Theocratic Democracy Nachman Ben-Yehuda.2010-11-29 The state of Israel was established in 1948 as a Jewish democracy without a legal separation between religion and the state. An expert on the construction of social and moral problems, Nachman Ben-Yehuda examines more than 50 years of media-reported unconventional and deviant behaviour by the Haredi community.

Religion and Politics in the 21st Century Natalia

Vlas.2013-07-26 Religion and Politics in the 21st Century is composed of a number of articles that were presented during the 2012 international conference on "Religion and Politics in the Globalization Era" organized by the Centre for Political Analysis in Cluj-Napoca, Romania. With careful attention given to 21st century religious resurgence and its dynamic interactions with political structures and the public sphere, the present volume captures a wide variety of perspectives on contemporary religion and politics, ranging from theoretical approaches to case studies and from analyzing global facets to exploring local situations. Its thematic richness and its careful exploration of not only present realities, but also of patterns of past interactions and of possible future directions, render this volume a valuable resource for scholars, policy makers and the general public as well.

Reinventing Khomeini Daniel Brumberg.2001-04-15

Reinventing Khomeini offers a new interpretation of the political battles that paved the way for reform in Iran. Brumberg argues that these conflicts did not result from a sudden ideological shift; nor did the election of President Mohammad Khatami in 1997 really defy the core principles of the Islamic Revolution. To the contrary, the struggle for a more democratic Iran can be traced to the revolution itself, and to the contradictory agendas of the revolution's founding father, Ayatollah Ruhollah Khomeini. A complex figure, Khomeini was a fervent champion of Islam, but while he sought a Shi'ite vision of clerical rule under one Supreme Leader, he also strove to mesh that vision with an implicitly Western view of mass participatory politics. The intense magnetism and charisma of the ayatollah obscured this paradox. But reformers in Iran today, while rejecting his autocratic vision, are reviving the constitutional notions of government that he considered, and even casting themselves as the bearers of his legacy. In Reinventing Khomeini, Brumberg proves that the ayatollah is as much the author of modern Iran as he is the symbol of its fundamentalist past.

The Dominant Ideology Thesis (RLE Social Theory) Bryan S.
Turner, Nicholas Abercrombie, Stephen Hill. 2014-09-15 As a
radical critique of theoretical sociological orthodoxy, The
Dominant Ideology Thesis has generated controversy since first
publication. It has also been widely accepted, however, as a major
critical appraisal of one central theoretical concern within
modern Marxism and an important contribution to the current
debate about the functions of ideology in social life.

Punishment and Culture María José Falcón y Tella, Fernando
Falcón y Tella. 2006-05-01 This volume critically explores the
basis and the goal of punishment from the standpoint of the right
to punish. Studies and works dedicated to punishment are scarce
compared to those dedicated to Crime Theory or some aspect
thereof. The book reviews the main doctrines that have dealt with
the theme of punishment from Antiquity to the present, not
limiting itself to the legal-philosophical sphere but also analyzing
the contributions from other social sciences. It then explores how
these are reflected in the sphere of Positive Law. Moving from the
most abstract and general to the most concrete and specific,
various themes relating to the concept of punishment are

distinguished. These themes are not exactly equivalent but are, nevertheless, often confused with one another. They are: Punishment; Punitive Practice; Sentence and Penalty. Of these the third – Sentence, which is almost the least generic concept dealt with, having to do with that area of law which basically constitutes Criminal Law – forms the central part of the work. In this section, via a dual structure, the distinction is made between punishments and deterrents, as the prime types of punitive practice, with a distinct historical tradition, diverse bases and functions, around which different sorts of theories and schools have developed. The book ends with a series of critical conclusions as to what, in the opinion of the authors, should be a correct conception of punishment.

Islam, Secularism, and Liberal Democracy Nader

Hashemi.2009-04-08 Islam's relationship to liberal-democratic politics has emerged as one of the most pressing and contentious issues in international affairs. In *Islam, Secularism, and Liberal Democracy*, Nader Hashemi challenges the widely held belief among social scientists that religious politics and liberal-democratic development are structurally incompatible. This book argues for a rethinking of democratic theory so that it incorporates the variable of religion in the development of liberal democracy. In the process, it proves that an indigenous theory of Muslim secularism is not only possible, but is a necessary requirement for the advancement of liberal democracy in Muslim societies.

