*Wake Up, Woods* Michael A. Homoya,Shane Gibson.2019-10 Early in the year, our North American forests come to life as native wildflowers start to push up through patches of snow. With longer days

and sunlight streaming down through bare branches of towering trees, life on the forest floor awakens from its winter sleep. Plants such as green dragon, squirrel corn, and bloodroot interact with their pollinators and seed dispersers and rush to create new life before the trees above leaf out and block the sun's rays. *Wake Up, Woods* showcases the splendor of our warming forests and offers clues to nature's annual springtime floral show as we walk in our parks and wilderness areas, or even in shade gardens around our homes. Readers of *Wake Up, Woods* will see that Gillian Harris, Michael Homoya and Shane Gibson, through illustrations and text, present a captivating look into our forests' biodiversity, showing how species depend on plants for food and help assure plant reproduction. This book celebrates some of nature's most fascinating moments that happen in forests where we live and play.

*A New Critical History of Old English Literature* Stanley B. Greenfield,Daniel G. Calder.1996-05-01 Anglo-Saxon prose and poetry is, without question, the major literary achievement of the early

Middle Ages (c. 700-1100). In no other vernacular language does such a vast store of verbal treasures exist for so extended a period of time. For twenty years the definitive guide to that literature has been Stanley B. Greenfield's 1965 *Critical History of Old English Literature*. Now this classic has been extensively revised and updated to make it more valuable than ever to both the student and scholar.

**Musical Performance** Stan Godlovitch.2002-01-31 Most music we hear comes to us via a recording medium on which sound has been stored. Such remoteness of music heard from music made has become so commonplace it is rarely considered. *Musical Performance: A Philosophical Study* considers the implications of this separation for live musical performance and music-making. Rather than examining the composition or perception of music as most philosophical accounts of music do, Stan Godlovitch takes up the problem of how the tradition of active music playing and performing has been challenged by technology and what problems this poses for philosophical aesthetics. Where does the value of musical performance lie? Is human performance of music a mere transfer medium? Is the performance of music more expressive than recorded music? *Musical Performance* poses questions such as these to develop a fascinating account of music today. musicians - but via some recording medium on which sound has been stored.

*The Oxford Handbook of Mobile Music Studies, Volume 1* Sumanth Gopinath,Jason Stanyek.2014-03

The two volumes of The Oxford Handbook of Mobile Music Studies consolidate an area of scholarly inquiry that addresses how mechanical, electrical, and digital technologies and their corresponding economies of scale have rendered music and sound increasingly mobile-portable, fungible, and ubiquitous. At once a marketing term, a common mode of everyday-life performance, and an instigator of experimental aesthetics, mobile music opens up a space for studying the momentous transformations in the production, distribution, consumption, and experience of music and sound that took place between the late nineteenth and the early twenty-first centuries. Taken together, the two volumes cover a large swath of the world-the US, the UK, Japan, Brazil, Germany, Turkey, Mexico, France, China, Jamaica, Iraq, the Philippines, India, Sweden-and a similarly broad array of the musical and nonmusical sounds suffusing the soundscapes of mobility. Volume 1 provides an introduction to the study of mobile music through the examination of its devices, markets, and theories. Conceptualizing a long history of mobile music extending from the late nineteenth century

to the present, the volume focuses on the conjunction of human mobility and forms of sound production and reproduction. The volume's chapters investigate the MP3, copyright law and digital downloading, music and cloud computing, the iPod, the transistor radio, the automated call center, sound and text messaging, the mobile phone, the militarization of iPod usage, the cochlear implant, the portable sound recorder, listening practices of schoolchildren and teenagers, the ringtone, mobile music in the urban soundscape, the boombox, mobile music marketing in Mexico and Brazil, music piracy in India, and online radio in Japan and the US.

