancement, regeneration, restoration or replacement of body parts (i.e. organs, skin, bone or muscle). It covers a vast array of domains: from cell therapy to pharmaceutical interventions, from bio-surgery to aesthetic surgery, from human enhancement to fortified food, from smart housing and robots to toxic-free environments. Anti-ageing medicine holds promises but also significant risks and safety issues which are addressed in this book. It presents the latest scientific evidence on what works or does not work. It also provides public policy recommendations to ensure the protection of consumers and their rights while encouraging research and development. This book is intended for academics, health professionals, business persons, consumers and policy-makers interested in the latest evidence and ethical issues about anti-ageing medicine.

The Ocean Challenge Badge Food and Agriculture Organization of the United Nations.2018-05-08 The ocean covers 70 percent of the Earth's surface, and is essential for life on our planet - even for those of us who live nowhere near the sea! It provides us all with food and other materials that we need, regulates our climate and provides half of the oxygen we breathe. The ocean also offers us various means of transport and opportunities for recreation. People have long thought that the ocean was so wide and bountiful that it would go on supplying our needs forever, but this is not the case: human activities are causing significant damage to life in the ocean. People are often unaware of the problems created by this heavy reliance, as few of us have the opportunity to look beneath the surface of the sea and see the damage that our actions have caused. This is where the Ocean Challenge Badge comes in: let it take you on a journey to discover the ocean! It is packed with activities to help you learn about how the ocean works, the creatures that live in it, and just how important it is in our everyday lives. You will also discover how YOU can play a role in protecting our ocean for future generations. We hope you will be inspired to take the challenge and celebrate our ocean. So dive in and begin your aquatic discoveries!

Visual Arts in Cameroon Schemmel, Annette.2016-02-27 Annette Schemmel provides a highly illuminating case study of the major actors, discourses and paradigm that shaped the history of visual arts in Cameroon during the second part of the 20th century. Her book meticulously reconstructs the multiple ways of artistic knowledge acquisition - from the consolidation of the *Système de Grands Frères* in the 1970s to the emergence of more discursively oriented small artists' initiatives which responded to the growing NGO market of social practice art opportunities in the 2000s. Based on archival research, participant observation and in depth interviews with art practitioners in Douala and Yaoundé, this study is a must read for everyone who wants to better understand the vibrant artistic scenes in countries like Cameroon, which until today lack a proper state-funded infrastructure in the arts.

Global Ecology and Oceanography of Harmful Algal Blooms Patricia M. Glibert,Elisa Berdalet,Michele A. Burford,Grant C. Pitcher,Mingjiang Zhou.2018-04-26 Harmful algal blooms (HABs) - blooms that cause fish kills, contaminate seafood with toxins, or cause human or ecological health impacts and harm to local economies - are occurring more often, in more places and lasting longer than in past decades. This expansion is primarily the result of human activities, through increased nutrient inputs and various aspects of climate change. The Global Ecology and Oceanography of Harmful Algal Blooms (GEOHAB) programme promoted international collaboration to understand HAB population dynamics in various oceanographic regimes and to improve the prediction of HABs. This volume introduces readers to the overarching framework of the GEOHAB programme, factors contributing to the global expansion of harmful algal blooms, the complexities of HABs in different habitats, and the forward-looking issues to be tackled by the next generation of GEOHAB, GlobalHAB. The programme brought together an international team of contributing scientists and ecosystem managers, and its outcomes will greatly benefit the international research community.

The Future is an Ancient Lake Caterina Batello,Marzio Marzot,Adamou Harouna Touré,Food and Agriculture Organization of the United Nations.2004 This art book contains over 350 color photographs by Marzio Marzot, documenting information on traditional food production systems, scientific details and notes from a journey through one of the world's outstanding region: the Lake Chad Basin in Africa. It provides an insight into the life and customs of the local farmers, fishermen and pastoralists who foster, maintain and utilize biodiversity in their traditional agricultural systems, thereby deploying the knowledge and techniques that they have accumulated over many centuries. FAO promotes the sharing of experiences and awareness related to the role of rural people in conserving and sustainably using agricultural biodiversity. Building on the local knowledge and social organization of farmers is indispensable. The images in this book are a tribute to the knowledge and work of farmers and their care for the land.

The Frailty Model Luc Duchateau,Paul Janssen.2007-10-23 Readers will find in the pages of this book a treatment of the statistical analysis of clustered survival data. Such data are encountered in many scientific disciplines including human and veterinary medicine, biology, epidemiology, public health and demography. A typical example is the time to death in cancer patients, with patients clustered in hospitals. Frailty models provide a powerful tool to analyze clustered survival data. In this book different methods based on the frailty model are described and it is demonstrated how they can be used to analyze clustered survival data. All programs used for these examples are available on the Springer website.