Body/Politics Thomas Shevory.2000-02-28 Negotiating the terrain between techno-optimism and eco-pessimism, this work establishes the political connections between technologies of the body, property, and the environment. Specific technologies of the body, such as surrogacy and in vitro fertilization, are examined in relation to their political and legal constructions. Next, Shevory

analyzes private property as an evolving historical concept that implicates environmental and biological transformations with particular attention given to biotechnology cases. He then considers the body's appearance and its alterations through plastic surgery, dieting, or piercing as political constructions. A theoretical overview specifies technoprogressivist (liberal) and technophobic traditions, especially as they have evolved in the United States during the second half of the 20th-century. Drawing upon critical and feminist theories, Shevory specifies a body politics that negotiates the terrain between these two traditions. Body technologies and markets, he argues, interact to consolidate and reinforce dominant systems of power, while at the same time resisting and sometimes subverting them. Technology is often a factor in the fragmentation of evolving political ideological discourses on the left and right; however, the resulting instabilities create the potential for both the expansion of global capital and its subversion via democratic interventions.

Pentecostal Republic Ebenezer Obadare.2018-10-15

Throughout its history, Nigeria has been plagued by religious divisions. Tensions have only intensified since the restoration of democracy in 1999, with the divide between Christian south and Muslim north playing a central role in the country's electoral politics, as well as manifesting itself in the religious warfare waged by Boko Haram. Through the lens of Christian-Muslim struggles for supremacy, Ebenezer Obadare charts the turbulent

course of democracy in the Nigerian Fourth Republic, exploring the key role religion has played in ordering society. He argues the rise of Pentecostalism is a force focused on appropriating state power, transforming the dynamics of the country and acting to demobilize civil society, further providing a trigger for Muslim revivalism. Covering events of recent decades to the election of Buhari, Pentecostal Republic shows that religio-political contestations have become integral to Nigeria's democratic process, and are fundamental to understanding its future.

From Jerusalem to Timbuktu Brian C. Stiller.2018-03-20 Christianity started in Jerusalem. For many centuries it was concentrated in the West, in Europe and North America. But in the past century the church expanded rapidly across Africa, Latin America, and Asia. Thus Christianity's geographic center of density is now in the West African country of Mali—in Timbuktu. What led to the church's vibrant growth throughout the Global South? Brian Stiller identifies five key factors that have shaped the church, from a renewed openness to the move of the Holy Spirit to the empowerment of indigenous leadership. While in some areas Christianity is embattled and threatened, in many places it is flourishing as never before. Discover the surprising story of the global advance of the gospel. And be encouraged that Jesus' witness continues to the ends of the earth.

Theocracy Or Democracy? Arnold Petersen.2002-02-01 *Theocracy or Democracy?* shows that the threat of theocracy is real. It is all the more sinister because it is insidious, because it is cloaked in virtue, because American workers are not forewarned. The subject of theocracy urgently needed Marxist analysis. The De Leonist scholar, Arnold Petersen, in analyzing it, has written a powerful and convincing document. In the present volume the analysis has been carried further by the addition of *In Defense of Slavery*, exposing those who, in the name of their God, have defended slavery, both chattel and wage slavery. *By Superstition: Father of Slavery*, which treats of the subjugation of man to his

man-made gods, with its counterpart in social and economic subjugation to a ruling class, contrasted with mankind's emancipation that can come only through Socialist society freed from class-sundering creeds. And, finally, this volume contains a goodly number of quotations on priestcraft and creeds, Church and State, and theocratic pretensions voiced by Thomas Jefferson. Arnold Petersen was National Secretary of the Socialist Labor Party of America.

José Ingenieros Maximiliano E. Korstanje.2024-03-19 Maximiliano Korstanje presents an overview and analysis of the work of the Argentinian sociologist and physician, José Ingenieros (1877-1925). In fact, José Ingenieros was a seminal scholar who contributed directly to the formation of sociology in Latin America. Born in Palermo, Italy Ingenieros grew up in Buenos Aires, Argentina. He trained in medicine, psychiatry, sociology and philosophy; he devoted much of his life to addressing societal challenges such as mass migration, imperialism, marginality, criminality and social identity. Korstanje takes in turn the key areas of Ingenieros's work and examines how his thinking can be brought to bear on the social challenges of today. In particular his work on mass migration and the "Other" have echoes in the problems facing many countries in the early twenty-first century. It is a valuable resource for scholars and students looking to better understand this key figure in Argentinian - and Latin American - sociology in the early twentieth century.