Openness, Secrecy, Authorship Pamela O. Long.2003-04-30 A history of the book and intellectual property that includes military technology and military secrets. Winner of The Morris D. Forkosch Prize from the Journal of the History of Ideas In today's world of intellectual property disputes, industrial espionage, and book signings by famous authors, one easily loses sight of the historical nature of the attribution and ownership of texts. In *Openness, Secrecy, Authorship: Technical Arts and the Culture of Knowledge from Antiquity to the Renaissance*, Pamela Long combines intellectual history with the history of science and technology to explore the culture of authorship. Using classical Greek as well as medieval and Renaissance European examples, Long traces the definitions, limitations, and traditions of intellectual and scientific creation and attribution. She examines these attitudes as they pertain to the technical and the practical. Although Long's study follows a chronological development, this is not merely a general work. Long is able to examine events and sources within their historical context and locale. By looking at Aristotelian ideas of Praxis, Techne, and Episteme. She explains the tension between craft and ideas, authors and producers. She discusses, with solid research and clear prose, the rise, wane, and resurgence of

priority in the crediting and lionizing of authors. Long illuminates the creation and re-creation of ideas like trade secrets, plagiarism, mechanical arts, and scribal culture. Her historical study complicates prevailing assumptions while inviting a closer look at issues that define so much of our society and thought to this day. She argues that a useful working definition of authorship permits a gradation of meaning between the poles of authority and originality, and guides us through the term's nuances with clarity rarely matched in a historical study.

Self-images André Rival, Klaus Honnef. 1995 Andre Rival, at home in both Paris and Berlin, has created a fascinating project out of a relatively simple idea: 100 women taking photographs of themselves. The outcome is both startling and impressive. It is an expression of contemporary female identity - self-aware, distinctive and thoroughly positive, in a series of nude photographs that inexorably capture and hold our attention, revealing at the same time the artist's highly creative approach to the medium of photography and to the individual selves of the women portrayed. The author describes his project in this way: We are inundated with pictures of women in the media. Ordinarily, the pictures we see seek to achieve a kind of 'sameness' based on unwritten ideals of beauty; physical perfection, total fitness become the determining factors. These images of women, provoked as they are by the media industry, awakened in me the urge to confront both that industry and myself with something else. I chose to set aside my own ways of thinking and do a series of 100 women in which it was not I who would put together the photographs, but the women themselves. For this purpose, I gave them each a shutter-switch and left the room. That represented the beginning of the attempt to enable the women to become photographic subjects rather than objects; they were left to decide on their own which personal image of themselves they wanted to convey. The conditions were the same for all of the women: the same lighting, the same white background

and the same unchanged camera position. It was essential to fix the location of the camera, so that the women did not perceive themselves as being pursued by an 'observer'; instead, they were able to establish distance and camera angle themselves with the aid of a video screen that showed them each camera exposure as a still photo.

*The Body of the Artisan* Pamela H. Smith. 2018-01-16 Since the time of Aristotle, the making of knowledge and the making of objects have generally been considered separate enterprises. Yet during the late sixteenth and early seventeenth centuries, the two became linked through a new philosophy known as science. In *The Body of the Artisan*, Pamela H. Smith demonstrates how much early modern science owed to an unlikely source—artists and artisans. From goldsmiths to locksmiths and from carpenters to painters, artists and artisans were much sought after by the new scientists for their intimate, hands-on knowledge of natural materials and the ability to manipulate them. Drawing on a fascinating array of new evidence from northern Europe including artisans' objects and their writings, Smith shows how artisans saw all knowledge as rooted in matter and nature. With nearly two hundred images, *The Body of the Artisan* provides astonishingly vivid examples of this Renaissance synergy among art, craft, and science, and recovers a forgotten episode of the Scientific Revolution—an episode that forever altered the way we see the natural world.

**Architecture in the Age of Printing** Mario Carpo. 2017-02-10 A history of the influence of communication technologies on Western architectural theory. The discipline of architecture depends

on the transmission in space and time of accumulated experiences, concepts, rules, and models. From the invention of the alphabet to the development of ASCII code for electronic communication, the process of recording and transmitting this body of knowledge has reflected the dominant information technologies of each period. In this book Mario Carpo discusses the communications media used by Western architects, from classical antiquity to modern classicism, showing how each medium related to specific forms of architectural thinking. Carpo highlights the significance of the invention of movable type and mechanically reproduced images. He argues that Renaissance architectural theory, particularly the system of the five architectural orders, was consciously developed in response to the formats and potential of the new printed media. Carpo contrasts architecture in the age of printing with what preceded it: Vitruvian theory and the manuscript format, oral transmission in the Middle Ages, and the fifteenth-century transition from script to print. He also suggests that the basic principles of typographic architecture thrived in the Western world as long as print remained our main information technology. The shift from printed to digital representations, he points out, will again alter the course of architecture.

*Early Germanic Literature and Culture* Brian Murdoch, Malcolm Kevin Read. 2004 A collection of fresh essays examining the wide scope and significance of early Germanic culture and literature. The first volume of this set views the development of writing in German with respect to broad aspects of the early Germanic past, drawing on a range of disciplines including archaeology, anthropology, and philology in addition to literary history. The first part considers the whole concept of Germanic antiquity and the way in which it has been approached, examines classical writings about Germanic origins and the earliest Germanic tribes, and looks at the two great influences on the early Germanic world: the confrontation with the Roman Empire and the displacement of Germanic religion by Christianity. A chapter on orality -- the earliest stage of all literature -- provides a bridge to the earliest Germanic writings. The second part of the book is devoted to written Germanic -- rather than German -- materials, with a series of chapters looking first at the Runic inscriptions, then at Gothic, the first Germanic language to find its way onto parchment (in Ulfilas's Bible translation). The topic turns finally to what we now understand as literature, with general surveys of the three great areas of early Germanic literature: Old Norse, Old English, and Old High and Low German. A final chapter is devoted to the Old Saxon Heliand. Contributors: T. M. Andersson, Heinrich Beck, Graeme Dunphy, Klaus Düwel, G. Ronald Murphy, Adrian Murdoch, Brian Murdoch, Rudolf Simek, Herwig Wolfram. Brian Murdoch and Malcolm Read both teach in the German Department of the University of Stirling in Scotland.

*Aesthetics of the Virtual* Roberto Diodato. 2012-11-15 Reconfigures classic aesthetic concepts in relation to the novelty introduced by virtual bodies. Arguing that the virtual body is something new—namely, an entity that from an ontological perspective has only recently entered the

world—Roberto Diodato considers the implications of this kind of body for aesthetics. Virtual bodies insert themselves into the space opened up by the famous distinction in Aristotle’s *Physics* between natural and artificial beings—they are both. They are beings that are simultaneously events; they are images that are at once internal and external; they are ontological hybrids that exist only in the interaction between logical-computational text and human bodies endowed with technological prostheses. Pursuing this line of thought, Diodato reconfigures classic aesthetic concepts such as mimesis, representation, the relation between illusion and reality, the nature of images and imagination, and the theory of sensory knowledge. Roberto Diodato is Associate Professor of Aesthetics at the Catholic University of the Sacred Heart in Milan, Italy. Justin L. Harmon is a teaching assistant in the Philosophy Department at the University of Kentucky. Silvia Benso is Professor of Philosophy at the Rochester Institute of Technology.

**The Anglo-Saxon Minor Poems** Elliott Van Kirk Dobbie.1942

Fragments Of A Faith Forgotten (Annotated Edition) G. R. S. Mead.2013-11-08 The writing of the present work has been a congenial task to Mr. Mead, and he has brought to bear lovingly and zealously upon the portraiture of the figure of Christ and of early Christianity, all the knowledge which a deep study of Oriental religions from their emotional side could furnish. The outset that there is very little of what is commonly regarded as the Theosophic method apparent in the work, which is the product of a scholarly though withal very devotional spirit. Mr. Mead's aim has been to enable the reader to obtain a glimpse of a world of which he has never heard at school, and of which no word is ever breathed from the pulpit; to take him away from the pictures which the rationalists and the apologists have presented, and to enable him to obtain an unimpeded view of that wonderful panorama of religious strife which the first two centuries of our era presented. He will here see a religious world of immense activity, a vast upheaval of thought and a strenuousness of religious endeavor to which the history of the Western world gives no parallel. Thousands of schools and communities on every hand, striving and contending, a vast freedom of thought, a mighty effort to live the religious life. Here he finds innumerable points of contact with other' religions; he moves in an atmosphere of freedom of which he has previously had no experience in Christian tradition. Who are all these people—not fishermen and slaves and the poor and destitute, though those are striving too—but these men of learning and ascetic life, saints and sages as much as many others to whom the name has been given with far less reason ?