Religion, Democracy and Democratization John Anderson.2013-09-13 A new exploration of the troubled relationship between religion and democracy, focusing in on two

key questions: * how has religion engaged with the democratization processes that have taken place over the last thirty years? * how can it contribute towards democracy in the future? These questions are tackled with clarity and rigour. Select chapters explore the ways in which religious ideas have been used to undermine authoritarian regimes and how religious institutions have provided the basis for resistance to such regimes. Religion on the Edge Courtney Bender,Wendy Cadge,Peggy Levitt,David Smilde.2013 The thirteen essays in this volume offer a challenge to conventional scholarly approaches to the sociology of religion. They urge readers to look beyond congregational settings, beyond the United States, and to religions other than Christianity, and encourage critical engagement with religion's complex social consequences. By expanding conceptual categories, the essays reveal how aspects of the religious have always been part of allegedly non-religious spaces and show how, by attending to these intellectual blindspots, we can understand aspects of identity, modernity, and institutional life that have long been obscured. *Religion on the Edge* addresses a number of critical questions: What is revealed about the self, pluralism, or modernity when we look outside the U.S. or outside Christian settings? What do we learn about how and where the religious is actually at work and what its role is when we unpack the assumptions about it embedded in the categories we use? *Religion on the Edge* offers groundbreaking new methodologies

and models, bringing to light conceptual lacunae, re-centering what is unsettled by their use, and inviting a significant reordering of long-accepted political and economic hierarchies. The book shows how social scientists across the disciplines can engage with the sociology of religion. By challenging many of its long-standing empirical and analytic tendencies, the contributors to this volume show how their work informs and is informed by debates in other fields and the analytical purchase gained by bringing these many conversations together. *Religion on the Edge* will be a crucial resource for any scholar seeking to understand our post-modern, post-secular world.

Jewish State, Pariah Nation Jerold S. Auerbach.2014-04-06

Jewish statehood was restored in 1948 amid a struggle over legitimacy that has persisted in Israel ever since: Who rules? Who decides? Antagonism between the political left and right erupted into bloody violence over the Altalena. Secular-religious discord even made defining who is a Jew in a Jewish state contentious. After the Six-Day War, the return of religious Zionist settlers to biblical Judea and Samaria reframed the struggle over legitimacy. Who decides where in the Land of Israel Jews may live: settlers and rabbis or the government? Israel's invasion of Lebanon in 1982 provoked the first significant eruption of military disobedience, undermining the authority of the Israel Defense Forces with competing claims of personal conscience. Ever since the United Nations declared Zionism to be "a form of racism," Israel has confronted an escalating international assault on its legitimacy. In political, academic, media, and cultural circles it has been demonized as an "apartheid," even "Nazi," state that much of the world despises. These conflicts are explored in this illuminating study of the dilemmas of legitimacy in the world's only Jewish state and most reviled pariah nation. A new addition to the Contemporary Society Series from Quid Pro Books.

Brains, Media and Politics Rodolfo Leyva.2019-11-25 Following the 2007–2008 global financial crisis, a number of prominent academics, journalists, and activists were quick to pronounce the demise of neoliberal capitalism and governance. This rather optimistic prediction, however, underestimated the extent to which neoliberalism has shaped the 21st-century world order and become entrenched in our sociopolitical and cognitive fabric. Indeed, 11 years after the crisis, and in spite of the significant levels of socioeconomic inequality, psychological distress, and environmental destruction generated by neoliberal policies and corresponding business and cultural practices, the ideological hegemony of neoliberalism has not been supplanted, nor has it really faced any serious unsettling. How, then, has neoliberalism inflected and shaped our “common-sense” understandings of what is politically, economically, and culturally viable? To help answer this question, this book combines leading theories from sociology, media-communication research, developmental psychology, and cognitive science, and draws on primary evidence from a unique mix of ethnographic, survey, and experimental studies – of young people’s leisure practices and educational experiences, of young adults’ political socialisation processes in relation to exposure to social networking sites, and of the effects of commercial media viewing on material values and support for social welfare. In doing so, it provides a nuanced and robustly empirically tested account of how the conscious and non-conscious cognitive dimensions of people’s subjectivities and everyday social practices become interpellated through and reproductive of neoliberal ideology. As such, this book will appeal to scholars across the social and behavioural sciences with interests in neoliberalism, political engagement, enculturation, social reproduction, and media effects.
